SECOR ATTEMPT THE VINCE - A New

FREDERICTON, THURSDAY, Feb. 14, THE GOVERNOR'S SPEECH. Mr. President and Hon. Gentlemen of the

Legislative Council: Mr. Speaker and Gentlemen of the House of Assembly:

You will join with me in the expression of gratitude to the Almighty for the many blessings which have been bestowed on the people of this Province, during the past year. The Agricultural Crops of the season have been generally abundant.

The Fisherics have been successful; and, although our trade has exhibited, in some degree, that depression to which the commerce of the world has been more or less subjected during the same period, we have, I am happy to learn, no reason to fear that the progress of the Province in commercial prosperity, has received any permanent check.

Above all, our heartfelt thanks are due for our exemption, under Providence, from any recurrence of that disease by which some portions of the Province were so severely afflicted during the preceding year.

The continued cessation of operations on the Railway works, which have been commenced in the Province, is a subject which has, during the recess, engaged my anxious consideration.

On the recommendation of my Council, directed the Attorney General to proceed to England, charged with a mission, the particulars and the result of which are fully set forth in papers which will be laid before you.

You are fully alive to the importance of extending the means of intercommunication between different parts of the Province, and to the effect which may be expected therefrom, in promoting immigration, and advancing the general prosperity of the community.

I am sure that the measures which will be submitted to you for the purpose of facilitating and promoting the construction of railways in the Province, will receive your ear-

Mr. Speaker, and Gentlemen of the House of Assembly:

The accounts of income and expenditure for the past year, estimates proposed by the Government of the probable revenue, and of the necessary expenditure for the current year, will be laid before you.

You will perceive with regret that the expenditure of the year 1855 has largely exceeded the revenue received during the same period. But the amount of revenue collected is nearly identical with that stated in the estimate which was laid before you at the commencement of last Session. The excess, therefore, of expenditure over revenue is not attributable to errors in the estimate, or to an unexpected diminution of the revenue of the

The system by which supplies are now granted has obviously failed to secure that equality between the current revenue and the current or ordinary expenditure of the Province, which is indispensable to the maintenance of figancial order; and it will be for you to consider whether the public interests do not, demand that some alteration should be made in this system. The har distanti

You are aware that in the mother country the Executive Government is directly responsible for the financial condition of the country, and this responsibility is justly regarded by the Imperial Parliament and by the people, as the main security against financial embarrassment.

The character and present position of the Province claim your attention.

The deposits in the Savings Banks are liable to be withdrawn at call, and I recommend you to consider whether the application of the whole of the money thus deposited to defray the ordinary expenditure of the Province, without making any special provision for meeting the calls of the depositors, is in accordance with those principles on which the financial affairs of the Province should be conducted. You will not fail to remember the close connection which exist between the establishment of a sound financial system, and the power of constructing public works calculated to promote the development of the resources of the Province, and I am well assured that in the consideration of any scheme for the formation of works of this description involving the expenditure of capital beyond the annual increase of the Province, you will bear in mind the necessity of making full and ample provision for securing, both for the present and for the future, the prompt and regular payment of all claims on the Provincial

You will now have for the first time, the advantage of a synoptical statement of the condition of those extensive Public Works, in the construction and maintainance of which, a large portion of the public revenue is annually expended; and I trust that you will see reason to believe that the establishment of a Board of Works has already given, and that it promises still further to secure efficiency and economy in this important branch of the public service. FREDERICTON, Feb. 16. Several Bills and Petitions presented. Harding and English's Scrutiny Committee reported the death of Mr. Taylor-Mr. Harding's nominee-and of Mr. English, the member returned, and requested to be discharged. After some discussion, the House resolved to go into the matter on Monday morning, immediately after the Journals are

FREDERICTON, Feb. 18. This morning Mr. Gray laid on the table an amendment to a section of the address, involving a vote of "no confidence." If carried, the Government will dissolve immediately: but friends of the Government claim a decided majority in the House. Rumours of Executive resignations false. The report of the committee in the Carleton scrutiny case discussed for several hours. Efforts made to get Mr. Harding, the petitioning candidate, the seat without further scrutiny. This failed; the discussion was somewhat affected by party feelings. On motion of Mr. End, the discussion is referred back to the committee. This afternoon the House went into consideration of the address in answer to the Governor's speech. ### From our Fredericton Correspondent. FREDERICTON, Feb. 16.

The political horizon looks a little stormy just now. I presume the storm will burst forth on Monday next, when the Reply to the Governor's Address comes to be considered. I suppose the strength of the Government will be tested on that question. I think the present Administration will be sustained; there appears to be an opposition organized, which, I think, will number about

seventeen or eighteen at farthest. The friends of truth and humanity are getting hard rubs from the anti-prohibitionists here, but "Truth crushed to earth will rise again." I do not know how the vote to repeal will stand, but I think the Law will be sustained, which the Lord grant. The adverates of the License System forget that there are any other interests to be protected, save those of the persons engaged in the Trafic in intexicating drinks, and those who At the conclusion of the Session last year, have formed an appetite for them. Strike out 5th Section, and insert :-"We can assure Your Excellency we are fully alive to the advantages to be derived from the introduction of Railways into this Province. ### CITY AND OTHER ITEMS.

Great Conflagration. About 2 o'clock on Tuesday morning a fire broke out in Sheffield street, in a house kept by a man by the name of Crockford. The fire companies were early on the ground; but before the flames could be arrested six double, two story houses were burned to ashes. These houses were inhabited by a class of persons of vicious and degraded habits, and many of them wholly unable to provide for themselves. It was pitiable to see these poor wretches in the morning on the side of the street, not knowing where to find a shelter from the cold. Amongst the number The House was principally occupied with was a poor woman, whose back was said to be routine business during the morning. The broken by the falling of a chimney. WORMS. IF As this is the season of the year when worms are most formidable among children, the proprietors of M'Lane's Vermifuge beg leave to call the attention of parents to its virtues for the expelling of these annoying, and often fatal enemies of children. It was invented by a physician of great experience in Virginia, who, after having used it for several years in his own practice, and found its success so universal, was inluced at last to offer it to the public as a cheap, but certain and excellent medicine. It has since become justly popular throughout the United States, as the most efficinet Vermifuge ever known, and the demand as been steadily on the increase since its first introduction to the public.
