(Continued from page 299.)

It is reported the Persian city of Ispahan was nearly destroyed by an earthquake on the 11th of

The German papers assert that the United States are backing Switzerland in her opposition to Austria and promise her active assistance, the boldness of the Americans in the Koszta affair being the main grounds for this.

Turin, Sept. 8.—Some days since a number of refugees, about fifty it is said, were arrested by the gens d'arms on the frontier, in the neighborbood of Saranza, under suspicious circumstances.

THE EASTERN QUESTION .- The Czar has refused the Turkish Note, and the impression was that war is now almost inevitable. It was currently reported, although no foundation was apparent for the rumour, that the Turks had attacked the Russian outposts, though no general engagement had been fought. The rumour is doubtful. The Vienna Despatch says :- "The Czar rejects the Turkish modification, but abides by the Vienna Note and promises to evacuate the Principalities if the Porte accepts it pure and simple." This yet leaves one chance for peace. Another Despatch says, a new manifesto was expected from Russia. The Turks were quite rife for war and Omar Pasha had difficulty in restraining his troops from hostilities. Fanaticism on both sides was at its height. Anonymous placards, calling on the faithful to attack the Russians, had much excited the people and it was only on the special demand of the representative of the Powers that the Sultan people. From Bucharest the Russian Command- that it will close sometime in the month of Deer-in-chief had issued an order of the day to his cember. troops and concluded saying :—"Russia is called to annihilate Paganism, and those who would oppose her in that sacred mission shall be annihilated with the Pagens. Long live the Czar, viva the God of the Russians."

Omar Pasha notified Prince Gortschikoff that if the Russian gun boats approached too near the Turkish batteries they would be fired on. Gortschikoff briefly replied, " if they are fired on they will return the fire." The Turks have carefully fortified the line of the Balkan, between Shumla that city of yellow fever.

and Trinovn. It is said that the French Ambassador urgently attempted to persuade the Porte to recall the modified note even after it was sent to St. Petersburg. The Russian party in Conptantinople prophecy change in the Turkish Ministry. Riza Pacha, ex-Minister of War, to supersede Mehemet Ali, the

determined enemy of Russia. Trouble continued between the Hospodars and the Porte.

A Courier took his departure for Marseilles with orders to embark there at once. It is said he is bearer of a despatch to the English Ambassador from his Government, enjoining him to employ ing majority of votes, both clerical and lay mem- its fury. every possible means to induce the Sultan to accept, without delay, the note of Vienna without modifications. In case the Porte should object that it cannot restrain the population the Ambassador is authorised to allow the English squadron to enter the Bosphorus and to disembark troops for the purpose of causing the dicision of the Sultan to be respected. A Courier is also to be sent at once to Omar Pasha forbidding him to commence hostilities in any way. France and England agree perfectly on the Eastern question.

VIENNA, Sept. 8.—The warlike preparations of been formed from Widdin to Shumla, and from Shumla to Varna; towards the end of August, another detachment of 2300 men was conveyed on The Turkish army in the neighborhood of Varna collegiate institute. is estimated at 90,000 men, with 250 guns. In the various fortresses and in the passes of the Balkan are guns of a large calibre. In Varna there are six batteries of heavy metal. The order and discipline maintained in Omar Pacha's camp are highly spok-en of, but the financial dificulties with which he has to contend are great.

The Turkish government had entered into a contract for the supply of 300,000 great coats, lined with leather, for the troops, and this was thought indicative of a further complication of the question, and consequently the probability of hostilities.
