DAILY HERALD

WEDNESDAY, MARCH 27, 1901.

AN AUSPICIOUS EVENT.

The formal opening of the new science building in connection with the University of New Brunswick was the greatest event that has occurred in the history of that old and honored institution since its charter was amended and it took its place as a seat of learning entirely free from sectarian influence.

The completion of the splendid building, to be devoted to the new education, was quite properly marked by the presence of distinguished guests, one of whom, President Louden, delivered an address which most ardent interest in technical education in this province. It is less than a year since the corner stone of the new erection was laid by Governor McClellan, and it was the same gentleman's pleasant duty last night to hand over the building to the University authorities practically completed and ready for occupation. It is true the building is not yet free from debt, but the announcement Dr. Pugsley made, that the legislature proposed making a substantial grant to remove the load, has relieved the situation, and was received with hearty applause. The University is fortunate in having among the members of the legislature, a number of its own graduates, including the attorney general and the opposition leader, who at least in this matter can see eye to eye.

The latest triumph of the university is due first and foremost to Prof. Dixon, who has devoted his time and ingenuity towards awakening public interest in the enterprise which has resulted in such splendid results. The new building cost \$22,000 and it looked at first as if the professor had taken on himself a stupendous undertaking. However, friends of the University came to his rescue, and we have as the reward of his unceasing labors, a magnificent erection which will furnish means for higher education in branches for the teaching of which the University hitherto had only primitive and restricted appliances.

We congratulate Chancellor Harrison, the Senate and all connected with the University, on the grand achievement accomplished under Prof. Dixon's lead, and most of all we congratulate the young men and women of New Brunswick on the increased facilities they have of securing culture in some of the most important branches of education.

ABOUT PRES. LOUDON.

Dr. James Louden, the distinguished president of the Toronto University, whose clever address on technical education at the University last night, we have pleasure in publishing in full, is recognized as one of the ablest of Canadian educationists. He is a native of Toronto, where he was born in 1841, and received his early education in the schools of that city, at Upper Canada College and Toronto University from which he graduated B. A. with the gold medal for mathematics when twenty-one years old. His first position was as teacher of mathematics in University College Toronto, succeeding to a professorship in the same institution in 1875. He was appointed to the Presidency of the Toronto University in 1892 on the death of Sir D. Wilson. He received the honorary degree of LL.D. from his Alma Mater in 1894 and a similar honor from Princeton University in 1896. Dr. Louden is the author of two textbooks in Algebra, and is recognized as the leader in technical education in Canada. He is a Presbyterian and married to a daughter of the late J. L. McDougall M. P. Renfrew Ont.

Mr Cook's evidence before the Senate committee, has not gone far towards establishing his charge that the government offered to sell him a senatorship for \$10,000 or any other sum. The gentleman who is mentioned as conducting the negotiations, is dead, and the alleged incriminating letters have not been produced, only alleged copies. Mr Cook attempts to implicate Sir Richard Cartwright, but the public will forbear to draw conclusions until the latter gentleman is heard on the witness stand.

This is the third consecutive day that St. John bills have occupied the time of the legislative committee, and the expense attached thereto is properly chargeable against the provincial revenue. The St. John papers so often declare the draw from that city.

Moncton Transcript: Thought not agreeing to the Herald's objection to the Liberal principal of "one man, one vote," yet

our Fredericton contemporary logically has Mr. Hazen "by the hip" when it says—Mr. Hazen objects to non-resident voters but he evidently believes in non-resident representatives. Mr. Hazen sits in the legislature for Sunbury and resides in St. John.

Richibucto electors have rejected by popular vote the proposition to incorporate the place.

The Governor General and Lady Minto are to visit New Brunswick this summer.

PERSONAL INTELLIGENCE.

Movements of People in Whom Our Readers Are Interested.

Scott E. Morrell, barrister of St. John, is a guest at the Barker today.

Judge Barker of St. John, registered at the Barker last evening.

Wm. Cooke of Sydney, C.B., is today a guest at the Barker.

T. McHarg, a Montreal traveller is at Long's Hotel.

E.W. Magee and A.L. Treadwell of Upper Magalloway are at Long's hotel.

J.S. Hunter and A.S. Bell of Toronto, are guests at the Queen today.

H.M. Edwards of Meductic, is a guest at the Queen.

C.O. Thompson of Oxford, N.S., is stopping at the Queen.

W.S. Tompkins of Middle Southampton, is stopping at Long's Hotel.

Miss Douglas, of Stanley, has returned from an extended visit to friends in Boston.

W.C.H. Grimmer of St. Stephen, came in by the western train today and is a guest at the Queen.

J.G. Murchie of Calais, is among the guests at the Queen today.

Arthur Patridge of the Globe was among the guests at the University reception.

Isaac E. Moore, principal of the Rousesburg collegiate school, was at the University reception last night.

W.H. Barnaby, of St. John, is at the Queen today.

George W. Fowler, M.P. for Kings, is in the city, a guest at the Queen.

A. McIntyre, of Ottawa, is staying at the Queen.

W.E.O. Jones, of St. John is today a guest at the Queen.

W.M. Jarvis, of St. John, is at the Queen today.

Bishop Kingdon is to administer the rite of confirmation at the Stone Church, St. John, tomorrow evening.

Capt. H.C. Blair, the well known rifle shot of Truro, has been gazetted adjutant of the 78th Highlanders.

Miss Edna Randolph of St. John, is among the visitors in the city.

Miss Sterling of New York, who has been the guest of her uncle, Sheriff Sterling, left today for Newcastle.

Wm. Thorrold, of Margareville, is in the city. He has been in the province for some time looking for a few choice driving horses. Mr. Thorrold is one of New Brunswick's progressive farmers.—Charlottetown Guardian.

Col. McLean, A.P. Barnhill, and Alda Armstrong, Baxter and Macrea, of St. John, who have been here promoting bills before the Legislative committee returned home this morning.

Dr. Murray MacLaren, of St. John, was in the city last evening.

John C. Best, the Sackville man, now on trial for murder at Salem, Mass.

Pain Must Go

Where Poison's Nervine is used. Come posed of the most powerful pain-subduing remedies known. Nervine cannot fail to give prompt relief in rheumatism, neuralgia, cramp, pain in the back and side, and the host of painful affections, internal or external, arising from inflammatory action. A bottle of Nervine will give efficient proof of its superiority over every known remedy. Try Nervine. Large bottles 25 cents. Druggists sell it.

"Perrina Gloves."

Perrin's celebrated kid gloves are so well known to the ladies that they need no recommendation from us. They took first prize at the Paris Exposition and have given general satisfaction wherever sold. They have just received at Elgcomb's a fine stock of these gloves for spring and summer wear.—d

Experienced Corns and Warts.

Your unsatisfactory experience with other preparations should not influence you against "Pain-nu-ne." It was the first, the best, the only painless corn cure. Give it a trial. A corn treated with other remedies wouldn't do so again if it could help it. Give your corn a chance. Druggists who sell only the best always sell Pain-nu-ne's Painless Corn Extractor.

Pratt's Food

for horses, cows, sheep and poultry, the greatest of animal regulators for sale at G.T. Whelpy's.—d

THE CENSUS.

List of Enumerators for the County of York.

SOUTHAMPTON HAS LARGEST NUMBER.

They Will Commence Work on Monday, April 1st.

AND WILL ACT UNDER THE DIRECTION OF THE COUNTY COMMISSIONER.

Following is a complete list of the census enumerators for the parishes of York county, and also the town of Marysville:

Bright—William Graham. CH. Bartt. Canterbury—Lorne Grant, W.H. Scott Douglas—Joseph Richards, Geo. L. Pugh, Jesse Merrithew.

Damfries—Chas. W. Barnett Kingsclear—Thomas Murray, Geo. W. McEwin.

McAdam—James Given. Manners Sutton—Robert Little, John F. Petty.

Marysville—W.T. Day. New Maryland—W.H. McKnight.

North Lake—W.H. Foster. Prince William—Jared W. Smith, Jos. McCutcheon.

Queensbury—Jesse Clark, Isaac Murch, G.H.V. Ingraham.

St. Mary's—Jas. W. McLaggan, George T. Bradley, Charles Simmons.

Southampton—Nelson W. Brown, Thos. W. Purvis, Frank McFarlane, Odbur Sharp.

Stanley—John Hinchey, Michael W. Croity, Havelock Kelly.

The enumerators are to start out on Monday morning of next week, and take the census of the county under the direction of the county commissioner, A.S. Murray. The work is supposed to be completed in a fortnight, but it is hardly likely with the country roads, in their present condition, that the enumerators in the outlying parishes will all get through in that short time.

The enumerators are all sworn to secrecy, and the information given them is solely for the use of the government. Individuals need therefore have no fear that their private affairs will be given publicity.

It might be added here that refusal to give information to the enumerators is punishable by a penalty of not less than \$5 or more than \$20 for each offence, therefore trouble can be avoided and the work of the enumerators facilitated by cheerfully supplying the answers to their questions.

The list of enumerators for the city has not yet been announced.

THE TORRENS SYSTEM.

Of Land Registration—Dr. Pugsley's Bill Introduced in the House.

In the Legislature Tuesday, Hon. Dr. Pugsley introduced a bill entitled the Land Titles Act. This act, he said, had been introduced in several of the United States, in British Columbia, the Northwest Territories and in certain cities and sections of Ontario.

The object of the bill is to substitute what is known as the Torrens system of land titles for the present registration system. Under this system the evidence of ownership is a certificate of the title from the district registrar, which is registered in his book of titles. This does away with all searches of titles. The province under this act will be divided into land titles districts, in each of which there shall be a land titles office and an officer to be called the district registrar. There may also be a deputy registrar and such examiners of titles as are required for each district, and likewise an inspector. The registrar shall keep a book to be called the day book, in which shall be entered a short description of every instrument which is registered, with the day, hour and minute of filing. Application may be made to bring land in each registration district under the new system by filing an application with the district registrar, and after this application is filed and a certificate granted, the provisions of the registry act shall cease to affect such lands.

The bill makes provision for the perfecting of titles and defines the powers and duties of district registrars. Any person subdividing land for the purpose of selling it in allotments, is required to deposit duplicate plans in the office of the district registrar, and the registrar may require any owner of land in his district to file plans of it before bringing it under the new system. The act is not compulsory.

SOUTH AFRICAN WAR.

General French Made Big Scoop of Boers.

Vryheid, Monday, March 27.—General French, with Darnall's and Pulteney's columns arrived here today, having killed, wounded or captured 1,200 Boers.

He has also taken seven canons, 1,000 rifles, 1,800 wagons and 28,000 head of horses, cattle and sheep.

London, March 27.—It is reported from Bloemfontein that General De Wet is again in Orange River Colony.

London, March 27.—The Pretoria and Bloemfontein correspondents of the Times send long despatches admitting that Lord Kitchener's policy and operations have failed to achieve the results hoped for, and pointing out that the British public must be prepared to return to the original policy of occupying districts and stalling the country with military posts, as the only means of effecting complete pacification.

This process, the correspondents say, will occupy much time and necessitate a constant supply of fresh troops. The strain on both officers and men has been and will be immense, and arrangements

must be made to send absolutely fresh troops to the front in order to enable the troops to be sent home.

"Unless this aspect of the case is grasped by the authorities," says the advice to the Times, "there is a possibility of the war lasting for years. It is quite useless to renew peace negotiations. Nothing approaching 'terms,' as the word is generally understood, would be politic or even possible with the Boers.

THE MODERN TYPEWRITER.

Some of the Ingenious Schemes From Which It Has Evolved.

"The history of the typewriter would make a volume full of intense human interest," said an expert who was recently in the city. "There is no other mechanical appliance in the world upon which so much diversified inventive genius has been lavished and so many strange and cranky ideas advanced. We now know that over 300 different kinds of typewriters have been constructed and abandoned since the date of the first experiment, and over 100 are in use now, you can form some conception of the magnitude of the problem and the activity of the inventors.

"Many of those queer early models bear no resemblance to any variety of machine familiar to us today. One of them was half as large as an ordinary piano and weighed 800 pounds. It did pretty fair work, by the way, if the operator was pressed for time, and is now preserved as a curiosity in the office of one of the big firms in the north.

"Another strange specimen was made like a globe—in fact, it was called 'The Writing Globe'—and had the type raised on its surface. It swung around on a universal joint, and a very ingenious contrivance stopped and depressed it at exactly the proper place over the paper. It worked perfectly, but it was impossible to write more than two or three words a minute on it, and how the inventor could possibly have imagined it would ever be a practical success is something I am unable to understand.

"Nearly all the modern typewriters now on the market are evolutions, rather than inventions. They have been gradually built up and perfected and are the fruit of scores of brains. I call one machine to mind in which fully 200 patents of different kinds are incorporated. One small part, that could be held in the palm of the hand, has been changed and improved a dozen times since the first model came out of the shop.

"Most of these inventions are made by the workmen at the benches, and the company buys and develops them. As a rule they are small, and the mechanic gets from \$5 to \$50 for his idea, but occasionally some bright fellow stumbles on to something much more valuable. One big bit in that line was a device for cutting typewriter type from a continuous roll of wire. It was designed by a young chap in one of the large manufacturing concerns of the land, and he was paid \$40,000 in cash for the exclusive rights. He has quit work since and set up an automobile."

Always the Best.

Lucy & Co., wish to inform the public that they handle nothing but first class goods. Their stock is the cheapest because it is the best. Manufacturers usually have a large supply of inferior goods, the result of errors, inferior workmanship or some other such cause. These they frequently offer us at a nominal price but we do not think them fit for our customers. Lucy & Co. don't deal in such goods. They annually return hundreds of pairs of boots and shoes which are not up to the goods. They retain the best only. Their samples are the cheapest because they are the best. Deal with Lucy & Co.—d.

St. John Bills.

The municipalities committee of the House is still busily engaged with St. John bills. Last evening they considered a bill to provide for submitting to the ratepayers of St. John the property of the council making a grant for exhibition purposes and decided not to recommend it to the House. This morning the Carleton Railway bill was agreed to with amendments and the Spruce Lake bill was held over for further consideration.

Sworn In.

A number of the census enumerators for the parishes of the county were sworn in by County Commissioner Murray this forenoon. Among the number were Jared W. Smith of Prince William, Geo. W. McEwin of Kingsclear, and Thomas W. Purvis of Milville.

Don't be Caught.

Are you thoroughly equipped with clothes? If you do not better place your order with me at once for a working suit or a nice dress suit. I employ skilled labor, use good goods, and always give a good fit. I. C. Burden opp. Eon Business C. here York St. Free.—d.

Pill Sense.

It stands to reason that Dr. Agnew's Little Liver Pills will crowd out of the market many of the nauseous old-timers. A better medicine at less than half the price is all the argument needed to keep the demand what it has been—phenomenal—40 doses to cents. They cure Sick Headache, Biliousness, and allay all stomach irritations.—5

Property Transfer.

Frank DeL. Clements of Upper Kingsclear has purchased from Mrs. Bridgette Murray farm at Springhill. It contains upwards of one thousand acres and it is understood the purchase price was in the vicinity of \$7,000.

Police Cur.

Five small boys were before Col. March this afternoon on complaint of the policeman for creating a disturbance in front of a newspaper office on Queen street.

The Rubber Season

I am now here. We can supply you with every style of Rubber Footwear.

Quality the best.

Prices the lowest.

THE COOK CHARGES

Principal Witness Submitted to a Searching Cross Examination.

HERMAN DECLINES TO TELL WHO PREPARED HIS DECLARATION FOR THE PRESS.

But Admitted That it was not His Own Work.

(Special to the Daily Herald.)

Ottawa, March 27.—The sitting of the Senate committee, which is making an investigation into the charges of Herman H. Cook, that he was offered a seat in the upper house for \$10,000, was today devoted to an exhaustive cross examination of Mr. Cook by Hon. S. H. Blake, counsel for the government, who went over the whole ground covered by Cook's direct evidence on Tuesday.

Mr. Blake's questions were calculated to weaken the force of the statements made by Cook.

Cook stood to his guns on the majority of points and although ordered by the committee to do so, stoutly refused to tell who prepared the lengthy declaration on the subject given out to the press previous to the last general election.

He admitted that it was not his own work, and Mr. Blake finally gave up the attempt to make him tell, saying that he would come back to the point later on.

Cook reiterated the statement he made on Tuesday, that W. T. R. Preston had offered him a seat in the Senate for \$10,000. He said he regarded Preston as a general buffer. The cross examination continued till noon and the committee adjourned till 3:30 p.m.

Special from Kingston, Ont.

Kingston, Ont., March 27th. Please announce to the readers of the Herald that we have just placed in the hands of the drug trade, a 25¢ size of that now famous remedy Catarhazine. This will be welcome news to a great many as it will save them the trouble of sending to Kingston for it. If your druggist hasn't it he can get it.
