BALLOT FOR THE RUSSIAN.

Right to a Representative Assembly Almost Secured.

St. Petersburg, July 8.—(Special)—The Novists this morning prints what it claims is the actual text of the final draft of Minister of the Interior Boulignane's project for the formation of a representative Assembly.

The question of the election of members to the lower House of the Legislative Assembly is settled, not on the basis of property, but on that of universal suffrage of men and women, the latter voting by proxy. The classes absolutely debarred are Jews, the nomadic races, persons not of Russian nationality, Governors and other Imperial and local administrators, and all persons connected with the police. It is provided that the disability of the Jews shall continue until their status shall have been defined by the popular Assembly. Persons convicted of crime, etc., are also deprived of the suffrage.

The Emperor possesses the right of absolute veto as well as the power to prorogue the Assembly. The interpellation of Ministers will take place behind closed doors if reasons of State are pleaded.

A WASTE OF MONEY.

Proposed Analysis of the Water Supply Entirely Unnecessary—Plenty of Information Already Available.

To the Editor of the Herald:

Sir—The Herald reports that the City Council is to expend another \$250 in having the city water analyzed again. Each new council must apparently order and pay for an analysis of the water, then wait for their successors to do the same. The average citizen remembers report after report on the water—all condemning it in the plainest terms. One alderman said, that Dr. Mason's report was not reliable. Why not? Will that alderman, or any other, say that Prof. Harrison's report made a year ago last May, was not reliable? Or do the aldermen think that because Prof. Harrison's report cost the city nothing, it should be ignored? How would it do, Mr. Editor, to tabulate with an eye to their cost to the city, reports to the council in the last few years always filed away and forgotten, on drainage; on sewerage; on the water supply, etc?

The object of this communication however, is to express my agreement with your article of yesterday on the unnecessary waste of more money on securing another analysis and especially, to direct attention to your criticism of the council's intentions to have such analysis made at once.

This "at once" condemns the idea, because the water in the river is too high. A bacteriological analysis of the water at this height would be another \$250 thrown away. Have you not noted that each outbreak of typhoid, of late years at least, has been coincident with extremely low water in the river? The only sensible time to analyze the water is when typhoid prevails in the city. Did the council, or the board of health secure a bacteriological examination or another kind of examination of the water, of the milk supply, during the late typhoid infection of the city? If so what was the report. Surely that was the time to act, and not now—if action on that line is necessary.

Yours etc.,
JULY 8th, CITIZEN.

FORESTERS' HIGH COURT.

Business of the Closing Session—Delegates Elected to Supreme Court Meeting.

The Foresters of the New Brunswick High Court closed their meeting shortly before 6 p. m., yesterday,

MUTINEERS HAVE SURRENDERED.

Russian Warship and Her Crew Throw up the Sponge to German Authorities.

JAPANESE MAKING A GENERAL ADVANCE IN MANCHURIA.

Tokio, July 8.—(Special)—The following official despatch has been received from the Japanese army headquarters in Manchuria: "Occasional collisions take place between the scouts on both sides of the railroad along the Feng Wha, Kai Yuen and Taioing roads.

The enemy is gradually being driven northward.

Pekin, July 8.—It is generally considered that an armistice between Japan and Russia is unlikely.

Kusten Ji, Roumania, July 8.—The Kniaz Potemkine arrived here today accompanied by torpedo boats, and now lies in the outer harbor, near the Russian guard ship, Pezouspe. The Roumanian cruiser, Elisabeta and the training ship Mercea, are in close proximity.

General Angeldisco commanding Dahrja division left with the port commander and proceeded to the mutinous battleship to demand an explanation and reasons for her reap-

pearance in Roumanian waters.

Later in the day it became known that the mutineers had offered to surrender to the Roumanian authorities as deserters, and that the Roumanian officials had demanded the breechlocks of guns of the battleship as a pledge of the mutineers' good faith.

Kustenji, July 8.—The mutinous crew of the Kniaz Potemkine and her consort the rebel torpedo boat, have surrendered to the German authorities, have been landed, and are now being dispatched in small parties to different places in Germany.

Constantinople, July 8.—The Russian embassy has authorized Turkey to sink the Russian battleship Kniaz Potemkine, if she appears in the Bosphorus. The Turkish despatch boat Izzedy was consequently sent to communicate with the Kniaz and warn her not to go to Klava as she would be sunk if she did.
