MARGARET TORRINGTON:

OR, THE VOYAGE OF LIFE.

By the Author of "Violet Vaughan," "Sir Julian's Wife," "St. Beatha's," &c.

"So He bringeth them unto their desired haven."—Psalm cxi. 5.

(Continued.)

MY SECOND BREAKFAST.

It was of no use. I had struggled till I could struggle no longer. All at once my senses seemed to fail: I believed that I was an indeed an ingrate, an impious, self-willed girl; that my uncle had been most generous, most kind; and that I had repaid him shamefully. I had striven well and perseveringly; but, after all, I was not a full-statured woman, only a poor, weak girl, and my heart failed me, so I fell back upon the usual resource of girls, and cried bitterly and unrestrainedly. Meanwhile there was an awkward silence, and each moment as it passed added to my discomfiture and diminished my little stock of self-possession.

At length my uncle resumed:—"Dear me! all this is very foolish; what have you to cry about? Your aunt will overlook your hasty remarks, I have no doubt. My dear, she is sorry, you see. I am sure you will forgive the temper she has shown. It was very unbecoming and most uncalculated for me; but there may, perhaps, be some little excuse. Margaret has been a spoiled and petted child, and accustomed to her own way, and she has gone through much trouble lately. No doubt she is a little unbalanced; but let us hope that in a day or two, when she has settled down in her new home, she will see things in a different light. There, leave off crying, and be reasonable. Let us finish our conversation, and then it will not have to be renewed."

Thus exhorted, I made a mighty effort, and succeeded in wiping away my tears and presenting an air of composure which was very far from genuine. I could not help sobbing hysterically, and my hands trembled visibly; but I wept no more, and prepared myself to listen attentively. Mrs. Crofton then addressed me: "Perhaps, after all, this little outburst may do you good. I am quite ready to make every allowance for you; your training has evidently been not of the best kind, and you are naturally excitable and impulsive, and you have not been taught the duty of deferential respect towards your elders and superiors. If you wish to succeed in life, you must know your own place and keep it. You may be very comfortable here if you like; you will have a place in the school-room, and you will have the same advantages as your cousins, who are under Miss Hollingsworth's care. I am sure I hope you will profit to the utmost by her instructions. In return, I only wish you to devote yourself to your little cousin Gussie. She has a peculiar temper, and servants have not patience with her; she unfortunately dislikes Miss Hollingsworth, and cannot endure the school-room. You, therefore, will take charge of her: it will be very good for you, and you will gain some experience in teaching and taking charge of children. Gussie will sleep in your room, and you will give her such assistance in dressing as she requires. You will also give her two or three hours in the morning, hearing her read and practice, and one hour in the afternoon you will spend with her, giving her such lessons as Sibyl or I shall arrange. All the rest of your time will be at your own disposal, and I trust you will make diligent use of your opportunities and improve yourself to the best of your ability. If you choose, you may make yourself very useful in this house. I should like you to read to me sometimes, and if you have a voice, you can practice Sibyl's duets with her; only I must have you patient and conciliatory with Gussie."

"Aunt," I said sorrowfully, "I am sure I shall never manage Gussie; I lost all patience with her this morning."

"So I heard, and I was very much shocked to hear of it. I cannot have Gussie excited; her nervous system is so peculiar that I have known her to scream till she was perfectly exhausted when some one has been injudicious enough to oppose her."

"But she uses her nails and her teeth."

"You must not believe all you hear in the nursery. Nurse and Rebecca make the worst of her; she is a very interesting child when properly managed; you must try to understand her, to win her affections. When she gets into her tantrums, you must try the soothing system; she will not bear opposition or coercion."

I did not say it, but I thought that to win Gussie's affections would be a very difficult, not to say impossible, task; but I did ask what I was to do if she would bite and scratch, or, as Cuddie phrased it, "nip pieces out of one."

I replied by drawing up my sleeve, and showed the discoloured and still raw flesh where the nipping process had been effected. My uncle looked really shocked, but my aunt said calmly, "It is precisely as I said—you must have made her very angry. Now, probably, she will take a dislike to you, and it will be some time before you gain any influence over her."

Accordingly, I narrated my morning's experience; how I had been awakened by something sitting on my chest, how I had desired Gussie to go to her own bed, and all the rest of the story; but Mrs. Crofton only shook her head, and reiterated her opinion that I had not been sufficiently patient. "However," she continued, "I have business now to attend to, and I must go away, and in conclusion I can beg you for your own sake to be humble, good-tempered, and industrious. You understand that Gussie is under your care, and I shall hold you responsible for her general improvement, also for all defects in her appearance and behaviour. To-morrow, under Sibyl's direction, you will arrange about her lessons, and I should be very much pleased if you could get her hair to curl."

I felt very much as if a tiger's cub had been committed to my fostering care; if I had been appointed nursery-governess to a young parthenon, my task could scarcely have been more hopelessly trying. I knew that there would be everlasting *casus belli* between Miss Augusta and myself. As Mrs. Crofton was leaving the room I said, "I will do my best, aunt, and I will endeavor to be patient, but I cannot promise you to take unreasonably such treatment as I experienced this morning. I will always try persuasion, but if that fails what am I to do to do to force?"

I felt that I had better say so much, since I knew that there had been turbulent seasons when, according to the nursery chronicles, the young lady had cleared the table of the tea-things, and tossed baby's basket into the fire, and thrown Rebecca's work-box out of the window; and surely then vigorous measures were essential! Mrs. Crofton replied vaguely, "that physical force was always injurious to a child, and that she hoped we should get on comfortably without collisions, and that I should see the necessity of controlling my own temper." Still, I had made my protest, and in some measure I felt relieved. Sibyl now desired that I would follow her to the school-room, and tremblingly I obeyed, wondering sadly whether Miss Hollingsworth would be my friend, or whether she would render my position at Crofton House more endurable than it promised to be already. I admired her for her frankness in refusing to admit the refractory Gussie into her own special precincts, and yearningly I hoped that she might be kind, and wise, and altogether good, and so far as in her lay, shelter me from the stormy gales that threatened to blow so roughly about my unadorned head, or at least

strengthen me to meet with courage and composure all coming shocks of the rising tempest.

Was this being launched on the voyage of life? If so it was rough enough, and cold, and dark, and dreary. Oh! to be in the haven again, if it were only for one little hour!

(To be Continued.)

MARKETS.

Revised every Wednesday, for the Visitor.

COUNTRY MARKET.	
Butter, in firkins, 1/2 lb.	\$0 15 to 0 19
"Roll, 1/2 lb.	0 24 to 0 25
Beef, 1/2 lb., quarter	0 04 to 0 06
"do, 1/2 lb., smooth	0 10 to 0 12
Buckwheat, 1/2 cwt.	1 60 to 1 80
Calfskins, per lb.	12 to 13 1/2
Cheese 1/2 lb.	11 to 12 1/2
Chickens, 1/2 pair	30 to 35 00
Cordwood, at the station	5 50 to 6 00
Eggs, 1/2 dozen	0 15 to 0 20
Geese, 1/2 pair	0 40 to 0 50
Hams and Shoulders	0 14 to 0 15
Hides, per lb.	0 05 to 0 06
"at the Hay Market	8 00 to 13 00
Mutton, 1/2 pair	15 to 16 00
Lamb, per lb.	0 06 to 0 07
Lamb Skins	0 55 to 0 60
Oats per bushel, new	0 45 to 0 50
Potatoes, 1/2 bushel	0 00 to 0 05
Tallow per lb., rough	0 07 to 0 08
"rendered, per lb.	0 10 to 0 12
Turkeys, per lb.	9 to 10 1/2
Turpins, per bushel	0 30 to 0 35
Veal, per lb.	0 04 to 0 06
Wool	0 25 to 0 30

MARKET SLIP.	
Apples, per bushel	\$0 50 to 4 00
Potatoes, per do.	0 25 to 0 40
Oats, do.	0 00 to 0 55
Barley, do.	0 05 to 0 80
Butter, 1/2 lb.	0 17 to 0 18
Eggs, per dozen	0 15 to 0 16
Codfish, 1/2 qt.	8 50 to 4 00
Pollock, do.	2 25 to 2 40
Haddock, do.	0 00 to 2 00
Shelburne Herrings, 1/2 bl.	4 50 to 4 75
Bay, do.	0 00 to 3 25
Dry Herring, 1/2 box	0 50 to 0 75
Flour, 1/2 bushel	75 to 1 10
Corn Meal, do.	4 50 to 4 75
Outmeal, 1/2 cwt.	8 00 to 3 25
Sugar, 1/2 lb.	0 09 to 0 10
Tobacco, do.	0 25 to 0 55
Molasses, 1/2 gallon	0 38 to 0 45

THIS is an age of inquiry. People want to know the why and wherefore of all statements submitted to them as facts, and as far as this is possible, we will endeavor to give them the reasons for our statements. We are not, however, in a position to do this in every case, but we will endeavor to do so in as many as we can. We are not, however, in a position to do this in every case, but we will endeavor to do so in as many as we can.

GREAT PROTECTIVE AND INVIGORANT is concerned, it is proposed to gratify them. All the physicians admit that the greatest difficulty they encounter in their practice is in conveying to the seat of the disease the medicine that will counteract the disease. It is now generally admitted that the electric fluid is too subtle an agent to be made the vehicle of medication. It shocks the nerves, but cannot distill through the system anything except itself. Medicated electricity, in short, an exploded humbug. But a liquid stimulant, such as Sarsaparilla, can be taken in the most palatable manner, and every substance in the *Materia Medica*, and there is no herbal extract which it will not hold in solution, with all its preventive and curative virtues unimpaired.

Now the pure liquid stimulant of which Hostetter's Bitters are in part composed, is charged with invaluable vegetable remedies; and these, by reason of its powerful diffusive principle, it conveys to every organ and introduces into the circulation. To use a common expression, it goes to the spot, taking with it just what is wanted there. The sense of Rye would undoubtedly diffuse itself through the organization as swiftly if administered pure and simple, as if mixed with the tonic of iron and appetite, such as Sarsaparilla. But of what use would it be without its healing, strengthening, life-sustaining balm? It would merely excite. It could neither protect nor cure. It would merely excite. It could neither protect nor cure. It would merely excite. It could neither protect nor cure.

Under the general head of Dyspepsia may be classed all the various forms of indigestion, and the symptoms are so various, and differ so much in different individuals, that it is almost impossible to classify them. In fact, some of them are indescribable. It may be safely asserted, however, that half the diseases of mankind spring from the disordered state of the stomach; and that the other half, whatever their origin, react upon that sensitive and important organ. Among the ordinary indications of Dyspepsia are flatulence, a bloated and full feeling about the stomach, a sense of hollowness at the pit of the stomach between meals, a dull heavy feeling in the head, or a feeling of oppression, or a sense of restlessness during the night, and a weary, unrefreshed feeling on rising in the morning, palpitation of the heart, depression of mind, sometimes amounting to monomania, confusion of thought, and sometimes amounting to a complete prostration. These are a few of the direct signs of Dyspepsia, but as it is generally complicated with specific affections of the bowels, the liver and the nerves, its indications are often very peculiar, and which are technically attributed to other causes.

The best advice that can be given to any one who has the slightest predisposition to Dyspepsia, is to fortify his or her digestive organs by the use of Hostetter's Bitters. The disease proceeds from a lack of vigor in the stomach, and this vitalizing preparation will tone and renovate that organ. If the gastric apparatus is in good working order, and can perfectly dissolve and thoroughly assimilate the food submitted to its operation, there will be no need of Sarsaparilla. It cannot do this, it requires reinforcement, and the best of all reinforcing agents should be forthwith resorted to. The stomach is the commissary of the system. It supplies the element of life to the whole body. It is in preparation of blood, muscle, bone and fibre, and if it fails to purvey that material in sufficient quantity and of a proper kind, the whole body suffers, and with it the digestive faculty. Therefore protect the "Commissary Department." Don't let the enemy obtain possession of it. It is easier to prevent disease from getting into an organ, than to expel it after it has become seated there. Hostetter's Bitters is a powerful tonic, and it is in preparation of blood, muscle, bone and fibre, and if it fails to purvey that material in sufficient quantity and of a proper kind, the whole body suffers, and with it the digestive faculty. Therefore protect the "Commissary Department." Don't let the enemy obtain possession of it. It is easier to prevent disease from getting into an organ, than to expel it after it has become seated there.

Hostetter's Bitters. This balm is grounded on twelve years' experience of the efficacy of the preparation. The first instance of its failure to give relief is yet unrecorded. If it ever had failed, the voluminous correspondence addressed to the proprietors from all parts of the United States and South America, would have been a record of its failure. It is a remedy of the most reliable kind, and it is in preparation of blood, muscle, bone and fibre, and if it fails to purvey that material in sufficient quantity and of a proper kind, the whole body suffers, and with it the digestive faculty. Therefore protect the "Commissary Department." Don't let the enemy obtain possession of it. DR. KNIGHTS' HAIR DRESSING!

A VEGETABLE PREPARATION For Preserving and Beautifying the Hair, Contains neither Oil nor Alcohol.

This article has been prepared with a view to supersede the pernicious compounds so common in the market, the use of which has been almost invariably attended with the growth and beauty of the hair. It is especially adapted to the use of LADIES AND CHILDREN, with whom it is a UNIVERSAL FAVORITE. Persons whose hair has been thinned by sickness or age should give it a trial. A VEGETARIAN GROOMING RESULT. By the use of DR. KNIGHTS' HAIR DRESSING, the hair is beautified, its growth is improved, and the scalp is cleansed, nervous headache is cured, hair cutters are eradicated, and all causes of eruptions are removed.

DR. KNIGHTS' HAIR DRESSING is prepared by E. R. KNIGHTS, M. D., Chemist, Melrose, Mass., and sold by all Druggists, Perfumers, Fancy Goods Dealers and Merchants generally, at One Dollar per Bottle.

DR. KNIGHTS' Oriental Hair Restorer

Is the only preparation in use which invariably cures GRAY AND FADED HAIR TO ITS ORIGINAL COLOR. Its effects are so uniform and speedy, as to be regarded almost miraculous. It gives UNIVERSAL SATISFACTION, a single trial proving its superiority over all other articles offered to the public under similar names.

The verdict of the people is in its favor. KNIGHTS' ORIENTAL HAIR RESTORER is a scientific discovery, prepared under the superintendence of an eminent Chemist, and is approved, recommended and used by the medical faculty. It will not soil or stain the skin, or any article of apparel, is exquisitely perfumed, is put up in large bottles, and is sold by all Druggists, Perfumers and Fancy Goods Dealers.

Price—\$1.00 per Bottle. Prepared by E. R. Knights, M. D., Chemist, Melrose, Mass.

DR. LAROOKAH'S PULMONIC SYRUP

FOR THE CURE OF Coughs, Colds, Whooping Cough, Croup, Asthma, Catarrh, Influenza, Bronchitis, Spitting of Blood, Pleurisy, Inflammation of the Lungs, Chlo. P. in Child, &c. It is a powerful expectorant, and is especially adapted to the cure of Coughs, Colds, Whooping Cough, Croup, Asthma, Catarrh, Influenza, Bronchitis, Spitting of Blood, Pleurisy, Inflammation of the Lungs, Chlo. P. in Child, &c.
