How Rockets Are Made.

Skyrockets are made for two purposes, for signalling and for decorations or celebrations. For signals the charge consists of 12 parts of niter, 2 of sulphur and 3 of charcoal. The decorative rocket is the one we see used on the Fourth of July. It is composed of 122 parts of finely pulverized powder, 80 of niter, 40 of sulphur and 40 of cast iron filings.

The main part of the rocket is a case, made by rolling stout paper, covered on one side with paste, around a wooden form, at the same time applying considerable pressure. The end is then "choked" or brought tightly together with twine.

The paper case thus made is placed in a copper mold, so that a conical copper spindle will pass up through the choke, and the composition is then poured in and packed by blows of a mallet on a copper packing tool made to fit over the spindle. The top of the case is then closed with a layer of moist plaster of paris one inch in thickness, perforated with a small hole for the passage of the flame to the upper part or "pot." The pot is formed of another paper cylinder slipped over and pasted to the top of the case and surmounted by a paper cone filled with tow.

His Name Obliterated.

In some country districts in Ireland it is not unusual to see the owners' names simply chalked on carts and other vehicles, in order to comply with legal regulations. Unfortunately, this custom lends itself to the playing of pranks on the part of "bhoys" maliciously inclined, who sometimes rub off the lettering and thereby gets the cart owner into trouble with the police. A case of this kind having occurred, a constabulary sergeant accosted a countryman whose name had been thus wiped out unknown to him: "Is this cart yours, my good man?" "Af coorse it is," was the reply; "do you see anything the matter wid it?" "I observe," said the pompous policeman, "that your name is obliterated." "Then ye'r wrong," quoth the countryman, who had never come across the long dictionary word before, "for me name's O'Reilly, an' I don't care who knows it!"

Peeling a Pearl.

The lapidary was skinning a pearl, according to the Philadelphia Record. He had on gloves of a very delicate

sort of kid and the glasses that he wore had lenses of such great magnifying power that his eyes through them looked as big as saucers. "I wear gloves," he said, "because the hands perspire freely in this work, and perspiration has often been known to discolor pearls. This stone was injured by the accidental dropping on it of some acid. The disaster discolored it, you see. With this very delicate little tool I am removing the outer skin, and if I find that the acid has filtered through and discolored the inner skin also I may remove that as well. A pearl, you see, is composed of concentric layers or skins, and you can, if you are a clever workman, peel it down and down until it disappears."

Hardly.

Bilks—Yes: my wife and I have agreed that whenever I make a mistake I am to acknowledge the fault at once.

Jilks—But when she is in error you will call her attention to the fact?

Bilks—Well, hardly. That would simply be another one for me to acknowledge.

Eating Became a Dread.

HOW MANY PEOPLE ARE ALMOST AFRAID TO SIT DOWN TO THEIR MEALS?

YOU MAY BE ONE OF THEM. IF YOU ARE, THERE IS A CURE FOR YOU.

BURDOCK BLOOD BITTERS

CURES INDIGESTION, DYSPEPSIA, BILIOUSNESS, SOUR, WEAK AND ALL STOMACH TROUBLES.

Mr. J. G. Clunis, Barney's River, N.S., tells of what this wonderful remedy has done for him:—It is with gratitude that I can testify to the wonderful curative powers of B.B.B. I was so badly troubled with indigestion that whatever I ate caused me so much torture that eating became a dread to me. I tried numerous physicians, but their medicines seemed to make me worse. I thought I would try B.B.B., so got a bottle, and after taking a few doses felt a lot better. By the time I had taken the last of two bottles I was as well as ever, and have had no return of the trouble since. I recommend your medicine to the highest degree. B.B.B. is for sale at all dealers.
