MONCTON STEAMER'S MISHAP.

Wilfrid G. Hard Aground on Petitcodiac River Mud Flats--Passengers Safely Landed.

Moncton, Aug. 24.—(Special)—The steamer Wilfrid G., which left here this morning at nine-thirty with the Brotherhood of Locomotive Firemen excursion to Hopewell Cape Rocks, got stuck on the flats about two miles down river and is hung up high and dry.

There were twenty-five or thirty excursionists on board and when the steamer ran on the flats, they were hurried ashore in row boats.

All the passengers were safely landed and with the exception of a coating of Petitcodiac river mud, escap-

ed without damage.

The people got a bad fright, but there was no occasion for alarm, as the steamer simply plowed into the mud flats, and stuck fast being left there by the tide, which was low when the boat left the wharf.

The steamer will suffer no damage as the mud makes a soft bed for her, and she has not listed enough to harm her. She will float with tonight's tide.

The excursionists landed at Fox Creek, and were brought back to town in teams.

CENTRAL RAILWAY CONTRACT.

Brown Brothers of This City Will Undertake Work At Once.

The contract for the repairs on the Central Railway was closed yesterday at St. John, by Commissioners McAvity and King with Gilmore Brown and David W. Brown, contractors, of Fredericton. The contract price is eighty-five thousand dollars. The work is to be begun at once and to be completed by August 1, 1906. Payments will be made monthly to Brown Brothers to the extent of eighty-five per cent of the work done at the time as reported by the government engineer. The remainder, fifteen per cent, will be paid when the work is completed.

A large part of the work will be done this fall and continued during the winter so that the contractors anticipate no trouble in finishing within the time specified.

Gilmore Brown gives the following account of the work to be done.

"The main items of the work are ballasting the entire line, putting in between twenty thousand and twenty-five thousand new ties, filling in the trestle work, the bridge repairs and ditching the roadbed and clearing the right of way on each side.

"The ties will be put in all along the line. Many new ties have been put in within the last year and a half, and these are in first class shape.

"A great number of old trestles will be filled with earth, making great embankments. For this and similar work the commissioners will furnish a steam shovel, an unloading plow, two engines and a sufficient number of flat cars.

"The trestle at Cody's will be torn down and rebuilt with hard pine timber.

"All the old timber open culverts and a large number of the timber box covers will be torn out and in their places will be put double strength vitrified culvert pipe.

"All the trestle bridges will be rebuilt either of hard pine or of steel, it being the intention of the commis-

sioners, if the same can be secured, to rebuild the important bridges with steel structures purchased from the I. C. R.

"The other bridges are at Bellisle, one fifty foot span, and at Washademoak, which has one seventy-four foot span and a 146 foot draw. The fourteen foot span will be done away with entirely and the space occupied by this bridge will be filled with an earth and stone embankment. The draw span will be rebuilt of hard pine timber and metal, entirely new.

"The piers at the Norton and Cumberland Bay bridges will be rebuilt entirely of concrete. The piers of the Washademoak bridge will remain as they are, certain specified repairs being put upon them.

"The line from end to end will be thoroughly ditched. There will be a lot of new wire fencing and all the public and farm crossways will be replanked. The right of way for a distance of thirty-three feet on each side of the centre will be entirely cleared of all bushes and rubbish and this will be burned so that the right of way will be perfectly clean.

"Our contract does not include any repairs to station buildings which will be undertaken by the commissioners themselves. When all the work is completed the road will be in first class condition."

At times, Mr. Brown said, they would be employing between two hundred and fifty and three hundred men. Yesterday afternoon Brown Brothers entered into a contract with Joseph A. Lively for him to supply all the hard pine timber necessary. About half a million feet of this will be required.

"Our plant," said Mr. Brown in conclusion, "which is now in Kent county, will be moved to Norton immediately. This plant was last used in the construction of the Beersville railway. Work will be begun next week."

A MONCTON OUTRAGE.

Three Drunken Men Brutally Beat a Chinaman--Run Over on Street and Seriously Injured.

Moncton, Aug. 24.—(Special)—Last night three young men, whose names have been given to the police, entered a Chinese laundry, on High street and gave the proprietor a bad beating.

The Chinaman complained to the police last night and gave evidence of rough treatment. Some teeth were knocked out, his face marked and he received a severe mauling generally.

The young men reported could not be found last night, but it is expected a complaint will be laid.

So far as can be learned, the assault was unprovoked, the men being drunk.

The police are looking for the parties who ran over to John McDonald and his wife, on upper Main street last Saturday night. McDonald was badly hurt and is yet in a critical condition. He had an ankle sprained, and an arm injured, and was unconscious for some time after being run over. His wife's injuries were not so severe. The parties wanted are believed to hail from the country.

YELLOW FEVER SCOURGE.

Disease is Abating at New Orleans, But Spreading in the State.

New Orleans, Aug. 24.—(Special)—The following yellow fever report is up to 6 p. m. yesterday.

New cases yesterday, 53, total, 1,556.

Deaths yesterday, 5, total 219.

New disease centres yesterday 10, total 353.

Under treatment, 312.

The yellow fever situation appeared improved at New Orleans yesterday, while the scourge is reported as gaining renewed energy in Louisiana outside of New Orleans.

The number of deaths fell yesterday

from five to nine, while only ten new disease centres were reported, as against 21 yesterday.

The number of cases under treatment gradually grows fewer, despite the large number of new cases each day.

Inspectors discovered three cases in the Italian settlement beyond the outskirts of the city, and a freshly infected spot in St. Bernard Parish is announced. Health Officer Heraux found here five genuine cases, and three suspected cases.

he thought the country along the banks of the Southwest Miramichi was altogether too rocky and hilly for farming purposes, although the soil may be all right.

Asked to give an estimate as to what he thought the probable cost per mile of building a road in that section would be, he replied that he had no sufficient data on which to base a calculation. "But," he added from what I have seen of the country I would not care to undertake the work for less than \$25,000 per mile."

The Captain went on to say that the river is very crooked, in some places taking the form of a double S so it will be pretty hard to follow with a railway line."

PICNICS TODAY.

The Church of England Sabbath school picnic is being held today at Taylortown. Between four and five hundred persons, with numerous well filled baskets, left here by the Victoria this morning. It began to rain just as the steamer pulled out, but the enthusiasm of the picnickers was not dampened.

The Methodist Sabbath school picnic is being held today at Hart's Island near Springhill. A large crowd left at nine o'clock by the steamer Aberdeen, which has been chartered for the day.

The St. Mary's Episcopal Sabbath school picnic is being held today at Durham.

Mr. William McAndrews, who has been in St. John for some time, has returned to Fredericton and accepted a position at Palmer's tannery.

THE TENNIS TOURNAMENT

Some Fredericton Competitors Among the Winners.

The New Brunswick Tennis Association opened its annual tournament on the St. John Club's courts yesterday morning under most favorable conditions. The following are the results so far:

Rich. & Ont. Nav. 70½, 73½.

A LATE ARRIVAL.

Halifax, Aug. 24.—(Special)—The schooner yacht, Blackhawk, one of the contestants in the ocean race from Marblehead only reached the finishing line at one o'clock this morning. She met light winds and thick weather. The little sloop Sanquet finished at 11:51:58.

Mr. D. D. MacLaren of St. John's is stopping at the Queen.

Bottled Water.

Before drinking bottled water as a beverage pour it several times from one pitcher to another. This will aerate it and remove the insipid taste.

Accustomed to It.

Ada—And weren't you a bit nervous when he proposed? Clara—Oh, no! A proposal doesn't make me nervous any more.

Much bending breaks the bow; much unbending, the mind.
