#### THE MANITOBA MACHINE

The Rogers' "machine" is at work again. With a provincial election pending in Manitoba, it has been discovered that expert election tricksters, trained by long years of experience, have brought about the issuance of some 1,500 pogue naturalization certificates in Winnipeg, with a view to plugging the electoral lists of the city. With the bogus names once on the lists and with personaters and repeaters brought from the Flemming should tender the resigna-United States, it will be an easy mat- tion of himself and colleagues does ter for the "machine" to run in hundreds, perhaps thousands, of votes which are absolutely illegal.

The work of getting out the bogus among a number of the experts of the "machine." One set of workers prepared a list of bogus names for fictitious negroes. Another group work ed out a list of bogus Ruthenians, another a list of Germans. Other workers prepared lists for other nationalities. Places of alleged resi dence for the imaginary electors were also supplied. In one case, seventeen non-existent voters were put down as living in a non-existent Nothing which it was thought would help make the success of the plot complete was left undone by the corps of political crooks. The Roblin government must, be saved, no matter what the means, so the tricksters did their work.

The Manitoba "machine" has become the most notorious in Canada, It grew up during those years when Hon. Robert Rogers was a member of the Roblin government. It has been kept well-oiled and in first-class work ing order since Mr. Rogers entered the Borden cabinet. It was used when he sought to capture control of Saskatchewan affairs in the provincial election of 1912. Ie was used in the disgraceful campaign in the federal byelection in Macdonald, Manitoba, where its operations were carried to such lengths that the Conservative who had been elected by its aid was compelled to resign his sent in parliament. It was used, though the "machine" and the methods of the "machine" were used in the fed- St. John. eral byelection in Chateauguay, which was one of the most corrupt in Canadian history

The "machine" is once more being ased in Manitoba. The bogus naturalization scheme is simply one of many pieces of trickery which will be attempted. Hon. Mr. Rogers cannot afford to have the control of Manitoba affairs pass from the hands of his friends, so the "machine" is spar ing no effort to hold the province in they knew all about it months ago. the grip of Rogers-Roblin rule.

The suggestion made by His Lordship Bishop Richardson to the City Council that the city should take steps to provide bathing ouses along the water front, is a good one and should have careful consideration It is important that the boys and girls to for that matter should be taught to swim, and a few bathing houses at convenient places along the river bank, would undoubtedly be a great convenience. There is no reason why any boy brought up in this city should not have a chance to learn how to swim. The City Council can well afford to expend a little money along the lines suggested by the Bishop.
