Fredericton, N. B., August 14, 1912.

JOURNALIST FOR SENATE

The Collingwood Bulletin (Liberal) has the following apropos of a subject which has been receiving a good deal of attention in the press of Ontario:

"The Canadian editors have become imbued with the idea that it is their duty to boom every or any one but their own calling. That there should be a change and an opportunity to make the turn now presents itself. It is in connection with the appointment of a successor in the Senate to the late Senator Wilson, of St. Thomas. In the past in matters of appointments to the Upper House, newspaper men have received but scant consideration—the fault being chiefly their own. Instead of advocating their own claims they have been helping the politicians without any return or hope whatever. The present vacancy in the second chamber is the subject of much comment, and it is gratifying that the discussion has turned to journalistic representation. Newspapers, regardless of political views, have not hesitated to take hold of the question and present arguments in favor of the elevation of a working journalist. Conservative he must be, and of the names mentioned, Editor W. S. Dingman, of the Stratford Herald, and W. B. Burgoyne, of the St. Catharines Standard, are well qualified for office. Both have been prominent in the public life of their respective cities and have thus gained an experience which will be very valuable to them."

There are no senate vacancies in New Brunswick at the present time, but should one occur in the near future no doubt there would be several journalists among the numerous aspirants. For instance there is Commodore Stewart of the Chatham World, who was recently elected to the Legislature. Being a confirmed bachelor, he might for a time be a little out of place among the "old women" of the red chamber, but a fat sessional indemnity, a trunk full of stationery and other perquisites, would soon bring him into harmony with conditions as he found them. As the North Shore is at the present time without a senator the Commodore's strong claims and qualifications will no doubt receive due consideration whenever a vacancy occurs, providing of course that Hon. Mr. Hazen has forgiven him for certain harsh statements concerning the then premier of the province which appeared in the Chatham World during the memorable Northumberland bye-election.

Hon. George J. Clarke, of St. Stephen, who would have very strong claims on the first senatorial vacancy is also a journalist, although he does not devote his whole time to the noble profession. He is a practising barrister, and merely performs journalistic work as a sort of side-line. Hon. Mr. Clarke gets credit for being the brainiest man in the Legislature, and no doubt when he looks over and sizes up the timber on the government front benches from his place in the speaker's chair, he often wishes that he had a more congenial job. It would not be surprising if he should seek to escape from provincial public life at the first opportunity, and if he should enter the race for a senatorship with Commodore Stewart as a competitor and Hon. Mr. Hazen as referee we are inclined to the opinion that the North Shore journalist would come out at the little end of the horn. On the whole the chances of a journalist landing the first vacant senatorship in this province would seem to be fairly good.

Mr. Borden should invite his Nationalist friends Bourassa and Laverge to attend the naval conference at Ottawa. He did not hesitate to avail himself of their advice and assistance when forming his cabinet a few months ago.

Premier Borden has decided to invite Sir Wilfrid Laurier to attend a naval conference to be held at Ottawa. It is just possible that Sir Wilfrid may have another engagement at the time and may not find it convenient to help Mr. Borden out of a hole.

Telegraph: Hon. William Pugsley gives The Telegraph some pleasing information which he secured lately from Mr. Smithers and Mr. Chamberlain the Chairman and the President of the Grand Trunk Pacific. The transcontinental at an early date is to begin work on its terminals here and it is planning to bring its freight from Nipadogan via Fredericton and the Valley Railway to St. John thus avoiding the round about way through Moncton. The settlement of these questions is a matter of the utmost importance to St. John. The next year or two we are constantly reminded, will see a tremendous volume of traffic passing through the acknowledged winter port of the country.

The annual threshing contest in Kansas started last week. Kansas holds a lot of contests each year to decide who can thresh the most wheat, husk the most corn, play the fiddle the best, and so on. Robert Outshaw of Hutchinson has the highest wheat-threshing record so far this season, with an average of 321 bushels an hour for six hours, but he is only one bushel ahead of Vogt of McPherson.

In a recent lecture Sir Oliver Lodge gave a striking illustration of the minuteness of the atom. The amount of gold in sea water though very small seems considerable when stated in atoms, for a single drop of sea water contains 50,000,000 atoms of gold. That figure indicates merely one fiftieth of a grain in a ton of sea water and it would take 100,000,000 atoms to be visible under a microscope of the highest power.

The government dredges operating in the river here are doing good work but many people are at a loss to know why it should be necessary for them to toot their whistles at five o'clock in the morning.

The long spell of wet weather has been disastrous to the agricultural industry in Central New Brunswick and a change will be warmly welcomed by the farmers.

CHANGING ENGLISH NAMES OF OFFICES

Ottawa, Aug. 13.—The love of the postmaster general, Hon. L. P. Pelletier, for the euphony of his mother language is demonstrated by a reference to a list of post offices throughout the dominion whose names have recently been changed.

In the county of Rimouski was once an office which was known by the plain appellation of Cedar Hall. In future it must be known by the more euphonious name of "Valbrillant."

Those who in future look for Park Laval in the county of the latter name will fail to find it, for the place which bore that name will in future be called "Laval des Rapides." The homely name of Rorny, applied to an office in the county of Prince, has been changed to "Caessie," while in the county of Joliette there is no longer a Radstock. It is now "Petit Moulin."

Some months ago a tendency on the part of the postmaster-general to apply French names to offices in the province of Ontario as a substitute for their former names aroused a strong protest. It will be noticed that on this occasion the minister has confined his attention to the provinces further east.

CAVERHILL

Caverhill, Aug. 12.—The haying season is quite well advanced for this part of the country and every one is working by the old proverb of making hay while the sun shines. Mr. Chas. Tucker has his new barn nearly finished which will take the place of the one destroyed by lightning this summer.

Mr. Jos. Anderson has built a large extension to his barn which makes a decided improvement.

Mr. Wm. Caverhill of Fredericton is spending the summer with his brother, Mr. John Caverhill at this place. Miss Leona Staples will have charge of our school next term.

Mr. Geo. Oliver has returned to his work at Minto, where he has charge of a crew cutting right-of-way for Hill & Hammond.

Moose and bear are reported to be numerous. A very large bear and a cub were seen in a patch of raspberries at the cross-road one day last week.

The stork has visited the home of Mr. Jas. Clark and left a lovely baby boy.

Councillor Wm. F. Morris has rented a store at Meductic where he will reside in the future.

Rev. Brinley Abbot held service in the Episcopal Church on Sunday last.

He had never received a typewritten communication.

THE STOCK MARKET IS SHOWING SOME ACTIVITY

New York, Aug. 14.—There was large volume of activity at opening and stocks showed gains over Tuesday's close. Advances were confined to a comparatively small fraction and there was no evidence of desire to squeeze shorts. Buyers bought stocks because they wanted them and not to advance prices. Trading broadened to a satisfactory extent in the second hour. Strength in equipment stocks was based on great activity in trade and fact that companies are now obtaining much better prices than a few months ago.

Chicago, Aug. 14.—Wheat opens firm demand fair. Unfavorable crop news from Germany. Corn, firm, good scattered demand. Sept hard to buy. Oats, trade light, no special features.

THE LIGHT-HOUSE KEEPER'S STORY.

FROM the lighthouse at Lobster Cove Head, Bonne Bay, Newfoundland, Mrs. W. Young sends her experience of Zam-Buk.

She says: "I suffered with eczema for seven years and to my great delight Zam-Buk has cured me. The disease started on my breast, and spread until it extended over my back. The itching and burning—especially when the affected parts were warm—was terrible; and yet when the eruption was scratched or rubbed, it turned to bad sores and caused great pain. I went to a doctor and tried various prescriptions, but seemed to get no benefit, so I tried another doctor. Again I got no relief, so I tried a third doctor, and then a fourth. Seven years is a long time to suffer, and I had got used to the thought that I never would be cured, when I saw a report in the Family Herald, telling how beneficial Zam-Buk was in cases of skin disease. I bought some Zam-Buk, and from the use of the very first box I saw it was going to do me good. I persevered with it, and the improvement it worked in my condition was really wonderful. "It eased the irritation, stopped the pain, and the sores began to dry up and disappear. In short, I found Zam-Buk all that was claimed for it and within a very short time it worked a complete cure in my case. "Since that time I have recommended it for several other cases, and in each it has proved its wonderful merit."

What Zam-Buk Cures

Zam-Buk cures Eczema, Ulcers, Blood Poison, Piles, Cold Sores, Chapped Hands, Scalp Sores, Bad Legs, Festering, Children's Eruptions, Cuts, Bruises, Scalds and Burns. All druggists and stores sell at 50c box or post free for price from Zam-Buk Co., Toronto. Refuse worthless substitutes.

500 AT Y. W. C. A. MEETING

Williams Bay, Wis., Aug. 13.—Five hundred young women, from the states of the middle west and the central provinces of Canada, have arrived here during the past twenty-four hours, each with her full quota of trunks and traveling bags, to be present at the opening of the cen-

tral city conference for young women which is to hold forth during the next ten days at the Young Women's Christian Association camp on Lake Geneva, under the auspices of the national board of the Y. W. C. A.

He had never imagined such a thing as a typesetting machine or a typewriter.
