FREDERICTON, N. B., FRIDAY, AUGUST 16, 1901.

NO 290

NOTES OF THE NEWS.

Interesting Occurrences
Paraphrased for Herald Readers.

FROM LATE DESPATCHES AND EXCHANGES.

An outbreak of rabies is causing alarm in Pelham Township, Ontario. A number of mad dogs have been destroyed.

The artillery corps in various centres of the Dominion fired minute guns in memory of the late Empress Frederick of Prussia.

The Rat Portage Miner notes that the Indians in the vicinity have so far in the season received \$30,000 for picking blueberries.

Mr. S. Clark, M. P. P., of Cobourg, Ont., has bought 10,000 acres of land in Manitoba townships for residents of Durham County, Ont.

Donald McKay, of Sydenham township recently pitched eight loads of grain, working hard all day, although he is 88 years of age.

The Ontario crop bulletin for August estimates a decrease in fall wheat and spring grains. The apple crop is a failure and other fruits light.

A Montreal despatch says that a director of the C. P. R. expresses the opinion that the difficulty with the trackmen will be settled in a few days.

A Canadian regiment will be sent to represent Canada at the King's Coronation. It will be organized in the same manner as the regiment sent to the jubilee ceremonies.

The Dominion Government is considering the adoption of the Ross Rifle, the invention of Sir Charles Ross, and has asked a number of military experts to convene at Quebec and there test the new arm, in order to report on its merits.

While Captain Fennell and officer Connors of the Montreal Police force were attempting to arrest a young man for assaulting another, on Saturday, they were set upon by a gang of roughs and badly beaten.

Four delegates, representing 100,000 unionist labourers, have sailed from Liverpool to study the economic conditions of labour in America. Their passages was provided by A. L. Jones of Liverpool. More delegates will visit the United States when the steel strike is over.

The body found on the G. T. R. track at Sherbrook was identified last evening as that of P. Boucher, Windoe Mills. At the inquest the jury returned a verdict that deceased came to his death by being run over by a train while asleep on the track, and that no blame was attached to any one.

Frederick Westbrook and Robert Groin who had been paying attention to a young woman, met on the road in the Bowman neighborhood of Jackson, Miss. recently, while Westbrook was taking the young woman to church. A duel followed, in which Westbrook was killed. Groin afterwards committed suicide.

Considerable interest is being excited among pedestrians by the sight of two workmen busy replacing rusted plates on St. James Cathedral spire, Toronto, over 300 feet above the ground. It is the first work of repair that has been done on the steeple since its erection. The steeple climbers are Frank Scully and James Plowman.

Rumors of a settlement of the steel strike are again being revived, but confirmation of them at any source is impossible. It is related circumstantially that the Amalgamated knows it cannot win; that the United States Steel Corporation fears the loss of both skilled men and orders to the independent mills, and that they are close to terms which will be satisfactory to both sides.

James E. Badell, who is serving a sentence of 25 years and 4 months in Sing Sing prison for having stolen \$296,880 while employed as chief of the department of real estate in the law firm of Shipman, Barlow and Choate, of New York city, in 1888, has been granted a commutation of sentence by Gov. Odell. Badell forged mortgages, releases and cheques, and when detected made a full confession.

The Colonial office announces that, under date of July 8, the resident Magistrate and Clerk of Steytlersville reported to Sir Haly-Hutchinson, Governor of Cape Colony, that while they were out scouting with a native constable named James Madhlaila they were surprised by Boers, who shot the constable in cold blood, though he was not armed.

A mountain of logs—10,000,000 feet of them—is about to be towed across the Pacific. A similar experiment years ago resulted in a sorry, smashup that left acres of timber floating on the waters. But the Robertson Raft Company has been very successful in "rafting" timber from Oregon on San Francisco, and is thus encouraged to bolder ventures in cheap transportation. Over 1,000 tons of heavy chains will be used in constructing the raft; and if it reaches the Orient in safety the profit will be stupendous. San Francisco Cal.

The fattest baby in Missouri is Carl Hatcher, son of Mr. and Mrs. Clifford Hatcher, of Rich Hill, Mo. When he was 11 months old he weighed 44 pounds. Carl is a handsome as well as a fat baby. When born he weighed nine pounds. He began increasing in avoirdupois at once, and has gained from three to five pounds every month since. His proud mother is certain that he is the biggest child of his age in Missouri. The largest baby between six months and two years exhibited at the recent show in Convent hall weighed but 35 pounds. Both of Carl's parents are comparatively small. His father, who is a coal miner, weighs 140 pounds, while his mother weighs only 120.—Kansas City Journal.

A man talks about owning his business. But, as a matter of fact his business owns him. His whole life is regulated by the demands of the business. The time at which he rises, his breakfast hour, the time given to meals, are all determined by business obligations. He rushes through lunch because he "can't spare the time from business" to eat leisurely. He won't take a rest because he is needed at the store or office. He is in fact an absolute slave to business. The results which follow this slavery are to be seen on every hand. Men dyspeptic, irritable, nervous, with drawn faces, and hollow eyes, sit at the desk or stand behind the counter until they collapse in a fit of sickness, or are taken away by heart failure. Those who cannot escape the exactions of business will find a friend in Dr. Pierce's Golden Medical Discovery. It strengthens the stomach, increases the action of the blood-making glands, increasing the vitality and physical vigor. It makes men strong and prevents those business break downs which so often terminate fatally.

While lecturing his congregation rather strongly on a recent Sunday about slack attendance and small collections a minister of a church in an English city used the following eloquent and forcible sentence. "Yes brethren our collection of a little over £3 last Sunday included no fewer than 500 halfpennies. We all know about the widow's mite and I am sure we are glad to receive it, but I don't think there are 500 widows in this congregation."

Bronchitic Sufferers.
Act foolishly. If they improve ever so little when the fine weather comes, they relax effort and drift back into the old condition which if possible, becomes more chronic. Hit Bronchitis hard in the summer and you'll get rid of it and drive it right out of the system. In winter it is almost impossible to do this. Inhale Catarrhose regularly, it's a dead sure thing on Bronchitis. It goes into the most minute air cells of the lungs, bathes all parts of the bronchial tubes with its healing, germ destroying vapor, and cures every time. Highly endorsed by all competent druggists and doctors. 25c. and \$1.00.

The woman in the New Jersey State Hospital who calls herself the Goddess of the Sun and imagines she rules the solar system may some time come out of her trance and learn that J. Pierpont Morgan is in control of most of the territory she is presuming to govern.

Toothache Cured in One Minute.
Not only toothache, but any nerve pain is cured instantly by Polson's Nerviline. Thousands have testified that its powerful, penetrating, pain-subduing properties make it an absolute cure for neuralgia, rheumatism; toothache, cramps, colic and all other pains and aches that beset mankind. The world is challenged to equal Nerviline as a household liniment. Large bottle 25 cents.

THE MANITOBA HARVEST.

Cutting Will Be Completed at an Early Date.

Winnipeg, Aug. 15.—Fine, bright weather, somewhat warm, visited Manitoba today. Harvesting is going on apace, and everything points to an earlier completion of the cutting than was expected. Word received at the Grain Exchange today shows that in all parts of the Province the harvest is on, and if the present ideal weather continues to favor the fields of ripening grain, it will be garnered in short order. A despatch from North Portal, on the Soo line, says: "Crops here were never better, and they are certainly as good as anyone could wish. A conservative estimate puts the wheat yield at an average of thirty bushels; oats, 50. The acreage is fully 50 per cent. more than last year. There are about one thousand acres under flax in this neighborhood, which promises a big yield." From Summer District, Assa.—Cutting in this district is general, both wheat and oats being an exceptionally fine crop. If nothing untold happens, the finest crop will be harvested here since the settlement in 1883. Farmers are too busy to think of the political outlook, but if the question of applying for Provincial rights is deferred until fall, a very pronounced feeling will be in evidence that the arbiters are those who have made the Province.

J. A. Smart, Deputy Minister of the Interior, who is on his return from a trip to the coast, gives a flattering account of the progress observable in the west generally. Mr. Smart visited Edmonton, Prince Albert, Calgary, Vancouver, Victoria, Nanaimo and the Kootenay District. "Everywhere," said Mr. Smart, "I found signs of the enterprise and material progress so characteristic of the west. Not only is the grain crop a record one, but the increase in the ranching business is phenomenal. Horses, cattle and sheep are all in good order, and the ranchers are jubilant. Another month of good grain crop, and as a result Manitoba and the Territories will boom as never before."

Don't let worms gnaw at the vitals of your children. Give them Dr. Low's Pleasant Worm Syrup and they'll soon be rid of these parasites. Price 25c.

She's as White as a Ghost.
As pale as a lily. A matter of pride? Certainly not. Strength! Color! Endurance! That's what every woman wants. Good digestion, perfect assimilation. Buoyancy is the right of every woman. She need not lack these if she will only use Ferrozone. It makes blood, gives appetite, gives strength to the nerves, color to the cheeks, and brightness to the eyes. A box of Ferrozone tablets is at once transmittable into health, beauty and strength. There is power in Ferrozone. Try it and see if it is not so. Sold only by C. H. Borchill.

Admiral Dewey will go down into history as the man who was in command during two great naval battles—the battle of Manila and the Sampson-Schley engagement which is to take place in Washington in September.

To Reduce Your Boot Measure One Size
Isn't half as hard neither is it as painful as before the introduction of Putnam's Painless Corn and Wart Extractor. In twenty four hours the corn is removed. Pretty and small feet are well assured on everybody, but it can't be done unless you use Putnam's—there are not nearly so good. Putnam's is the best. At druggists.

A New Yorker, in trimming a corn, caused blood poisoning, and has had to have his leg amputated. He would have saved time and money and cured the corn just as effectively by having his leg cut off in the first place.

Anyone troubled with boils, pimples, rashes, festering sores, or any chronic or malignant skin disease, should use Burdock Blood Bitters externally and take internally. It will cure where others fail.

HILARIOUS HARVESTERS

Refreshment Rooms Raided and Robbed By Them.

Fort William, Aug. 13.—A party of Maritime Province men, on board one of the harvester excursion trains bound for the west, has been having a somewhat hilarious time on the journey up. Owing to a plentiful supply of whiskey, which they brought with them, they

got into a quarrelsome state of mind, and are reported to have used their knives on each other during the night, but without much injury. This morning one man fell off the train while it was in motion. Later, on arriving at Missanabie, a refreshment room was raided, and at White River the same thing occurred. Supplies were taken from a shop as well, and all the cigars in sight at the station lunch room were appropriated. These latter proceeds have been reported to Police Magistrate Dobie at Port Arthur, who is considering what is to be done when the train arrives there in the morning. As there are about 800 men on the train there may be some difficulty in identifying the guilty parties.

What teas shall we use? Ask any good housewife and she will tell you that UNION BLEND TEAS at 25c, 30c, 35 and 40 cents a pound are the best on earth.

LIPTON'S DEPARTURE.

The Great Yachtsmen Given a Rousing Send Off.

London, Aug. 14.—Sir Thomas Lipton started for the United States this morning, leaving a cheering crowd of acquaintances and well-wishers who had assembled at the station to bid him farewell. His compartment on the train was half filled with flowers, including a model of the Shamrock II, the hull being of manganese bronze, from the trimmings of the plates used on the Shamrock II, gold plated, the rigging of gold cords and the sails of woven flowers. It was the gift of Miss May Morell.

Sir Thomas' party included Charles Russell, J. B. Hilyard and Robert Ure, George L. Watson, the yacht designer, will join the party at Liverpool.

When the time drew near for the train to leave, the crowd cheered Sir Thomas Lipton, sang "For he is a jolly good fellow," and called for a speech. Sir Thomas thanked those present for their kind wishes, and expressed the hope that the Shamrock II. would fulfil all expectations.

"We have done all on this side that could be done," said he, "and the boat is in the hands of the most skillful yachtsmen in the United Kingdom. If we fail we shall know we have been beaten by generous, high-feeling sports men who know more about the game than we."

Sir Thomas stepped on the moving train amid outbursts of cheering.

Prof. Brouardel, dean of the medical faculty of Paris, declares that consumption is curable. Out of the deep thought and investigation that are being given to this subject there are certain to come results that shall add to the happiness and health of the race.

LOWER SOUTHAMPTON.

(Special Correspondence to the Herald.)

Aug. 13.—The most of the farmers in this section of the country are done haying.

Mrs. Wilmot-Fox of Perham, Aroostook Co., Me., who has been visiting relatives in this place, has returned home.

Mr. Charles Mullin, traveller for J. M. Wiley, Fredericton, was also here last week.

Mrs. Abey Brewer of Woodstock, is visiting her parents, Mr and Mrs George Miller.

Miss Jean Bustard, who has been staying with her grandmother, returned home on Monday last.

Mrs. Andrew Mustard and family, of Kirkland, Carleton county, made her mother, Mrs. Peter Morrison, a visit on Sunday last, returning home on Monday.

Mr. Clarke, representing the Hart Boot & Shoe Co., of Fredericton, passed through here the other day.

J. A. Lawlor, representing J. S. Neill, Fredericton, passed through here this morning.

Some of the men of this place has gone off to the Manitoba harvest fields.

Viennese shoemakers are holding meetings and protesting against the projected establishment of American shoe houses in Vienna. It is such demonstrations against Yankee skill, industry and natural resources that show where the shoe pinches.

The occasional irony of the elements is not often so pointedly shown as in the case of the lightning that recently struck a ball player and missed the umpire.

LAXA-LIVER PILLS regulate the bowels, cure constipation, dyspepsia, biliousness, sick headache and all affections of the organs of digestion.

HALIFAX, NOVA SCOTIA.

Soon to Pass from Control of the British Military Authority This Into a Naval Station.

Halifax will soon cease to be a military station and pass exclusively under the control of the British admiralty. This statement was lately made in official quarters, says The Ottawa Citizen.

Halifax has been a military station since 1749, and it is now proposed to make the city one of the greatest naval stations in the world. In addition to the men of the fleet there will be a reserve consisting of about 2,000 soldiers and marines, of which 600 will be marine artillerymen. This naval force will be retained here. Information states also that royal engineers will be retained and continue under and in charge of the submarine department. The royal marine artillery belonging to the reserve force will be required to man the forts, and will, when necessary, be assisted by sailors. It is the intention to station in Halifax a regiment known as the royal garrison regiment. This will be recruited from time-expired men, who will be required to serve four years before going on regular service. The garrison will, of course, be under command of the admiralty, and the British admiral will replace the army general, who has hitherto commanded the station.

It is also stated that the works at Esquimaux will also be transferred wholly to the admiralty department.

A military officer stated in conversation the other morning that he would not be surprised should an announcement be made that the Imperial Government had decided to construct and operate a factory near Halifax for the manufacture of small arms and ammunition.

A USEFUL EXHIBIT.

It may be said that the Canadian exhibit at Glasgow is a good, useful and well-arranged display of the natural resources of the country, and all manufactures in which a trade can be done with countries on this side of the Atlantic, writes a correspondent on the spot. No doubt can exist in the minds of any who visit this Exhibition as to the wealth of Canada in the production of its soil, in its minerals, its forest and its fisheries. Nor can there be any question as to the great progress which has been made in the development of these various resources. No better object-lesson can be placed before the mind of the intending emigrant than what is here represented to him, and from the enquiries made, the interest taken and the admiration so freely expressed by the people of all classes who crowd the Canadian Pavilion there can be no doubt that the Glasgow Exhibition will have more effect in developing trade with Canada and promoting emigration than people in Canada are inclined to admit. We are here, not among strangers who may wonder and admire and pass on, but amongst our best customers, the people with whom we are most anxious to trade and most desirous of attracting to our shores.

Horse's Fear of Paper.

"Odd, isn't it," said an old horseman, "but a piece of white paper blowing under a horse's feet will scare him when nothing else under the sun will make him bat an eye."

"There are old dray horses in this town that would go on eating out of a nosebag if the crack of doom should sound in the street. There are hundreds of them that would not wink if a circus procession and seven bands came by. A tugboat might blow up in the river not 50 feet away and they wouldn't try to dodge the boiler-plate."

"But you can't trust one team in a thousand to stand for the half of a newspaper to come blowing under their feet."

"Why is it? I don't know. If a horse has any 'bolt' left in him he will go at that. The automobile and the trolley, that are new to him, don't feaze him, but the scrap of paper, which has been with us for generations will frighten him into a fit."—Toronto Sunday World.

A Boy's Sense of Honor.

Was it a mistaken idea of boyish honor that prompted him to do it? Who could, however, not admire the spirit of the little fellow who, while he lay dying in a Toronto hospital, the other day, refused to tell the name of the companion who had pushed him from a car and brought him to his death? "Don't cry, mamma," he said, after his crushed legs had been amputated. "It wouldn't be fair to tell. He didn't mean to hurt me." And, with his hand clutching his mother's tightly, the boy who was true to his chum, even to death, passed away.

Where Kid Gloves Come From.

Grenoble is the place where the most of the kid gloves come from. At this place alone 1,200,000 dozen pairs of gloves are manufactured annually. This represents a value of \$7,000,000 and gives employment to 25,000 working people of both sexes.
