## CITY ELECTION

The Election for Mayor and Alderman for the City of Fredericton, for the ensuing year, will be held on Monday, the Ninth Day of March next, at the following places, viz.:

## DIVISION NO. 1.

For all voters, residing or owning property above the centre line of Carleton Street, prolonged, at or near the City Hall in the said City.

## DIVISION NO. 2.

For all Voters, residing or owning property in the remainder of the said City, not included in Division Division No. 1, at or near the County Court House in the said City.

Polls will be opened at the above named places at nine o'clock a.m. of the said day of Election, and will close at the hour of four o'clock p.m. of the same day.

Nominations for Mayor and Aldermen must be filed in the office of the City Clerk, City Hall, at or before four o'clock on Monday, the 2nd day of March, next, and must be signed by at least two qualified Electors, and the signatures attested to under oath.

Forms for Nomination can be procured at the City Clerk's Office.

A Certificate of the City Treasurer showing that all rates and taxes of the candidate have been paid within the time required by law, must be attached to each Nomination Paper.

Dated at the Office of the City Clerk, Fredericton, this 16th day of February, A. D. 1914.

J. W. McCREADY,  
City Clerk.

March 8th.

## WITHIN AN ANT HILL

Tiny Insects Have Their Homes Carefully Planned

When you step on an ant hill you crush ruthlessly a complicated architectural structure far more wonderful in its way, than a modern skyscraper. Entering the hill at the hole in the top an invader instantly encounters a soldier ant, always on guard. The first floor is the guardroom. Floor 2, counting downwards, is the summer sleeping room for the workers. In the third floor the workers live and dine. No. 4 is storage room, while the fifth floor provides the barracks for the ants' standing army.

They form the guard for the queen who lives and lays her eggs on the floor below. Next—floor 7—come the storage rooms of fodder and grain for the milk-cows—the aphids, who suck up "milk" from blades of grass with their feet, so that the ant milkmaid can afterwards "milk" them by stroking their legs until a drop of "milk" falls. Other little insects collect honey, and are "milked" in the same way.

The stables, where they are kept are shown on floor 8. Then, below the earth we come to the ninth floor, the nurseries, where the milk and honey which the milkmaids have secured is handed over to the baby ants just hatched as larvae, from eggs. Below—floors 10 and 11—are other nurseries, where the baby ants are reared for in various stages of their growth.

Next we find the winter quarters of the ant kingdom, and on the same floor is the graveyard; for the ant city in a hill is complete even to a cemetery. Last of all is the queen's winter apartment.

## SAFETY IN THE STREETS

Don't cross an intersection at an angle; cross squarely. It takes a few seconds longer, but it is safer.

Don't stop in the centre of the pavement.

Don't hesitate when crossing a street. Keep going.

Don't attempt to read a newspaper when crossing a street.

Don't step abruptly off the curb, look for passing cars.

Don't step from a moving car. Wait until it stops and the motorist will stop.

Don't dodge to and fro if in danger. Stand still and the man in the auto will know which side to take.

Don't allow your children to run wild on the street. A little restraint exercised with children will avoid accidents.

## BIGGEST PAIR OF TUSKS

Burmese Elephant Carries Huge Ivory Adornments

In the stables of the Royal Palace at Mandalay, in Burma, there may be seen an elephant with a remarkable pair of tusks, which the Burmese declare are the largest in the world. These gigantic tusks measure as much as seven feet nine inches on the outside curve, with a greatest circumference of no less than seventeen inches. To naturalists the most extraordinary point about these tusks, which are still being carried by their owner, is that they virtually touch the ground and almost meet. Apparently, however, their owner experiences no inconvenience from these long and cumbersome appendages while taking exercise. As a zoological curiosity the elephant has naturally attracted wide attention, and it is said that several offers have already been received for the tusks when the animal would set to depart from this world.

## CARVING CAMEOS

This Delicate Process Was Not Known to the Ancient Greeks and Romans

The carving of shell cameos is a comparatively modern art. The Greeks and Romans, although they made cameos out of layered agate knew nothing about shell carving, possibly because the Mediterranean did not supply suitable shells. When shell carving first came into vogue, many different kinds of shell were tried, but all were found faulty because of the color or lack of permanence except one variety of the hermit shell. Of this variety, only one out of many shells is fit to use because the making of a cameo demands a strong, evenly colored under layer, a soft outer layer and sufficient usable surface.

The process of carving the shell requires great skill and delicacy. The shell is to be carved as a whole the artist takes advantage of the fact that the coloring of the lower layer is richest next the mouth of the shell and the ridges on the last whorl are thick enough to permit deep carving. For commercial purposes the shell is usually cut into pieces with a tin wheel, running water and emery powder.

The piece that is to be carved has to be shaped with a small grindstone and the surface has to be smoothed and cleared of imperfections. A piece of paper cemented to the back keeps the shell from cracking and is used for fastening a working handle to the cameo.

After the design has been drawn on the outer surface with a pencil it is cut in the soft white outer layer with steel engraver's (much like a wood engraver's) tools. The naturally colored inner layer, which becomes the background, requires polishing and developing with pumice and acid, rubbed in with a boxwood stick.

The whole process must be carried out with great care, because the shell is very fragile and can easily be broken or corroded by the acid used in polishing.

## SCREAMED WITH THE TERRIBLE PAIN

"Fruit-a-lives" Completely Cured Distressing Kidney Trouble.

ST. THOMAS, ONT., April 1st, 1913. "In 1911, I was laid up with Kidney Trouble and not able to get out of my chair. Had tried many kidney remedies without satisfactory results. The pain was excruciating and my screams could be heard on the street. One day a friend from Ottawa came to see me, and when he found me in such poor health, said he would send me a sample of 'Fruit-a-lives', which he did and I commenced taking them. The results were so apparent with the first few doses that I continued to take 'Fruit-a-lives' and was completely restored to my normal state of health. I would strongly advise anyone suffering with Kidney Trouble to take 'Fruit-a-lives' and cure themselves." CHARLES CALVEART. 50c a box, 6 for \$2.50, trial size, 25c. At all dealers or from Fruit-a-lives Limited, Ottawa.

## THEY FARED WELL

Among the patriots who stumped York during the recent campaign on behalf of the Local Government party candidate were Indian Agent Smith and Dr. B. J. Millin, Indian Medicine Man. The names of both of these gentlemen figure in the Dominion Auditor General's reports, for last year, Mr. Smith who is put down as belonging to Centreville, was paid a salary of \$502.02. He also received the following extras, travel and outlay board, lodging, 25.05; office rent 4 1/2 months \$17.40; small items \$9.05; making a grand total of \$562.10. Dr. Millen valued his medical services to the Indians at \$358.53 and was paid that amount.

## WORDS THAT SPEAK

Bang—"a sudden noise like that from a gun" is the definition given by the dictionary. But the explanation is befogging and futile, for a "bang" is—well, what better describes it than that simple word itself?

So many of our most expressive words seem similarly to have sprung from a desire to form with the lips a sound mimicking the thing described. We waste words in a definition of the word "splash," for example! You hear all the abrupt, restless heaving of the waters in that one word.

And does even a baby need to be told what "buzz" means when a blue bottle is leading a forlorn hop against the pantry window?

"Tinkle," "whistle," "waine," "ziggle," "cackle," "fey"—these are only a few of our other eloquently descriptive words.

It is also extremely interesting to note the sharp distinction drawn between the words of opposite meaning, so as to emphasize their difference in sound—thus, "brisk, lazy" (or "sluggish"); "hot, icy"; "down, up"; "jolly, miserable," and so on.

THOMAS M. SCHUMACHER who was elected chairman of the board of directors of the big Rock Island system after 34 years of railroad experience. He began as a telegraph operator.

## ONE DOSE RELIEVES A COLD—NO QUININE

Take "Pape's Cold Compound" every two hours until you have taken three doses, then all gripe, misery and your cold will be broken. It promptly opens your clogged-up nostrils and the air passages of the head; stops runny discharge or nose running; relieves the headache, dullness, feverishness, sore throat, sneezing, soreness and stiffness. Don't stay stuffed-up! Quit blowing and snoring. Ease your throbbing head—nothing else in the world gives such prompt relief as "Pape's Cold Compound," which costs only 25 cents at any drug store.

"In the Case of MY Little Girl—"

In choosing and using a soap for your "Little Fairy" you will find no soap so mild, so neutral, so agreeable to tender skins as FAIRY SOAP.

Being made from products that you could eat, FAIRY SOAP agrees with even the tender skin of a babe.

**FAIRY SOAP**

is white—pure—floating. It comes in a handy oval cake. We could charge you five times the price asked for FAIRY SOAP and we could add nothing to its quality.

In higher-priced soaps you are paying for high-priced perfume and fancy wrappers—not better soap.

Made by THE N. K. FAIRBANK COMPANY Montreal

"Have you a little 'Fairy' in your home?"
