THE UPPER PROVINCES.

Ensign Whittaker died on the 10th inst. His edical attendant states that the immediate cause o his death was inflammation of the brain, ending in his death was inflammation of the brain, ending in suppuration and producing delirium. The Coroner at the inquest charged the Jury to cast aside any sympathy which they might have for the deceased or for the prisoner, that it may not bias your minds and influence your verdict. Of the cause of his death and the person killing, there can be no doubt in your minds. It is my duty to tell you, that no provocation, however grievous, can render homicide justifiable or even excusable. The least that it can amount to in contemplation of law is manslaughter.
As an example I will say: If a husband find another man in the act of adultery with his wife, and in transport of passion kill him, it will be manslaughter; but if killing be deliberate, it will be murder. You have in evidence in this case, direct evidence establishing the lying in wait and killing, and in my opinion a moment of serious reflection will convince you all, that by the oath you have taken and the strong evidence laid before you, only one course is left open, and that is to find that the prisoner feloniously, wilfully, and of malice aforethought, took At two o'clock the jury returned with the follow-

Senator Sumner has prepared a long and careful speech on our relations with England, which he will deliver at an early day. It is understood that he takes very high ground on the subject of the Aiabama claims, and will express strong dissent to the treaty made by Mr. Reverdy Johnston. He holds that England is responsible for a good d al more than the destruction of our ships, because her action with reference to rebel privateers drove our commerce from the seas. Diplomatic circles are considerably exercised over what they have heard about the speech. The British minister thinks it looks like war, while the French minister is credited with saying that it looks like Canada.

Beware of all Washing Compositions and Pluids whatever, that contain Lime, Turpentine, Alcohol, and other ingredients that eat up the clothes and injure the health. "Clark's Excelsior Washing Composition" is patented, and warranted perfectly free from everything injurious to clothes, hands, or health. It is especially recommended for cleaning windows, and the repeated use of it on wood tends to make it glossy. It also gives a beautiful polish to silver-plated ware, tin ware, brass. &c. I am willing it should rest on its own merits. All I ask for it is a fair trial, and, if it does not give full satisfaction, the money will be cheerfully refunded.
