A Law Regulating The Sale of Milk in the City of Fredericton.

1. No person shall sell or offer for sale milk in the City of Fredericton without having first procured a license so to do, from the local Board of Health.

2. Every person applying for a license to sell milk within the City of Fredericton shall, with the application therefor, furnish the Board with a declaration in writing that all cows belonging to him which supply milk for the purpose of sale have been tested with the Tuberculin within one month from the date of such application by a veterinary surgeon, recognized as such by the Board, for the diagnosis of tuberculosis and that he will not sell or offer for sale in the said City of Fredericton, any milk procured from any cow which has not been so tested.

3. Every person so applying as aforesaid shall also furnish along with the application and with said declaration, a certificate in writing from an accredited veterinary surgeon, approved by the local Board of Health, certifying that all the cows from which the applicant procured any milk for the purpose of sale, have been tested within one month from the date of such application, with Tuberculin for the diagnosis of tuberculosis, and that the said cows and each and every one of them are entirely free from Tuberculosis, Cow Pox, Actinomyces, Puerperal Fever, Retention of the Placenta or any other malignant or contagious disease. All certificates from veterinary surgeons shall be on form, approved of and supplied by the local Board of Health.

4. And every person owning or keeping herds from which milk is sold in the City of Fredericton, shall, upon making any additions to said herds, have each and every addition properly tested with Tuberculin for the diagnosis of tuberculosis and shall file a certificate from an accredited veterinary surgeon that said additions are free from tuberculosis.

5. And every person selling milk in the City of Fredericton shall have their entire herd of cows properly tested for tuberculosis as before provided, at least once every year, between the first of April and the first of May. Should the Board deem it necessary in the interest of the public health, they can order any or all herds from which milk is supplied to the City of Fredericton to be tested with Tuberculin as before described, twice during the year.

6. Every license to sell milk within the City of Fredericton shall be subject to the condition that the licensee shall and will observe, abide by and perform all the restrictions, conditions and regulations from time to time adopted or enacted by the local Board of Health during the currency of said license or any renewal thereof, and upon the said licensee failing to observe, comply with or perform any of such restrictions, conditions or regulations, the license granted to such vendor of milk shall forthwith become null and void.

7. Every licensed vendor of milk offering milk for sale in the City of Fredericton shall at least once a year, deliver to the Board of Health a statement containing (1) His name and address; (2) The source or sources of his milk supply; (3) The number of cows in his possession; (4) The average quantity of milk disposed of either (a) to milk shops, (b) to milk vendors, (c) or to private consumers; (5) The situation of his dairy or dairies, and such other information as the Board or its officers may deem necessary.

8. Every licensed vendor of milk shall comply with the various clauses of the Public Health Act by giving notice to the local Board of Health of any cases of contagious disease in his family or in his farm house or shop at which, from which, or in which the milk is either sent or received, and he shall further carry out the restrictions laid upon him by the local Board under the Public Health Act.

9. No licensed milk vendor shall sell or offer for sale in the city of Fredericton any milk which is unwholesome or unfit for human food, or any milk which has been adulterated, or has been reduced or changed by the addition of water or other substance, or by the removal of cream, or milk known as swill milk, or milk from cows or other animals fed upon garbage or the like substance, or milk from diseased animals; but skimmed milk may be sold as such if contained in cans or vessels bearing upon their exterior the word "Skimmed" placed conspicuously in letters not less than two inches in length; and no person shall supply such skimmed milk unless such quality of milk is asked for by purchaser.

10. Every licensed milk vendor shall permit all his milk cows and cow byres, and all dairies and other places in which milk is sold or kept, to be inspected by the Health Officers, or person or persons appointed for that purpose by the Board of Health whenever any such officers may desire to do so, and no licensed vendor of milk shall keep any milk intended for sale, or which may be afterwards sold or offered for sale in the said city, in any place where such milk is likely to become unwholesome or liable to produce disease, either by reason of adulteration, contamination with sewerage, absorption of disease germs, infection of cows, uncleanness, or any other unrecognized cause, nor

Got A Pain In Your Back?

IF YOU HAVE
HEED THE WARNING.

You get a pain in your back, and you wonder what is the matter. When the back aches or becomes weak it is a warning that the kidneys are affected in some way.

Heed the warning; cure the weak, lame, aching back and dispose of any chances of further trouble.

If you don't do this, serious complications are very apt to arise, and the first thing you know you will be troubled with Dropsy, Diabetes or Bright's Disease; the three most deadly forms of kidney trouble.

On the first sign of a pain in the back, Doan's Kidney Pills should be taken.

They go right to the seat of the trouble, cure the backache and prevent any further complications arising.

Mr. Stewart Johnston, Richardson Mines, N.S., writes:—"For years I was troubled with my back, and I had to give up work. I tried Dr. after Dr., and was getting no better. I had almost given up hope when I began to try Doan's Kidney Pills. I took three boxes of them, and found I was completely cured. I feel I owe my life to Doan's Kidney Pills."

Price 50 cents per box, or 3 boxes for \$1.25, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

When ordering direct specify "Doan's."

WESTERN ELEVATOR DESTROYED BY FIRE

Brandon, Man., May 10.—This morning the Maple Leaf Milling Company two elevators were burned, their respective capacities were 20,000 and 50,000 bushels. The latter was completely destroyed by fire in January of last year. The heat of the flames were so intense that at one time the Canadian Pacific Railway freight sheds directly east of the elevators were in danger, while the C. N. R. sheds 100 yards south had to be flooded by several streams the older elevator of coarse grains, while the new elevator contained only five thousand bushels was practically empty. The new elevator was the last word in elevator construction and costs sixty by insurance.

The eighteenth annual Lake Mohonk conference on arbitration will begin at Lake Mohonk Wednesday, and as usual, the program provides for addresses by many persons of international note. Other gatherings of the week will include the annual convention of the National Grocers' Association at St. Louis, the National Wholesale Liquor Dealers' Association at Philadelphia, the General Society of the Daughters of the Revolution at Boston, and the Southern Commercial Secretaries' Association at Houston.

In any place condemned by the Board or its authorized official, nor carry it in any wagon of vehicle used for the conveyance of swill, manure, or any other offensive material.

11. Every licensed vendor of milk shall have the number of his license conspicuously placed on the wagon or vehicle from which the milk is sold, and every can or vessel from which it is sold when no vehicle is used.

12. Every dairyman and vendor of milk and every driver of milk wagons or vehicles having in his possession in the city of Fredericton milk for sale in the said city at the time, shall, whenever so requested, furnish the Inspector of the Board with such samples of milk as he may require from time to time and at such places as the samples may be demanded.

13. Every sample of milk shall have a label attached to the vessel containing it, which shall have written thereon at the time of collecting it, the number of sample, date of collection and the initials of the officer or inspector receiving the same, who shall at once enter in a book (carried for that purpose) for further reference, a corresponding number with the name of the owner or driver from whom the said sample was obtained.

14. Each sample shall be examined separately according to its number, by the medical health officer or person appointed for the purpose, who shall register the specific gravity, temperature and percentage of butter fat, opposite a corresponding number in a book kept for that purpose, the names of the owners to be subsequently inserted.

15. The Health Officers and Sanitary Inspectors are authorized and required to inspect, as often as to them or any of them seem necessary, all Milk offered for sale whether on any of the streets, public places or shops of the said City, and to seize and destroy all such Milk which may, on such inspection, be found unwholesome or unfit for human food.

16. Any one infringing any of the above regulations will be subject, for every offence to a penalty not exceeding Forty Dollars.

17. These regulations will come in force on the first day of June, 1912. Passed and enacted this twenty-sixth day of April A. D. 1912.

CHAS. W. BECKWITH,
Secretary Health District,
No. 1, City of Fredericton.
JOHN M. WILEY,
Chairman.

POINTERS ON THE CARE OF THE LAWN

To have a good lawn, one must put the lawn space, with its two spalls, in good condition. The general surface should be made smooth. Hummocks and stones and holes must be effaced, for they not only give a rough appearance to the lawn that it ought not to have, but they represent inequalities in the surface soil that will prevent a prosperous growth of grass.

Generally speaking, the lawn should be level. This does not mean that it may not slope at all, but that no slope must be abrupt. When the lawn is built on a steep incline a retaining-rail is needed at the bottom, so that the yard can be graded up to a less incline. If the lawn space is extensive, the slopes may chance to form a hollow in the middle of it. Occasionally such a hollow can be managed well enough, but scarcely so unless the area contains several acres. If the hollow is left, great care must be taken to carry off the water. It must not wash the slopes out, or gather in pools or wet spots.

There are two soils to be considered in building up the lawn—the top soil and the subsoil. In grading, the top soil should be removed and kept by itself, to be spread over the surface again after the grading has been completed. Only the top soil has much to do directly with sustaining the plant life.

When the grading has been completed the top soil should be replaced. This soil should be loam, which is the part of the earth that contains most vegetable matter, such as roots and rotted leaves and grass, and has been acted on by sun and weather and cultivation until it has become of looser texture and richer mixture than the subsoil.

For the best soils, the top soil should be about a foot deep. Sometimes it will be of this depth naturally. If it is shallower, and is to be built up, the subsoil should be graded off to a lower depth, so that the surface of the completed lawn shall not be too high. Loam for building up the top soil may prove hard to get except at a good price.

If lawn soil can be obtained, the problem will be solved. The blocks of sod should be cut carefully to one size, so that they will fit together again in a close surface. They should also be as thick as is possible without wasting the earth from the under side; it will drop off if the sod be cut deeper than the network of roots. No sod will do well that is cut so thin that the roots have been injured. It is inadvisable to lay sod that is weedy, or that shows a scanty grass growth. The latter kind may, however, be laid in the late summer, upside down, to increase the soil depth. The rotting grass and roots will help to increase the humus. Spring-laid sod must be kept moist until the sods unite thoroughly with the old soil.

The top soil should be very thoroughly broken up by plowing or spading before the grass is sown. It should be still more worked and pulverized by disking and harrowing or dragging when the area is sufficient to permit such treatment. It should also be packed down again firmly, but not solidly. The subsoil ought to be well stirred to a depth of about eight inches.

For the best results, the soil should be thoroughly manured when it is broken up. Well-rotted stable manure is excellent. One cart-load to two or three square rods is about right for ordinary soil. It should be worked into the soil perfectly. When the top soil has been removed to permit grading, it may be replaced in successive layers of three inches, well mingled with the manure. Each layer should be rolled to pack it before the next is spread. When the desired level has been reached, the seed is sown, wetted down and left to dry.

RICHESS

I may neither sport nor feast;
Wealth is not for me to make;
But the sun is mine, at least,
And my blue hills none can take.
If I own no gardens fair
I can see the wild rose twine,
Wood and wild are mine to share,
And the hills, the hills are mine.

Though my purse can never buy
Place to hear the diva's song,
There's a lark against the sky,
And to me the birds belong.
Though I own no acres broad,
Though I hold no farms in fee,
Yonder glorious hills of God
Hold their purple arms to me.

If my cellar lacks of wine,
Blowing splendid from the sea,
Are not all the hill-winds mine,
Brimming golden cups for me?
If my shelves of books are bare,
Have I not the skier to read,
And the wild flowers that declare
What is aye the cleaner creed?

Let the wealthy hoard their gold,
Let the famous guard their wreath;
Is my path across the heath,
None may I away to withstand,
None my faith and me to part,
Just the winds to hold my hand
And the bird to keep my heart!

The New Zealand cities of Wellington and Christ Church have elected labor mayors.

Don't Begin Planting until you have provided yourself with

A YANKEE SEED POTATO CUTTER

It is one of the greatest time and labor saving devices imaginable. With it a man can cut 50 bushels in a day and cut them as uniformly as could be done by hand. You can hardly afford to cut by hand when you can get one of these cutters for \$3.00.

Let us demonstrate it to you or write for circular. We have wired for a third carload of Bissell Disc Harrows. It is the harrow that progressive farmers insist on having.
