

read the sublime funeral service of our Church. It was observed that the coffin was not highly decorated or even ornate. The inscription simply stated, that Lieutenant-General Sir C. J. Napier, C.B. was born on such a day and died on such another.

On the lid were the General's hat, with plume, &c., of the deceased. There were two swords upon it also; one of them was worn by the General for many years, and memorably in the last India campaign. The guard was torn up and bent backwards towards the blade from the hilt. This was the work of a musket or ginjal ball at Hyderabad. The second was a *sabre d'honneur*, a very richly mounted and handsome weapon, presented to the General by Lord Ellenborough, when Governor-General of India.

When the coffin was lowered into the grave—a plain bricked-up pit, some five or six feet deep, by the side of the path from the gate to the church—and the solemn words "Earth to earth, ashes to ashes, dust to dust" were pronounced, not a few of the old soldiers present were unable to restrain their emotion. As soon as the service was concluded, Sir W. Napier, standing by the side of the grave, turned round to the soldiers, who formed three sides of a square around it, and, as well as we could hear, said,—

"Soldiers! There lies one of the best men—the best soldiers—the best Christians—that ever lived! He served you faithfully, and you served him faithfully. God is just."

The gallant officer could proceed no further. He had evidently intended to speak something at greater length, but was unable to command his words, and slowly and sadly the group around the grave broke up, and the military filed away. The crowd gradually thinned, and at last nothing was to be seen in the church-yard but the men who were closing up the mortal resting-place of one of the noblest soldiers England ever sent forth to do or service.

In a letter in the London papers, Sir Wm. Napier says, that it was Ney, not Soult, who protected the deceased when captured in Spain.

Compound Fluid Extract of Sarsaparilla

A NEW and the most valuable Extract introduced, which is put up in Quart Bottles, is cheaper, more pleasant, and warranted superior to any sold. It is prepared from the best

HONDURAS SARSAPARILLA ROOT combined with Yellow Dock and other valuable productions, which from their purifying effects on the Blood render it the best

## Spring and Summer Medicine

in the World, purifying and cleansing, giving tone and strength to the whole system.

This Extract is the result of numerous experiments, and the Proprietors feel confident that they have arrived at that perfection in preparing it to which no other manufacturer has yet attained. Every person has heard of Sarsaparilla. All have heard of its uses. And many Physicians in this City are conscious of the fact that our Extract is far superior to those sold under the names of "Townsend's, Sands' Bristol's, Brown's, or Bull's Sarsaparilla," inasmuch as it contains other prime remedies besides those used by the above named parties, is stronger, contains nothing but Vegetable productions, and is prepared without Jelling, which causes it to attain all the volatile and active properties.

## Encourage home manufacture.

We pledge our reputation on the truth of what we here state; that we believe it better in every sense than any other Extract of Sarsaparilla ever introduced.

Scrophulous diseases, Cutaneous Eruptions, Rheumatic Affections, Syphilitic disorders, Liver Complaints, Dyspepsia, Lung and Bronchial Affections, all diseases arising from the injudicious use of mercury, impure state of the Blood or habit of the system, are some of the many diseases which are cured by the use of this SARSAPARILLA.

## CHILSON'S Patent Air Warming and Ventilating Furnace.

(FOUR SIZES.)

THE fame of this well known FURNACE has now become so extended, that it would become mere supererogation to enter into any elaborate detail of its construction. Since the period of its first appearance, it has attracted the attention, and gained the encomiums of many individuals, who hold high rank in the scientific world, and completed an entire revolution in the construction of "HOUSE WARMERS."

The antiquated and now exploded notion, of obtaining a sufficiency of pure warm Air from a small surface of Red Hot Metal, in contact with which, an inadequate supply of Cold Air disseminates into the apartments above a sluggish current of burnt deoxygenated Hot air, unfit for respiration, is rapidly being supplanted by the introduction of our new House Warmers, which, from its peculiar construction, can never become overheated, and by its extensive and well proportionate surface, is capable of warming a large volume of atmospheric air.

Another prominent peculiarity of our Furnace, is so complete adaptation for Wood or Bituminous Coal; the flues being so arranged that they cannot become closed by soot or ashes: this point has never before received the attention of Furnace Manufacturers, and is indeed the only article in which this description of fuel can be used to any advantage.

And when we take into consideration the fact, that this has become the standard on which all new Furnaces are founded, and the only Heater on which attempts at infringement are constantly being made; and add thereto, that it has received numerous Medals and first Premiums from various Scientific Institutions—not to make mention of the "World's Fair," (where, in competition with articles for similar purpose, from all parts of the world, it received the GREAT PRIZE MEDAL),—it must convince every unprejudiced mind that this Furnace already held the highest rank for the purposes to which it is applied.

Any information respecting our Furnace, or the general subject of "Heating and Ventilation" together with our pamphlets containing Cut of Furnace &c., and an Appendix of over 1000 References, will be promptly forwarded to all who address the Subscribers by Post.

We are also the Agents for, and have constantly on hand, an assortment of the Patent Mirror Marble Chimney Pieces—a new, cheap and elegant substitute for Marble—at prices varying from \$18 to \$150 each, a sample of which is in possession of the Editor of this paper.
