Kitchen Wall Bag.

A bag for the kitchen wall is easily made of white oilcloth and bound with very strong braid. The bottom of the bag is made in a double box plait and does not break through. The chief merit of the bag is its number of pockets, one pocket for some particular article that is always going astray in a kitchen and causing any amount of time and trouble to find it when needed most. Let one pocket be devoted to string, which is always in demand; another for paper sacks and bags, one for corks, and still another for cut newspapers which are used for polishing. These pockets may be wiped and kept perfectly clean.

The Kitchen Sink.

Hot lye will cut the grease out of the pipes of the kitchen sink, but should be followed by plenty of hot water as a "chaser." If the lye cools in the pipes crystals are apt to form. Chloride of lime, copperas water and carbolic acid are disinfectants and will kill odors, but should be used after the pipes have been cleansed by the hot lye.

Soot on the Carpet.

One of the surest and best ways of removing soot or dirt of any kind from a moquette, velvet or axminster carpet is to rub cornmeal well into the spots and then spread sparingly over the whole carpet. Sweep off, and the spots will be gone, leaving the carpet as bright as new.
