F. W. DeMILLE, MANAGER FREDERICTON BRANCH

If the lines of the hand really indicated how long a person will live, insurance people would have adopted a cook before I married her."—Chicago Record-Herald.

Let's remember the kind acts of others—but forget our own.

A full range of Spring Millinery is now being exhibited in our showrooms. All the demanded Models and Materials are embraced in our display, which, as usual, is characterized by tastefulness and Good Style.

COLD CHEERLESS HOMES

Igloos of Eskimos Crowded and Unsanitary

The igloos used by the Eskimos on the bleak north are small in size, necessarily overcrowded, and even crevice is carefully sealed during the long winter months in order to maintain a comfortable temperature within. The different forms of dwellings on the Arctic coast are the sod igloos which are the standard and are constructed of two different plans.

The first type of igloo, with windows and doors in the walls, is a frame structure of logs or lumber. The walls and roof are covered thickly with sod, and one or two windows are set into the walls. The home contains two separate compartments which are connected by a small door, the living-room proper and the entry or shed. The shed is somewhat smaller in size than the living quarters and is used as a storeroom for provisions, clothing, sleds, and other articles too numerous to mention. The entrance into the igloo is also constructed of timber, and covered with sod, but the plan of construction differs somewhat from the one just described. This igloo also has two compartments, a living-room and a storeroom, connected by a low passageway. The entrance into the home is through an open hatch in the roof of the entry by means of a ladder. Then by passing through the tunnel, one enters the living-room.

The living-room of some of the igloos are curtained off to separate the sleeping quarters from other parts of the household, but the majority have no such arrangements, all the household duties being conducted in the single room. The furniture equipment usually consists of a small stove, a few dishes, and improvised beds. The board floor, which is usually fairly clean, serves the purpose of chairs and tables. A few of the families own sewing machines and occasionally a phonograph.

THE BEGUM OF BHOPAL

The Begum of Bhopal is the only woman ruler in India. She rules over a territory 6,874 square miles in extent, with a population of 900,000.

Javanese Marriages

A marriage among the Javanese is quite a lengthy ordeal. Such a thing as courtship is practically unknown. The parents choose partners for their children, although the latter are consulted and their consent obtained. The parents discuss among themselves the terms of the marriage, and then the girl's parents give a betrothal pledge to those of the bridegroom, who soon after offer the purchase price for the bride in silver, jewels, stoves, food, and so on. Each of the girl's parents also receives some special personal gift. On the day when the presents are delivered all the relatives and friends on both sides are invited to a series of festivities and banquets which last several days, being furnished first by one side and then by the other. The eve of the actual wedding, which usually takes place a week later, is spent by the future husband and wife in a vigil, without which it is thought that great ill fortune would follow. Next day the happy couple, with their parents and friends, appear before the priest, who duly unites them.

A healthy person must eat healthy food. Do you know how to distinguish healthy from unhealthy food? For instance, a good egg will sink in water. Boiled eggs which adhere to the shell are fresh. The shell of a fresh egg has a lime-like surface.

Locomotor ataxia is a chronic, progressive disease of the nervous system. It affects the spinal cord particularly. On this account it interferes with muscular co-ordination. It causes the gait of the patient to be irregular and uncertain.

The British coast is so well protected with lighthouses that if a ship sailed right round England, Scotland, and Ireland by night, only on six occasions would it be where it could not see the flash of a lighthouse lantern.

Plurisy Pains Vanish!

Chest Colds Cured!

NERVILINE HAS NEVER

FAILED TO CURE

Don't suffer!

Nerviline is your relief. Nerviline just rubbed on, lots of will ease that drawn tight feeling over your ribs, will destroy the pain will have you smiling and happy in no time.

"I caught cold last week while motoring," writes P. T. Mallory, from London. "My chest was full of congestion, my throat was mighty sore, and I had the fiercest stitch in my side you could imagine. As a boy I was accustomed to have my mother use Nerviline for all our minor ailments, and remembering what confidence she had in Nerviline, I sent out for a bottle at once. Between noon and eight o'clock I had a whole lot of rubbing on, and then got into a perspiration under the blankets. This drove the Nerviline in good and deep, and I woke up next morning fresh as a dollar and absolutely cured. Nerviline is now always part of my travelling kit, and I will never be without it."

The large 50c. family size bottle is the most economical, or you can easily get the 25c. trial size from any dealer.

And many a chap talks like a wise man and acts like a fool.

E. H. ALLEN,
Sat., Tues., Wed. Auctioneer.

CONTROL IMPORTANT PASSES

London, April 9.—The Russian success in the Carpathian Mountains, where the Mustovites are now said to control virtually all the important passes and are preparing for a descent of the southern slopes onto the plains of Hungary, have revived unofficial talk of separate peace for Austro-Hungary, and seemingly increasing anxiety on the part of the interventionists in Italy for their country to take up arms on the Allies and secure territory which they have failed to get in negotiations through Germany with Austria.

The Russian Newspapers seem convinced that Hungary, if not the whole of the dual monarchy, is ready to seek peace, and it is said that Emperor Francis Joseph has requested Pope Benedict to intervene in his behalf. Except in Italy, the neutral country most directly interested in this question, little credence is given this report, although the opinion is expressed in military circles here that if Russia succeeds in overcoming the joint resistance of the Austro-German troops in the Carpathians, as she apparently has that of the Austro-Hungarian armies, Hungary, at least, will be ready to bring the war to an end, as far as she is concerned.
