A vagrancy law comes into effect in Quebec Province next week. It punishes with imprisonment all persons having no visible means of support and no income. The Act is aimed at professional criminals, and it is said that a perfect cordon of gamblers has been taken place already.

PARLIAMENTARY.
The Government Bank Act contemplates the withdrawal of all bank notes and government legal tenders now in circulation, and the issue of bank notes secured by Government debentures; that is, promissory notes of the several banks certified by a government official to be secured by deposit of debentures. There are many other peculiar features in the Bill, and it will be vigorously opposed by those interested in the Banks of the Dominion.

A Bill is before Parliament to make vaccination compulsory throughout the Dominion. Every child born in Canada is to be vaccinated within a certain period after birth, and penalties are prescribed for violation of the act.

Parliament has resolved by a vote of 80 to 60:— "That in the opinion of this House it is expedient after the strong desire expressed by Her Majesty's Government in the despatch of his Grace, the Duke of Buckingham and Chandos, dated 30th July, 1868, that the present salary of the Governor General should be maintained, that the salary of the Governor General should be fixed at \$10,000 sterling."

Newfoundland delegates have arrived.
The Prince and Princess of Wales were magnificently entertained during their stay at Constantinople, and their visit gave occasion to sundry innovations which the Sultan seems willingly to have yielded to, amidst the shaking, it may be supposed, of a grave head on the shoulders of old-fashioned Turkey who would prefer the existence of former days to be adhered to, rather than foreign customs to break in upon Mussulman forms. The Princess and three other ladies actually sat at the Grand Signor's table! The Prince had to be invited to dinner, and it would not do to ask him to come without his wife, so the Princess had to be asked, too, and she had to be suitably attended. Young Turkey begins to show the signs of being open to the world, and to apply it twice a day, and they will gradually disappear.

The elevation of the whole sex will be the necessary consequence, and the social state of the people will be in the course of twenty years, what entered not into any Turk's head twenty years before 1860. Their Royal Highnesses paid a short visit to the Crimea, returned to Constantinople on the 17th, but made no stay; on the 20th of April they arrived in Athens.—*Ex.*

Blood spavins may be effectually cured by Dr. Dow's Sturgeon Oil Liniment. Wet the bandage with the Liniment and apply it twice a day, and they will gradually disappear.

A dose of Professor Clark's Derby Condition Powder administered occasionally, will improve greatly the appearance of your horse, and cause him to assume a smooth glossy coat.

The human family is so numerous that a birth and a death occur every moment. Every second a child is born; every second some one dies. The prevalence of sickness in the world may be realized in Dr. J. C. Ayer's Laboratory, where medicines are made for all mankind. It would scarcely seem that there are throats enough to swallow the doses he issues daily—Ayer's Sarsaparilla, Ague Cure, and Cherry Pectoral by the thousand gallons, and Ayer's Pills literally by the ton. But they must all be wanted, or he could not make such quantities for so many years.—*[Northfield Telegraph.]*

The Peace Society has met and resolves were adopted regretting rejection by the United States Senate of the Alabama claims treaty, hoping if the statement of the two countries are unable to grapple with the emergency, that the reason and Christianity of the two great Anglo-Saxon nations may interpose to prevent a war, and bringing in the activity and earnestness of the peace cause.

London.—It is definitely ascertained that the rumor of an alliance of France, England and Spain against the United States is without any foundation. Despatches from Marseille report much excitement in that city over the election. Large crowds have gathered in the streets, and there were shouts of "Vive la République." Places of business were closed in anticipation of a riot. At last accounts order had been restored.

The result of the election in Paris and Lyons has been favorable to the anti-imperial candidates.

Coughs and Colds.

Sudden changes of climate are sources of Pulmonary, Bronchial, and Asthmatic affections. Experience having proved that simple remedies often act speedily and certainly when taken in the early stage of the disease, recourse should be had at once to "Brown's Bronchial Troches," or Lozenges. Few are aware of the importance of checking a cough, or "common cold," in its first stage. That which in the beginning would yield to a mild remedy, if neglected soon attacks the Lungs. "Brown's Bronchial Troches," or Cough Lozenges, allay irritation, which induces coughing, having a direct influence on the affected parts. As there are imitations, be sure to obtain the genuine.
