Albert J. Machum,

MANAGER of the

Union Mutual

Life Ins. Co.

of Portland, Me.
Established 1848

It is a strictly Annual Dividend Company, the surplus or profits being apportioned every year upon all plans of insurance and a statement of same given to each individual policy holder at the expiration of the first and each subsequent year. The result is that every holder of one of these contracts knows exactly what profits have accumulated every year on his own particular policy. He can make use of such profits any time he so wishes, and in event of his death, such additions are paid, besides the full amount for which the policy is written.

If "A Bird in the Hand is Worth Two in the Bush," how much is a policy worth which guarantees an annual dividend as above, combined with a policy under which no profits are apportioned until the end of twenty (20) years? "Union Mutual" policy contracts are the most liberal issued. The guaranteed reserve value is equal to that of any company in the world. If you require insurance of any kind consult a "Union Mutual" agent, or write direct to

Albert J. Machum,
MANAGER.

Wood's Phospholine is sold in Frederic-
ton by all Druggists.

SUNLIGHT SOAP

Clothes washed by Sunlight Soap are cleaner and whiter than if washed in any other way.

Chemicals in soap may remove the dirt but always injure the fabric. Sunlight Soap will not injure the most dainty lace or the hands that use it, because it is absolutely pure and contains no injurious chemicals.

Sunlight Soap should always be used as directed. No boiling or hard rubbing is necessary.

Sunlight Soap is better than other soap, but is best when used in the Sunlight way.

5c. Buy it and follow directions. 5c.

\$5,000 REWARD will be paid to any person who proves that Sunlight Soap contains any injurious chemicals or any form of adulteration.

Lever Brothers Limited, Toronto

A BIG LAWSUIT.

E. B. Eddy Estate being Sued for Large Sum by Quebec Government.

Ottawa, July 13.—Aylen & Ducloux, acting for the provincial government, of Quebec, have entered action for \$254,535 against the E. B. Eddy Co. Limited, for succession duties on the estate of the late Ezra Butler Eddy. The executors of the E. B. Eddy estate filed a statement with the collector of provincial revenue at Hull to the effect that after the debts of the late E. B. Eddy had been paid, and bequests carried out, there remained nothing, that the estate was worthless. But the department declined to accept that statement, and after several attempts to come to terms, the government finally takes legal action.

JUMPED INTO WELL TO ESCAPE ROBBER.

Middleboro, Mass., July 13.—Geo. Lamphear, a resident of Puchado Street, barely escaped a robbery this afternoon. He has been slightly de- mented of late and the excitement over the break and robbery at his home Saturday, together with the assault on his sister, Cora, caused his mind to wander and he believed that he was being pursued by a robber. In his flight for safety he jumped into the well. A passerby happened to see the man struggling and rescued him, and later he was taken into cus- tody. He was found insane and it-

committed to Westboro asylum. He formerly lived in Marlboro, moving a short time ago to this place.

DO YOU GET BILIOUS?

No remedy could be more prompt and agreeable than Dr. Hamilton's Pills. No matter where you go you will hear of the grand cures they make. Writing from Ottawa Mrs. M. E. Legere says: "For people inclined to biliousness and such headache I don't think that there is a remedy to compare with Dr. Hamilton's Pills. I formerly had bilious attacks about once a month—used Dr. Hamilton's Pills and obtained grand results. My stomach has been put in good order and my health improved." No medicine is better for men, women and children. Try Dr. Hamilton's Pills—25c. per box or five boxes for \$1.00 at all druggists.

A servant girl had been out on an errand. On returning she said to her mistress:

"Oh, ma'am, there's been a young man following me."

Mistress—Oh, indeed.
Servant girl—Yes ma'am, I know he was a following me because he kept looking around to see if I was a-coming.

Mrs. Grouch—If I should die you would never get another wife who would look after you as I have done.
Mr. Grouch—No, not if I could help it.

TOOKE SPORTING SHIRTS

Are designed to give the greatest freedom of action and general comfort.

They are well and strongly made, look natty, and come in hundreds of printed fancy weaves.

In summer weather they are very comfortable and quite the correct thing for business and general wear.

Careful dressers for more than a quarter century have always demanded Tooke Shirts.

TOOKE BROTHERS, Limited,

MONTREAL. 904

See programmes, prize-list and other printed matter for particulars. Geo. E. Fisher, Secretary, Hon. L. J. Tweedie, president.

NEW IODINE CURE.

A Remedy Which Gives Fresh Hope to Consumptives.

Such marked and striking results have been obtained from the new iodine cure for consumption which has been submitted for the consideration of the medical profession by Dr. George A. Brown, physician to the Montreal dispensary, that steps are being taken to give a demonstration of cases before the British Medical Congress, which meets in Toronto in the latter part of August.

Dr. Brown was approached by a Montreal Herald representative on the subject of the cures that have been effected. "It is too early yet," he said, "to discuss results. It was only in February last I brought the matter before the Montreal Medico-Chirurgical Society, and put before my professional brethren the whole of the data required to enable them to treat patients themselves. I think a year ought to elapse before results are definitely given out to the public; but I am trying to arrange so that several cases can be submitted to the British Medical Congress, so that the members of the profession can judge for themselves."

As this congress will bring together the most distinguished members of the profession not only from all parts of Canada and the United Kingdom, but from all over the world, it is likely that the cure will be scattered far and wide, and will be known to the uttermost ends of the earth.

Dr. Brown is a quiet, unobtrusive man with a grave and thoughtful face. He is tall, dark, and well built, and his manner, despite the serious cast of features, is kindly and sympathetic.

It has been said that we miss in our heroes the dash, vivacity, forcefulness and power that we have accustomed ourselves to think about in their connection. Those obtained by Dr. Brown himself.

MODERN TREATMENT GIVES MORE HOPE.

One soon finds that Dr. Brown is not a talkative man. "I would rather," he said, "leave others to speak of results when the proper time comes, but it is too early yet."

Some hundreds of cases are being treated by this method in Montreal today, and the results are regarded as extremely gratifying and promising.

A generation ago it used to be accepted as unquestionably as the law of gravitation that consumption could not be cured.

Dr. Brown's idea, as he put it before the members of the profession is that the truth lies somewhere between the two views.

In some cases it can be cured and in some cases it cannot. Physicians today approach a case of consumption with more confidence, and patients may bring to their aid new hope.

Progress has been along two lines—towards the discovery of a specific remedy and towards the better understanding of the capabilities of the human organs for resisting the disease.

If present-day methods are more satisfactory, it is due to the workers recognizing the capacity of the body to deal with the disease—to the fact that they have striven to strengthen the body to end by assisting on fresh air, sunlight, improved hygiene and increased nutriment or superalimentation. To this must be added the employment of drugs as adjuncts to these remedial measures.

Dr. Brown has employed iodine in a rather unusual way in the treatment of tuberculosis, with results that have, as already stated, been found extremely gratifying.

The method employed is the injection of a solution in which iodine is held in suspension. The preparation is made according to the following formula: "Precipitated iodoforn formula: 'Precipitated iodoforn which contains 97 per cent. of iodine 100 grains; acacia powder, 25 grains; glycerine, 200 minims; carbolic acid, 5 minims; boiled distilled water, 300 minims.'"

Dr. Brown has employed this method for twelve years. He was induced to make it after reading Krause's monograph upon iodoforn in the treatment of tubercular joints.

Dr. Brown's experience is that this method is efficacious not only in affections of the joints, but in tubercular conditions in the lungs as well, and that in addition to the local effect, it has a constitutional action.

The injection is performed under the usual directions for securing antiseptics. The vessel holding the emulsion is sterilized by heat, and a syringe with a metal piston is employed, so that it too may be made surgically clean.

The place of application is the space between what is called the left acromion process and the capsule of the shoulder joint. The general reader will understand from this that it is near the shoulder joint.

The operation is not unaccompanied by pain, but it is long continued; absorption is slow, and the chance

of acute poisoning is small. It is considered well to dress the wound with sterilized gauze and bandage, and then fix the arm to the body with a bandage for two days. At first as high as 48 grains of the solution were given. This was in a case of tuberculosis of the larynx, which was so swollen that the trachea could not be seen. The effect was quite marked and the swelling entirely disappeared. Although this dose had a favorable action, it was found to be too large and depressing. The amount for pulmonary tubercular affections rises from eight to twenty-four grains, according to the amount of the disease and the condition of the patient. It may be well to use smaller doses and repeat frequently. Dr. Brown now uses twelve grains every two weeks.

He was induced to undertake experiments along these lines in December, 1894, when a patient, who had become a victim of tuberculosis, consulted him. The patient was suffering from tuberculosis of the ankle, but he declined to be operated upon. The doctor suggested treatment by iodoforn and gave four injections during the year. At the end of the time recovery was completed and the patient had a useful joint. Other cases followed with equally good results and from these were made the deduction that the action of the iodine must be constitutional as well as local.

Experiments went on and the results of the treatment and the cures effected in a number of patients were brought before the Montreal Medical Society in February. Since then the prescribed method of treatment has been adopted by a number of physicians with results, it is said, no less gratifying than those obtained by Dr. Brown himself.

IODONE ONE OF THE GREAT MYSTERIES OF CHEMISTRY.

Iodine, which plays such an important part in this cure is one of the mysteries of chemical science. It is one of the four halogens—substances which by combination with metals form saline compounds, and which are chemically active to a high degree, but are not found free in nature.

It is a dark crystalline solid at ordinary temperatures, but readily evaporates into a violent colored gas. When it is brought in its elemental form in contact with living tissue it exercises very marked effect. An illustration may be found in a not too strong solution painted on the skin. The element seems to undergo rapid combination with certain of the tissues of the skin. In one form or other it is capable of being absorbed and of exerting marked actions upon tissues lying at a considerable depth beneath the surface of the skin almost as much as if the element had been applied directly to them.

In the language of medicine elemental iodine and some of its compounds are said to act as alteratives, producing the most marked changes in the behaviour of various tissues—changes often so profound and extensive as to be quite out of proportion to the relatively small amount of substance that produces them.

It is considered probable by up-to-date scientists that iodine, in its elemental form or as an iodide, must have the power of transferring oxygen from place to place or of acting as an oxygen carrier. It is able even in very small quantities to do a large amount of work, some of which is the oxidation of some of the self to an extra supply of oxygen disposes of it and goes on to repeat the process indefinitely.

A further characteristic stage in the illustration of the process is furnished by the formation of an extraordinary group of substances in the human body, the property of which is that by their mere presence and without undergoing any change in themselves they are able to cause the most marked chemical changes in other substances with which they come in contact. This is in effect the explanation which is advanced by one of the very greatest students of chemical interactions—Prof. Binz of Berlin.

It was in the substance called Kelp, variously defined as sea-weed, or the ash of the sea weed that iodine was first discovered. The plant obtains it from the sea water in which it lives and obtains bromine in like manner. When the ash is distilled with the sulphuric acid and chloride of manganese first the iodine comes away then the bromine. Iodine is used in medicine directly, occasionally internally and very frequently externally. But it has been considered even more valuable in the form of salts, especially iodides, such as the iodide of potassium. In common with the other members of the galeogen group it is held to offer excellent confirmation of the new periodic law of Mendeleeff which asserts that the elements are related to each other in the order of their atomic weight, specific gravity, etc.

WHEN THE COWS COME HOME.

With kingle, kangle, kingle,
Way down the dusty dingle,
The cows are coming home;
Now sweet and clear, and faint and low.

The airy tinklings come and go,
Like chimings from some far off tower,
Or patterings of an April shower.
That makes the daisies grow,
Ko-klarg, ko-klarg, ko-klingle-ingle.
Way down the darkening dingle,
The cows come slowly home,
And old time friends and twilight plays,
And starry nights, and sunny days,
Come trooping up the misty way,

When the cows come home.

With jingle, jangle, jingle,
Soft sounds that sweetly mingle,
The cows are coming home,
The and Pearl, and Florine,
De Camp, Rosered and Gretchen Schell,
Queen Bess and Sylph and Spangled Sue,
Across the fields I hear her oo-oo,
And clang her silver bell;
Gooing, goo-ing, goo-ing-ling,
With faint, far sounds that mingle
The cows come slowly home,
And mother songs of long gone years
And baby joys and childless tears,
And youthful hopes and youthful fears,
When the cows come home.

With ringle, rangle, ringle,
By twos and threes and single,
The cows are coming home;
Through the violet air we see the town,
And the summer sun a-slipping down,
The mahie in the hazel shade,
Throws down the path a longer shade,
And the hills are golden brown,
To-ring, to-ring, to-ringle-ingle,
By threes and fours and single,
The cows come slowly home,
The same sweet sound of worthless psalm,
The same sweet June day rest and calm,
The same sweet scent of bud and balm,
When the cows come home.

With a tinkle, tankle, tinkle,
Through the fern and periwinkle,
The cows are coming home,
A-jolting in the checkered stream,
Where the sun rays glance and gleam,
Stairne, Peachgloom, and Pheobe Phyllis,
Stand knee deep in the creamy lilies.
In a drowsy dream,
To-link, to-link, to-link-lankle,
O'er the banks with buttercups a tinkle,
The cows come slowly home,
And up through memory's deep ravine,
Come the brook's old song and its old time shoen,
And the crescent of the silver queen,
When the cows come home.

With a kingle, kangle, kingle,
With a loo-oo and moo-oo and jingle,
The cows are coming home;
And over there on Moriah Hill
Hear the plaintive cry of the whip-poorwill,
And over the poplars Venus shines,
And over the silent mill;
Ko-ling, ko-lang, ko-ling-ling-ling,
With a ling-a-ling and jingle,
The cows come slowly home,
Let down the bars; let in the train,
Of long gone songs and flower and rain,
For dear old times came back again,
When the cows come home.
Agnes E. Mittenell.

DISEASED KIDNEYS

Made Sound and Strong Through Dr. Williams' Pink Pills.

"Two doctors told me that I was incurable, but thanks to Dr. Williams' Pink Pills I am a well woman today." This strong statement was made by Mrs. Ed. Rose of St. Catharines, to a reporter, who hearing of her remarkable cure called to see her. "A few years ago while living in Hamilton," continued Mrs. Rose, "I was attacked with kidney trouble. The doctor lulled me into a state of false security, while the disease continued to make inroads. Finding that I was not getting better I consulted a specialist, who told me the trouble had developed into Bright's disease and that I was incurable. I had then to retire to a mere shadow, and suffered from pain in the back, and often a difficulty in breathing. Insomnia next came to add to my tortures and I passed dreary, sleepless nights, and felt that I had not long to live. In this despairing condition my husband urged me to try Dr. Williams' Pink Pills, and to please him I began to take them. After using several boxes I felt the pills were helping me and I continued taking them until I had used some twenty boxes, when I was again restored to perfect health, and every symptom of the trouble had disappeared. Dr. Williams' Pink Pills certainly brought me back from the shadow of the grave, and I have since enjoyed the best of health."

Every drop of blood in the body is filtered by the kidneys. If the blood is weak or watery the kidneys have no strength for their work and leave the blood unfiltered and foul. Then the kidneys get clogged with painful poisonous impurities, which brings aching backs and other signs of disease. The only hope is to strike without delay at the root of the trouble in the blood with Dr. Williams' Pink Pills. They make new blood. They flush the kidneys clean, heal their inflammation and give them strength for their work. Common kidney pills only touch the symptoms—Dr. Williams' Pink Pills cure the cause. That is why they cure for good, and at the same time improve the health in every other way. But you must get the genuine pills with the full name Dr. Williams' Pink Pills for Pale People, on the wrapper around each box. Sold by all medicine dealers or direct from the Dr. Williams' Medicine Co., Brockville Ont., at 50 cents a box or six boxes for \$2.50.

Mr. Robert Scott was a passenger to St. John by this morning's train.

THE WONDERS OF THE BODY

Its mechanism, like delicate machinery, by even a slight cause is so disarranged as to be practically useless. A headache is no trifling matter, because the stomach, kidneys and liver are sure to be affected. To cure the cause of headaches and prevent new attacks, use Ferrozone; vitalizes the nerves and brain instantly. Ferrozone braces—gives tone—elevates your spirits. No such health-bringer known. Fifty cents per box of fifty chocolate coated tablets at all dealers.
