SHOT HIMSELF DEAD.

Well Known St. John Citizen Connected With
Maugerville Families

ACCIDENTLY KILLED IN HIS OWN ROOM BY THE
DISCHARGE OF A GUN.

Whole Side of His Head Blown Off--No Witness of
the Tragedy.

St. John, Sept. 19.—(Special.)—A sad gloom overspread the city this morning when it became known that a well known citizen, William F. T. Harrison, deputy collector of inland revenue, accidentally shot himself while working with a shot gun in his home, 78 Elliott Row.

Members of the family, who heard the gun shot, rushed to the room to find Mr. Harrison lying dead, with part of his head torn away, while the shot gun was found close to his body.

It will probably never be known just what happened preceding the shooting, or exactly how Mr. Harrison became the victim of such a horrible accident.

Mr. Harrison was in his room working over the gun. Suddenly a shot was heard. His brother Walter rushed into the room and found the body of the unfortunate man lying across the room.

In the head was a gaping gunshot wound and when found, life was practically extinct.

The household was summoned and Dr. Berryman sent for, but Mr. Harrison was probably dead before the physician received the summons.

Mr. Harrison was born July 23, 1873, and had thus passed his thirty-second birthday. He was the second son of the late William F. Harrison, who for many years conducted

a wholesale business on North Wharf. An older brother of the deceased was Charles F. Harrison, who was one of the South African veterans who died of enteric fever in South Africa during the Boer war.

Deceased leaves two brothers, A. Bertram Harrison, a graduate of New York Academy of Dramatic Arts and who recently has been engaged as stage manager for Henry Miller & Anglin, and another brother Walter A., in the employ of T. H. Estabrooks. He also leaves one sister, Mrs. Hart, of Kingston, Ont.

Jeremiah Harrison, of the hay and feed firm of that name, and Hon. Archibald Harrison of Maugerville, were uncles of the deceased, and Harry E. Harrison, of Fredericton is a cousin.

Mr. Harrison was engaged in his father's office for some time and on the latter's death conducted the business. He was appointed deputy collector of inland revenue July 13, 1901.

He was an ardent hunter and fisherman, and took a keen interest in everything pertaining to rod and gun.

He was a member of St. Andrew's Presbyterian church, and of Court Martello, I. O. F.

The whole side of Mr. Harrison's head was shot away. There will be an inquest tonight.

THROWN TO HIS DEATH.

Victim of New York Runaway Accident Dropped 100
Feet From a Bridge.

New York, Sept. 19.—(Special.)—A man, said to be William A. Fusch, was thrown over the railing of the Williamsburg bridge, the new suspension bridge over the East River, and fell 100 feet to his death.

He fell on stones on the border of the New York side of the river, beneath the bridge approach. His death was caused by a runaway horse across a large portion of the bridge, an automobile having frightened his

horse. The vehicle which he drove was a news delivery wagon, under roof and closed sides, in which he was practically a prisoner. He made an attempt to jump, but leaned too far forward to guide his horse past other teams in the dangerous passage way. He landed on his head 50 feet below the bridge. The runaway horse was stopped at the iron gates leading into the street which had been shut by the police.

WILD CAT AT THROAT.

Hunter Runs Nine Miles to Obtain Assistance.

Colorado Springs, Sept. 19.—(Special.)—Bareheaded with hair disheveled, blood flowing from a wound in his face, and a live wildcat squeezed tight to his chest, John Seigel, a ranchman, ran nine miles over a mountain trail before finding help.

Seigel was hunting grouse when his dog pointed game. Instead of birds a huge wildcat sprang at his throat. Seigel dropped his gun and hugged the beast. His stout hunting jacket and the tightness of his grip prevented the animal from biting or scratching. At the end of nine miles he met two men, one of whom drew a revolver and shot the cat through the head.

Mr. James Tibbits, who has been playing on the Coatesville, Pa., baseball team the past season, arrived home today.

Some pianos are instruments of music, while others are instruments of torture.

GOING TO COURT.

Brooklyn Council Will Take Legal Steps
Against Arcanum Rates.

New York, Sept. 19.—A meeting of a general committee representing the subordinate councils of the Royal Arcanum of Brooklyn and Long Island was held last night in Brooklyn. A resolution was adopted protesting against the failure of the supreme council to recognize the protest registered by the committee of nine against the new schedule of rates.

It was also decided that the councils represented by the committee should not recede from their position, and that legislative action should be taken looking to a reorganization of the order, so that 90 would be made up of representatives from the subordinate councils, in place of the governing body as at present constituted. The committee also decided during the present week to take some legal action in the courts of Brooklyn, probably in the form of an injunction, against the supreme council, and directing it to show cause why the council should not be enjoined from putting the new schedule of rates into effect on Oct. 1.

WILL RECOMMEND FILTRATION.

Engineer Barbour Will Report to the Council Tonight--
Sewerage System for \$75,000.

Engineer Frank A. Barbour of Boston, who was engaged some time ago to prepare a report on the water supply and also on sewerage, arrived here by the noon train today and is a guest at the Queen. A special meeting of the council has been called for this evening to receive his report, but owing to the illness of Ald. Hanlon and Ald. McGinn and Stockford, being busy at the exhibition grounds, it is altogether likely that only a committee meeting will be held. Mr. Barbour has prepared no written report, it being his intention to report verbally to the council and fully explain the whole proposition to them.

It is quite likely that Mr. Barbour will report strongly against Garden Creek, Yoho Lake and Tower Lake as possible sources for a gravitation system, and will recommend that the city continue to obtain its water supply from the St. John river. He will further recommend, in all probability, the construction on the lot near the pump station, of a clear water tank, having a capacity of 250,000 gallons and will urge the installation of a filtration plant of the

most modern type. Mr. Barbour will also submit a report in regard to sewerage, and will strongly recommend the early adoption of a system. He has found no engineering difficulties in the way, and is confident that a first class system can be installed for \$75,000. This estimate will allow for thirty per cent. more pipe than appeared in Mr. Willis Chipman's estimate, and will include cellar sewerage for Queen street.

The sewage will be deposited in the river at the lower end of the city, and Mr. Barbour thinks that with the filtration plant working properly there will not be the slightest danger from contamination of the water supply by tides.

In conversation with a member of the city council today, Mr. Barbour stated that he was confident that \$150,000 would more than cover the cost of sewerage and the improvements to the water system that he would recommend.

This afternoon Mr. Barbour drove out to examine Millstream, so that he would be in a position to report on the same at tonight's meeting of the council.

WILL BE THE BEST YET.

Great Preparations Being Made for the Opening of
the Big Exhibition on Thursday.

The exhibition building and grounds present quite an animated appearance these days on account of the active preparations being made for the opening of the exhibition, on Thursday afternoon. A large force of exhibitors and their helpers are at work inside of the main building filling up booths and stalls, and have already made a wonderful transformation in the place.

Mr. M. Tennant is the energetic chairman of the committee on buildings, and for weeks has devoted nearly the whole of his time to the work. Extensive alterations and improvements have been made, which have cost a good deal of money, but were rendered absolutely necessary by the increased demand for space by intending exhibitors. This year the display of carriages will be shown in two large tents erected on the grounds, and the building formerly used for that purpose, will be given over to agricultural produce. An addition of thirty feet has been made to the poultry house, and the dining hall on the third floor of the main building has been greatly enlarged.

Mr. George Y. Dibblee is in charge of the grounds again this year and is the right man in the right place. Already he has everything in ship shape for the opening. The apparatus for the loop-the-loop performance has been erected on the south side in rear of the show ring and is attracting much attention. A second entrance to the grounds for the use of exhibitors has been provided on the eastern side at the head of Aberdeen street. This will be found very convenient for those bringing exhibits of live stock by rail, as it is conveniently reached from the railway station.

The building and grounds will be illuminated throughout by electricity. There will be five arc lights on the grounds, supplied by the city, but all the incandescent lights will be from a plant operated on the grounds. Ald. McGinn and Stockford are in charge of this department. The lights were turned on last evening and gave every satisfaction. The loop-the-loop apparatus has been equipped with electric bulbs and makes a fine appearance when illuminated.

MR. EMMERSON AND I. C. R. MEN.

Delegates Conferring With Him Highly Pleased With
the Discussion.

Moncton Transcript.—A representation of the Brotherhoods of engineers, firemen, trainmen, etc., who by request met the Hon. Mr. Emmerson on Saturday, expressed to a Transcript representative their delight at meeting the Minister of Railways and discussing from their standpoint measures for improvement in the general situation on the I. C. R. They were highly pleased with the address delivered to them by the Hon. Mr. Emmerson and regarded the statements upon which he appealed to them for co-operation as being well put, and thoroughly deserving of their sympathetic support. The assertions in some newspapers he said that there is a proposal to reduce the schedule is absolutely false. No such proposition was ever made or suggested, but more than that both the Hon. Mr. Emmerson and Mr. Butler, Deputy Minister, stated most positively that it was never even thought of, much less suggested. The chief aim of the conference was how to make the running

of the railway profitable so far as the men employed in various capacities on the train can assist.

It may be said from other sources that The Transcript learns that the discussion was a most pleasant and profitable one and that the information given by the various delegates themselves, respecting the operation of the trains, despatching, fuel and other associated questions was of a most valuable and pertinent character, and just the class of information which the minister and the department wanted. It is quite evident from the conference and from the valuable information given by the men that there are ways of improving conditions on the I. C. R. without reducing the schedule of wages and which would benefit the railway and not prejudice the men's interests. The men ridiculed the idea that political interference had anything to do with the situation on the I. C. R., so far as they are concerned or observed.

MONTREAL STOCK MARKET.

Montreal, Sept. 19.—(Special.)—Stock market quotations this morning were as follows:

Dominion Coal, 77, 73, 73.
Dominion Iron and Steel, 21½, 21½, 21½.
Dominion Iron and Steel, pfd., 69.
Nova Scotia Steel, 65, 65, 65.

C. P. R., 173½, 172½, 171½.
Twin City, 116½, 117, 117½.
Montreal Power, 92, —, 92.
Rich. & Ont. Navigation, 75.

Sixty buildings were destroyed by fire at Nome, Alaska, on the night of Sept. 12, causing a loss of \$200,000, according to advices received today. The city hall was destroyed but the records were saved.
