

THE MORBID PRINCIPLE OF RHEUMATISM IS URIC ACID.

Paine's Celery Compound
DRIVES IT FROM THE BLOOD AND
CURES THE DISEASE.

The Wonderful Medicine Does a Marvellous Work for Mr. G. J. McDonald, of Cornwall, Ont.

The ablest pathologists are of opinion that there is a morbid principal in the blood when rheumatism is present. This morbid principle is uric acid, which circulates with the blood and acts upon the joints and muscles, causing the pains and agonies of rheumatism.

Paine's Celery Compound is the only scientific remedy for the complete banishment of every form of rheumatism. If your joints are painful; if the knees, wrists, elbows or ankles are swollen, a few bottles of Paine's Celery Compound will surely remove all your troubles and pains. A 64 page book "Diseases of the Nervous System and How to Cure Them" is sent free to any address by The Wells & Richardson Co., Limited, Montreal. This book furnishes valuable Diet Lists for various diseases.

Mr. McDonald for the benefit of rheumatic sufferers writes as follows:

"After giving your Paine's Celery Compound a thorough testing, I am pleased to say a few words in its favor. For three years I suffered terribly from rheumatism. It seemed to me that I was forced to endure all the agonies and pains that a mortal could possibly experience from the dreadful disease.

"While suffering I tried many of the advertised medicines and also doctors' prescriptions, but never found a cure until I procured a supply of Paine's Celery Compound. It worked like a charm—it seemed to strike at the very root of my trouble. I am now cured; all pains are banished, and in every respect I am a new man.

"I shall always consider it a pleasure and duty to strongly recommend Paine's Celery Compound to all who are afflicted with rheumatism."

Among those who came to Bangor Thursday night on the train from Moosehead Lake was Mrs. Thomas Nelson of New Brunswick, N. J. Mrs. Nelson is an enthusiastic hunter of moose, and probably has killed more of the big fellows than any other woman who ever hunted in Maine. Her record is eight moose. She was obliged to return home this year without trying for a moose, owing to the illness of her husband.

A despatch from Wellington, New Zealand, says: Gen. Babington has been appointed, with the approval of King Edward, to command the forces in New Zealand. It is not known whether he will accept the position. He is now en route to England.

Three hundred officers and men of the Royal Engineers, who have been on service with the army in China, passed through Ottawa Tuesday afternoon en route for home.

"OIL OF GLADNESS"

South American Nervine has proved itself the "oil of gladness" to many a nerve-sick sufferer. It starts to work at the fountain-head of the trouble—the digestion. It tones the stomach, helps to assimilate the food, promotes healthy circulation, stimulates the flow of rich, red blood, accelerates the action of the organs.

South American Nervine cures nervousness, sleeplessness, neuralgia, nervous prostration, nervous choking, nervous twitchings, hot flushes, sick head-ache, dyspepsia, indigestion, and all kindred ailments. It is the very nectar of health.

How to Avoid Catching Cold.

Keep your vitality above the negative condition. No disease can exist where there is an abundance of pure blood. To get the necessary amount eat nutritious food; to circulate it perfectly, take proper exercise; to purify it, get fresh air and sunlight. If a perfectly healthy condition of the skin exists and an even temperature of the surface of the body is maintained it is impossible to catch cold. Cold water baths taken every day will do much toward producing the former; proper food and exercise, the latter. Nature gives you an alarm in the first chilling feeling. Heed it at once, or pay the penalty. Take a brisk walk or run, breathe deeply, and keep the mouth closed. If you are so situated that you can do neither, breathe deeply, rapidly, and noiselessly, until you are satisfied that your body has passed from a negative to a positive condition. Take care of your throat and lungs by protection from within, as well as protection from without, by keeping the mouth closed when passing from a warm to a less warm temperature. Precautions are often wrongly taken. It may be better to turn your chest protector around and make a back protector of it, thus protecting your chest and lungs by the necessary care of the spinal column, along which is the chain of sympathetic nerves. It is better to turn up one's coat collar than to wear a muffler, and better to protect carefully the back of the neck from draughts of cold air than to protect the throat. Pay attention to the feet by keeping them dry. Discard cotton hose in winter and wear woollen. It is not the woollen hose that make the feet perspire; it is nervousness which has been caused by worry or excitement. In this condition and through this cause the feet become damp, chilly, clammy, and the result is that the glands of the throat become enlarged, and hoarseness ensues.
