

THE FATE OF GEN. WALKER.

GEN. WALKER, the notorious filibuster, has come to an untimely end; or, rather, so near his end that, by the last advice from Central America, he was at the critical point between death and pardon. The Gray-Ryed Man of Destiny was captured a few weeks ago by a British war-steamer, and immediately handed over to the Spaniards, or more properly Spanish-American, whose territory he had so many times invaded, and whose government he had so many times threatened.

Ruller, his second in command, and seventy of his rank and file, were likewise captured. The two leaders were to be dealt with according to law, and the followers (many of whom were allured by audacious boasts into enlisting under the great filibuster) were to be sent free to the United States. It was thought that Walker's fate would be settled by a platoon of rifle balls through his heart.

It remains to be seen whether any of the pro-slavery politicians, in whose interest the filibuster undertook to conquer new lands for the extension of American slavery, will now interpose to save him, either by stratagem or rescue or by petition for reprieve. (American Ex.)

**NEW STEAMER.**—The new iron propeller, built for the Pembroke and Boston route, will commence her trips on the last week in September, and will, we learn, continue on the route all winter. She is owned by the Pembroke Steamboat Company, and is about 250 tons burthen. Capt. George Small, of Pembroke, will command her, and Mr. Thomas Norton, of Eastport, will be Clerk. We understand that the new boat will make one trip weekly between Boston and Pembroke, calling at Cutler, Lubec, and Eastport, going and returning.—1b.

**THE APPLE CROP.**—The apple crop in the States of New York, Connecticut, and New Jersey is prodigious, exceeding any fruit crop since 1848. In New York, the crop is short, as it was also in Maine, and these are the only regions where the apple will fail this year. The abundance affects prices, so that even the Newton pippins, which are chiefly relied upon for exportation, and for the last ten years have brought from three to six dollars a barrel, are now held at two dollars.

**CALIFORNIA.**—Our latest advices represent the market unchanged. A rather better feeling prevailed, but there were no changes in leading sales. More activity was expected shortly. The wage was scarce, and high rates have been paid.

**FROM HAVANNA.**—We have dates from Havana to the 17th inst. The Sugar Market was dull and unchanged. Molasses inactive. Exchange on London 154 1/2. Freight declining.

The Illinois Central Railroad is furnished with seventeen miles of cars, with the usual proportion of freight cars, but the grain crops of the State are so enormous, the road is incapable of doing all the transportation required of it.

**NEW YORK, Sept. 20.**—Freights to Liverpool easy; Cotton 3-16 at 7 3/4; Flour unchanged—Grain 12 a 13d.

**New Orleans, Sept. 19.**—Freights—Cotton to Havre 140.

The hull of the "Lady Elgin," supposed to have been carried down by the weight of the engine, has risen to the surface and rides at anchor, marking the spot where its 300 passengers went down.

The Red Sea and most of the Mediterranean telegraph cables have completely given out. There is now no long line of submarine telegraph in operation in the world. The short lines, however, between England and the continent, continue perfect.

Four Days later from Europe,

ARRIVAL OF THE "ADRIATIC"

NEW YORK, Sept. 24th.

The Adriatic, which left Southampton on the 18th inst., arrived at 10.

Garibaldi entered Naples on the 8th, and was received with the most intense joy. He proclaimed Victor Emmanuel King of Italy. The insurance was spreading in the Papal States.

The weather continued favorable in Britain for the crops. Flour steady at 76 3/4. Wheat quiet. Corn dull. Provisions quiet. Consols 92 3/4 for money and account.

**LETTERS FROM DR. LIVINGSTONE.**—Dr. Livingstone, the African explorer, has written home to state that he has discovered an opening into a "magnificent cotton field," to which he had long been seeking an entrance. He wishes, "to obtain freedom of navigation from the Portuguese to our discoveries," as he says this is indispensable, and he assigns as his reason that the Portuguese are of the lowest and most immoral class generally, and defile everything near them. Later advices state that the expedition is "all well." This letter comes from the lower part of the Zambezi, and its date is March 27.

**THE WEATHER AND THE HARVEST.**—Accounts from nearly all parts of the country are now of the most cheering nature, the fine weather which has been experienced in the metropolis during the last three or four days having been pretty general. In some churches on Sunday the prayer "for fair weather," which has been used for several Sundays past, gave place to the appointed thanksgiving that the Lord has in mercy "relieved and comforted our souls by this seasonable and blessed change of weather." In many dissenting churches also special thanksgiving were offered. It appears that from the 1st of September, 1860, to the 31st of August, 1860, the number of days on which rain or snow has fallen is 104, the proportion of wet to dry days being 53, or more than half. The majority of the remaining days have been dull, even though they have been dry.

The last few days of sunshine have been most favorable to the harvest in many localities in France. In many places the priests exhorted their parishioners to go into the harvest field without scruple on Sunday, assuring them that in such an emergency "to work is to pray."

**MR. LINDSAY, M. P.**—SENT ON A DIPLOMATIC MISSION.—Mr. W. S. Lindsay, M. P., has been authorized to proceed to Washington, to place before the American Cabinet and the Senate the views of her Majesty's Government with reference to the existing Navigation Laws of the States and its effects upon maritime commerce. Mr. Lindsay states on the 8th of September, "The above was taken from 'The Shipping Gazette.' Mr. Lindsay, however, writes to 'The Times'—'I am sorry you did not ascertain the facts concerning my visit to the United States before calling attention to it in your leading article of Saturday last. But, as so much has been said about it, I think it right to state that I do not visit that country in any official capacity whatever, and that the Government will not be responsible for anything I say or do. If I wished office, which I do not, I should certainly not aspire to that of special envoy.'

Mrs. Mirel of London has found that by passing a current of electricity through water in

THE "CUSTOM" AT DAHOMY.

It is the intention of her Majesty's Government to despatch an accredited agent to the dominions of the King of Dahomey in order to prevent a recurrence of the horrible rites of the "Custom." It is rumored that Mr. O'Brien who formerly filled the office of colonial secretary at Sierra Leone, and who adjusted the difference between the King of Benin and his subjects, will be the gentleman selected to discharge the onerous duty. The outfit allowed to the agent will be £400, and the salary £1,000, per annum.—[Army and Navy Gazette.]

Mr. Charles Babbage, the contriver of the calculating engine stated in the course of some testimony before a London magistrate, that he had made the number of people who might stand upon a given area the subject of thorough investigation, and the result proved that six adults required a square yard of room; while nine adults and children could be crowded on the same space.

In London, recently, twenty-two pictures of the choicest kind, from the Belvidere collection, were sold by auction, and brought the sum of \$125,000.

MARRIED.

At Harvey Bank, on the 12th inst., by the Rev. W. A. Coleman, Mr. Warren D. Peck, of Hopeville, to Miss Kuxley E., daughter of William W. Peck, of Harvey.

In Carleton, on the 23d inst., by the Rev. Isaiah Wallace, A. M., Mr. John Stewart, of Portland, to Miss Rebecca Hayes, of St. John.

DIED.

On the 19th August, Priscilla Frances, wife of M. F. Hammond, of Kingsclere, York County, aged 23 years. Her end was peace.

At New Castel, Grand Lake, on the 30th July, Mrs. Jane Williams, aged 68 years. Mrs. Williams professed religion in Wales at the age of 18 years, after which time she with husband and children came to this place, and when the Baptist Church was organized here, became one of its members.

Our sister, although poor as regards this world, yet was rich in faith; ever ready to converse about Christ and his Kingdom. She lived in the faith of the Gospel and died in peace. She could say "I am ready to depart and be with Christ, which is far better." Thus died our sister, leaving a numerous connection of friends and relatives to mourn her departure.

Also Mr. Christopher Graham, of the same place, died Aug. 6, aged 83 years. Our esteemed Brother was ever pleased to meet with his Christian friends. The subject of religion was his theme, and he loved to commune with his God. His last days were days of very great suffering; yet his mind appeared stayed upon his God, and he could look upon death not as his enemy but his friend; and he could say as in the language of the poet—

"Fly swifter round, ye wheels of time,  
And bring the welcome day."

Thus our Brother left the Church militant to join the Church triumphant in heaven. Our Brother died leaving a large circle of friends to mourn his loss.

Thus the Church at New Castle is called to part with two of its oldest members. May the Lord sanctify this dispensation to many hearts. On Saturday, 22d inst., of Dysentery. Welby Eliza, aged 2 months and 16 days, youngest daughter of Mr. C. H. Tucker.

Suddenly on Monday, 24th inst., Eliza, wife of Isaac H. Anderson of this city, aged 50 years. On Monday, the 24th inst. after a short and severe illness, Mr. Hugh Culnan, aged 50 years, leaving a wife and one child to mourn their loss.

UPHAM, Sept. 14th, 1860.

DEAR VISITOR.—It becomes my mournful duty to send you notice of the death of two more of brother Barn's children.

Of Diphtheria, on Friday 7th inst., Harriet M., aged 15 years and 8 months, eldest daughter of Rev. George Burn.

The deceased was the subject of religious awakening in the revival enjoyed here last winter; but she did not at that time find peace in believing.

A short time before she was taken sick, her convictions returned with great power, taking deeper hold of her heart as the dreadful disease seemed to hurry her towards eternity. Harriet had always been esteemed as an amiable young person; yet she declared that she saw herself to be a very wicked sinner. On being asked what gave her the most trouble of mind, she answered, "I have cherished hardness of heart and unbelief. I knew that the Saviour wanted me to give him my heart. I have loved and grieved the Holy Spirit, Jesus. While her mother was reminding her of the invitations and promises, and exhorting her to believe on Jesus, she said, 'I begin to see a ray of hope.' The days of her mourning were ended." That first ray was succeeded by clearer light, until finally all her anxiety and sorrow having been removed by him who had "borne her griefs, and carried her sorrows," she sweetly fell asleep in Jesus.

Also, on Tuesday 11th inst., of the same disease, Richard W. H., aged 19 years and 2 months, eldest son of Rev. George Burn.

The deceased was baptized by brother J. A. Smith in the winter of '58. He was in every respect an exemplary young man, whose early death is sincerely lamented by the church and community. He was remarkably sustained by divine grace during his sickness, and in death enjoyed the hope of the Righteous.

A. B. MACDONALD.

(For the Christian Visitor.)

Death is doing its work among us. Our esteemed Bro. Deacon Benjamin Bray is passing through deep waters of affliction, from whose embraces has been torn by the ruthless hand of death, the partner of his youth, and while those severed ties bleed, nature seems to shrink beneath sorrow's pressing weight.

Sister B. was long the subject of affliction and pain, during the last seven years of her life she was seldom able to go to the house of God, but while deprived of this privilege, which she ever valued above most others, she lived in daily communion with her Heavenly Father at home, and dwelt on no subject with such pleasure as her love to sinners; during her last illness she seemed to lose sight of everything pertaining to this world, and as though she had already got a sight of the pure bliss of Heaven, desired to depart and be with Christ which is far better.

She fell asleep in Jesus on the 22d inst., aged 57 years. "Blessed are the dead that die in the Lord." She has left to mourn their loss an affectionate husband, 10 children, and a large circle of friends.—[Com.]

HARVEY, Sept. 11th, 1860.

[Christian Messenger please copy.]

Deacon James Calhoun, of Hopewell, is again called to drink the cup of sorrow; yesterday he was called to the eternal remains of his loved daughter, Elizabeth, the silent grave, she died on the 8th inst., aged 22 years. She had been a professor of religion several years, and toward

SHIP NEWS.

ARRIVED.

THURSDAY, 20th.—Schr Margaret Ann, Whelpley, New York, Eaton & Bovey, gen. cargo.  
Schr Mecca, Regent, Eastport, W. M. McLean, Am. Ship Emory St. Pierre, Tessier, Charleston, J. Mackay, do.  
Am. Ship Bay State, Crowell, Portland, V. McLean, do.  
Hamburg ship Manilla, Dehrens, Boston, do.  
FRIDAY.—Ship Somerset, McNear, Bo-ton, Wm. Thomson, ballast.

Barge Juverna, Kirby, Cape of Good Hope, Chidley & Snider, ballast.  
SATURDAY.—Ship Sorocco, McColloch, Liverpool, J. Morrissey, coal.  
Bark Retriever, Spaulding, Dundee, R. Rankine & Co.  
Ship Gertrude, Doane, Liverpool, Gilbert & Co., gen. cargo.  
Brigt Margaret Elizabeth, McDougal, Salem, W. McLean, bal.  
Schr Lizzie Sturges, Willingale, Boston, E. D. Jewett & Co., do.  
Aloe, Martin, Philadelphia, Kinnear Bros., opal at the Island, brig Isabella, from Tron, C. McLaughlin & Co.  
TUESDAY.—Ship Henry, Davis, Liverpool, D. T. Vaughan, coals.  
Brigt Albion, Evans, St. Vincent, W. Thomson, bal.  
Brigt Mary, Mahony, Providence, master, bal.  
Brigt Zephyr, Hagarty, Cork, S. Wiggins & Son, do.  
Schr Ocean Bird, Lockhart, New York, G. A. Lockhart & Son, gen. cargo.  
N. C. Harris, do., Eastport, W. McLean, bal.  
Amanda, do., do., do.

CLEARED.

19th.—Ship Belmont, Grant, Liverpool, B. Lingley, deas, Thetis. Chipman, Liverpool, J. L. Woodworth, deas; bark Hiawatha, McDonough, Kingston, W. G. Carvill, deas; Brigt Maria C. E. Fowler, Barbados, Eaton & Bovey, and others, deas.  
20th.—Schr Elizabeth, Gillespie, Londonderry, W. & G. Carvill, deas; schr Arno, Parker, Providence, J. D. Sturges, ends.  
22d.—Schr Helen Bryson, Price, Providence, A. T. Heny, singles.  
24th.—Schr Volga, Kennedy, Providence, W. M. McLean, boards; schr Guldane, Hays, Eastport, R. Rankine & Co, deas; ship Parliament, Leach, Eastport, John Robertson, do.  
25th.—Ship Great Australia, Baker, Liverpool, J. L. Woodworth, Cudrip & Snider, and others, deas.

MEMORANDA.

Sid from Providence, 17th, brig Mary, do. Ard at Alexandria, 10th, Brig Robert Road, hence: 18th, Brig Athol, Maison, hence in 12 days.  
Cld at London, Aug 30th, Parkfield, McLean, this port; at Liverpool, 30th, Mansanito, Larkins, do; 31st, Boadicea, Coulthart, and Empress, Lyons, both for New Orleans.  
Ard at Liverpool, A. H. Stevens, Antelope, Arrow, and Louisa Sewall, Saileed-Argentine, Dundalk, Empire Queen, Jeddo, and Queen of the West.  
Sailed from Alexandria, 19th, brig Sir. Colin, Croscup, for this port.  
Ard at New York, 20th Clifton, Belyea, hence. Cld. at 22d, brig Allandale, brig Louisville, and Schr Gilbert Bent, all for this port. Cld at Boston 21st, schr. J. H. Scammell, McLean, do; 22d, bark W. H. Jenkins, Churchill and schr Onward, Munro, do. Ard at Boston, 23d, bark Goodwin, Durkee, Danke, from Glasgow.  
Spoken by brig Albion, Capt. Evans, which arrived this day, on 19th, in lat. 40 15 N, long 64 1 W, ship Adams, of and from Castine, for New Orleans.  
Ard at Halifax, 23d, schr Julia, Simpson, hence. At New York, 19th, Independence, McAlmon, Dorchester.  
Capt. Levis of the Princess Victoria, reports passing, lat 45 46 N., long 51 28 W., a large new ship, steering E. S. E., under low sail, throwing deck load overboard, consisting of deas, battens, &c., had a full figure head painted white, with painted ports, round stern and a poop.

NOTICE.

The New Baptist Chapel at the Mouth of the Keswick is to be opened for Divine Service, (D. V.) on the 2d Sabbath in October, at 11 o'clock, A. M. Rev. I. E. Bill, by special request, is expected to preach the dedication sermon. sept 26

QUARTERLY MEETING.

The Quarterly meeting for Queen's and Sanbury will hold its next session in the Church at Jemseg, On the 1st Friday in October at 2 o'clock P. M.

J. E. GOUCHER, Secretary.

NOTICE.

The next Quarterly Meeting in connection with the York, Carleton and Victoria Counties will be held with the Baptist Church at Becraft commencing the first Friday in October at six o'clock P. M. We hope that all the ministers and so many of our Brethren as can attend will give their attendance.

BENJAMIN JEWETT, S. C. C.

NOTICE.

The next Quarterly Meeting of Albert County will be held with the Baptist Church at Hopewell, commencing at Hopewell Hill on Friday the 28th of September, at 2 o'clock P. M. A large attendance is desirable—especially are the Churches of the County anxiously solicited to attend.

LEVY H. MARSHALL.

P. K.

We have but little confidence in the trumpet tongued statements of the proprietors of advertised medicines generally, by all who have used Perry Davis' Pain Killer and his best of diseases, external and internal, that it is a very valuable article, and one that it would be well for every household to have at hand, in case of illness, such as, Burns, dislocations, dysentery, cholera, fever and ague, and the best of diseases, external and internal, which is so adapted to cure or alleviate. No article of medicine has so long enjoyed such universal popularity and extensive diffusion. Invented only sixteen years since, its curative powers have been experienced by many, many thousands in every section of the United States and Canada. It has penetrated to every part, even the most remote, and has been found to be a most valuable remedy in all cases of acute or chronic disease, and in all cases of pain, and in all cases of inflammation, and in all cases of fever, and in all cases of dysentery, and in all cases of cholera, and in all cases of fever and ague, and in all cases of the best of diseases, external and internal, which is so adapted to cure or alleviate. No article of medicine has so long enjoyed such universal popularity and extensive diffusion. Invented only sixteen years since, its curative powers have been experienced by many, many thousands in every section of the United States and Canada.
