

DOCTOR JACK.

By ST. GEORGE RATHBORNE,

Author of "Doctor Jack's Wife," "Captain Tom," "Baron Sam," "Miss Pauline of New York," "Miss Caprice," Etc.

CHAPTER II.

The crowd is tremendous, but they avoid the worst of it, for there is a separate door or gate arranged in the interest of those who hold tickets for the shade. Once inside they find their way to the reserved seats, and Jack has time to look around him. He sees an immense amphitheatre, circular in shape, with the arena in the centre. Around this the seats arise in successive tiers. The place will seat perhaps fifteen thousand, and to-day there will be standing room only, for the battle is to be a royal one.

Around the arena is a small wall of boards for the hired chaps to leap over when pursued by the bull, and to protect the spectators in case the maddened animal should plunge over this; just a little way beyond over the sturdy barrier as high as a man's head.

Music sounds upon the air, and a military band dashes off some popular airs that make the pulse beat quicker. The scene is a gay one, not like a gathering in our land, where men dress in black or gray. Here the natives appear in gaudy colours, men as well as women, and the effect of this, added to by the uniforms of hundreds of soldiers, is to form a scene which for gay holiday appearance we never see off the opera stage.

"Look yonder, senior, we are favoured to-day," and Don Carlos points across to the left, where seats are reserved for royalty.

A party is just settling down, some of them officers in high state, and among others Jack becomes interested in those who wear the peculiar fez of the Turk.

"Who are they?" he asks—"The Turks, I mean."

"One is the Turkish ambassador. That stout man with the decorations on his breast is Abdallah Pasha—he won his medals in the late affair with the Russians. I have the honour of his acquaintance. If you should desire an introduction, senior, I can arrange it later."

Senior Jack hears, and yet forgets to reply, for he is staring hard at the Turkish pasha, as though something within warns him that this man will cross his path soon. Whether he has any reason for such a belief or not the near future will prove. At present Jack takes a decided interest in the Turk.

The pasha is heavy set, with a face that bespeaks cunning as well as bravery. He is a man with an iron will—once his mind is made up, all the powers of the earth cannot prevail upon him to change it. Even as Jack watches him the pasha looks that way—they are not far apart—and finding a steady gaze fastened upon him, returns it with a scowl, just as if in the American he has recognized an old foe.

How singular that these two men, who up to this time have never been seen together, should instinctively hate at sight, and yet soul language, speaking through the eyes, his windows, has communicated Jack's aversion to the pasha, and quick to take offence, he returns the challenge.

Presently Jack looks farther around, and sees a party of English and American tourists, who have secured seats in the shade. He watches this

Women are vastly more patient than men. It is scarcely believable that a woman, suffering past all telling, can attend to business, and bend and stoop with a back whose ache is agony. And beyond all this she smiles as she bends and stoops about her customer. A man might swallow down an ail or keep back a groan, but his face would be like a thundercloud, and his voice scarcely disguise his irritation.

For women who suffer from backache, bearing-down pains, or other pains due to womanly diseases, there is no other medicine equal to Dr. Pierce's Favorite Prescription. It regulates the womanly functions, dries weakening drains, heals inflammation and ulceration and cures female weakness.

There is no alcohol in "Favorite Prescription" and it is entirely free from opium, cocaine and all other narcotics. A vegetable preparation, it cannot disfigure with the weakest condition.

"I wish to thank you for the good things you have done for me," writes Mrs. Fulton Co., with doctor-dec seem to worse of.

My dear friend, I have been suffering from a very bad case of backache, bearing-down pains, and other pains due to womanly diseases, and I have been using your medicine for some time, and I feel much better now. I have been using your medicine for some time, and I feel much better now. I have been using your medicine for some time, and I feel much better now.

Alexander I. of Scotland was designated The Fierco. His impetuosity in battle almost invariably struck terror into the hearts of his enemies.

Dr. Pierce's Pleasant Pellets cure constipation and its causes.

HAWKER'S Tolu of Wild Cherry Balsam.

The Surest Cough and Cold Cure.

Price, 25 and 50 Cents per Bottle.

All Druggists Sell It. Be Sure and Get It.

Geo. Phillips, I. C. R. Ticket Agent, says: I was completely cured of influenza cold by Hawker's Tolu.

H. A. McKeown, M. P. P., says: I have used Hawker's Tolu for the last 8 years. It is the best cough cure.

Thos. McAvity says: I have used Hawker's Tolu in my family for years and find it an excellent remedy for coughs and colds.

ARE YOU IN THE GRASP OF THE GRIM REAPER DEATH?

You Can Save Your Life by Using

PAIN'S CELERY COMPOUND

The Great Spring Medicine.

A RESIDENT OF ST. HYACINTHE, QUE., WHO WAS NEAR DEATH, SAVED BY THE WONDERFUL COMPOUND.

It certainly requires a medicine of great power and extraordinary virtue to save a man or woman brought near the dark grave by disease and suffering.

Paine's Celery Compound in the past has saved many a precious life at the eleventh hour.

Mr. A. Diagnant, of St. Hyacinthe, Que., had become tired and weary of life owing to constant illness and pain, and looked forward to death as his only deliverer from agony and suffering.

He had been using Paine's Celery Compound for all other medicines had failed. Mr. Diagnant and his friends were not disappointed. The marvellous compound banished his troubles and restored him to health.

The same grand results—health, vigor of body, general activity and happiness will be your reward, dear sufferer, if you make use of the same life-giving remedy. Mr. Diagnant says:

"I desire to say, that had it not been for Paine's Celery Compound, I would not be living today. Five years ago I was taken sick, and suffered from dyspepsia and catarrh. For three years I was unable to work, and would lose consciousness several times a day. I was tired of life, and could realize that death was my only deliverer from suffering. At that time one of my friends urged me to use Paine's Celery Compound, as all other medicines had failed."

"After the use of six bottles I am as well as ever before in my life, appetite restored, and I can do a full day's work. My friends say my cure is a miracle, as I was surely condemned to die. I cannot thank you sufficiently for your wonderful life-giving medicine."

Indicates poor digestion, and the digestive organs require toning up by BURDOCK BLOOD BITTERS. The wind is caused by the fermentation of gas from imperfectly digested food or a faulty condition of the digestive organs, which, if neglected, leads to stomach and blood troubles, such as indigestion, jaundice, biliousness, or bad blood. All these are common complaints which B.B.B. cures in any stage of the disease.

We now give you testimony from those who have used B.B.B.:

January 28, 1900. With gratitude I can testify to the wonderful curative powers of BURDOCK BLOOD BITTERS. Last summer I was troubled with indigestion so badly that whatever I ate caused me trouble. Eating became a dread to me. I tried Doctors' medicine, but got no relief; then a friend recommended B.B.B. I got a bottle and after taking a few doses began to feel better. By the time I had taken two bottles I was as well as ever and have had no trouble in that way since.

Mrs. MINNIE CADE, Arden, Ont.

April 5, 1900. HANNAH MULLINS, Highland Grove, Ont., writes: "BURDOCK BLOOD BITTERS has done me more good than anything I have ever taken for my stomach. I could not eat, had pain in side and back and felt very miserable. I was run down to a shadow, but one bottle of B.B.B. made me feel perfectly well, and have not been troubled since."

Cartridges Made of Mica.

The uses of mica are manifold. One of its latest developments is distinctly novel. An ingenious Australian has invented and introduced a mica cartridge for sporting and military guns. The filling inside the cartridge is visible, and a further advantage is that instead of the usual wad of felt a mica wad is used. This substance, being a non-conductor, unaffected by acids or fumes, acts as a lubricant. Where smokeless powders such as cordite or other nitro-glycerine compounds are used mica has a distinct advantage over every other material used in cartridge manufacture. Being transparent any chemical change in the explosive can be at once detected. The peculiar property it has of withstanding intense heat is here utilized, the breech and barrel being kept constantly cool. The fouling of the rifle is also avoided, the wad actually cleaning the barrel.

Alexander I. of Scotland was designated The Fierco. His impetuosity in battle almost invariably struck terror into the hearts of his enemies.

ENTERTAINING ROYALTY.

How the Prince of Wales Broke a Long-Standing College Custom.

Many people are not aware what a business entertaining royalty is, how they are hedged off by a hundred little observances from ordinary mortals and treated as if they were a different order of beings entirely. If anyone, for instance, is honored by being allowed to entertain a prince and princess at dinner, all the other guests invited to meet their royal highnesses are asked for a quarter of an hour before the time, so that there may be no chance of the illustrious guests waiting.

One very curious rule is that at dessert none but the royal guests must have finger glasses put before them. The origin of this rather uncomfortable restriction is interesting. At a time when Jacobites were more common than they are now, and when the chances of a rising in favor of the Stuart pretenders to the throne were not altogether remote, certain high-born rebels were accustomed to drink to the king, holding their glasses over the water in the finger glasses. And so, while apparently drinking a loyal toast, they were really drinking to "the king over the water."

When the ladies have left the dining-room a cigarette at the dinner table is an invariable custom. The prince, however he may be, must not be asked to light his cigarette with an ordinary match, but has a little spirit lighter handed him for his sole use.

Upon one occasion, when the Prince of Wales was dining in the Hall of Trinity College, Cambridge, in which it is considered by the dons a sort of sacrilege to smoke, he was not offered the customary cigarette. The Prince had been an undergraduate at the college, and may have felt some hesitation in defying the well-known custom.

But nature prevailed, and his royal highness pulled out his cigar case and lit up; an example which was gratefully followed by many of the other guests. And so, probably for the first time since it was built by his royal ancestor, Henry VIII., the noble old hall was filled with tobacco smoke.

MANUFACTURERS OF

CALCINED PLASTER

LAND PLASTER

ROCK WALL PLASTER

A convenient Wall Plaster for farmers and others living in localities distant from central markets, where time, hair, etc., necessary for use in making ordinary mortar cannot be procured without considerable delay. Rock Wall Plaster is put up in bags of 100 lbs each, and is ready for applying to walls by the simple addition of sand and water. Rock Wall Plaster saves time, admits of carpenters immediately following the plasterers, giving the owner his building weeks earlier than with the ordinary plaster. Rock Wall Plaster is a substitute for ordinary lime mortar and makes a much superior wall. The most inexperienced plasterer can apply it.
