## THE WINDY CITY

Herald Representative Writes of His trip to Chicago.

**A CITY WITH OVER 4000 MILES OF STREETS.**

**Something About Chicago's Water and Sewerage System.**

**THE HOME OF SKY SCRAPING OFFICE BUILDINGS.**

(Staff correspondence Daily Herald.)

Chicago, March 15.—Chicago the great metropolis of the west, what a big, bustling place it is to be sure. A city occupying nearly two hundred square miles and containing a population of two million souls—a population two hundred and fifty times greater than that of Fredericton nearly seven times larger than that of New Brunswick, and fully one-third that of the whole Dominion of Canada. A city with a population much greater than that of all the cities of Canada combined, the greatest city in the west and the greatest in the new world barring New York. Chicago as it stands today in all its magnificence gives evidence of a growth which probably has no parallel in the history of the world. In the year 1800 we are told that the site of this great metropolis was nothing but a swamp; in 1812 a struggling military post and the scene of a terrible Indian massacre; in 1820 once more an unimportant military headquarters; in 1830 a group of a dozen houses without post office or mail routes; in 1840 a city with 5,500 inhabitants; in 1850 the population was 170,000, and to-day it is estimated at 2,000,000. It is difficult to believe that this great city was incorporated only eight years before Fredericton, but such, however, is undoubted the case.

**A GREAT RAILWAY CENTRE.**

The secret of the marvellous growth is found in the location of Chicago with reference to the great and fertile western country, which has in fifty years developed into a wilderness into a vast empire. Standing practically at the head of lake navigation, and being the greatest railway centre in the world it is naturally the great entrepot of the west, the receiving and distributing point for the products of that vast region, the gateway through which flows an enormous traffic. The great opportunities attracted the first men of enterprise and push, and to this circumstance is no doubt to some extent due the wonderful development of the city.

Chicago is not only the greatest railway centre in the world, but it is also the world's greatest grain and live stock market. The state of Illinois has 15,000 miles of railway, and no less than 90,000 miles of railway (one-twentieth of all the railway mileage in the universe and one-third that of the United States) centres in Chicago at the present time. Estimates have been made showing that more passengers arrive and depart, and more merchandise is received daily in Chicago than at any other point on earth. There are no less than six terminal railway stations and over one hundred way stations within the city limits.

The city of Chicago is intersected by the Chicago river, a sluggish, unpoetic stream, with a width of about one third that of the St. John. The river flows into Lake Michigan and is navigable for large vessels and steamers. About half a mile from its mouth the river branches and divides the city into three parts, known as the North Side, the South Side and the West Side. At first the expression "South Side" or "North Side" so frequently heard in conversation, was a little puzzling to the New Brunswickers, but they finally solved the problem. Something like fifty bridges span the river at various points in the city limits, and the electric cars cross by means of tunnels beneath the river bed.

Chicago in addition to being a great railroad centre is also a shipping port of no small importance, indeed it is said to even surpass New York in that respect. An enormous traffic is carried on the

**A Toronto Druggist Tried All the Catarrh Remedies Known**

**SAYS JAPANESE CATARRH CURE IS THE ONLY PERMANENT CURE.**

Mr. John Wyle, the well-known Senior Clerk for Mr. Geo. Marshall, the leading Queen St. Druggist, Toronto, writes:—"When I saw I believe Japanese Catarrh Cure the only cure for catarrh on the market, I think I know just what I am talking about. I have tried every remedy which I thought would do me good, and also several doctors, but only received a little temporary relief. After hearing second of our customers, who had used Japanese Catarrh Cure, speak so highly of it, I tried it. From the very first it gave me much relief, soon the dropping in my throat ceased, and now, after using in all four boxes of Japanese Catarrh Cure, I have myself completely cured of this most disagreeable disease, after suffering for years. I have since recommended it to some of our customers, and know of several of them whom it has cured."

Japanese Catarrh Cure permanently cures catarrh and catarrhal deafness. All druggists, 50 cents.

For sale by John M. Wiley, Druggist.

great lakes by means of vessels and steamers, and last year I am told that no less than 17,000 vessels entered and cleared from this port. Practically Chicago is the great shipping point of the lakes, as well as the great terminal point of all the trunk lines of railway in the United States, Canada and Mexico.

**THE WATER SYSTEM.**

The city is in possession of one of the best water and sewerage systems to be found on the continent of America. The water supply is drawn from Lake Michigan by means of tunnels extending under the lake. The tunnels have connection with pumping works in the city, one on the North side and one on the West side. The "Crib" is situated out on the lake two miles from shore. It is a substantial structure having within it two iron cylinders nine feet in diameter, which go down about fifty feet below the bottom of the lake and connect with the tunnels. One of the tunnels is five feet in diameter and is said to have cost \$400,000. The entire water works system cost over \$21,000,000, and the daily capacity of the plant is estimated at 350,000,000 gallons, which volume of water flows through fifteen hundred miles of main and distributing pipes. The North side water works has a tower 175 feet high from which a splendid view of the city and harbor is afforded the visitor.

**CHICAGO'S SEWERAGE SYSTEM.**

Engineering skill has triumphed in perfecting Chicago's drainage against almost insurmountable natural disadvantages. It must be remembered that the site of this great city was at one time a swamp, and today the streets are as level as those of Fredericton. The original level was only about ten feet above the level of the lake, and with the rapid increase of population the question of drainage soon became of the first importance. The same difficulties which may one day confront the citizens of Fredericton have been met and overcome by the enterprising people of the windy city. They solved the problem by first raising the grade of the streets of the business portion of the city from ten to fifteen feet, the buildings being raised by the actual use of jacks, and secondly by actually changing the current of the river. This was done by means of huge pumping works, which draw the water out of Lake Michigan through the river and into an enormous drainage canal, thence it passes by way of the Illinois river to the Mississippi river, which carries it to the sea. By this means the sewage is disposed of and the river cleansed by a current of water constantly flowing in from the lake. The drainage canal which connects Chicago with the Illinois river was only recently completed and provides a clear waterway for good sized vessels direct to the Gulf of Mexico.

Formerly the sewage was carried to the Illinois river by the Michigan canal, but there was thought to be a back wash to the lake which endangered the water supply, and to be on the safe side the larger canal was constructed.

**A GREAT BUILDING.**

The great fire of 1871 swept a large portion of Chicago out of existence, destroying property to the value of \$200,000,000 and rendering 100,000 persons homeless. The lesson taught by this great calamity does not seem to have been lost upon the enterprising business men of Chicago, for today the business portion of the city presents a uniform frontage of great and magnificent buildings which are probably not equalled in any city on the continent. The modern style of skyscraping, five structures are said to have had their origin in Chicago. It is well exemplified in the great Masonic Temple, located on State and Randolph streets. This building is twenty-one stories high and is undoubtedly one of the highest and finest of its kind in the United States if not in the world. It has many entrances and exits, the most imposing being through the great archway on State Street. A twelve foot corridor runs on every floor around the interior of the building. The flooring is of mosaic marble, and about ten elevators are kept constantly on the go. The first sixteen stories are used for office and store purposes, and the Masonic fraternity have the use of the 17th and 18th.

While several members of the New Brunswick party were inspecting this building a few days ago they lost 112 Adam Moore, and it took them an hour to locate him. It seems that after looking around the lower flat Adam stepped on board an already well filled elevator to go above, and the others, being unable to squeeze in with him, boarded an adjoining elevator. After ascending to the 15th story, they alighted and began to look around for their companion, but he was not to be seen. They made diligent enquiries of the elevator boys but none remembered having seen anybody answering the description given them. After an hour's search the lost one appeared on the scene, and declared that he had not been lost at all, but had only dropped into the American Field office, on the 7th floor, to have a chat with the editor. They had hard work afterwards to convince Adam that it was not they who had gone astray instead of him.

Among the other prominent buildings might be mentioned the Art Institute, Auditorium, City Hall, Cook County Court House, W. C. T. U. Temple, Chamber of Commerce, Old Colony Building and Illinois Central Depot. These buildings as well as the majority of Chicago's great structures are built of sandstone, and are supposed to be absolutely fireproof.

Chicago has over 4000 miles of streets, including many broad boulevards, ornamented with trees, which connect with the public parks. The streets, especially those in the business portion of the city, are broad and level, with wide sidewalks of concrete. Haystack street is the longest in the city, having a length of 21

miles. The streets number north and south number each way from the river, one hundred numbers being allowed to each block. In referring to a particular street the prefix west, north or south is always given to denote which side of the river it is on. Something like 3,000 of the 4,000 miles of streets are illuminated, both gas and electricity being used. There are about 4000 arc lamps of 2000 candle power, the wires for which are carried through conduits under ground. State St, the business centre of the city, presents a magnificent scene by night. The fronts of the immense stores, between Van Buren street and the river, are brilliantly illuminated and make a sight never to be forgotten. Changeable electrical signs, showing blue, white and red colors, are everywhere in evidence, and many of the store fronts are literally covered with electric bulbs, which reflect back the glitter of the early diamonds displayed in the windows of the jewelry stores. The spectacular effect is something grand, and it is not much wonder that State Street by night is regarded as one of the sights of Chicago.

**The Dregs of Grippe and Poison Gerns Keeping Th us in Poor Health.**

**PAINE'S CELERY COMPOUND**  
Purifies the Blood, Renovates the System, Braces the Nerves and Keeps People in Good Health

If the dregs and poisons of Grippe are still lingering in your system, causing weakness, debility, sleeplessness, headache, nervous prostration, rheumatism, heart trouble or blood diseases, the use of Paine's Celery Compound for two or three weeks will completely banish the poisons of death, purify the life streams, brace the weak and unstrung nerves and build up the entire system.

Mr. S. Irvine, Hecleston, Ont., who was brought near the grave by troubles arising from poisonous Grippe germs, was miraculously restored to health by Paine's Celery Compound after several doctors had failed in the work. Mr. Irvine says:

"After a severe attack of Grippe I was left in a weak and very debilitated condition. My health was almost wrecked. I had no strength and I felt tired all the time. I was so weak that my legs would not support my body, and I have often fallen to the ground when trying to attend to my work, and would be compelled to lie where I had fallen until I could muster sufficient strength to rise. My appetite was all gone, and when I would try to eat in order to gain strength, I would suffer untold misery for hours. It seemed to me that I was slowly starving to death.

"Doctors could not benefit me by their treatment. My friends thought I was going to die, and I verily believe I would have died had I not used Paine's Celery Compound. I bought six bottles and received more benefit from it than I had ever dreamed of. From the first, I began to improve in health, and today I am completely restored. I can do as good a day's work as I ever could and can eat any kind of food and sleep as well as when I was a boy. I send this testimonial unsolicited.

**A Few Words With the People of Fredericton About Waterproofs.**

You do not buy a waterproof for the fun of it, but you want that garment to protect you from rain, therefore ask a guarantee—no matter where you buy it—to be strictly waterproof, to look like one is not enough. And bear always in mind, no matter how cheap a dealer offers you one, that the manufacturers can sell 30 or 40 per cent cheaper. Do not believe when one offers you a gold dollar for 50 cents that one is going to do it. He will give you one that looks like a gold dollar, and it is not always the cheapness of the thing that gives satisfaction. It is your money's worth that does it, and above all when you get that which you expected to get, that makes you satisfied. I guarantee every waterproof to be strictly so. I cut every garment to your measure and style, you like best, I keep every coat in repair for two years, free of charge, and if you belong to Fredericton, and are unable to pay all cash I will give you credit.

Talking about cheap coats, if you believe in a cheap waterproof, come and I will sell you one for two dollars and guarantee it to be as good as you get for four dollars of your ready made jobbers. And above all remember that I manufacture those

Those who have used Laxa-Liver Pills say they have no equal for relieving and curing Constipation, Sick Headache, Biliousness, Dyspepsia, Coated Tongue, Foul Breath, Heart Burn, Water Brash or any disease or disorder of the stomach, liver or bowels.

Mrs. George Williams, Fairfield Plains, Ont., writes as follows: "As there are many other medicines offered for sale in substitution for Laxa-Liver Pills I am particular to get the genuine, as they far surpass anything else for regulating the bowels and correcting stomach disorders."

Laxa-Liver Pills are purely vegetable; neither gripes, weakens nor sickens, are easy to take and prompt to act.

coats right here in Fredericton and you are welcome to come and get a good look before you buy one.

H. SIDEMAN, manufacturer.  
Queen street,  
d1m O'Leary Sharkey building.

Between the ages of fifteen and forty-five, the time when womanhood begins and motherhood ends, it is estimated that the aggregate terms of woman's suffering is ten years. Ten years of misery! One third of the best part of a woman's life sacrificed! Think of the enormous loss of time! But time is not all that is lost. Those years of suffering steal the bloom from the cheeks, the brightness from the eyes, the fairness from the form. They write their record in many a crease and wrinkle. What a boon then to woman, is Dr. Pierce's Favorite Prescription. It promotes perfect regularity, rids of debilitating drains, heals ulceration, cures female weakness, and establishes the delicate womanly organs in vigorous and permanent health. No other medicine can do for woman what is done by Dr. Pierce's Favorite Prescription.

**ALCOHOLISM CAN BE CURED.**  
**Rev. Father Quinlan's Opinion.**

To whom it may concern: The good points of Mr. Dixon's new discovery of the cure of the liquor habit, in my opinion, are the following: First—it is taken according to directions it completely removes all craving for liquor in the short space of three days; its use for a longer time is intended only to build up the system. Second—it leaves no bad after effects, but on the contrary aids in every way the health of the patient, whilst freeing him from the desire for drink. Third—the patient may use it without interfering with his business or leaving his home. All other liquor cures I have yet heard of are very costly, operate slowly, are doubtful as to effects, and often impair the health and constitution of the patient. I therefore look upon the remedy as a real boon, recommending it heartily to all concerned and bespeak for it here in Montreal and elsewhere every success.—J. Quinlan, S. S., Pastor of St. Patrick's, Montreal.

Full particulars of this new medicine mailed free to all applicants. Address Mr. Dixon, 81 Willocks Street, Toronto, Ont.

**Always the Best.**  
Lucy & Co., wish to inform the public that they handle nothing but first class

goods. Their stock is the cheapest because it is the best. Manufacturers usually have a large supply of inferior goods, the result of errors, inferior workmanship or some other such cause. These they frequently offer us at a nominal price but we do not think them fit for our customers. Lucy & Co. don't deal in such goods. They annually return hundreds of pairs of boots and shoes which are not up to the sample. They retain the best only. Their goods are the cheapest because they are the best. Deal with Lucy & Co.—d.

**Don't be Caught.**  
Are you thoroughly equipped with clothes? Had you not better place your order with me at once for a working suit or a nice dress suit. I employ skilled labor, use good goods, and always give a good fit. I. C. Burden opp. Fion Business College York St. Rton.—d.

People wishing for a cup of really good tea can learn of something to their advantage by buying a pound of Union Blend Tea at 25, 30, 35 and 40 cents per pound.

**Boils keep coming**

Boils are the product of poor or watery blood carrying impure matter. Boils also indicate poor circulation, as the matter or pus, as it is usually called, clogs up the circulation, causing the accumulation of this poisonous matter, which must be removed from the congested parts. At the same time the blood should be enriched and purified by the use of BURDOCK BLOOD BITTERS. The best proof we can give you is the testimony of others. Here are some; others will be supplied on application to the proprietors.

**FLAT LANDS, Restigouche Co., N.B.**

THE T. MILBURN CO., Toronto.  
Gentlemen,—A short time ago my blood got out of order so much that numerous boils appeared on my face and neck, and hearing BURDOCK BLOOD BITTERS highly recommended as an excellent blood purifier, I decided to give it a trial. After using the first bottle the boils gradually started to disappear, and before I had taken the second bottle I was completely cured.

Yours truly,  
GEO. CALDWELL.

**Have you Boils?** If so, read the following letter from Mr. William Thompson, of McNicoll's Mills, P.E.I.

THE T. MILBURN CO., Toronto.  
Gentlemen,—Some time ago my blood got out of order and before long I had boils breaking out all over me. They appeared on my legs, neck and arms, and were so painful that I could not possibly sleep at nights. I tried many remedies, but without any effect, until a friend advised me to take BURDOCK BLOOD BITTERS. Before I had quite used two bottles I was entirely cured, and I cannot honestly say too much in favor of B.B.B. as a purifier.

Dec. 25, 1900.

MISS MAUD SEATER, West LaHav Ferry, N.S.:—"In the spring I was troubled with boils, one coming after another. My blood was bad and I was miserable when I began taking B.B.B., but before taking many bottles was completely cured."

MRS. G. MOORE of Hamilton says: "I cannot praise B.B.B. enough for impure blood, boils and sores. It is a perfect cure for boils. I have used it for twelve years in my family and cannot praise it too highly."

**APRIL, 1901.**

**This is the Month of Easter.**

We have been here for three Easters and never before were we in such a nice shape to do a big Easter business as we are at present. The greatest stocks in the city of seasonable and useful goods are here for your approval. Every article has been bought right, and will be sold accordingly to our patrons. Make your earnings go as far as possible when you're out shopping, as when your money is gone, your friends have disappeared beforehand. There is no reason why you should pay for other people's bad debts. Be sure you've looked through our new spring goods. Everything you require is here all under one roof to be sold only at one and only one profit.

**A Few Easter Bargains.**
