NEWS OF THE WORLD.

Items of Interest Condensed from Herald Exchanges.

Montreal will spend \$15,000 in the Duke of York's reception.

Christians form less than one per cent of the population of India.

The one thing not to be forgotten about Jim Hill, the great railway magnate, is that he, a Canadian boy, has beaten the Yankees at their own game.

Rev Father O'Connor, Kemptville, Ontario, has a movement on foot to have every family in his mission give a lamb in September. He expects to make \$400 out of it for the debt on the church.

Sir Wilfrid has told a Quebec deputation that the Government has practically decided on the purchase of the Plains of Abraham. Steps would be taken at once to ascertain the value of the grounds.

A runaway team in Chatham, Ontario, wrecked the front of Tarrell's store, damaging the stock to the extent of \$200 and the building \$300. Mrs. Coleman's child in a baby carriage narrowly escaped death.

While going to a fire Tuesday evening Chief Provost, of the Ottawa fire brigade, had a narrow escape. His rig collided with an electric car on Sparks Street and was badly smashed, but the chief escaped uninjured.

The Ontario College of Agriculture, at Guelph, is drawing students from the Southern Hemisphere. Two natives of the Argentine Republic propose to introduce scientific agriculture into the Argentine Republic.

Charles McAuley, of Clarendon, Queens county, and Miss Bell daughter of Robert Bell, Norcross, Me., were drowned last October in a lake near Norcross while boating. The bodies were recovered on Sunday.

On the vote for \$10,000 in Parliament for Hon William Mulock's expenses in Australia, the Premier stated that he had gone to represent Canada, and on a vacation, but "of course he is expected to have an eye to business."

Premier Farquharson, of Prince Edward Island, delivered his budget Tuesday night to a crowded house. He announced an increased subsidy from the Dominion Government. The estimates show a reduction of several thousand dollars.

The travel on the C. P. R., from the United States to the Maritime Provinces is the heaviest on record for this season of the year. Many of the people returning are mechanics and workmen who are coming to the provinces to settle permanently.

The French Minister of Marine has sent orders to the commander of the cruiser d'Estrees instructing him to proceed to Halifax with his vessel in time to welcome the Duke and Duchess of Cornwall and York upon their arrival at that place.

Wilber Moore, son of John Moore, of Clones, Queens Co., died at the home of his father, on May 5th, from typhoid fever. He had spent the winter in Maine and there contracted the fever. He was home only a week when he died. He was 20 years of age and a sober and industrious young man.

Henry Bliss, of Westchester, Cumberland, Co. N. S., lost a very fine 4-year-old colt, that was the pride of that locality. This young animal was being broken to halter, when becoming nervous and excited by the unusual restraint, he plunged forward, fell headlong, broke his neck and died in a few minutes.

Dr Ferguson, of Moncton, has returned from Montreal, where he has been the last week with E. Sinclair of Miramichi, consulting eminent Montreal physicians in regard to Mr Sinclair's ailment. Mr Sinclair returned home on Saturday, but his many friends in Moncton and elsewhere will regret to learn that his condition is not greatly improved.

Word has come from Shanghai that Dr Howard Barry was operated on for appendicitis on April 14th, but is now well on the way to recovery. Dr. Barry went to South Africa as Y. M. C. A. representative with the first Canadian contingent. On his return to Toronto he was married, and left to take up mission work in China.

Alfred Lynds, aged 13, son of Wm Lynds, of North River, Colchester Co., N. S., while cleaning a barn was kicked by a horse in the forehead. His skull was seriously fractured. Dr McKay, the attending physician, has removed 20 pieces of bone from the wound and the brain is exposed to view. The boy is still conscious but is in a most precarious condition.

The Toronto police are sending out circulars on the authority of the Imperial Bank and the Bank of Commerce offering a reward of \$1500, for the arrest of G. A. Winton, the cheque-raiser, and the recovery of the five thousand and odd dollars taken away by the swindler, on April 13. Of the \$1500, \$500 will be paid for the arrest on complete identification and delivery to Toronto.

For Seraphin Beaudria of Tetreauville, a suburb of Hull, Quebec, who died a few days ago, a special coffin of unusually large dimensions had to be built. The coffin was so large that it could not be taken into the house either by the door or window. Beaudria weighed almost 400 pounds. Six men were required to remove the body from the house to the coffin outside. As the ordinary hearse was not large enough, an express wagon had to be secured to convey the coffin to the church, and from the church to the grave.

Mr. D. Arcand, the Quebec broker, rumoured by the absconding last week of his confidential clerk, and who for years has been an honorable business man and a power in the community, held a meeting of his creditors Tuesday afternoon in his office, St. Peter street, and made an offer of fifteen cents on the dollar. His assets are \$7,000, and liabilities \$46,000. Much sympathy is felt for Mr. Arcand, as his present position is due to the rascality of his clerk.

Nobby Suits and Nobby Boots.

Have you seen those new goods at Lucy's? They are the product of the very best manufacturers in the dominion, and in style and prices will compare with the custom work of the best workmen in the city. Those goods were manufactured especially for Lucy & Co., and warranted to be just as represented and they have no hesitation in recommending them to their customers. Those goods comprise men's, youth's, boy's and children's suits of clothing, boots, shoes, hats, caps &c. Stylish and serviceable. They don't touch shoddies. They leave those to their neighbors.—d.

Gustave Baare, aged 50, bailiff of the St. Louis School Board, and ex-representative in the State Legislature, was shot and killed at his home Tuesday night by his daughter Ida, aged 20, who then turned the revolver upon herself, inflicting a wound from which she died in a few minutes. The action of the young woman was premeditated, as was shown by a letter which she left. In it she said that the frequent insults offered her mother by her father became unbearable, and that she had resolved to kill him and then herself. Mr. Baare was taking a nap when he was killed.

The healthy old man wears his gray hairs like a silver crown. What if he be three-score and ten if there is still fire in his eye, firmness in his step, command in his voice and wisdom in his counsel? He commands love and reverence. Yet how few wear the mantle of age with dignity. Dim eyed, querulous of speech, halting in step, childish in mind, they "lag superfluous on the stage," dragging out the faded end of life in a simple existence. The secret of a healthy old age is a healthy middle age. The man who takes care of his stomach, who keeps his body properly nourished, will find that the body does not fail him in old age. The great value of Dr. Pierce's Golden Medical Discovery lies in the preservation of the working power of the stomach and other organs of digestion and nutrition. From this centre is distributed the nourishment of the whole body, the salt for the blood, the lime for the bones, phosphates for the brain and nerves. A sound stomach means a sound man. A man who keeps his stomach sound by the use of "Golden

Medical Discovery" will wear the crown of gray hairs as befits a monarch, with dignity and ease.

MEMORY RETURNS AFTER 13 YEARS

Sailor in the Chinese Empire Sees a Cincinnati Paper and it Brought Back the Old Days.

Altoona, Penn., May 8.—Malden Valentine, a railroad shop foreman of this city, has received a letter that came like a voice from the dead. The letter was written about a week ago in San Francisco by Thomas Valentine, a brother of Malden, who has been mourned as dead since the day in 1887 when a whaling ship in which the boy had sailed went down just off the Golden Gate.

It was reported that all hands had gone down with the whaler, and as the years went by, with no word from the Altoona boy, his relatives ceased to hope that he might have survived. The letter tells a strange story.

"Do not think that I had forsaken you," writes the long-lost brother, "for my mind had been a blank so far as the past was concerned for 13 years. I remember well the storm and the sinking of the whaler, I and Jack Wales crawled on a fragment of the deck and for days floated about, sighting no ships. We were carried far out to sea. The fourth day Wales dropped off the raft, but I was tied fast.

"Delirious from hunger and thirst, I lost consciousness. When I awoke I was on the deck of a Chinese trader. In the course of a few months I regained my physical and mental faculties, except that I could not remember anything of my past. I did not know my name.

"For 13 years I drifted about China and Japan, sometimes spending a year on the sea. Last December I struck Hongkong. I was seated in a sailors' boarding house, reading a Cincinnati newspaper left there by an American soldier, when my eyes struck the word 'Altoona.' Like a flash the vision of the past broke in upon me. I knew who I was and whence I had come.

"As soon as I could arrange matters I worked my way to San Francisco, and I am now on my way home."

WEAK, NERVOUS WOMEN.

Could we read the hearts of women what a vast amount of suffering would be exposed. Female weakness has produced more invalids among women than any other cause. Have you any of the following symptoms? Nervousness, Weakness, Backache, Headache, "All-Gone" Feeling, Hot Flashes, Variable Appetite, Restlessness, No Ambition, Easily Excited, Painful Periods, Bearing-down Pains, Leucorrhoea, Pimples on the Face, Pains in the Loins, Eyes Sunk, No Vital Energy, etc. We Can Cure You. It matters not who has treated and failed in curing you. Consultation by Mail is Absolutely Free, and if curable we will tell you so. Don't let surgeons operate on you. We can cure you without cutting. Our New Method treatment is mild and pleasant. Family doctors have treated you for years, yet you are not cured—they only help you from time to time. Let us cure you at your own home by our New Method Treatment. Hundreds are being cured. Why not you? We will mail you our Symptom Blank simply for the asking, and we will tell you free of charge what we think of your case. Remember, your letters are kept strictly private and confidential and are answered in plain sealed envelope. Write at once, enclosing stamp for reply. Address Dr. W. H. SAUNDERS & Co., Sta. C., Chicago, Ill. Mention this paper.

Dec. 21, 1900, dwalyn.

The Finance Committee of the Montreal City Council have made new arrangements for the insurance of city property. Fifty per cent has been taken by the Scottish Union, forty per cent by the Ottawa, and ten per cent by the Montreal Mutual. The placing of insurance in this manner is of great importance to the city of Montreal, to the Province of Quebec, and to the whole of Canada. In placing it thus the aldermen have aimed a blow at the insurance combine, known as the Canadian Underwriters' Association, that has raised the rates at their pleasure in every province but Ontario.

Polson's Nerviline Cures Rheumatism.

The remarkable strength and marvelous soothing power of Nerviline renders it quite infallible in rheumatism. Five times stronger than any other remedy, its penetrating power enables it to reach the source of pain and drive out the disease. Nerviline is stronger, more penetrating, more highly pain-subduing in its action than any other medicine heretofore devised for the cure of rheumatism. Sold in large 25 cent bottles every where.

BOURASSA REBUKED.

Sharp Exchange of Compliments During Debate.

HON. D. C. FRASER, GUYSBORO',

Objects to the Style of Criticism Indulged in by the Member for Labelle.

Ottawa, May 8.—The close of the debate upon the motion to go into committee upon the bill confirming the Manitoba railway agreement was marked by an exchange of compliments between Mr. Bourassa and Mr. D. C. Fraser, Guysboro'. Mr. Bourassa, who strongly opposed the bill, expressed regret that the Minister of Railways, who, in the Committee on Railways, declared that this was one of the most important measures that had come before Parliament for many years, was not in his seat to express his opinions upon the subject. It was, he said, no use saying that there were no politics in the question; hidden politics were in it, but neither the leaders of the Government nor of the Opposition had pronounced themselves upon the subject, although the leading organs of the Government had denounced the scandalous bargain for a month and a half. It had been said that the powerful syndicate of Hill and Morgan was at the back of the agreement. Had the hand of the syndicate been so powerful as to close the mouths of members? The people would forgive mistakes, but would not forgive moral cowardice.

Mr. Bourassa was called to order by the Speaker, and withdrew the expression, but expressed regret that the leaders had not expressed their opinion upon the question, and that a situation had been produced which reminded him of the worst phases of the United States Congress, and was not calculated to inspire confidence in the Parliament of Canada. He protested against the method in which the bill had been put through the House, and predicted that the truth would come out some day.

Mr. Fraser thought this "mock heroism" had gone far enough, and objected to reflections being cast upon members who thought fit to exercise their own judgment, instead of depending upon the newspapers for opinions. After the unfortunate position in which Mr. Bourassa had found himself in one or two instances, when he ventured to bring his opinions before the House, he would have thought that gentleman would exhibit a little more modesty, if not less volubility. Mr. Fraser claimed as a private member the right to exercise his judgment. Honest men would differ upon the question, but let them do it without puffing themselves up with vanity and assuming that all knowledge was confined in one brain. Personally, he held that if the Province of Manitoba saw fit to enter into the agreement which is the subject of legislation the Legislature knew what was in their own interests as well as and better than the members for Labelle or Liegar.

In reply to Mr. E. F. Clarke, Mr. Fraser said that not a single member of the Manitoba Legislature had, since the agreement was ratified, offered any protest. The great scheme of Confederation was, Mr. Fraser said, being successfully carried out and he would refuse to retard that progress by interfering with the action of a Provincial Legislature acting within the purview of its own powers. He objected to being lectured to by any self-constituted gentleman of propriety who might arrogate to himself the attribute of superior knowledge.

Sir James Watson Says.

Catarrh is the commonest of all disorders, and not one person in ten thousand passes the winter without having a Catarrhal attack of some sort. It is dangerous owing to its tendency to develop consumption. Can be cured and completely eradicated from the system, if proper methods are employed. Being generally established in remote parts of the nasal passages, bronchial tubes and lungs, to cure it, a remedy must be employed that can be carried direct to these parts. Catarrhazone goes where ever the air breaths will go, and is sure to reach the trouble. It is inhaled into every air

cell of the lungs, the throat nasal passages and bronchial tubes. It kills the germs, heals the membranes, and cures the disease. Doctors recommend it as the most successful remedy. Catarrhazone never fails; never harms; always cures permanently. Price \$1.00; small size 25 cents. Druggists or N. C. Polson & Co., Kingston, Ont.

AN ANÆSTHETIC SAFE.

Queer Product of an Inventor of the Olden Times.

"I ran across a queer old relic in my line of business recently," said a safe and lock expert who is in the city. "I was prowling around a machine shop in a town in Iowa, trying to find a fitting that I needed, when I happened to notice a sheet iron box which seemed to have once been entirely covered with glass tubes attached to the surface by cement. All of the tubes were broken, and most of them were missing, but the general arrangement could be easily traced, and the contrivance impressed me at once with a sense of familiarity. Presently I remembered about it. It was all that was left of the one time famous 'anæsthetic safe,' an invention which ought to have been sponsored by a society for the prevention of cruelty to burglars. The idea of the thing was that any cutting or drilling through the outer casing should release certain chemicals which would promptly stupefy everybody in range of their fumes. In the morning the owner would find his valuables intact and could simply call a dray and pack off the unconscious burglars to jail.

"With such a device it was unnecessary to have massive steel walls, and the model which I chanced to resurrect was made of one-eighth inch sheet iron. The inner box was entirely surrounded with glass tubes about the diameter of a lead pencil and filled alternately with two chemicals which were supposed to produce stupefying gas when they came into contact. There was a thin outside casing, and the theory was that any effort to break in would necessarily fracture two or more of the fragile glasses. It seemed incredible, but several prominent capitalists became greatly interested in the scheme and stood ready to back it with unlimited means until actual tests finally convinced them of its grotesque impracticability. How the model ever drifted to the Iowa machine shop I couldn't find out. It had been there for years and was probably part of the plunder of some forgotten junk sale.

"The only other safe I know of fit to rank with the 'anæsthetic' as a freak was one designed by an inventor in Washington. It was circular in shape, with a pivot at the bottom, and at night-time the plan was to connect it with an engine belt and spin it like a top. The inventor was very much in earnest and made a large working model. He admitted modestly that the safe could only be used 'where steam power was available.' What would prevent the burglars from throwing off the belt he didn't state."

Where He Can't Smoke.

Miss Lafin—What has become of Mr. May?

Mr. Rand—He has taken employment in a powder mill for six months.

Miss Lafin—How strange!

Mr. Rand—Not at all. He wished to break himself of smoking.

A PALE-FACE GIRL

may be almost safely set down as wanting red in her blood.

If subject to dizziness, fainting, shortness of breath on slight exertion, no doubt remains.

To want red in the blood is to fail of the good of one's food.

Her food is not nourishing her. She needs a change.

The easiest change she can get, and one of the best, is Scott's emulsion of cod-liver oil.

It gives her the upper hand in the contest—her food has the upper hand now—she is pale no more.

We'll send you a little to try, if you like. SCOTT & BOWNE, Toronto, Canada.

Sitting by my fireside,
With only ghosts around,
The frost upon the window,
The snow upon the ground,
It haps my lonely spirit
When Mary brings to me
Of Union Blend a streaming cup,
Of all earth's teas, the tea.
