

Poetry.

The notice of Miss Helen Randall's death and funeral at Nictaux, which appeared in a late number of the "Christian Visitor," suggested the following Stanzas, affectionately addressed to her venerable father.

The Past, with all its lights and shades, Like some unyielding, mystic power, The memory's treasure-house pervades With scenes of many a happy hour. Bright, sunny spots in life's drear waste, Or days of darkness long since fled, Appear like pictures uneffaced, Or rise like spectres from the dead.

How oft my thoughts to thee are turned, As I look back to "days long since," When "neath thy parental roof I learned The moral worth of thee and thine, Afar removed from hateful vice— (For there Religion's way was felt)— In that domestic paradise When Helen was a babe, I dwelt.

At opening morn and evening's close, The household sought a throne of grace, And prayer from hearts united rose, Like incense from a hallow'd place: And there the innocent and young, In those bright, unforgetful days, With bird-like voices sweetly sung Beloved Zion's choicest lays.

Thy "little ones" in "beauty grew," Like buds of promise, fresh and fair, While not a cloud of sadness threw Its shadow o'er the sunlight there. Bounded by affection's gentle sway, They were so joy in hope and heart That one could scarcely deem that they On earth would ever dwell apart.

But years have passed—new household ties The most of them have form'd elsewhere; And Helen's in the grave—yet lies— How calm her dream's "slumber there!" 'Tis done—ah! no regretful tear— To Heaven in sweet submission bow; For she who call'd her father here, Above all others lov'd her Father now.

Far in the spirit world on high, Where souls and seraphs shine and shine, Bright revelations meet her eye Of goodness, grace and power divine. Life's mystery is understood, And Heaven's mysteries are made known; She joins the angel sisterhood, In anthems round the Eternal Throne.

Her dust in holy ground is laid; And many a saint is buried there— 'Tis holy—though no Prelate made It so by consecrating prayer; For guardian angels vigils keep Around the hallow'd graves of those Who now in Jesus sweetly sleep, And wait to rise as He arose.

When Gabriel's startling trumpet shall sound Its echoing blast through earth and skies, From Nictaux's turf burial-ground A host of God's elect will rise. Whole households may repose in death For ages there beneath the sod, Who then shall feel the quickening breath Of an immortalizing God.

Then Helen's form in beauty's bloom— (A bloom that never more shall fade)— Upstarting from the conquer'd tomb, In immortality array'd Will greet the resurrection morn With myriads of the waken'd dead, As they, on spirit pinions borne, Ascend to meet their living Head.

Dy Death with lov'd ones we must part; And that the lowliest ties are torn— But joy should swell a father's heart— To know he has a child in Heaven. That priceless privilege is thine— Submit, then, to thy Father's rod, And, Brother, cheerfully resign Thy Helen to the arms of God. A. M. G. Sandy Cove, Digby Neck, Sept. 1856.

was beginning to read in this language with some degree of ease. The summer, with its wearisome round of duties, could not damp his desire for knowledge. Every spare moment was carefully seized and sedulously employed in his favorite study.

The winter came again, and with gleeful heart Henry bounded away to the village school. On the way a classmate overtook him; one who had often jeered him for his bashfulness, and plain, homespun attire, and who, with every advantage, had uninterruptedly pursued his studies.

"Ha, ha, how are you, Hal?" said he, "don't you wish you could read all that?" triumphantly holding up a Latin Reader, and spreading his palm complacently over the open page.—Henry kept his own counsel, and together they proceeded toward the school-house.

Soon after the opening of the morning exercises, the class in Latin was called to the recitation bench.

"Henry," said the master, "I think you will not be able to go on with the class you were in last winter, you must fall back with the beginners."

"I should like to enter the Virgil class, Sir." "Virgil class! Nonsense, boy, you could not read one word, just let me see now," opening the book and placing it in his hand.

"How far shall I read?" "As far as you can," replied the master, with a sharp twinkle of his grey eyes, and an involuntary sarcastic smile.

Henry had commenced unhesitatingly to read, and had turned the first, second and third leaves before the master had sufficiently recovered from his surprise to arrest him.

"Stop, sir! Where did you learn all this?" Henry told him where. Taking him by the arm, the master led him to the centre of the room, and placing his hand upon his head, said:

"Attention, boys; here is a hero, a greater conqueror than was Caesar or Napoleon. Give him a round, three times three, now!" Cheerily, heartily, rang out that applause, penetrating the farthest recesses of that time-worn building, making the windows fairly shake again.

What a proud day was that for Henry! How his heart leaped and almost bounded out of his bosom—how the boys shook hands and envied him—how the girls nodded and blinked their pretty eyes at him; he has not yet forgotten, and although at the present time the laurels of a country's regard are clustering thick about his brow, he often says, "That was the victory of my life. It was at farmer Howard's I learned to labor unflinchingly for a given end."

Children, this is no fancy sketch. Such a lad as I have described really existed, and from his example may we not learn to plant for ourselves elevated standards, and never give over until we have mastered every obstacle and reached our aim.

It is not always lessons to be learned, or wood-piles to be demolished or rebuilt. There are bad hearts to govern, vicious inclinations to restrain, selfish dispositions to overcome, many, many wrongs to be righted. There is room for a life-long labor in our own hearts.

Up then, my young friends, with a strong purpose of life. Strive not at the sight of difficulty.—Remember that "where there's a will, there's a way," and that perseverance is a sure guarantee of success.

Obituary Notice

Died, of a lingering illness, on the 19th of April last, at Wickham, James Wilson, in the 66th year of his age, leaving a disconsolate widow, and five daughters by a former wife, to mourn the loss of a kind husband and tender parent; his end was peace. The funeral was improved by the Rev. Peter Spragg, from the words in the 116 Psalm, 15th verse, "Precious in the sight of the Lord is the death of his saints." Mr. W. was a native of Bardon, in the County of Cork, Ireland, and there became a member of the Methodist Society together with his former wife. They emigrated to this Province in the year 1818, and settled at Head of Belleisle Bay, in which place his wife thought it her duty to be buried with Christ in baptism, and united with the first Springfield church, and was considered a shining light in that church until her death, in 1831. Mr. Wilson, having moved to Wickham, was baptised by the Rev. P. Spragg, and was a member of the first Springfield church until his death. Mr. W. suffered much for the last six months before his death, but bore it all with patience and resignation to the Divine will of his heavenly Father, and was often heard to say when spoken to of his sufferings, that it was not to be compared to what the Lord Jesus had suffered for him. On the day before his death when asked by the writer on the state of his mind, he said that he was not afraid to die, for he found the Lord to be present with him, and would soon be in glory. A few hours before his death, not being able to speak, he opened his eyes and extended his right hand as it were to heaven, and smiled, as if he had seen angels come to convey him home.—[Rel. Intel. please copy.]

Agriculture.

AUTUMN PLOUGHING.—Sward land which is intended to be ploughed before spring, should be ploughed as soon as practicable. An argument frequently used in favour of fall ploughing is, that the sod gets rotten earlier, and yet the work is often put off so late that the object is not attained.—Sward that is turned over just at the setting in of winter does not rot any before spring, and in many cases the furrows become so packed by rain that decomposition makes but slow progress through the next season, leaving the fall ploughed sod less rotted than the spring-ploughed. A neighbour of ours had a piece of tough sward ploughed on the 24th of last December. When spring came the grass started freely along the edges of the furrows. The lot was cross ploughed, but this only exposed more of the grass, which was as full of life as ever, and shot rapidly into blade and stalk, making the surface almost as green as a meadow in a short time.

The lot was planted, but the row to be hoed there was a hard one, and the labour required to subdue the grass was double what it would have been if the first ploughing had been done the fore part of September, or not till the last of May. In September and part of October the weather is usually warm enough to produce considerable decomposition of the sod, but nearly the entire autumn is required to destroy the vitality of the vegetation.

Fall ploughing is sometimes performed for other objects. Clay soils may be made friable by it. But to effect this the ploughing should be done in narrow ridges, or by back-furrowing, so as to expose the soil to the air, and allow the greatest expansion from its freezing. Sward ground cannot readily be ploughed in this manner, but on ground which has been under cultivation one season or longer, there is no obstacle in the way. The later this kind of ploughing is done the better—that is, the quicker it is frozen after it is ridged, the more mellowing will be the effect of frost. Light land is injured by fall ploughing; its elements of fertility are too much drenched out by the rains of winter and spring.

Late fall ploughing is sometimes advocated for killing worms. Its advantages for this purpose are probably overrated. It is very likely that turning an insect out of its winter bed just as a cold snap is setting in, might make it suffer some. But some insects lie at a greater depth in the soil in winter than is commonly reached by the plough. Much has been said of the advantages of late ploughing on this score, has been mere guess work. We shall be glad to receive any statements as to what has actually been done by attempts to freeze worms to death.—Boston Cultivator.

THE LITTLE MONSTER IN YOUR SUGAR.

The sugar acarus approaches somewhat in organization and habits to the louse and the itch insect, itself, which are also included in the genus Acarus.—The sugar mite is in size so considerable that it is plainly visible to the unaided sight. When present it may be detected by the following proceeding:—Two or three teaspoonfuls of sugar should be dissolved in a large wine glass of tepid water, and the solution allowed to remain at rest for an hour or so; at the end of that time, the animalcules will be found, some on the surface of the liquid, some adhering to the sides of the glass, others at the bottom, mixed up with the dark and copious sediment. The body is oval, or somewhat ovate, being broader behind than before. From its posterior part proceed four long and stiff bristles, two together on each side, and some eight or ten smaller ones are arranged at equal distances around the circumference of the body; from its anterior part a proboscis of complex organization proceeds, and from its interior surface, eight legs, joined and furnished with spines or hairs at each articulation; the spine, which issues from the last joint but one of each leg, is very long, and extends beyond the termination of the leg itself. Lastly, each is armed at the extremity with a formidable hook. The acarus succhari clings to life with great tenacity, for warm water does not always kill it. Hence, those who sweeten their drinks with brown sugar, must swallow several of these disgusting insects in a living state, for the heat of the beverage is not sufficient to destroy them.

For the consolation of our readers, we are happy to announce that this insect is never found in purified, i. e., lump sugar. It owes its existence and nutriment to the albumen, which, as we said before, is always present in inferior sugar. It is well known that grocers are subject to an affection of the skin, denominated "grocers' itch," of which one of the symptoms is extreme irritation and itching. To this disease all grocers are not equally liable, but those particularly who are engaged in the "handling" of the sugars, as the warehousemen. Now the acarus succhari actually belongs to the same genus as the acarus scabiei, or itch-insect, than which it is larger, and possessed of an organization still more formidable and forbidding.

DETECTION OF METALLIC POISON.—In an article in the Dublin University Magazine for this month, there is a striking instance of the difficulty that medicine had in grappling with a metallic poison, and the beautiful remedy discovered accidentally:—

"Is there any of our readers who has not been acquainted with a paralytic house-painter? Many of them must have witnessed the shaking palsy of metal-gilders, or silvers of looking glasses; and few need to be informed that these chronic maladies are occasioned by the absorption of the metals we have named, which are retained in the system after it has got over their first violent effects. They may endure it for many years, but it was only the other day that Mr. Maurice Vergnes, of the Havana, actually discovered means of curing them by the removal of their material cause. Mr. Vergnes, having occupied himself with galvanic gilding and silvers, had his hands in continual contact with solutions of nitrate and cyanuret of gold and silver. They were in consequence, covered with ulcers, into which particles of the metals were introduced. One day, however, he chanced to plunge them into the electro-chemical bath, at the positive pole of the galvanic pile, and, to the great surprise of the beholders, a small plate of metal brought into contact with the negative pole, becomes covered with a thin coating of gold and silver, extracted from the hands of the operator, whence the most powerful remedies had not been able to eliminate them. The discovery was made on the 16th of April 1852; and it was shortly afterwards applied by Mr. Poey, also of the Havana to medical use, in the following manner:—

"Mr. Poey takes an unfortunate patient, corroded by lead, mercury, gold, silver, or any other metal, and places him in a metallic bathing-tub, isolated from the ground. The man sits down, his legs horizontally stretched out on a wooden bench, isolated from the tub, which is filled with water up to his neck. The water is slightly acidulated, to increase its conductivity; and the acid varies according to the cases. This done, the negative pole is placed in the hands of the patient. The work of purification is now in full activity: the electrical current precipitates itself

through the body of the sufferer, penetrates into the depth of his bones, pursues in all the tissues every particle of metal, seizes it, restores its primitive form and, chasing it out of the organism, deposits it on the sides of the tub, where it becomes apparent to the naked eye."

S. K. FOSTER'S Fashionable Shoe Stores, Foster's Corner, St. John, Queen Street, Fredericton.

NEW FALL GOODS. Received per Packet Ship John Harbour and recent Steamer from Boston.— LADIES' BOOTS AND SHOES of the best English manufacture, suitable for the season; Gentlemen's Black and Drab Cloth BOOTS; Misses', Boys', Youths' and Children's Boots and Shoes, of English and American manufacture; Ladies', Misses' and Children's American make BOOTS and SHOES in great variety.

Men's, Women's, Boys', Youths', Misses' and Children's Rubber Boots and Shoes. Domestic Manufacture. Gentlemen's Dress Elastic Side BOOTS; Do. Calf and Patent do.; Do. Calf, Morocco and Patent Booties; Boys', Youths' and Children's Boots, Booties and SHOES, with many other varieties. S. K. FOSTER. sept 6 vii.

FIRST OF SEPTEMBER.—German Double Width Fancy Pilot OESKINS, a great article for Pantalions. Corner of King and Cross-streets.

FIRST OF SEPTEMBER.—Superfine Black BEAVER, smooth Cloth finish, for Fall French Coats, faced and wadded, just the kind of garment for this climate for the next four months to come for Gents' wear without a Top Coat.

FIRST OF SEPTEMBER.—Under SHIRTS, DRAWERS, Stock, Neck Ties, Umbrellas, Travelling Trunks, Valises, and many other articles in the Furnishing line not here enumerated. Corner of King and Cross-streets. PANTRYBETHICA. vii.

FIRST OF SEPTEMBER.—Arctic Beaver CLOTHES, full style, made to measure, with care and attention. Corner of King and Cross-streets. PANTRYBETHICA. vii.

DRUGS, MEDICINES, PAINTS, OILS. The subscriber has just received ex barque Fame from London: a large and well selected stock of DRUGS, MEDICINES, Patent Medicines, &c.—2½ doz. Brandan's No. 1 White Lead; 150 doz. Colored Paint; 2 doz. Patent Light Dryer; 10 cans Raw and Boiled Linseed Oil; 1 ton Putty, in 7 and 14 lb Bladders; 12 bbls Paris Whiting; 5 tons English Whiting; 20 gallons London Body Varnish; which he will dispose of Wholesale and Retail at the lowest market rates. A liberal discount made to Wholesale purchasers. JAMES COLEMAN, 85, King Street, St. John, N.B. June 13 vii.

M. N. POWERS, UNDERTAKER, respectfully gives notice that he will attend to all the duties connected with the management of Funerals at the shortest notice; also keeps at his Ware-room a large assortment of Coffins, of every size and description, consisting of Mahogany Walnut and covered, at all prices. Coffin Mounting of all descriptions—English and American—Japanned and Plated. Plates Engraved and Lettered. Grave Cloths of all sizes and Qualities. Orders left at Ware-room or Residence over Ware-room, thankfully received and promptly attended to, day or night. M. N. P. P. S.—Two superior Horses, with quiet horse, and careful driver. Palls, &c., furnished. Aug 16 vii.

CO-PARTNERSHIP NOTICE. THE Subscribers having entered into Co-partnership under the Style and Firm of HENDERSON & CO., as FLOUR, GROCERY, and PROVISION DEALERS, will open on or about the 1st of April, with a stock of the above articles, in the New Store lately erected by Thos. Merritt Esq., next adjoining the Store formerly occupied by the Messrs J. & R. Reid, and hope by strict attention to business to merit a share of public patronage. W. H. HENDERSON, No. 29 South Market Wharf. St. John April 2, 1856.

Pork and Flour. To arrive, per Grosvenor, from New York: 20 BBL'S. Mess Pork; 83 bbls. extra Fancy FLOUR. In store—100 bbls. superfine Flour; 10 bbls. Boston Mess Pork; 5 bbls. Liverpool Mess Beef; 10 tons Rice; 5 tons Manila Cordage, ass'd sizes; 300 lbs. Live Salt. [aug. 6.] HARE & WAR. vii.

TO THE PUBLIC. WE are prepared to furnish purchasers, either at Wholesale or Retail, with all kinds of Fashionable HATS and CAPS. Our present stock is large and well assorted. In making up the Spring style of SATIN HATS we have used the very best description of French Plushes, which we have imported direct from the manufacturer, and the quality of our CAPS is very large, the materials and workmanship being of the best description. Our Kosuth, Wide Awake, and other Felt Hats are imported from the most extensive manufacturing Houses in the United States, and will be sold at a very small advance on cost. A further supply of English and American HATS and CAPS shortly expected, among which will be found a good assortment of Children's Fancy Hats. Orders respectfully solicited. C. E. EVERETT & SON, 15, King Street, April 11. vii.

CIGARS! CIGARS! Wholesale and Retail. THE Subscriber has just received 350 boxes genuine Havana CIGARS, which he will sell wholesale and retail at the lowest market rates. JAMES COLEMAN, Druggist, aug 29 vii.

SPRITS TURPENTINE.—Just received 300 gallons Spirits Turpentine, for sale low by JAMES COLEMAN, Druggist, 85 King Street, July 25 vii.

FLOUR.—100 bbls. superfine Flour, from new wheat, just received from New York. For sale by READ & LUNT, oct 3 vii.

In Store.—10 bbls. Mess PORK; 23 half bbls. Prime Cumberlan No. 1, SHAD, CONNERS, POLLOCK, &c. READ & LUNT, oct 3 vii.

Collegiate Grammar School, NOTICE is hereby given, that the above Institution, in connection with "VICTORIA COLLEGE," (Incorporated by Act of Assembly,) is now open for the reception of pupils. Until the College Grammar School will be temporarily carried on in the spacious School Room under the Presbyrian Church, at the corner of George and Carmarthen streets. The following Classes have been opened, viz:—

GREEK.—Vigant, De'actis, Grammar; LATIN.—Horace's Odes, Virgil's Eneid, Caesar's Commentaries; Cornelius Nepos, Eutropius, Delectus, Grammar. FRENCH.—Bolma's Conversations; Telmaque. Hebrew and other classes will be progressively opened as required. All the Branches of a thorough English and Mathematical Education will be correlatively taught. TRACINGS.—Mr. James McCintock, for the Classics; Mr. John Toland for English and Mathematics.—£1 10s. per Quarter. In order of the President and Trustees of Victoria College, B. D. McARTHUR, Secy. St. J. N. B., May 15, 1856. Secretary P. S.—Board and Lodging will be furnished Pupils from the country, on reasonable terms, by may 17 vii.

NEW GOODS.

North American Clothing Store, Sears' Brick Building, North side King St. R. H. ENTER has received per recent arrivals from Great Britain and the United States, his usual supply of Spring and Summer Goods, suitable to the trade, which, with the stock previously on hand, he has offered for sale at unusually low prices, in part consisting of:— Superfine BROADCLOTHS, Cassimeres, Doestings, Tweeds, Sattinets, Moleskins, Fannas, Ticks, Shirting Stripes, &c.; COATS, Vests, and PANTS, in all the various materials now in use; and most fashionable styles, and at any prices required—being cheaper than can be had at any other house in the trade; a general assortment of India Rubber Goods, comprising Coats, Caps, Legging Hats, Gloves, Horse Covers with or without Hoods, &c.; GENTS' FURNISHING GOODS, Consisting of Shirts, Shirt Fronts, Neck and Pocket Handkerchiefs, Stocks, Hosiery, Cravats, Neckties, Suspenders, Braces, Undertrunks, L'Wool, Merino, Cotton, and Flannel Undertrunks and Drawers, Carpet Bags, Trunks, Valises, Overall Pants and Frocks, &c.; Hats and Caps, in great variety.

COAL, Yards, and PANTS, in all the various materials now in use; and most fashionable styles, and at any prices required—being cheaper than can be had at any other house in the trade; a general assortment of India Rubber Goods, comprising Coats, Caps, Legging Hats, Gloves, Horse Covers with or without Hoods, &c.; GENTS' FURNISHING GOODS, Consisting of Shirts, Shirt Fronts, Neck and Pocket Handkerchiefs, Stocks, Hosiery, Cravats, Neckties, Suspenders, Braces, Undertrunks, L'Wool, Merino, Cotton, and Flannel Undertrunks and Drawers, Carpet Bags, Trunks, Valises, Overall Pants and Frocks, &c.; Hats and Caps, in great variety.

THE GREAT MEDICAL DISCOVERY OF THE AGE.—DR. KENNEDY, of Roxbury, Mass., has discovered in one of our common nature weeds, a remedy that cures EVERY KIND OF HUMOR, from the worst Scrofula down to a common Pimple. He has tried it in over eleven hundred cases with the most successful results, (both chronic and humoral). He has now in his possession over two hundred certificates of its virtue, all within twenty miles of Boston.

Two bottles are warranted to cure a nursing sore mouth. One to three bottles will cure the worst kind of pimples on the face. Two to three bottles will clear the system of biliousness. Two bottles are warranted to cure the worst canker in the mouth and stomach. Three to five bottles are warranted to cure the worst case of erysipelas. One to two bottles are warranted to cure all humors in the eye, and to remove all spots from the eye.

Two bottles are warranted to cure running of the ears and blotches among the hair. Four to six bottles are warranted to cure corrupt and running ulcers. One bottle will cure a scaly eruption of the skin. Two to three bottles are warranted to cure the worst case of ringworm. Two to three bottles are warranted to cure the most desperate form of rheumatism. Three to five bottles are warranted to cure the salt rheum. Five to eight bottles will cure the worst case of scrofula.

A benefit is always experienced from the first bottle and a perfect cure is warranted when the above quantity is taken. Reader, I peddled over a thousand bottles of this in the vicinity of Boston. I know the effect of it in every case, and I can testify to its efficacy. I have never will this cure humor. I never sold a bottle of it but that sold another; after a trial it always speaks for itself. There are two things about this herb that appears so surprising; first, that it grows in our pastures, in the most common places, and secondly, its value has never been known until I discovered it in 1846—second, that it should cure all kinds of humors.

In order to give some idea of the sudden rise and great popularity of the discovery, I will state that in April, 1854, I sold over 1000 bottles of it per day; in April, 1854, I sold over one thousand bottles per day of it. Some of the wholesale Druggists who have been in business twenty and thirty years, say that nothing in the annals of their business was ever like it. There is a universal praise of it from all quarters.

In my own practice I always kept it strictly for humors—but since its introduction as a general family medicine, and wonderful virtues have been found in it that I never suspected. Several cases of epileptic fits—a disease which was always considered incurable, have been cured by a few bottles. O, what a mercy if it will prove effectual in all cases of this kind—there are but few who have seen more of it than I have.

I know of several cases of Dropsy, all of them aged people, cured by it. For the various diseases of the Liver, Sick Headache, Dyspepsia, Asthma, Fever and Ague, Rheumatism, &c., I have used it with the most particular success in diseases of the Kidneys, &c., the discovery has done more good than any medicine ever known.

No change of diet ever necessary. Eat the best you can, and enjoy it. DIRECTIONS FOR USE.—Adults, one table spoonful per day; Children over ten years a dessert spoonful. Children from five to eight years, a tea spoonful. As no directions can be applicable to all constitutions, take sufficient to open the bowels twice a day. THE PRINCIPAL OFFICE for the STATE OF MAINE and the BRITISH PROVINCES is at the Drug and Medicine Establishment of H. H. HAY, 16 and 17 Market Street, Boston, Mass., to whom all orders should be addressed. Sold by respectable Druggists throughout the United States and British Provinces. Price, 5¢. Thomas Walker & Son, Wholesale Agents, also for sale by Chalmers & Hunt, Fellows & Co., G. C. Garrison & Co., F. Seaman & B. McArthur, J. B. Ar. nold, S. L. Tilley, Charles Estabrook, Canning, Burdick & Co., Sheffield, R. P. Yeomans, Canning, Daniel B. G. Salmon River, Q. C. C. Burpee, Clippman, H. B. Babbitt, Old Mines, Q. C. Thos. Davis, Chipman, John W. Salter, J. J. Salter, M. H. Harris, White, Cambridge, S. Black, Cambridge, J. T. Toole, Wadsworth, Y. A. Crandall, Springfield, T. S. Davis, Springfield, Samuel Foster, Kingston, and John Taylor, Indianapolis; Justus Barlow, Hampton; James E. White, Boston; J. C. Johnson, Salisbury; M. H. Harris, Monroton; J. E. Upham, Dorchester; Q. C. Chalmers, Westmoreland; L. Johnston, Sackville.

G. W. STONE'S Vegetable Liquid Cathartic. THE public do not require to be told that a mild, safe, and reliable Cathartic, in a liquid form, accessible to the taste, and one that purges without violence, is a desideratum in medicine, and is to be admitted by all. Such a discovery has been often attempted, but without success, until the introduction of the above named remedy.

No purgative medicine ever met with such ready approval by physicians as this. Many ready practitioners are using it daily, all of whom have spoken of it in the highest terms of praise. Persons, for the want of a better, have been obliged to resort to the use of those complicated, nauseous, and often attended with injurious purgatives, such as castor oil, salts, senna, jalap, rhubarb, aloes, gamboge, &c., all of which are more or less debilitating, and fail to accomplish the object for which they are taken; on the contrary, they often increase the disease, and render the patient more miserable. None of these enter into the composition of this invaluable remedy. It is composed of berries, roots and seeds, the medicinal properties of which are exactly adapted to the cure of those complaints for which it is recommended, such as Constipation, Headache, Typhoid, Biliousness, Dyspepsia, Diarrhea, Cholera Morbus, &c., it will be found to exert a powerful action of the bowels, curing Dyspepsia, restoring the appetite, producing a healthy action of the Liver, freeing the Stomach from bile, and invigorating and strengthening the whole system. It is a certain cure for the Piles, and those suffering from that complaint should give it a trial. It is also warranted to cure cancer in its worst forms. For all diseases of the Bowels it cannot be recommended too highly. In Summer Complaints, Biliousness, Dyspepsia, Diarrhea, Cholera Morbus, &c., it will be found to exert a powerful action of the bowels, curing Dyspepsia, restoring the appetite, producing a healthy action of the Liver, freeing the Stomach from bile, and invigorating and strengthening the whole system. It is a certain cure for the Piles, and those suffering from that complaint should give it a trial. It is also warranted to cure cancer in its worst forms. For all diseases of the Bowels it cannot be recommended too highly. In Summer Complaints, Biliousness, Dyspepsia, Diarrhea, Cholera Morbus, &c., it will be found to exert a powerful action of the bowels, curing Dyspepsia, restoring the appetite, producing a healthy action of the Liver, freeing the Stomach from bile, and invigorating and strengthening the whole system.
