

FINEST OF ITS CLASS

THE ONTARIO MINERAL EXHIBIT AT THE PAN-AMERICAN.

The Economic Ores and Minerals of This Province on a Scale That Shows the Real Importance and Abundance of These Resources of Ontario—Well Displayed and Artistically Grouped.

(Special by Martha Craig.)

It is now generally acknowledged that the Ontario mineral exhibit is the finest of that class at the Pan-American Exhibition. Premier Ross, Hon. E. J. Davis, Commissioner of Crown Lands, and F. W. Gibson, of Toronto, Director of the Bureau of Mines of Ontario, decided to show the economic ores and minerals of Ontario on a scale that would convince visitors of the real importance and abundance of these resources of the Province. All the ores have been taken from working mines and represent the ordinary run of ore from these mines. Mr. Frank N. Speller, B. A., secretary, of Toronto, appointed superintendent in charge of the collection and installation of this notable exhibit. Mr. Speller is the right man in the right place, he understands his work thoroughly and deserves to be congratulated on results attained. The exhibits are well displayed and artistically grouped.

Occupying a prominent place is a large map of Ontario, 13x20 feet. It is geologically colored and was prepared by the Bureau of Mines and executed by Elliott and Sons, of Toronto. The map shows the location of the principal mineral deposits of the Province and has been pronounced by artists the finest piece of artistic decorative work in the building.

A second map of Ontario 10x15, shows in particular the mineral and forest resources about the region of Sault Ste. Marie. The lines of communication are shown by colored incandescent lights. The map was prepared by order of F. H. Clergue, general manager of the Lake Superior Power Company of Sault Ste. Marie.

The nickel-copper exhibit shows the ore from the Sudbury region. Every working mine is represented here. The weight ranges from 1,000 to 10,000 pounds per specimen. The entire pile contains about 17 tons of ore. Every stage of the operation of the reduction of nickel and copper from the ore is illustrated by samples. The final operation of the reduction process is also shown, thus illustrating completely the manner in which the nickel and copper are extracted from the ore. The Nickel-Copper Co., of Ontario, have attractive exhibits showing the new French process in detail. The average visitor appreciates the details by the lucid manner in which it is illustrated.

Copper ores of the north shore of Lake Superior are shown on a similar scale, every mine being represented. The pieces weigh from 1,000 to 8,000 pounds, the pile weighing 12 tons in all. It is evident that modern machinery must be used in these mines to raise and transport such great masses.

The Lake Superior Power Company have collective exhibits of iron ore from Michipicoton. Copper and nickel ore are also shown, besides building and ornamental stone and pig iron, also a large assortment of enlarged photographs showing the works and mills of this company.

Ferre nickel made by the new electrolytic process is shown in the form of bars, and is attracting the attention of steel men who know the value of nickel steel.

As a central point in the display stands the most remarkable feature of the Mines Building in the form of a column of solid graphite from the Black Donald Mine, Renfrew County. It is made up of three large blocks, the lower one being 3x3x4 feet in size. A base three feet high of limestone of excellent quality from Queenstown Quarry, St. David, Ont., was provided by that company. On this pedestal is placed a statue of Canada, executed by J. W. Banks of Toronto. Its dignity of pose and excellent treatment have created universal admiration amongst exhibition sculptors and artists.

The Canadian Corundum Company have the largest display of this material ever made, and have also a complete line of abrasive material made from Canadian corundum. The fine exhibit of the Crown Corundum Company and Imperial Corundum Company demonstrates the increased importance of this industry in Canada.

The other and more prominent of the divisions represented are the gold, silver and iron ores, building and ornamental stones and mica. The use to which this latter material is put in coppering steam pipes and boilers is well shown on a practical scale by the Mica Boiler Covering Company of Montreal. The contract for covering His Majesty's ship Blake, one of the most modern battleships under construction, was awarded to this firm. There is a grand field for mica in this and for electrical purposes.

Talc, gypsum, salt, mineral water and coal are also in evidence.

The Milton Pressed Brick and Terra Cotta Company are represented by an arch, which is an excellent example of the progress made in artistic decorative terra cotta work.

The excellent record made by the Province in the Mines Building at Chicago is well remembered, and the

progress made in mining in Ontario since that date is evident by the greater variety and importance of the Pan-American display. It is the best yet prepared by the Ontario Government.

Those interested in Ontario mineral resources can obtain copies of the latest reports of the Bureau of Mines, the descriptive catalogues of the exhibit and any further information by applying to the superintendent, Mr. F. W. Speller, at his office in the Mines Building.

THE DOUKHOBORS.

"Lally Bernard," Mrs. C. E. FitzGibbon, Tells of the Good Qualities of the Spirit Wrestlers.

That the Doukhobors are scrupulously honest, clean, and altogether picturesque and charming was the impression given by Mrs. C. E. FitzGibbon in a very interesting lecture at the Conservatory of Music, Toronto, one night recently. Coming before her audience unheralded by the usual chairman, Mrs. FitzGibbon rapidly sketched the history of the Spirit Wrestlers until their final expulsion from Russia, and then, the lights being turned out, scores of excellent photographs were projected upon the screen. These photographs, most of which were colored to show the peculiar characteristics of the Doukhobor costume, formed a continuous history of these people from their landing in Halifax to the present time, and about them the lecturer wove the thread of her bright, chatty narrative.

The Doukhobors, according to the lecturer, were almost wholly good, and their goodness shone all the brighter because of the fierce persecution they had endured; while the wicked Russian Socialist, Bojanski, whose photograph was not prepossessing, was the villain of the plot. Mrs. FitzGibbon described fully the benefits of the community system, whereby all draw such supplies as they need from the communal storehouse and give their work for the common good. Want for the sick and aged was unknown in a Doukhobor community. They were not relieved by charity, the word was distasteful to Doukhobors, but as a matter of right and a matter of love for the brotherhood.

The lecturer indignantly denied the charge that the Doukhobors refused to register their marriages. They had never been asked, but would do so just as soon as they were, and the matter was explained to them. Registration had always meant conscription with them, but now it was to mean individualism, and the thing which the lecturer most keenly regretted was that the nature of the survey and allotment of land in the Canadian West rendered it almost imperative that they give up their community system and live separately upon homesteads.

Altogether, in Lally Bernard the Doukhobors have a very appreciative admirer, a warm friend, a capable advocate, and a determined defender.

When It Comes Easy.

"Some philosopher has said that it is easy to learn something about everything, but difficult to learn everything about anything."

"Hm! He ought to have heard some young couple talk about their baby for a few minutes."—Chicago Times-Herald.

DRUNKENNESS

CAN BE CURED!

If your husband, brother, father, or any of your relatives afflicted with Drunkenness? We have a sure cure which can be given with or without the knowledge of the patient. Send for particulars, enclosing a 2c stamp for reply. Address

MANUFACTURERS OF

Clined Plaster

Land Plaster

Rock Wall Plaster

A convenient Wall Plaster for farmers and other living in localities distant from central markets, where lime, hair, etc., necessary for use in making ordinary mortar cannot be procured without considerable delay. Rock Wall Plaster is put up in bags of 100 lbs each, and is ready for applying to walls by the simple addition of sand and water. Rock Wall Plaster saves time, admits of carpenters immediately following the plasterers, giving the owner his building weeks earlier than with ordinary plaster. Rock Wall Plaster is a substitute for ordinary lime mortar and makes a much superior wall. The most inexperienced plasterer can apply it.

Try Rock Wall Plaster.

COAL

Hard Coal!

Now on the way from New York, ex Schooner Jennie C., 200 tons best Lehigh Hard Coal. As the season, freight and coal are all advancing consumers should leave their orders at once.
