

HOUSEHOLD HINTS.

Some Interesting Information for Busy Housewives.

Kerosene is very useful and does wonders for many a housekeeper. A soft cloth moistened with it and used on the furniture in regular dustings will brighten the wood. Many ladies dresses put a little into the water in which soiled clothes are soaked, and a little added to the starch will keep the iron from sticking. Kerosene is also good for cleaning enameled beds, tubs, sinks, etc.

When trying to put out a fire, remember that by soiling them for a while at the bottom of the blaze will do more to put it out than ten gallons at the top. "Play low" is the motto to follow while fighting fire. A few gallons at the bottom of the flames will rise in clouds of steam when the fire is rising to quench it. A big blaze on the leeward side looks fearful, but play low with water on the windward side and you have the speediest way to quench the flames and will not require a river.

By putting an ounce of sal ammoniac in the last water in which muslins and cottons are rinsed, or a similar quantity in the starch in which they are stiffened, they will be rendered unflammable.

Paint stains on a floor may be scoured off by soaking them for a short time in benzene or turpentine, and then rubbing them with emery paper or a little pulverized pumice stone applied a damp cloth.

When washing China silk, add a slight suggestion of starch and it will look like new.

So often people tell of the many things they have lost down their registers. Money, buttons, and trinkets are sure to roll straight for the register. Place a fine wire, extending in the top of the pipes, just below the register, then when anything is dropped into it, all you need to do is to lift out your register and take out the article.

To pack a bottle of liquid for traveling roll it in the corrugated paper that comes around breakables from the stores and leave a generous space inside the paper at the top for sawdust. If the liquid leaks out the sawdust will absorb it. Rubber caps with which to encase corks are also a safeguard. To keep the sawdust inside the improvised tube it will be necessary, naturally, to wrap it with paper and string. For a long journey in a trunk bottles of liquid are safest packed in a big tin box, with sawdust for filling.

Clean flannel dipped in paraffin oil will satisfactorily remove finger mark on polished or painted wood. If rubbed in for a few moments. Wipe with a clean cloth wrung from hot water to remove the odor. The oil will also prevent leather from cracking and is said to make shoes take polish easier.

Burlap is a wall covering is objected to by many people on account of the expense. They do not, however, take this advantage into consideration. It may be tinned or re-colored without removing from the walls, either a dull or a glazed finish being easily put on, making it quite as good as new. The first cost of burlap far exceeds that of paper of the same general effect, but its wearing qualities make it far less expensive in the end.

Grained and varnished imitations of hardwood are best cleaned by rubbing well with cloths wrung out in borax soapuds, never letting the water touch them. Afterward they should be rubbed with a flannel barely moistened with kerosene. If there is too much kerosene it will dissolve and blur the colors. Clean hardwood with a flannel wet in turpentine and rub afterward lightly with boiled linseed oil. Take off spots with fine sand mixed in oil. Apply it with a leather and rub with clean flannel afterward to bring back the polish.

HEALTH AND BEAUTY.

Mutton tallow is not desirable for the complexion. Good cold cream or skin food is much better.

To whiten the face the following is harmless: Peel and chop a cucumber so as to make a poultice. Bind it on the face, letting the juice remain on the skin until dry.

For severe sunburn, which is often very painful, especially when blisters form, use raw potato. Scrape and

plaster on soft linen and apply like a poultice, renewing when it dries.

Placing eyeglasses or spectacles with the lenses resting flatly against a hard surface dims the vision, according to an oculist. They should be placed so that the bridge supports them.

To remove callous places on the elbow, every night soak them for ten minutes in warm water in which a teaspoonful of borax has been dissolved. Then carefully dry and rub with a good cold cream.

RECIPES.

Peach Cream Pie.—Roll out some puff paste very thin, and line a deep tin with it, nearly fill it with thinly sliced peaches, sprinkle with one-half cupful of granulated sugar, mixed with half the quantity each of macaroon crumbs and finely chopped English walnuts. Put on a cover of the paste, prick it well with a fork, and bake in a quick oven. Let it get cold, then cut a neat hole in the top, and carefully fill it with a cream made as follows: To the stiffly whipped whites of three eggs add three tablespoonfuls of almond extract, and one cupful of thick, sweet cream. Serve very cold. Delicious.

Lemon Pie.—Two cups sugar, juice of two lemons, yolks of six eggs, one rolled cracker, one cup of milk, whites of the six eggs to be used for frosting.

Cottage Pie.—One and one-half tablespoonfuls flour, two cups gravy or water, one tablespoon butter, two cups of meat. Make a gravy of the butter, flour and gravy, pour over the meat, cover the dish with a layer of rich mashed potatoes and bake a golden brown.

Blackberry Cream Pie.—Line a deep pie plate with rich pastry. Put in a thick layer of fresh or canned blackberries, sweeten to taste. Bake carefully, when cool, and just before serving, add a layer of whipped cream. This is a delicious dessert.

Mock Cherry Pie.—One cup chopped cranberries, one cup chopped raisins, one heaping teaspoonful flour, one beaten egg. Pour over all one cup boiling water and bake between two crusts.

Date Pie.—One pound dates, one quart of milk, three eggs, three tablespoonfuls sugar, a little salt and nutmeg; the dates to be stewed and sifted; will make two pies; bake with one crust.

Potato Pie.—Line a deep pie plate with good paste and fill with mashed potatoes that has been well seasoned with salt, butter and cream, and then whipped with a fork until light. Put on a top crust and bake just like an ordinary pie. Serve with roast beef or boiled beef, cutting it in triangles; put a spoonful of the meat gravy on each piece.

SEWING HINTS.

Charming fichus adorned with tiny detached roses or other flowers, are much favored by young girls, and these can be easily fashioned at home.

Never neglect small repairs—a stitch in time saves not only nine, but ninety. Don't let buttons hang by their last thread, darn small holes never wear dirty or tumbled lace, brush off mud and bind frayed skirts.

A sewing room should, if possible, be fitted up with all the necessities of work. It should contain a oier glass, and opposite it one belonging to a chiffonier. There should be a long table, a manikin, a rack, a hamper, sewing machine and baskets for pieces and patterns.

Muslin covers with ribbon run through slits are pretty for pillows. The newest ornamental pillows are covered with colored silk or oriental satin, with a gathered puff about five inches deep at each end. The effect is very pretty if muslin covers are used on them.

The back breadths of an unlined shirt waist should be sufficiently wide to keep the underarm seams in a straight line from the arm's eye to the waist line. These seams should not curve toward the front, but should set straight on the figure. If you wish fullness in the back of your shirt waist adjust this fullness gives a neater appearance

YUKON GOLD FIELDS.

Rev. Dr. Potterton Says Yukon and Alaska Will Produce \$35,000,000 This Year.

Rev. Dr. Thomas Edward Potterton, pastor of the church of Our Father in Brooklyn, was at Montreal Wednesday on his return from a trip to the Yukon and Alaska. He is the first to arrive from the gold fields this summer.

In an interview with the Herald in the C. P. R. passenger department with regard to the Yukon mining field he said the work of the individual miner is practically through in the gul-

ches round Dawson, and it is expected that eighty dredges will be at work in the beds of the creeks next year.

The doctor who is a Yorkshireman of massive and well-knit frame, speaks with great fluency on the mining conditions in the sub-Arctic regions.

"I think the output of the Yukon will be larger this year than last. The most competent authorities I

have met calculated that Alaska and the Yukon will between them send out \$35,000,000 worth of gold. In both these mining regions new discoveries are being reported, but as to how far they will supplement the old as to how rich they may prove, it is impossible to say.

"I noticed that the dredges that are now in use are going over the ground that has already been worked by hand, and are finding it profitable to work the tailings which were considered of small account when the gold fever was at its height."

A company headed by the Guggenheims of New York, the principal operators in the smelter trust, have acquired a good deal of gold-bearing land, and are likely to give an impulse to mining on a larger scale than has hitherto been attempted.

Dr. Potterton, who has brought with him a fine collection of photographs, which he intends to use as illustrations for his lectures, declares the scenery in these remote parts to be of grandly picturesque type, and he speaks highly of the activity and industry of the people.

Nothing can be purchased for less than a "quarter" up there—not even a local newspaper.

Dawson itself he described as a quiet city—possessing upon the whole an orderly population.

The little town of White Horse at the junction of the Yukon railway with the river, navigation route, which was entirely destroyed by fire about a year ago, has been entirely rebuilt and it looks snug and comfortable.

In the vicinity of Dawson there is some railway building in progress, the most important undertaking being a new line from Dawson to Grand Forks, through Bonanza, Creco, where the earliest discoveries were made.

The doctor went out to the Pacific coast and returned by the C. P. R. route, but he took the American ships up the coast. He states that if only the C. P. R. would run their vessels into the American ports on the Alaska coast—Sitka, Juneau and the other more important places of call—the company would capture the whole American trade, as everybody speaks more highly of them than they do of those of the U. S. companies.

MEN RULE BY FORCE, WOMEN BY CHARM.

And yet because they live less strenuously, women neglect the early evidences of failing vigor. The wise woman will not permit her charms to be robbed by ill-health. When she feels appetite failing, nerves getting on edge, color fading, she takes Ferrozone. How it sharpens the appetite! How quickly rich blood is available to restore color to the cheeks, buoyancy to the step. Better try Ferrozone. You'll feel like a new being, with new vigor and ability to confront life's difficulties. You are sure to bless the day you commenced Ferrozone. Sold everywhere in 50c. boxes.

EVERY MEMBER OF THE FACULTY WAS DISMISSED.

Exposure of the Evils in Deaf Mute School Causes Big Sensation.

Rome, N. Y., Sept. 6.—A scandal of far-reaching proportions has been discovered by the State Board of Charities in the management of the Central New York Institution for Deaf Mutes.

So appalling were the conditions unearthed that a clean sweep has been made, not only of the faculty, but of all employees, big and little. An investigation made showed that the whole institution was honeycombed with evils which involved not only mismanagement but immorality.

Extraordinary drastic measures have been taken by the State Board of Charities to clean up the institution and rectify the outrageous condition of affairs, which apparently has existed for a long period.

Peremptory orders were issued by the State Board to the local managers of the institution, requiring the immediate dismissal of every employee on the payroll of the institution. This order has been complied with. Unless its commands in this respect were met, the local board were notified that the State, which is the main support of the institution, would extend it no further aid.

Prof. E. B. Nelson, who has been principal of the institution ever since it was founded more than thirty years ago, in March, 1873, is one of

A SMALL COAT.

Consisting of a part of the wardrobe of a girl in quite as good style as those of older wearers. It is a light gray simply made and of a neat style. It fastens in a double-breasted manner and requires no fitting except for the shoulder seams. A double cape collar provides extra warmth over the shoulders and adds to its attractiveness. The coat may be loosely belted in a long waisted manner if desired. Blue or brown serge with narrow stitched pieces finishing front, collar and sleeve edges would prove pleasing and wear well. A soft silk should line the coat and offer a contrast in color. Large pearl, one or enamel buttons serve for adornment and fastening. The medium size calls for 3 1/2 yards of 44-inch material.

4712—Seven pieces, 5 to 12 yards.

FREDERICTON HERALD.

Please send the above mentioned pattern, as per directions given below, to

Name.....

No..... Street.....

Town..... Province.....

Measurement—Waist..... Bust.....

Age (if child's or miss' pattern).....

CAUTION.—Be careful so send size of pattern wanted. When the pattern is sent measure you need only mark 32, 34, or whatever it may be. When in waist measure, 22, 24, 26, or whatever it may be. If a skirt, give waist and length measure. When miss' or child's pattern write only the figure representing the age. It is not necessary to write "inches" or "years." Patterns cannot reach you in less than three or four days from the date of order. The price of each pattern is 10 cents in cash or postal order or stamps.

CATTLE EMBARGO MAY BE REMOVED.

Member of British Parliament Expects Bill to be Introduced Before Long.

Mr. W. E. Baker, member of the British House of Commons, for East Finsbury, London, who has been spending several days visiting friends in Montreal city, left for the west last evening.

Mr. Baker is a Canadian by birth but has lived the greater part of his life in the Old Country.

He has crossed over to Canada every summer for a number of years and is familiar with affairs in this country.

Mr. Baker is deeply interested in the embargo question, though he was rather reticent in reference to it when interviewed by a Montreal Herald reporter.

"I think that in the interests both of Canada and of England the embargo on Canadian cattle should be removed," he remarked. "The embargo, it seems to me, is simply a little bit of protection which survives in England. I would be in favor of changing the law so as to admit Canadian cattle and of authorizing the board of agriculture to arrange for a thorough examination of all imported cattle at the port of entry.

Mr. Baker is of the opinion that a large majority of the members of the house are in favor of the removal of the embargo. He was not in a position to speak authoritatively, but he thought it was not unlikely that a bill to that effect would be introduced before long.

LET THE STOMACH ALONE.

You can't cure catarrh by dosing the stomach. The disease is in the throat, nose and bronchial tubes. Inhale Catarrhazone to the spot where the disease really is,—it clears away foul secretions, stops discharges at once, purifies and heals the passages, literally annihilates every trace of catarrh. Nothing else is so direct and certain as "Catarrhazone." Results guaranteed. Two sizes, 15c. and \$1.00 at all dealers.

INTERCOLONIAL RAILWAY.

TENDER

Sealed Tenders, addressed to the undersigned, and marked on the outside "Tenders for Excavation at Halifax," will be received up to and including SATURDAY, SEPTEMBER 8th, 1906, for all labor and material in connection with the excavating and grading for new tracks between North Street Station and the grain elevator at Halifax, N. S.

Plans and specification may be seen at the Terminal Agent's Office, Halifax, and at the Chief Engineer's Office, Moncton, N. B., where forms of tender may be obtained.

All the conditions of the specification must be complied with.

D. POTTINGER, General Manager.

Railway Office, Moncton, N. B., 16th Aug. 1907.
