

News Summary.

NEW BRUNSWICK.

The *Globe* publishes the particulars of a narrow escape from death which occurred at Nerepis, Queens Co., recently. It says that while Mr. Jas. Polley was throwing a hay-fork from the barn floor to the mow, it suddenly descended upon him, one prong piercing his nose from side to side, coming within a hair's breadth of entering his eye, the two outside prongs mutilating his forehead and chin. Another inch and the fork would have entered his temple, and no doubt been attended with fatal consequences.

John Moody, of New Line Road, K. Co., fell out of an ox cart while returning home with a neighbor, on Tuesday, and was killed by one of the wheels passing over his body.

A most distressing and fatal accident is reported by our *Lapreux* correspondent. He states that on Wednesday afternoon, Jas. Ellis, aged 12 years, only son of John Ellis, of Mace's Bay, accidentally shot himself. He had a gun concealed behind a fence, and, in company with another boy, went to get it. While pulling it, muzzle toward him, from its hiding place, the gun was discharged and the contents lodged in his stomach. He only spoke once, and died in a few minutes after the accident.

The Germain Street Baptist social, Thursday evening, was very largely attended, and was a decided success in every particular. The proceeds will amount to \$40.

A fire at Oak Hill, Charlotte Co., on Sunday night, destroyed a house and barn, with part of its contents, belonging to Hiram Jenkins. One of his sons, a boy of fifteen years, was in the upper flat when the fire broke out, and in making his way out was so badly burned that he died next morning.

On Friday night last Mrs. Robert Clark, of Glen Cove, Green Head, St. John River, met her death in a most shocking manner; the intelligence of which was brought into the Portland Police Office Saturday afternoon about 2 o'clock by Mr. McMinimam, who gave it as his opinion that there appeared to be some trace of foul play. That the woman was dead was beyond doubt, and how her death occurred Mr. McMinimam said no person at Glen Cove knew. Coroner Rigby was notified and once empaneled a jury and proceeded in a small boat from Indian-town to the scene, the old Armstrong house, close to the bank of the river. The house was occupied by Mrs. Clark and her daughter, Mrs. Chas. Higgins, who has one little child. The daughter on Friday left the child with the deceased and came to Indian-town on business. Saturday morning Mrs. Higgins returned home and found her mother dead, with her arms to her elbows, and legs to her knees, clamped to a chair. Horrified at the aspect before her, Mrs. Higgins fled to the neighbors, and in faltering accounts told of the terrible fatality that had happened her mother. As we have already stated Mr. McMinimam as soon as possible informed the authorities. About 4 o'clock Coroner Rigby with the jury arrived at the scene of the accident and the story of the affair, as far as known, told by the coroner beggars description. As he entered the kitchen of the house where the accident occurred, there was before his eyes the remains of the unfortunate woman in the fireplace. She was sitting on the ashes her back against the wall, her head erect, eyes staring wildly, knees pointing toward her chin with the elbows resting on her knees, and the charred arms from the elbows to the finger ends pointing upwards. The body was almost nude, save some tattered and burned portions of a chemise which partially covered the remains. The hair was dishevelled and somewhat singed, and her face bore the expression of having suffered intense agony. Beside the corpse stood the little grand-daughter patting the deceased on the back, the mother of the child in her excitement at the sight revealed to her, having forgotten to take the little one away. Another look around the room displayed fragments of an oil lamp and shade scattered about the floor; also portions of clothing in which large holes were burned. There was oil on the floor and what little covering was on the woman was saturated with it. How the accident occurred is left to conjecture, but that it is a case of pure accident is beyond a doubt. It is very apparent that the lamp had been upset or fallen from the woman's hands, the oil taking fire and burning her clothing. The deceased had no doubt made an effort to subdue the flames, and in this way met her fate.

The jury returned to the town and adjourned the hearing of the case until Monday evening at the Portland Police office, when the following verdict was returned: That the said Sarah Clark came to her death by her clothes taking fire, by means whereof and from the smoke and flame of said fire, the said Sarah Clark was then suffocated and burnt, of which said suffocation and burning the said Sarah Clark died. Constable Pigeon was ordered to secure a coffin and have the remains interred in the Poor House Burying-Ground. Deceased was about 45 years old and the wife of the notorious "Bob" Clark, known to the Portland police for years. The husband is at sea at present.

A sad accident occurred at Hamtown, in the parish of Douglas, Friday. A man named Steen, while shingling a house fell from the roof striking upon his head. Death occurred almost instantaneously.

The Rev. and Hon. Burnthorn Musgrave, who was ordained a few days ago in Digby, is to assume the pastorate of the Reformed Episcopal Church, which has become vacant by Rev. W. Windeyer's resignation.

NOVA SCOTIA.

A young man named Everett, of Plymton, Digby Co., was killed by falling from a bridge on the W. C. Railway at Meteghan.

A little girl named Ruby King, daughter of Elias King, Pugwash, while in a fit fell on a

hot stove and before she was discovered was badly, if not fatally burned.

The Intercolonial Safe on the passenger train was broken into last week between Londonderry and Wentworth, and robbed of \$500. The bag was ripped open on one side, and why the thief should have taken out one bag only and left two others with double the amount, untouched, is a mystery.

A little son of Wm. Love, Bridgewater, fell off a chair the other day and broke his leg. This is the third time his leg has been broken in the same place.

The late decision of the Supreme Court of Canada relative to Queen's Counsel appointed by the Nova Scotia Government will deprive forty or fifty legal gentlemen of the privilege of wearing the silk gown.

Gold has been discovered at the head of the Musquedobit River, and a rich copper mine is also reported on the same river. The Montague gold mines have been sold to a New York gentleman for \$50,000.

A fatal affray occurred last week on Seatarie Island. Two boys named Scott and McCuish, aged respectively 8 and 12 years, while in their school's coal cellar getting coal, had a quarrel, and McCuish stabbed his companion in the abdomen with a broomstick sharpened at the end, causing almost instant death.

The schr. *P. L. Widden*, of Newfoundland, has been seized for smuggling at Cape Breton.

PRINCE EDWARD ISLAND.

The schr. *Emeline McMillan*, from St. Johns, Nfld., was wrecked on Saturday last, at Indian Rocks, Wood Islands. She was owned by Hon. Ambrose Shea, of St. Johns, Nfld.

On Friday morning a man named Wm. McDonald was discharged from the Lunatic Asylum, Charlottetown, as cured, but it seems that his friends, who live in the country were not notified of this, and he was allowed to go where he pleased. He went to the Dominion House where he remained until Sunday, when he became so crazy that he was given in charge of the police, who locked him up until the morning when he was sent back to the asylum. While in the police station he was very violent, and it would certainly have been very dangerous to allow him to go at large.

The growth of the sugar beet has been introduced into P. E. I. by Dr. McNeil, of Stanley Bridge, New London. This is what the *Patriot* has to say about the new syrup, having been shown a specimen of it by the Dr.:

The sample of syrup given us has not been purified, being merely got in a primitive way by boiling the beets down. It contains besides the sugar, Albumen Salt, Pectine Potash and has a strong beet flavor. In order to render the syrup fit for table use the salt and Potash and the beet flavor must be got rid of. This is done by a very simple process known as the lime process. As soon as the beets are broken up, fermentation sets in. If allowed to proceed this destroys the sugar they contain. By using the lime this fermentation is prevented, and the objectionable ingredients in the beet are got rid of. The doctor considers that it is feasible for the farmers of this Island to make syrup quite equal to the article now in market, at a small cost from beets grown by themselves.

The work of repairing the damage occasioned by the late storm, is being energetically pushed forward at Cascopec. Hon. P. Gavin, whose lobster factory was completely demolished, has two buildings already in course of erection—one in frame, and the other boarded in.

A reward of \$300 is offered for information which will lead to the conviction of the party or parties who set fire to the buildings lately destroyed at Bradalbane.

UPPER PROVINCES.

The petition presented on behalf of Susan Kennedy for commutation of her sentence to imprisonment for life, has been granted by the Governor General. The convict will be conveyed to St. Vincent de Paul Penitentiary. The Sheriff paid a visit to her cell on Wednesday week for the purpose of informing her that the capital sentence passed upon her had been commuted to one of penal servitude for life. She had all along shown the greatest distrust of every one, and declined to believe the Sheriff unless she was permitted to read the pardon: she then remarked, "For life, that's a long time," subsequently observing, "I have never been in goal so long before; I would rather go home." On it being suggested to her that it was better to be imprisoned for life than to be hanged, she replied, "Well, I shouldn't like to be hung." She has always exhibited the greatest indifference as to her sentence, but has frequently asked to be sent home. The prisoner has also been visited by her mother.

There are over fifty Protestant churches in Montreal, while the total adult Protestant population is estimated at 16,000.

Intelligence has been received in Quebec of the frightful death of a farmer of the County of Port Neuf, at St. Casimir. Two hunters while going their rounds a few days ago, in the wild country at the head of the Lake of Seven Islands, in St. Casimir, came upon a portion of the remains of the unfortunate man in a bear trap, which held him by the arms while a good portion of his body had been eaten by bears.

BRITISH AND FOREIGN.

Two men, named Wright and Dollard respectively, were recently murdered in California. Wright was a native of Truro, N. S.

The Rev. Robt. Healy, a Protestant clergyman of advanced age, died suddenly recently in the chapel attached to the Female Orphanage, North Circular Road, Dublin. He was observed to hesitate in the course of the service which he was conducting, and turn pale. A medical gentleman in the congregation sent an official of

the church to tell the Rev. gentleman that the exertion was too much for him. The service had so far advanced when the minister from within the communion rails gave out the hymn immediately preceding the sermon, and at that moment he was observed to stagger and fall heavily to the communion table. Several gentlemen at once ran to his assistance, while the rest of the congregation, though visibly impressed by the occurrence, proceeded with the hymn which was sung through. Meanwhile the sufferer somewhat revived, but was too weak to regain his feet. He was lifted up in the willing arms of those about him and thus resting he gathered sufficient strength to pronounce the benediction. With the solemn words: "May the great Physician of souls be always near you and yours" the service abruptly concluded and the congregation, who were much affected by the painful scene, dispersed, only, however, to gather again in small groups and make anxious inquiries as to the condition of Mr. Healy. The latter was conveyed to the vestry but he had so thoroughly broken down that it was thought necessary to take him to bed at once. This was done, and in a few minutes, after requesting that his head should be raised a little higher, he suddenly expired.

An accident occurred to a passenger train on the Madras, British India Railway, near Arcotum, on the 31st October, in consequence of the sinking of the embankment after rain. Nineteen persons, including three Europeans, were killed and forty-five wounded.

The French Revenue for ten months of the present year, ending October, exceeds the estimates by 123,000,000 francs.

Forty-nine Afghans were hanged for complicity in the massacre of the British Embassy.

The Catholic Bishops of Ireland have adopted resolutions appealing to the Government and all public bodies and private individuals to help the poor, as the Poor Law Act is sufficient to meet the necessities of the impending crisis. The bishops exhort their flocks to bear their trials patiently, to respect the rights of others, pay their just debts fully as they are able, and obey the laws while using all peaceful constitutional means to reform the land-laws.

Clergymen, singers and public speakers troubled with hoarseness or bronchial affection, will find themselves greatly relieved by the use of Adamson's Botanic Balm. Sample bottles, circular free at the druggists.

There is no remedy top of the earth that possesses so much real absolute merit as Johnson's Andonyne Liniment. It is both for internal and external use and is worth more in a family than a seventh son.

One single box of Parsons' Purgative Pills taken once a night will make more new rich blood, and will more effectually purify the blood in the system than \$10 worth of any other remedy known at the present time.

The African King.

Who listened to the white man's story of travelling upon an ice bound river, was incredulous. How could such things be? It was all a lie. But if that same ebony ruler had tried our country in the cold weather, he would have seen many a gay, dashing team of animals drawing high sleighs, full of happy people, for miles and miles upon the frozen water. In fact, winter is our carnival season for outdoor sports and amusements. There are some old-time doctors in our remote villages who let people die according to prescription, and if one of their patients should tell them that he knew a neighbor who had been cured by using Dr. Herriek's Sugar-Coated Pills he would like King Niger, loaded in a tub. "All bosh and nonsense," would be his assertion. But the king might just as well deny a frozen river as for a doubting novice to deny the benefits of these pills. Oh, King! come to Canada and learn that there can be no suffering, try Dr. Herriek and know that they will cure you!

I strongly recommend the use of Fellows' Compound Syrup of Hypophosphites to all who suffer in any way from disease or weakness of the Lungs Bronchial Tubes, or general debility.

J. H. W. Scott, M. D., Gagetown, N. B.

Amos Woolly, M. D., of Kosciusko County, Indiana, says: "For the three past I have used Allen's Lung Balm extensively in my practice; and I am satisfied that there is no better medicine for lung-disease in use."

Pain Killer is a purely Vegetable preparation, safe to keep and to use in every family. The standard remedy for all pains, together with the great variety of diseases that may be entirely eradicated by it, and the great amount of pain and suffering that can be alleviated through its use, make imperative upon every person to supply themselves with this valuable remedy, and keep it always near at hand.

HANINGTON'S

Quinine Wine and Iron.

(TRADE MARK REGISTERED.)

Combines the Tonic effects of Peruvian Bark and the Strengthening and Blood making properties of Iron with the finest Sherry Wine, and is highly recommended in all Morbid Conditions of the system, such as: Chronic Fever, or any other chronic disease; Chronic Disease with Debility; and in all cases of Weakness from whatever cause arising. It strengthens the Organs of Digestion, and promotes Assimilation of the Food, thereby increasing the Appetite, relieving Dyspepsia, Indigestion and Weakness, Depression of the Stomach, etc.

IT SUPPLIES VITALITY TO THE BLOOD

strength and vitality to the Mind and Body, and is beneficial in all troubles arising from Impure Blood, or a Low and Debilitated state of the system.

INTELLIGENCE OFFICE, 102 PRINCESS ST., SAINT JOHN, N. B., JULY 29TH, 1879.

Messrs. HANINGTON BROTHERS & Co. were going to write you how much benefit I received from taking two bottles of your QUININE WINE AND IRON, being then very weak and low, with no appetite for any sort of food, after a severe attack of Erysipelas in my head. Again, after the fire, I was nearly quite gone, and was restored to strength and activity by taking two bottles more, and last May I had to have recourse to the QUININE WINE AND IRON again with the same beneficial results.

While I was taking it at last, a person came in who had left her situation to get into the Hospital, being so weak she could not work. I said, I will send you to a place where you will get seven dollars a month; take two bottles of HANINGTON'S QUININE WINE AND IRON with you, and if you are not able to earn the seven dollars I will pay you for the medicine. At the end of the month she was quite smart, and is still filling the situation. I send you these few lines for the benefit of society if you trouble to publish them, as there are so many sick at present. It would greatly benefit persons after Sickness or Diphtheria, and would most certainly prevent sickness by strengthening and building up the system.

Yours very truly, JANE A. LEE.

Price 50c. per Bottle. Six Bottles for \$2.50. For Sale at the Drug Stores.

Pulmonary Consumption arises from a decline or deficiency of vitality in the natural bioplasm or personal matter, and this deficiency manifests itself not only in general wasting or atrophy of the whole body, but also in a peculiar degradation, chiefly in the lungs and lymphatic system, or portions of this bioplasm into a sluggish, low-lived, yet poefferating matter, which instead of maintaining the natural integrity of the tissues (which is the natural office of bioplasm), clogs them, and irritates them with a substance which is more or less prone to decay, and eventually involves them also in its own disintegration and destruction.

To remedy this deficiency by sustaining the vitality of the bioplasm, and thus provide for the general building up of the whole system, is the office and design of Robinson's Phosphoric Emulsion of Cod Liver Oil with Lactate-Phosphate of Soda.

Prepared solely by J. H. Robinson, Pharmaceutical Chemist, Saint John, N. B., and for sale by Druggists and General Dealers. Price \$1 per bottle; six bottles for \$5.
