Lieut. W. H. J. Nickerson, who received the Victoria Cross for conspicuous bravery in caring for the wounded under a heavy fire at Makkerstrom, April 20, is a native of Sackville, being a son of Rev David Nickerson, M. A., who about a quarter of a century ago was Church of England rector of that parish. Rev. D. Nickerson resigned Sackville parish about 20 years ago and went to England, where he was appointed to a chaplaincy in the army and his son also entered the army.

Major Alexander H. Davis, a millionaire, who until recently made his home in Syracuse N.Y. and paid personal taxes, has declared himself a subject of King Edward, of Great Britain and had his name stricken from the personal tax roll. Major Davis ran for congress on the Democratic ticket against James J. Belden, 15 years ago, and was defeated. He has large street railroad interests in Louisville and extensive real estate in this city. For 10 years he has lived in London and at Naples, Italy.

Grand Lodge, Independent Order of Good Templars, met at Moncton Tuesday, about fifty being in attendance. The reports of Grand Chief Templar Dodge of Nauwigewank and Grand Secretary Lawson of Salisbury were submitted. The latter showed a considerable decrease in membership. Four new lodges were organized and three resuscitated during the year, but fifteen charters were forfeited, so that only 44 are active, as compared with 52 last year. The total membership had declined in the same time from 1,708 to 916, the heaviest loss being from forfeit of charters.

The ten thousand men who are to be reviewed by the Duke of Cornwall and York in Toronto will be in the city for two days. Perhaps 5,000 of the men will be accommodated on the Exhibition grounds, and the remainder probably will be encamped in the east end of the city. Over thirty regiments will appear in review before the heir-apparent. The city corps will be drawn from Toronto, Hamilton, London, St Thomas, Brantford, Stratford, Belleville, Peterboro, Brockville and Ottawa, and will number about 5,500 men. The remainder will be selected from the rural corps in numbers one, two, three and four districts.

What does it profit a woman if she gain the whole world of knowledge and lose her own health? Young women students, and school teachers, eager, ambitious, and full of energy, very often neglect their health in the struggle to gain education. They eat insufficient food, and at irregular hours, they allow irregularity of the womanly functions to be established, and the result is that they become chronic invalids with all their education practically worthless. There is a plain road back to health for such as these, marked by the feet of thousands.

It is the use of Dr. Pierce's Golden Medical Discovery for diseases of the stomach and digestive and nutritive organs, and Dr. Pierce's Favorite Prescription for diseases of the delicate organs womanhood. A cure so certainly follows the use of these remedies that out of hundreds of thousands who have tried the treatment, ninety-eight in every hundred have been perfectly and permanently cured. Constipation, with its calamitous consequences, which is a common ailment of students, can be entirely cured by the use of Dr. Pierce's Pleasant Pellets.

Capt. Standen, of the bk Liberti, which arrived at Point du Chene, Tuesday from Newport, reports having picked up July 8th a dory with two dead men in it between Grand Bank and St. Pierre, aged about 50 and 20 years respectively. Everything possible was done to revive them, but without avail, and they were buried at sea the following day with the usual religious ceremonies.

Recently a herd of cattle owned by James O'Brien, of Beaver Brook, Northumberland Co., strayed on the I. C. R. track just before the express passed. When the express came along they were quietly chewing their cud. Six of them were killed and several injured. The train was running at a high speed. It was a little foggy and the engineer claimed he did not see the cattle in time to stop.

Bronchitic Sufferers

Act foolishly. If they improve ever so little when the fine weather comes, they relax effort and drift back into the old condition which if possible, becomes more chronic. Hit Bronchitis hard in the summer and you'll get rid of it and drive it right out of the system. In winter it is almost impossible to do this. Inhale Catarrh Remedy, it's a dead sure thing on Bronchitis. It goes into the most minute air cells of the lungs, bathes all parts of the bronchial tubes with its healing, germ destroying vapor, and cures every time. Highly endorsed by all competent druggists and doctors. 25c. and \$1.00.

THROUGH THE RAPIDS.

Carlisle D. Graham's Second Successful Voyage.

HIS BARREL CAUGHT IN THE EDDY UNDER THE CANTILEVER BRIDGE.

And He Nearly Perished for Want of Air.

DESCRIPTION OF THE THRILLING TRIP.

Niagara Falls, July 14.—Carlisle D. Graham successfully navigated the Whirlpool Rapids in his barrel this afternoon. The feat was witnessed by seven or eight thousand people, who lined both banks of the gorge and bridge. At about 3.15 p. m., he stepped into his barrel, that lay on the American shore a few hundred feet above the cantilever bridge. After closing the trap on the end of the barrel, which is about nine feet in length, bound with iron hoops and heavily ballasted in one end with lead, it was towed out to about midstream by a rowboat and cut loose. The barrel slowly glided down stream towards the American side, and after passing the large rock between the cantilever and steel arch bridges it was caught in an eddy and was thrown into the American current, where it made the rounds several times of the little bay up and down the river for about twenty minutes, finally being caught in the current down stream. It soon shot under the steel arch bridge, hugging the rapids towards the American shore, and was tossed like a cork up high in the air, then completely submerged under great breakers that tossed and tore through the gorge. When it reached the turn in the river opposite Webb's Point it was shot out into midstream, and a few seconds later it shot into the maelstrom of the pool. It was caught in a current that carried it clean across the side of the pool to Thompson's Point, on the Canadian shore, where it was caught by a lot of boys and towed ashore. The trap was opened, and Graham, who was in a dazed and semi-conscious state for want of air, was taken out and laid on a large rock and fanned, rubbed and brought back to life again. He claims he will make another trip during August. He said the man in the boat did not tow him far enough out into the stream, and that he was nearly exhausted on account of being caught in the eddy under the cantilever bridge.

WILL GIVE UP POLICIES.

Twenty Thousand K. of Ps Expected to Do So.

Twenty thousand members of the Endowment Rank of the Knights of Pythias, says the Bangor News, or almost one-third of the entire present membership, are expected to give up their policies and abandon their insurance, as the result of drastic reform measures adopted by the supreme lodge of the order at the convention in Chicago.

The reforms have put the endowment rank on a more substantial finan-

cial basis than it has ever had before by raising the rates of the monthly payments for insurance an average of 53 per cent. The rates proposed as desirable by the national fraternal congress last summer have been met at every point, and they will place the income of the rank far beyond the death losses.

The leading officials of the endowment rank expressed their personal opinions unanimously that the increases would drive a big percentage of the policy holders away. The lowest estimate of the probable forfeitures was 10,000, and the figures predicted ranged from that point to 25,000, out of a total membership of 69,311 enrolled June 30.

The effect of the higher rates will be to provide for the payment of all the delayed death claims inside of a year at the longest. The total amount of these claims was \$425,000 on June 30, and the new rates, allowing for the heavy loss of members, will net almost \$50,000 a month income more than is needed.

Before the new rates were adopted there was a violent many-sided fight as to whether the policy was good or not. The old rates were much more favorable to old men than to young, and consequently the younger element lined up in favor of the change against the older element.

There was an even harder struggle made by men who thought it was not fair to place all the financial burden of making up the deficit caused by bad administration on the policy holders. The men who took this view pointed out that the endowment rank was incorporated in the name of the Supreme Lodge of the Knights of Pythias and was controlled by it. They said that Mr Hinsey was an officer appointed by the Pythian order and not by the policy holders, and that consequently the whole order should bear the losses caused by him, and that a uniform assessment on all Pythians should be levied to make it good.

An Ontario census enumerator wants \$10 to cover cost of a pair of trousers damaged by "a mongrel collie." Census enumerators who wear \$10 trousers ought not to be exposed to anything less than thoroughbred bull dogs.

Peers and "Pables."

By a parliamentary return, obtained on the motion of Mr. Summers, M. P., for Huddersfield, it appears that the Upper House is largely interested in public-house property.

The following is a list of peers, with the number of these establishments which, according to this document, each owns:

Lord Salisbury	11
Lord Dunraven	11
Lord Derby	72
Duke of Bedford	50
Duke of Devonshire	47
Lord Hartington	6
Duke of Rutland	37
Duke of Northumberland	36
Lord Dudley	33
Lord Cowper	22

325

It may be answered, however, that many peers run public-houses, not for profit, but to ensure that the "poor man's club" used by their workmen and tenants shall be properly conducted.

Absent-minded Englishmen.

Some stories about absent-minded men are rather difficult to swallow, but a correspondent, of whose integrity we are convinced, vouches for the following:

I have (he says) a friend, still at large, who went home the other day to dress for a party, but unhappily wound up his watch before taking off his clothes. This set up a sequence of automatic actions which ended in his going to bed instead of going to his party! Can anyone beat that? Another example is sent to us:

A friend of mine (a correspondent says) was recently married. Before his marriage he had always lived with his mother. One evening, a fortnight after returning from his honeymoon, he went straight home from business to his mother's house. What happened afterward is his own secret.—London News.
