Perry Davis' Vegetable Pain Killer. THE UNIVERSAL REMEDY FOR INTERNAL AND EXTERNAL COMPLAINTS !

At this period there are but few of the human race unacquainted with the merits of the Pain Killer; but while some extol it as a liniment, they know but little of its power in easing pain when taken internally, while others use it internally with great success, but are equally ignorant of its healing virtue, when applied externally. We therefore wish to say to all that it is equally successful whether used internally or externally, and it stands alone unrivalled by all the great catalogue of Family Medicines, and its sale is universal and immense. The demand for it from India and other foreign countries is equal to the demand at home, and it has become known in these faroff places by its merits.

CABINET ORGANS .- We are sure we are doing a real service to smaller churches and Sunday-schools, as well as to lovers of music generally, in calling attention to the Cabinet Organs manufactured by Messrs. Mason & Hamlin. No one who hears these instruments will be surprised at the very strong favor with which they are regarded by our leading organists. Their quality of tone is admirable, round, sonorous, pure, and sympathetic; while they have abundant volume of tone for any private house, and quite sufficient for smaller churches and such halls as are usually occupied by Sunday-schools. With all this, their capacity for expression is wonderful, exceeding in some respects even that of the largest and most costly church organs. This is mainly effected by the introduction of a swell, operated upon an entirely new principle, which gives the performer very efficient control of the tones he produces. The moderate prices at which they are sold, and the little space they occupy, are important practical advantages in these instruments. - New York Commercial Advertises.

MASON & HAMLIN. MANUFACTURERS OF CABINET ORGANS AND PORTABLE ORGANS, Adapted to Secular and Sacred Music ; for Drawing-Rooms, Churches, Sunday and Day-Schools, Lodges, &c.

Uniting to a considerable extent the capacity of the Piano-Forte with that of the Pipe-Organ, and costing much less They occupy little space; are elegant as furniture; not liable to get out of order, and are securely boxed, so that they can be sent anywhere by ordinary freight routes, all

Forty Styles, plain or elegant cases; one to twelve stops Prices, \$75, \$90, \$110, \$125, \$130, \$140, \$150, \$160, \$170, \$200, \$225, \$250, \$300, \$435, \$500, \$550, \$600, and upwards
The Mason & Hamfin Cabinet Organs were introduced four years since, and are a great improvement upon the Melodeon, Harmonium, and other reed organs, greatly excelling them, especially in the excellent quality and variety of their tones; in power and quickness of action, and ca-

pacity for expression.

Their success has been entirely beyond precedent, and proves how greatly such an instrument was needed. Again and again the manufacturers have been compelled to dou-ble their manufacturing facilities, until they have increased six-fold. From the most eminent of the musical profession, the most distinguished pianists, organists, composers and musical directors, the Mason & Hamlin Cabinet Organs have received an amount and degree of commendation nev-er before bestowed upon any similar musical instrument. More than two hundred and fifty of the most eminent musicians in the country have given written testimor the value of the improvements contained in them, and that they excel all other instruments of this class.

Fifty five Gold or Siver Medals, or other highest Premi-ums, have been awarded to Mason & Hamlin for the im-portant improvements effected by them, and for the supe-riority of their instruments to all others.

Constantly exhibiting their instruments in competition with others, they have been awarded the highest premium in every justance, but three or four.

For churches, sunday schools, &c., the MASON & HAM-LIN CABINET ORGANS are the instruments long wanted,—of the very best quality, abundant power, not too expensive, nor liable to get out of order. For private use, in drawing rooms, &c., they are not less lesirable, and are finding a place in the musical families of the principal cities.

They are adapted to a wider range of music than the Piano, being better fitted for all sacred music and for much secular music, while their quickness of action is such that the most lively, rapid music can be played on them. Then their cost is greatly less, as well as their liability to get out of order.
