Temperance.

Temperance and Intemperance.

The "Chicago Journal" says there is a poor fellow in jail who was fined \$205 by a suburban Justice for being drunk. As there is no prospect of his ability to lift the encumbrance, he applies to the County Court for release under the Poor Man's Act. If all the fellows that got on sprees in the city were treated according to suburban interpretation of the law, what an interesting record the jail register would present every morning.

James Parton concludes a recent article upon the habits and death of Bayard Taylor, as follows: "I would say to every young man in the United States, if I could reach him, if you mean to attain one of the prizes of your profession, and live a cheerful life to the age of eighty, throw away your dirty pipe, put your cigars in the stove, never buy any more, become an absolute teetotaler, take your dinner in the middle of the day, and rest one day in seven.

Is your boy a drunkard? How came he to be a drunkard? The liquor dealers drew him in and ruined him. Do you want to have him reformed and saved? Then remove temptation out of his way both at home and by shutting up the liquor shops. Certainly not by voting for men or with parties, who are opposed to shutting them up. You might as well vote for Satan to abolish sin. If you want them closed, then vote to shut them up forever. If you want laws better adapted to close them, then vote for men, for law makers whose principles are the embodiment of what you want.

"The Oneth"

BY ELEANOR KIRK.

At a dinner given by Capt. Boyton to Nan the newsboy, and his comrades, wife, although plentifully furnished by the host, was entirely abstained from by the boys. A gentleman very much interested, not only in these particular boys, but with a heart full of love for all the boys in the world, took occasion to ask the intelligent, and totally uneducated, Nan, a few questions.

"I see that you and your companions don't drink, Nan," he said. "How is that?"

"A feller can't make room for everything," replied the boy with a laugh.

"Oh, that's it, said the gentleman. "I thought perhaps you might have another and a better reason for not drinking."

"I ne'er see no good from drinking," replied Nan with emphasis, "and that's a fact. Seems to me, most all the trouble in the world comes from rum. Most of the folks that I've hauled in out of the water have been drunk when they jumped in, else they'd never done it."

"And you have made up your mind to keep a level head," interpolated the interviewer.

"Yes, sir," said Nan. "If a man wants to put wine on his table 'tain't none of my business, I s'pose; but 'tis my business to keep the stuff out o' my head. One boozey feller jumping overboard after another boozey feller! That 'ud be richness, wouldn't it?" and Nan laughed merrily.

"Now when you get your boat," continued the gentleman, "Suppose one or more of the crew should take too many drinks, what then?"

"They ain't a-going to," said Nan decidedly; "and I'll tell you the reason why. A feller has to take one drink before he can take too many, and we ain't a-going to swaller the oneth. That's the way to keep your head level, sir; and us fellers knows it."

With this logical summing up, the newsboy skipped off, leaving his companion of the opinion that Nan and his comrades were certainly wise in their generation.

Health Hints.

For cholera infantum take the whites of two eggs, well beaten; mix with water, add a teaspoonful orange-flower water and a little sugar; a tablespoonful every hour. It will, says an exchange, cure the worst case of cholera infantum; the egg coating the bowels.

In removing objects from the eye, place your forefinger on the cheek bone, then draw up the finger and you will probably be able to remove the object; but if you cannot get at it this way repeat the operation while you have a knitting needle laid against the eyelids; this will turn the lid inside out, and the sand may be removed with a silk handkerchief. Bathe in cold water and exclude the light for a day.

Appleton's American Cyclopaedia.

A LIBRARY OF

Universal Knowledge,

In Seventeen Volumes Containing 50,000 subjects and Illustrated by 6,000 Fine Engravings

AND LITHOGRAPHIC MAPS.

This work cost the publishers over \$500,000 to prepare it for the printer and its excellence is fully commensurate with the expense. An improvement in this over all other Cyclopaedias is the analytical Index prepared by Dr. Conant. By means of this, any subject may be turned to with the smallest possible loss of time.

A Volume is Issued Annually,

Containing information on

ALL SUBJECTS

that have attained further developments during the year.

A FULL SET

May be seen at the

"VISITOR" OFFICE.

Payments may be made in instalments.

"Throw Physic to the Dogs."

DR. HALL'S ELECTRIC BELTS.

For the cure of all nervous diseases, without the least derangement of the patient's habits or daily occupation. This appliance exerts powerful and beneficial influence throughout the whole frame, is applicable to either sex, and affords instantaneous relief in the following diseases:

- Rheumatism,
- Neuralgia,
- Dyspepsia,
- Lumbago,
- General Debility,
- Headaches,
- Dizziness,
- Impotency,
- Spermatorrhoea,
- Sexual Exhaustion,
- Self Abuse,
- Premature Decay, &c.

These Belts are the result of the most profound research and experiment in Electro-Therapeutics, and by their peculiar construction, a continuous "galvanic current" is generated, which permeates the whole frame, and especially envelops the suffering parts with its gentle influence. The current stimulates closer to the Nervous Fluid than any thing known to Medical Science—hence its potency as a curative agent. Most especially is the application of Electricity in this form beneficial to those disorders arising from youthful indiscretion, sexual excess or dissipation of any kind, whereby the procreative powers are lessened and impotency threatened. No false delicacy or sense of shame should prevent the success, which is subject to restless nights, nightmare, dreams, palpitation of the heart, neuralgia, dimness of sight, and other symptoms of nervous and physical debility, applying to the undersigned for relief. These Belts are light, perfectly flexible, and easily adjusted, all of which, together with their cheapness renders them superior to any other form, for the application of Electricity, practically.

"I cheerfully recommend Dr. Hall's Electric Belt, and consider it one of the greatest blessings to mankind that has been put before the public"—Dr. De Barr, Paris.

"Ingenious, wonderful—a death-blow to the old system of drugging"—London (Eng) Lancet.

"You have perfected a great blessing on suffering humanity"—Dr Richardson, London, Eng.

"Wonderful for the restoration of exhausted vitality"—Dr. Ferrier, London.

"I cheerfully recommend Dr. Hall's Electric Belt, and consider it one of the greatest blessings to mankind that has been put before the public"—Dr De Barr, Paris.

Price of Electric Belt, \$6.00

" " " Extra Power, 10.00
