Melotte

These are the standard Cream Separators; other manufacturers

compare their machines with these.

The Melotte and De Laval have stood the Test of Time.

The De Laval is practically the original cream separator and has a world wide reputation because the highest standard of material and workmanship has been maintained through the years and new features have been added where necessary.

We have sold the Melotte for about seventeen years and have

yet to hear of one actually playing out.

The life oj other makes is only from five to ten years under ordinary circumstances.

Buy a Melotte or De Laval and you get value for your money.

Hartford will do nicely if the men who have named there keep the horses good when second payment comes due early next month, for with any sort of a racing card the attendance at Charter Oak will be large.

KEEPING UP RACING IN EAST.

That Hartford did not receive the undivided support of every Grand Cir uit regular is due to poor treatment given by some of the past manage ments. The grievance of Will Snov dates back several years and in the days when Syracuse and Hartford clashed he always passed up the Connecticut meeting. The unfriendly feeling of some of the other trainers is the result of the declaring off of a part of the program two or three years ago when it should have been raced off.
