

the other remained at No. 31, Bond street, with Mrs. Cunningham, in charge of the office.

At 1 o'clock messengers came from Mrs. Cunningham, asking of Captain Dilks that a nurse be furnished, as she was in a very feeble condition. The reply was that her daughters were with her, and could attend to her wants.

Gov. Daily has decided to name the baby who performed so important a part in the affair, "Justitia Anderson."

New York, Aug. 6.—Dr. Catlin, who was arrested with Mrs. Cunningham, on Monday night, exposed the fictitious birth, at No. 31, Bond street.

STEAMERS SUNK AND BURIED.—Montreal, August 5.—A collision occurred on Lake St. Peter last night between the steamers Quebec and Montmorency. The latter was sunk, but no lives were lost. She was laden with a cargo of flour.

Steamer J. C. Morrison, belonging to the Ontario and Huron Railroad Company, was burned to the water's edge at Barrie, Lake Simcoe, last night.

EUROPE

European News by the "Persia" at New York.

GREAT BRITAIN.—In the House of Commons, on Monday, Mr. G. Smith, on behalf of the government, denied the truth of a report, which had found its way into print, that the Army in Bombay had also broken out into mutiny, and stated that the latest official advices from India, pointed very reverse of this.

The vote of half a million sterling on account of the Persian war, and four hundred thousand pounds for the Chinese hostilities, were agreed to.

During the debate on the latter question, Sir C. Wood stated that the arrival of the gun boats in Canton river would enable the British Admiral to destroy the war junks, and beyond that no hostilities would be entered upon until the arrival of Lord Elgin at Peking, and the result of his mission to the Emperor was ascertained. After that, if any further hostilities took place, they would probably be confined to Canton, which was the wish of the British government, and seemed to be the wish of the people of China, as well.

On Thursday, in the House of Lords, the Queen's answer to the address upon the subject of emigration of free negroes from Western Africa, was received. It merely gives an assurance of an earnest desire to discourage all schemes for the emigration of negroes, that are calculated to promote slavery.

In the Commons a test vote upon the new Divorce bill showed a majority of 87 in favor of the measure. On Tuesday evening Lord John Russell renewed his motion for leave to bring in a bill for the admission of Jews into Parliament, and after an animated debate, the motion was agreed to by a vote of two hundred and forty-six to one hundred and fifty-four.

On the same evening, in the House of Lords, the subject of Jewish disabilities was likewise alluded to by Lord Campbell, who gave it as his opinion that if the Commons acted independently of the Lords in the matter, by omitting from their form of oath the objectionable sentence, a revolution would be the consequence.

According to the latest impressions, Parliament would not adjourn before the 20th of August.

The Parliamentary election for Oxford resulted in the defeat of Mr. Thackeray, his vote being for Cardwell, 1085; Thackeray, 1018.

The resignation of Baron Rothschild was announced, and a new writ was ordered for an election in the city of London, to fill his seat.

A public meeting was held by the Electors of London upon the subject, and a pledge was given to again return Rothschild as one of their representatives in Parliament. A resolution was also adopted, calling on the government to use its entire influence for the immediate settlement of the Jewish question.

The suspension of Henry Schwabbe, of Liverpool, is announced. Liabilities about 50,000. A compromise of six shillings and eight pence in the pound is said to have been agreed.

There is a rumour of the appearance of the potato blight in the province of Munster, Ireland, but it was not regarded as very serious. The American horses Pryor and Priores, which had been entered to run for the Good Cup, had attracted attention in betting circles, and were backed at short odds.

Considerable rioting, resulting from the feeling engendered by the 12th of July celebration, had taken place between the Orangemen and Ribbonmen, at Belfast, Ireland, and on one occasion a serious collision of the military was the result, but fortunately without loss of life.

The London "Times" publishes a despatch from Paris, dated the 24th, stating that the Spanish government, after some hesitation, has accepted the offer of mediation in the Mexican question, made by Lord Howden, and the Marquis de Turgo, the name of the English and French Governments.

MARKETS.—Cotton active at 1/4 advance. Wheat dull; Flour declined 1/4; Wheat 2d.; Corn firm. Tens dull and unchanged. The London Money Market.—The London money market was slightly easier, but no change had been made in the Bank rates of discount. The billion in the Bank of England had reached £248,000.

Multiple our date for May 30th, had been received in England. Gold was selling in London at £3 17s. 6d. to £3 19s. 6d.; and £22 per ton.

Whisk business was being done in imports, confidence was re-established.

The steamer Great Britain left Melbourne for Liverpool 21st May, with 101,600 ounces of wool. At Sydney, wool had advanced, selling at 1s. 5d. a 2s. 6d. per pound. Flour and freights were unchanged.

FRANCE.—One of the arrested Italians is said to have made a full confession of the details of the recent conspiracy.

The Pays says that the British government has already communicated to Mazzini that, although England will continue to afford an asylum to political refugees, he could not any longer be allowed to prepare expeditions against foreign States on English soil.

It is also stated from other sources that the British Cabinet had promised to subject Mazzini to a strict surveillance.

The Paris correspondent of the "Independence Belge" says that the sending out of some French and English vessels to war of Tunis, is spoken of.

The "Monitor" alludes to the discovery of the Italian plot to assassinate the Emperor Napoleon, and says that it was concocted in London, placing Mazzini and Ledru Rollin among the accomplices to it.

The "Monitor" says the rumor that French troops are to be sent to China is entirely without foundation.

AUSTRIA.—It is said that the endeavours to effect a reconciliation between Austria and Russia are not likely to prove successful.

ITALY.—It is said that a Convention is to be signed between the sovereigns of the Italian States, with the exception of the King of Sardinia, to guarantee each other against revolutionary attacks.

INDIA.—There is nothing later from India. Intelligence was hourly expected when the Persia sailed.

A mass of papers had been laid before Parliament, but they added nothing of interest to the published accounts.

[From the London Court Journal, July 11.] Her Majesty's reception of the Queen of Oude, with her son and grandson, has at length taken place, and nothing could be more gracious than the welcome given by our Queen. The Queen of Oude left Harley House in great haste, her Indian crown being placed in the carriage. It is a lofty coronet, cap, in form something like the coronet of our peers, only higher and rounder at the top, and instead of velvet, is a mass of gold tissue, ornamented with jewels. On the top of the cap are placed some extraordinary silver ornaments, which sway and jingle about with every movement, producing a sound like a number of silver bells. From the rim of the crown depends the veil, which is really two curtains of gold and coloured tissue that meet over the face and then pass down each shoulder. The Queen of Oude wore a robe of gold tissue pendant from her shoulders, which was borne by a Hindoo "lady in waiting," who alone was permitted to enter the carriage with her. The Queen's dress was a blaze of Eastern magnificence, but she had adopted European fashions sufficiently to indulge in the finest silk stockings, though they were ornamented with gold anklets. Her female attendant was remarkable for the absence of gold and jewels, wearing a plain Indian dress, with large red stripes. The Queen, whose name and style is Jenabi Auleah Mootsiah Nawab Tajera Begum Sahed, was attended by a numerous suite, including Mohammed Joorat Allie Khan Bahadour, the Nawab Nezir, or chief eunuch; Inalood Dowlah Bahadour, an aide de camp; Nawab Mahdee Koollie Kan Bahadour, a great grandson of Nadir Shah; a chamberlain, a physician, a secretary, a diplomatic agent, and several other officers. The dresses of the Princess of Oude are doubtless familiar to most of our metropolitan readers.—They each wore the same sort of high coronet cap of gold and jewels, but ornamented with a few small feathers, and without the silver ornaments peculiar to the crown of the Queen. The young Prince was magnificent, decorated with jewels, the dress itself being composed of cloth of gold. The Oudians still delight in calling this Prince the "heir apparent," and his name and style are Wulies Auhad Mirze Mohammed Hemid Allie Bahadour. His uncle, the elder prince, is called Mirza Skunder Hushmut Jawaad Allie Bahadour.

ERRATA.—The successor of the late Dr. Cone of the First Baptist Church in New York, was spoken of in our last issue as Mr. Knox, it should have been Mr. Wolf.

Rev. Dr. Kirk, in a letter from Manchester England, says:—"I had in the oldest factory of the town a striking exhibition of the value of human art and labor. A pound of cotton was pointed out as worth a pound of gold. Its cost as crude cotton, may have been eight cents. And as a curiosity of art I was shown a pound of cotton spun into a thread that would go round our globe at the equator, and tie in a good large knot of many hundred miles in length.

A younger brother of the Rev. Charles H. Spurgeon has commenced preaching in England, with high prospects of success. According to the representations of the *Lincolnshire Times*, he has preached to large audiences in the corn Exchange Hall, Boston. The above named paper remarks that the younger Spurgeon's style of speaking possesses nothing in common with that of his brother, but in command of language and the choice of words he is, though but still a student, at the very best his equal.

A FAVORITE REMEDY.—We believe no medicine has ever given stronger proof of its efficacy than the Oxygenated Bitters. In cases of Dyspepsia and Colic, it is a most efficacious and cheerful remedy, when all other remedies have failed. It is very strong that some people will endure Rheumatic pains for days and nights, while a few applications of Perry's Bitters will procure a cure at any store, will entirely relieve them.

Wistar's Balsam of Wild Cherry. The Editor of the Boston Post says:—"We have not, until recently, been acquainted experimentally with the value of Wistar's Balsam of Wild Cherry in Pulmonary affections. We have received a present bottle, having recently used it in a case of severe cold and cough, with entire success, and most cheerfully recommend it to those alike afflicted. It is a scientific preparation and worthy of confidence." In the course of my practice in this vicinity I have tested the good qualities of Wistar's Balsam of Wild Cherry in Pulmonary complaints, and I now wish to procure a supply of the same. None genuine unless signed I. BUTTS on the wrapper.
