

He has left his honored parents, one brother, and four sisters to mourn their loss, besides a large number of relatives and friends who will long love to cherish his memory.

May God sanctify this deep affliction to the present and eternal good of the mourning family and the whole community.

CHILSON'S

Patent Air Warming and Ventilating Furnace.

(FOUR SIZES.)

THE fame of this well known FURNACE has now become so extended, that it would become mere supererogation to enter into any elaborate detail of its construction. Since the period of its first appearance, it has attracted the attention, and gained the encomiums of many individuals, who hold high rank in the scientific world—and completed an entire revolution in the construction of "HOUSE WARMERS."

The antiquated and now exploded notion, of obtaining a sufficiency of pure warm Air from a small surface of Red Hot Metal, in contact with which, an inadequate supply of Cold Air disseminates into the apartments above a sluggish current of burnt deoxygenated HOT air, unfit for respiration, is rapidly being supplanted by the introduction of our new House Warmers, which, from its peculiar construction, can never become overheated, and by its extensive and well proportionate surface, is capable of warming a large volume of atmospheric air.

Another prominent peculiarity of our Furnace, is its complete adaptation for Wood or Bituminous Coal; the flues being so arranged that they cannot become closed by soot or ashes: this point has never before received the attention of Furnace Manufacturers, and is indeed the only article in which this description of fuel can be used to any advantage.

And when we take into consideration the fact, that this has become the standard on which all new Furnaces are founded, and the only Heater on which attempts at infringement are constantly being made; and add thereto, that it has received numerous Medals and first Premiums from various Scientific Institutions—not to make mention of the "World's Fair," (where, in competition with articles for similar purpose, from all parts of the world; it received the GREAT PRIZE MEDAL.)—it must convince every unprejudiced mind that this Furnace already hold the highest rank for the purposes to which it is applied.

Any information respecting our Furnace, or the general subject of "Heating and Ventilation" together with our pamphlets containing Cut of Furnace &c.; and an Appendix of over 1000 References, will be promptly forwarded to all who address the Subscribers by Post.

We are also the Agents for, and have constantly on hand, an assortment of the Patent Mirror Marble Chimney Pieces—a new, cheap and elegant substitute for Marble—at prices varying from \$18 to \$150 each, a sample of which is in possession of the Editor of this paper.

Besides the above, we have always in our Warehouse a large stock of Cooking, Office, Hall, and Parlor Stoves, Ranges, Registers, Ventilators, &c., &c., which we are happy to present for inspection at 51 and 53 Blackstone Street, Boston. June 11. CHILSON, RICHARDSON & CO.

BLASTING POWDER.—60 kegs, 100 lbs., 50 lbs., and 25 lbs., just received per ship James Reddin.—For sale low. July 12. W. H. ADAMS.
