FREDERICTON, N. B., THURSDAY, AUGUST 22, 1901.

NO. 295-296

NOTES OF THE NEWS.

Interesting Occurrences Paraphrased for Her- ald Readers.

FROM LATE DESPATCHES AND EXCHANGES.

A few days ago Mr. H. H. Cook's residence in Parkdale, Ont., was entered by burglars and a quantity of silver stolen.

H. M. Whitney has donated five hundred dollars to the fund for a thoroughly equipped gymnasium at the Y. M. C. A., Sydney.

Captain John B. Ross of Yarmouth, N. S., master of the Standard Oil's ship Kentmere, died at sea on voyage to Java. He was a brother of Dr. Ross of St. Stephen.

Lord Kitchener's weekly report from Pretoria Tuesday shows that 64 Boers were killed, 20 were wounded, 248 were made prisoners and 95 surrendered during that time. The prisoners include Landrost Steyn, of Vredefort, and Commandant De Villiers, father of Mrs. Schalkburger, wife of the acting president, and Commandant Breytenbach, of Lilliefontein.

Lord Mount-Stephen will, during the present month, be presented with the freedom of Aberdeen, in recognition of his benefactions to the city, and while in the north he will be the guest of General Sir Peter Lumsden, at Buchrobb, near Dufftown, his native place. In the two Dufftown magnates there will be a mingling of East and West, for the General won fame in India while his fellow-townsmen was winning fame and fortune in Canada.

That the tendency to amalgamation now a-days has been extended to journalistic circles as well as commercial, is shown by the recent purchase of the Canadian Home Journal by Mr. Hugh C. MacLean, publisher of the Ladies' Magazine, Toronto. The Journal, which was established many years ago, will be discontinued as a distinct publication, and will be merged into the Ladies' Magazine, which has already won a place for itself as the popular home paper for Canadian women.

The constitutionality of the Prohibition Act of Prince Edward Island is now before the Supreme Court for settlement. The Act itself declares that there shall be none of those delaying annoyances known as certiorari, which take the decision of a magistrate to a higher court. But the certiorari has got in its deadly work because the Act prohibiting this interference with prohibition is itself attacked. The cases are to come before the Supreme Court at the Michaelmas Term, and in the interim there is no drought in Charlottetown.

Will Godley, a negro, was lynched by a mob shortly after dark Monday night, at Pierce Mo., for the murder of Miss Caralle Wild, whose dead body was found in the woods near here. The mob went to the goal about nine o'clock and batted down the doors and threw ropes around Godley and Jean Carter, another suspect. Godley was hanged in front of the Lawrence Hotel, and his body riddled with bullets. Carter's guilt was not clearly established and he was taken back to jail. Carter has since been taken out by the mob, riddled with bullets and left dying in the street.

"Have by some surgeon Shylock on thy charge to stop his wounds lest he do bleed to death." People can bleed to death. The loss of blood weakens the body. It must follow that gain of blood gives the body strength. The strengthening effect of Dr. Pierce's Golden Medical Discovery is in large part due to its action on the blood-making glands and the increased supply of pure, rich blood it produces. It is only when the blood is impoverished and impure that disease finds a soil in which to root. The "Discovery" purifies the blood and makes it antagonistic to disease. When the body is emaciated, the lungs are weak, and there is obstinate lingering cough, "Golden Medical Discovery" puts the body on a fighting footing against disease, and so increases the vitality that disease is thrown off, and physical health perfectly and permanently restored. It has cured thousands who were hopeless

and helpless, and who had tried all other means of cure without avail.

Thirty-one-cent stamps to cover expense of mailing and customs, will obtain a copy of Dr. Pierce's Common Sense Medical Adviser, 108 pages, in paper cover. Send fifty stamps if cloth binding is preferred. Address Dr. R. V. Pierce, Buffalo, N. Y.

The winter service of the mail steamers of the Allan line will commence with the favorite steamer Parisian, leaving Liverpool November 7th, and sailing again from St. John on November 23rd. The next boat will be the twin screw steamer Bavarian of 10,376 tons from Liverpool, November 14th, and from St. John November 30th. She will be followed a week later by the new twin screw steamer Ionian, which is now building, and makes her maiden trip to the St. Lawrence on October 17th. The next weekly sailing is the steamer Tunisian which is listed to leave St. John December 14th. The fifth boat of the service will be the Pretorian of 9,000 tons. The aggregate tonnage of the five boats performing the service is 45,374 tons, so St. John may reasonably expect an enormous quantity of goods to be shipped from there during the coming winter.

Never Say Die.

You may be weak, miserable, nervous, sleepless, your digestion may be poor, and you despair. Never say die, until you have used Ferrozone, the most wonderful blood maker, nerve strengthener and brain invigorator. It tones up the whole system. You can eat anything and digest it if you use Ferrozone. You sleep well. You make blood quickly, strength increases daily, in a short time you're well. Try Ferrozone, which you can obtain at C. H. Burchill's drug store.

The fur cape which will be presented by the women of Ottawa to the Duchess of York and Cornwall, is to be made from the finest mink procurable. The collar and flare around the edge will be lined with ermine, while the body of the cape will be lined with thick white satin. The cape is to be of good length, reaching to the knee. It will be fastened with gold clasps. These are to be fashioned in the form of a maple leaf both artistic and appropriate. Arrangements are being made to secure a sufficient number of nuggets from the Canadian Yukon for the making of the clasps.

The Cause Of Nervous Headache.

This most distressing and common malady doubtless has its origin in some unbalanced condition of the nervous system. Probably the simplest, safest and most efficient remedy is Polson's Nerviline. Twenty drops in sweetened water gives immediate relief, and this treatment should be supplemented by bathing the region of pain with Nerviline. To say it acts quickly fails to express the result. Sold everywhere in large 25c. bottles.

Adam Kest and John Eugene, who were supposed to have perished in the waterworks tunnel at Chicago last Wednesday, as the result of the destruction of the crib by fire, were rescued alive on Sunday afternoon, after having been confined in the tunnel five and one half days, and are now in an hospital.

Stop Thief!

would be a justifiable cry directed against the countless humbugs that offer a cure for Catarrh. There is only one scientific method of treatment for Catarrh. Make the air you breathe the carrier of healing balsamic, curative agents. It bathes every inch of mucous membranes with its healing, soothing properties. That's Catarrhzone. Your druggist or doctor will tell you it's the only effective method of treatment and that it is sure—prompt permanent. Remember the name Catarrhzone. All dealers, 25c and \$1.00

John Nease, while passing along the road about a mile west of Fort Erie, Ont. saw a basket in the hedge, and on examination found it contained a newly born girl baby. The child was wrapped in some old rag and a horse blanket thrown over the basket. It is thought an attempt was made to burn or smother it as the cotton rags around it were scorched. The police were notified and took charge of the child.

Warts Aint Pretty

Why do you hang on to yours? Don't know how to cure them? Why Putnam's Painless Corn Extractor does the work in short order—you just try it. Guess your druggist has it all right—ask him.

CANADA SHIPS.

Minister of Public Works Says We Can Build all We Need.

MUST REMEDY GRAIN CARRYING TRADE.

Out of 30,000,000 Bushels Less Than 5,000,000 Go Through Canadian Channels.

Ottawa, Aug. 21.—Hon. J. I. Tarte was speaking yesterday of three large dredges under construction in Canada. One of these is now being completed on the Fraser River for use in the harbors and rivers of British Columbia. A second is under construction in the Poison shipyards at Toronto. This is intended for dredging operations in the St. Lawrence. It will be launched September 2, and Mr. Tarte has promised to attend. A third hydraulic dredge for the Maritime Provinces is in course of construction. Two wooden dredges, one for Ontario and the other for Quebec, have been finished.

NO NEED TO GO ABROAD.

"Canada has no need to go abroad for ships," said the minister. "We can construct in this country all the vessels we require, and ought to do so. They can be built just as cheaply here as anywhere else."

Then the minister reverted to the transportation question, and lamented that out of perhaps 30,000,000 bushels of grain, less than 5,000,000 bushels would go through Canadian channels this season.

"We must remedy this state of affairs," Mr. Tarte declared; "and I am prepared to give whatever time and thought I can to grappling with the problem. Mr. Goldwin Smith, judging by some criticisms in the Farmer's Son, is not in sympathy with our plans for improving transportation. The trouble with the Professor is that he is all the time thinking of the United States. That is where we differ with him. We are for Canada first, last and always. We believe we have great natural opportunities, and we will strive to make the most of them."

CAPT WOLVIN'S OFFER.

It is said here that Capt. Wolvin, of Cleveland, and his associates, when they met the Minister of Public Works at Montreal on Saturday, submitted an offer to build ten vessels for the grain carrying trade provided certain privileges were granted them. Each of these vessels carry 80,000 bushels of grain, and would cost \$100,000 each, so that the total outlay for the building of the carriers would be \$1,000,000.

The Cleveland men apparently realize that the only direct water route from the west to Europe is via Canadian territory, and they are anxious to profit by it. They proposed not to handle merely grain, but freight of all kinds. Moreover, their desire is to do trade not only between American and Canadian points, but between points in the United States, using the Canadian channel for this purpose

PRIVILEGES ASKED FOR.

The privileges asked are briefly as follows: The use of a pier at Port Colborne, of the two banks of the Windmill Basin at Montreal and of an elevator and warehouses to be erected by the Montreal Harbor Commissioners. In return for the use of the Montreal elevator and warehouses the Cleveland men would pay five per cent interest. They also ask for the admission of their ten vessels to Canadian waters free of duty. At Port Colborne they would erect an elevator and warehouse themselves. If the Harbor Commissioners built an elevator and warehouse for the convenience of Capt. Wolvin and his friends, the money would have to come out of the million dollar loan.

Hon. Mr. Tarte promised to consider the proposition, and to give his reply at the end of ten days.

FIGHT WITH A BEAR.

Ottawa, Aug. 20.—Mr. Peter Watson, of Alice township, Renfrew county, had a thrilling encounter with a huge she bear on Friday morning. Armed with a gun he was out in the woods when he was confronted by a young bear.

He lost no time in despatching it, but was immediately surprised and put on the defensive by the mother bear, which made a vicious lunge at him, roaring savagely over the fate of the cub. Having no time to reload the gun, Mr. Watson struck at her and was dismayed to see the stock shatter into fragments. Fortunately Mr. Watson had a large knife sheathed at his side, and just as it looked as if he was in for a fatal bugging, he stabbed the bear in the side and both rolled to the earth together. Consciousness left Mr. Watson for a time, and when he came to he found himself lying across the body of the dead bear. His clothes were badly torn and his arm and side lacerated. Stiff and weary he dragged himself home and will long have occasion to remember his exciting adventure.

To make money it is necessary to have a clear, bright brain, a cool head and strong nerves. Muburn's Heart and Nerve Pills invigorate and brighten the brain, strengthen the nerves, and remove all heart, nerve and brain troubles.

CAT HATCHED EGGS.

Whipped the Rooster and the Chickens All Like Her.

Chicago, Aug. 20.—Whether the chickens hatched by a cat are fowls or felines is the nice question which threatens to disrupt the barnyard of Samuel Bishop.

Eleven little pithballs made their advent into the world four days ago under the tender care of a motherly cat. She stepped in and kept the eggs incubating when the giddy hen, bent on flirtation, deserted them. At the sacrifice of nightly symphonies on the back fence and of daily investigations of the pantry, the cat devoted herself to the task, and the happy result she regards as her personal property.

To accomplish this it was necessary to give a lesson to a rooster, the lord of the farmyard. He made a game fight, but was vanquished at the expense of a large part of his feathers.

Strangest of all is that the chicks dote on their fur-coated mama. They follow her all around the yard, and, while their taste and hers differ somewhat in regard to food, nevertheless the Bishops see that each secures a plenty.

Backache, swelling of feet and ankles, puffing under eyes, frequent thirst, scanty cloudy, highly colored urine and all urinary troubles lead to Bright's disease, dropsy, diabetes, etc. Doan's Kidney Pills are a sure cure.

Charles A. Moore, Jr., of Brooklyn, who is at present cruising in Arctic waters on a scientific expedition with a party of friends, on the steamship Algerine, writes of the rescue by their vessel of the whaler Kite, the ship formerly used by Lient Peary. They found her in a perilous ice pack off the coast of Labrador. The Kite was on her way to Northern stations. She left St. John's about June 15th, with a crew of about 150 men. She was towed to Tarnairk by the Algerine.

ATHLETES, BICYCLISTS and others should always keep HAGYARD'S YELLOW OIL on hand. Nothing like it for stiffness and soreness of the muscles, sprains, bruises, cuts, etc.

It is announced that an American syndicate, at the head of which is a Standard oil man, has purchased Cow Bay Beach, near Halifax. The beach will be modernized and placed on a footing with the watering places of the United States. An electric tramway will be laid down from Dartmouth to the beach. A hotel with 200 rooms will be built. The cost of the building will be \$150,000, and the tramway will cost a large sum.

An important factor in every household is the tea! It should be pure and free from dust. To be sure of getting these qualifications, buy UNION BLEND. See that you get the little key placed in the end of each pound package.

An Episode.

"There is one thing that particularly strikes me about your country," said the visiting real estate expert. "and that is your fine watershed."

"Watershed?" exclaimed the local freeholder. "Seems to me more like bloodshed."

The expert turned a dubious glance upon his companion and remarked, "I don't quite understand you."

"You don't?" quietly retorted the freeholder. Then, pointing to the sumac bordered defiles, he added, "Don't you see how nature's bleeding in her mountain veins?"—Richmond Dispatch.

CHILDREN'S STYLES.

Pretty Ideas For the Wardrobe of Little People.

Poppy red is now fashionable for the dress of children and is extremely pleasing. Little people may always wear this beautiful, bright color without incurring comment, and the tiny red clad figures are a pleasure to the eye. Blue and pink, after white, are, of course, the conventional wear for children, and to them is now added lettuce green. For babies who take the air in a perambulator the cloak, bonnet and rug are chosen to match.

The cut illustrates a girl's costume of red cashmere with white dots. The skirt is plain. The blouse bodice has a wide collar of nainsook bordered with

GIRL'S COSTUME.

lace and opens over a plaited plastron of nainsook crossed by little bands of red velvet, each ornamented with a steel buckle. The collar and the draped belt which fastens at the side with long ends are of red silk. The half length sleeves consist of a puff from the shoulder to the elbow, below which are three circular ruffles. The hat of red straw is trimmed with red ribbon having white dots. JUDIC CHOLLET.

The Difference.

"Ah, but Miss Cashleigh, I have got zee title, and in Europe it tells you who is who."

"Yes, count, and I have the money, which in America tells you what's what."

Reducing It to Schedule.

"I know I express myself lamely, Miss Thriller," the young man faltered, "but I want to tell you how much I love!"

"Mr. McGinnis," interrupted the assistant editor of The Weekly Society Recorder, with a vivid blush, "can you do it in about 200 words?"—Chicago Tribune.

Has One Qualification.

Mrs. Brago—Tell me, professor, will my daughter ever become a great pianist?

Herr Vogleschuitze—I cannot tell.

"But has she none of the qualifications necessary for a good musician?"

"Ach! Ya, matam; she has two hands."—London Tit-Bits.

As a Discourager.

Tommy Smith—This is the night your sister's best feller comes, ain't it?

Willie Jones—Yes, but I guess she's tryin' to shake him.

Tommy Smith—How d'yer know?

Willie Jones—She eat onions fur supper tonight.—Philadelphia Press.

Too Strenuous.

First Mute—Weren't you awfully scared when the highwayman held you up?

Second Mute—Yes. Why, I screamed so loud for help that I strained my fingers.—Denver Times.
