FLORIDA MOTOR

BOAT CARNIVAL

Miami, Fla., Jan. 5.—The opening of water carnival week today found the pick of the world's speedy motor boats assembled here to take place over a three-mile course just off of Alton Beach, in Biscayne Bay. Six thousand dollars in cash prizes

and trophies will be distributed among the winners of the various contests.

Much interest is manifested in the municipal elections to be held in Ontario Monday, when more than fifty cities will vote on the question of prohibiting the liquor traffic.

The first of the week will see the opening of the sessions of the legislature in a number of the states, including New York, Kentucky, Rhode Island and Mississippi.

HER LITTLE SON WAS DYING

Gave Him "Fruit-a-Lives" And Saved His Life.

CAMPBELLVILLE, ONT., May 5th, 1913. "Our little boy, Lawrence, was sorely affected with Chronic Indigestion, and the doctor did not think he would recover. He started with a sore mouth and it developed into this other trouble. Everything he ate just passed right through the system without change. He cried incessantly and life was a misery to him. My husband had been using 'Fruit-a-Lives' for indigestion, getting much benefit from them, and I thought what did him good, might help our boy. We tried 'Fruit-a-Lives' giving Lawrence 1/2 a tablet at a dose, and the result was marvellous. Today, he is the picture of health, and he is perfectly well."

Mrs. J. VANFLANDT.

CANADIAN EXPORTS

Goods From Canada Are Sold In South America

Chile imports a considerable quantity of farm implements from Canada. Canadian windmills, one or two industrial machines, a few tools, are also found there, and an occasional shipment of lumber and paper is also imported. To Bolivia, nothing beyond some chairs, brooms and wooden goods seem to be exported.

Peru takes an occasional shipment of lumber. In Ecuador, Canadian flour is finding a market, and bids fair to rival the United States product. If indeed it does not eventually drive it out, or at least force that portion of the trade which buys quality and not the cheap low-grade article which is obtained in California and the Pacific coast of the United States. In Guayaquil, some Canadian tools are also seen. Panama is now purchasing Canadian flour, and also small quantities of silver-plated ware and a patent automobile tire cement.

Constipation is the root of many forms of sickness and of an endless amount of human misery.

Dr. Morse's Indian Root Pills,

thoroughly tested by over fifty years of use, have been proved a safe and certain cure for constipation and all kindred troubles. Try them.

The Country of Vineyards

France is the greatest wine-producing country in the world, but its vineyards are slowly declining. None the less, no fewer than a million and a half Frenchmen still are proprietors of vineyards, and between them they own well over 4,000,000 acres.

HEAVY EXPORTS OF BEEF TO THE UNITED STATES

Ottawa, Jan. 8.—The tremendous movement of live cattle and dressed meats from Canada to the United States, which has followed the adoption of the Underwood tariff bill on the other side, is shown by figures just received by the Department of Live Stock Commissioner. The figures are for the months of October and November, when the rush was at its height. During October alone no less than thirty-five thousand live cattle and six million pounds of dressed meat left Canada for the United States. During November the quantity was little decreased, Canada during both months providing by far the largest proportion of the American imports of these commodities.

NOW ALMOST STOPPED.

During December, however, Dr. Torrance states, the movement has not been nearly so brisk and it has now almost ceased.

"The withdrawal of this vast amount of live and dressed meat from Canada," Dr. Torrance explained, "has resulted in Canadian prices going up. The result is that the live stock can now procure a price almost as good at home as he can in the United States market. An eastern shipper just the other day, in calculating what to do, decided that he could make as good a profit by selling in Toronto as he could in Buffalo after freight charges were considered."

"The dearth of Canadian cattle due to the movement south has resulted in prices here which justify and will for a time at least continue to justify shippers patronizing the home market."

It would appear, therefore, that the farmer now has the advantage of choosing between two markets which work together to retain stability of prices.

U.S. IMPORT FIGURES.

United States figures of imports just supplied by the Bureau of Animal Industry to the department here show that during the months of October and November 209,327 head of cattle were imported, as against 72,420 head for the corresponding months last year. These all came from Canada and Mexico, with the exception of 447 head of pure bred stock for breeding purposes from Great Britain.

The imports were classified as follows:

For October, for immediate slaughter, 73,166, for stockers and feeders 54,565, for breeding purposes 739.

November, for immediate slaughter 39,086, for stockers and feeders 41,548, for dairy and breeding purposes 223.

SUCCESSFUL CONCERT AT PLASTER ROCK

Plaster Rock, Jan. 1.—The annual Christmas concert of the Presbyterian Sunday School of Plaster Rock took place in the Oddfellows Hall on Dec. 20th beginning at 8 p.m.

The Rev. D. Morrison acted as chairman. There was a large attendance, the hall being crowded. The occasion was very enjoyable. The music was furnished by Ogilvey's Orchestra. The Misses Lucy Cawthra and Marion Hawkes, pianists. The programme was as follows:

Overture—By Orchestra.

Chorus—Hossana—By Choir.

Song—Hushabye—By eight little girls.

Trio—Mildred Green, Alice Cronkite and Ted Hawkes.

Recitation—Millard Tramley.

Merry Christmas—By fourteen boys.

Solo—Muriel Green.

Instrumental Selection—By Orchestra.

Fan Drill—By ten little girls.

Chorus—Keep the Sweet Bells Ringing—By Choir.

Dialogue—Taking the Census.

Recitation—Vera Shields.

Scenic Reading—Jesus Saviour Pilot Me.

Instrumental Selection—By Orchestra.

Trio—Miss Cawthra, Miss MacQuarrie and Mrs. Robt. MacFarlane.

Star Drill—By ten larger girls.

Dialogue—Simple Simon.

Duet—Sadie Toland and Alice Cronkite.

Chorus—Silver Bells by Choir.

Chorus—Beautiful Night—By Choir.

After the program was successfully carried through, Santa Claus arrived and distributed the presents.

Much credit for the success of the concert is due Misses Marion Hawkes and Lucy Cawthra and Mrs. Robt. MacFarlane for the training of the children.

The bulk of the slaughter cattle came from Canada, while Mexico furnished four-fifths of the stockers and feeders.

Canada also provided the bulk of the imports of dressed meats. During October 6,000,735 pounds were imported and during November 11,792,576 pounds, or a total for the two months of 17,793,311 pounds, the greater part being fresh and refrigerated beef. Of the total Canada furnished 8,093,197 pounds, Argentina 6,209,700 pounds, Australia 2,725,142 pounds and Uruguay 559,843 pounds.

BEST CATTLE FROM WEST.

Of the cattle provided by Canada, the best quality, it is admitted, came from the west, fat two-year-old steers being numbered among them. From the east few fat cattle for immediate slaughter have gone across, the majority being stockers and feeders. The scarcity of feed in the east is said to be the chief reason for this.

BEEF WILL STILL BE HIGH.

"The price of beef," said Dr. Torrance, "is bound to remain high. The United States expected to get a deal of beef from the Argentine after the duty was removed, but she has to compete with Great Britain for the Argentine meat and the rush has not been so great as she expected. Canada cannot raise enough for home consumption and will stop exporting as soon as prices rise. Australia is too far away. There is no considerable source of supply and prices are sure to remain at a high level."

SERIOUSNESS OF EXPORT OF COWS.

Dr. Torrance is fully aware of the seriousness of the export from Canada of female cattle and expects a great shortage in stock for breeding purposes next season.

"A serious feature," he declares, "is the fact that the farmers appear to be anxious to sell off their cows. There is a decided glut of veal on the market every spring. It seems to me that this is a decided loss to the country. I should suggest that something might be done to send buyers to Montreal and Toronto next spring to save these calves from the butcher and save them for the western farmers, who would be very glad to buy them. The British Columbia government did something in this line to procure dairy cattle and successfully competed with the American buyers. It is impossible to prevent the farmers from selling their female cattle, but certainly something should be done to replenish the herds."

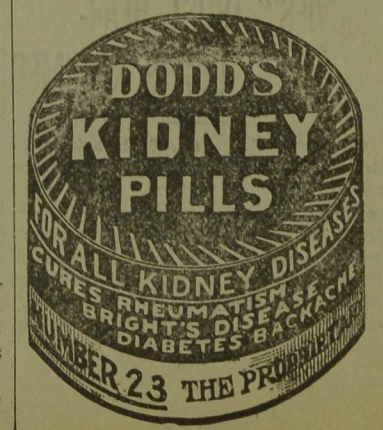

VALUE OF MAN'S SIZE

Modern Achievements Would be Impossible to Tiny Men

If men were much larger or much smaller than he is he could not have accomplished many of the most important feats of civilization. For man, by his stature, is just the right size to make the best use of everything around him. If a man were the size of an ant, for example, he could have made none of the machines which he has conquered the world. The dimensions of such machines as he could have built would condemn them to uselessness, as the surface upon which friction must take place would be out of all proportion to the volume of the apparatus.

Such a man could not make a balloon that would float in the air. The delicacy of the materials he would have to employ would prevent this. For when a certain point of tenuousness is passed the gas diffuses quickly through the envelope. He could not build ships that would cross the ocean or float on any large body of water, because the dimensions of such vessels would have to be so inferior to the length and height of the waves as to make certain the immediate swamping of the tiny craft.

He could not even produce great heat, because the external surface of his furnaces would be so large in proportion to their volume that most of the heat would be lost. This would cut him off from all the chemistry that involves high temperatures, and therefore from metallurgy and mechanics.

CLASSIFIED

Wanted

WANTED—Boys and girls to sell novelties just honest and ambitious who wish to earn from \$5.00 to \$12.00 per week. Write O. D. Ferdinand Co., 738 Norwood Blvd. Edmonton, Alta. 531—d 3 mos.

Wanted

Man wanted for stable and general work. Married man preferred. Apply to

DONALD FRASER, Woodstock Road

Hay Wanted

Wanted to buy good horse hay in cat lots and would like a piece of standing Timber Pine and Spruce. Give particulars by letter, as for distance to mill and railroad would like to hear from farmers.

D. W. WOOD, Armory St. Wakefield, Mass.

2wks D and W. Jan. 15.

For Sale

I have for sale a Brown mare, fifteen years old, about ten hundred weight. Will sell at a bargain. For price and other particulars apply to E. C. Barry at Waverley House or the undersigned at Durham Bridge
