

TRouble THREATENING IN EGYPT.

Parliament and Country Receives a Surprise--Sensational Speech.

London, July 7.—Parliament and the country were given a surprise tonight by an unexpected and sensational speech by Sir Edward Grey, the foreign secretary, on the situation in Egypt. An interesting debate on foreign affairs had been anticipated when the House of Commons took up the foreign estimates, but on account of Russia and the Congo affairs rather than Egypt. All other subjects, however, were temporarily forgotten when the House realized the momentous character of Sir Edward Grey's deliverance with regard to Egypt. Speaking in a solemn tone, and amid a tense silence, the minister declared that the recent attacks on British officers at Tanta had not been accidental, but a deliberate manifestation of the fanatical spirit which had necessitated the strengthening of the garrison in Egypt, and declared that unless the authority of Lord Cromer and the Egyptian government were strongly upheld it might lead to a situation requiring the adoption of such unconstitutional measures to meet the emergency as would be especially distasteful to the liberal government.

DENOUNCED BY DILLON.

During the consideration of foreign estimates several members offered criticisms specially urging that a fleet be not sent to Cronstadt. John Dillon, Nationalist, strongly denounced what he termed the brutal barbarism of floggings and executions, accusing Sir Edward Grey, the foreign secretary, of a desire to cloak the affair.

APPEAL FOR FIRM SUPPORT.

Sir Edward, in a general reply,

stated that all foreign relations were friendly. With regard to the Egyptian affair he accepted full responsibility, and pointed out that danger might accrue when dealing with eastern peoples, through discussions of this kind. The secretary proceeded to refer to the growth of the fanatical feeling in Egypt and throughout North Africa recently, which might necessitate even further measures to protect Europeans in Egypt; and, speaking in a solemn manner, said: "As things now are, I say deliberately, and with a full sense of responsibility, that if parliament does anything at this moment to weaken or destroy the authority of the Egyptian government you will come face to face with a very serious situation, for, should fanaticism get the better of constituted authority, there might arise the necessity for extreme measures."

THE CONGO QUESTION. Dealing with the Congo question the foreign secretary said he distrusted the proposed reforms because the system was wrong. He disliked trading companies, and believed the root of the whole mischief was in the system under which the state itself was a trading company. If the Congo State talked of its rights, Sir Edward said, Great Britain also had rights. The question of reservation of enormous areas for private property must be dealt with, and if any dispute arose there was "The Hague tribunal." He believed it would be beneficial to resume British Consular jurisdiction, but it would be discouraging Belgium from taking over the Congo government, and therefore he thought the government should wait. But they could not wait forever.

NATURAL CONSEQUENCES

Some Comments on the New York Murder Case.

(From the Boston Herald.)

New York's latest sensational crime illustrates newly the bitter truth of George Eliot's pregnant saying "Consequences are thimblefuls." The wind-up of young Thaw's meteoric career of escapades and debauches is not more logical than the death at his hands of the brilliant "Beauty worshipper," Stanford White.

When a boy not over sixteen with brains and lacking in moral strength has an allowance of \$250 a week and spending money at school, and upon reaching maturity is put in possession of an income of \$80,000, it is not difficult to foresee his "finish." Especially is this true when the boy becomes as young Thaw did, a cigarette fiend, before getting out of knickerbockers, and enters, upon worse dissipations while still in his teens. The "gilded youth" naturally became a gilded fool of the "high roller" sort, a spendthrift and debauchee. Marrying at last a girl of the pretty face, artistic model, and show type, he scandalizes his family and ends up by shooting to death in a theatrical manner and with fantastic plea of "honor" a man whose alleged former relations with his wife aroused his jealous hatred.

Handcuffed to a policeman he was arraigned for murder, and now faces a trial for his life with only the plea of insanity between him and the public executioner.

As for his victim, his splendid work in architecture, is cut short his family is plunged into distress and humiliation, and his personal reputation as a persistent seeker of pleasure overclouds his professional fame. One of the newspaper accounts of the tragedy said:

Stanford White's death was a tragedy and is a warning. His last night was typical of his method of life. He dined with his son, he went to his club. From his nearest kin and his honorable friends he turned to the structure his genius had raised, where was hid his "studio." The lights and music of the roof garden enticed him. In the presence of the woman who vows he ruined her life he perished by her husband's hand. And the last jangle that sounded to him was a comedian's song, "I could love a million girls."

In the cases of both these men the consequences of their career, and its end, were alike logical and unifying. And in both heredity may have played a part. It is told of the elder Thaw who heaped up the "swollen fortune" that has proved so disastrous to his family, that in his last years he "set the pace" which his son followed. And it is related of Richard Grant White, the scholar and critic, father of the dead architect, that he sold a good portion of his library to purchase the favor of a statuesque, coars opera queen of his day, whom he declared possessed "the lost arms of the Venus of Milo." But whether or not "the sins of the fathers are visited upon the children" the result of their follies often are, and the wages of both are aware to be the same.

TO THE POLE BY AIRSHIP.

Public interest in the aeronautical polar expedition of Mr. Walter Wellman, the well-known journalist, is general throughout both Europe and America. His airship makes an entirely new departure in designing these vessels. It has a lifting power of no less than 16,000 pounds, and as the weight of the vessel with all its equipment is just half of that, there is a margin of four tons for crew and

cargo. Heretofore all airships have been built for high speed for short distances, but Mr. Wellman's vessel is designed for moderate speed and a large radius of action. The reason for this is obvious. The journalist-explorer aims to make a voyage from the expeditionary base in Spitzbergen to the North Pole and back—a distance of 1,200 miles—at an estimated speed of twelve miles an hour, or a total return voyage of one hundred hours. This calculation is based on the "proper" speed of the vessel, and does not take into account the incidence of winds. The fuel supply is for 1,800 miles, this calculation also being based on the prevalence of calm.

The voyage is expected to take place next month. It is expected that from the moment the vessel leaves Spitzbergen she will be in constant communication by means of wireless telegraphy, both with that port and Hammerfest in Norway. It is thus possible that Mr. Wellman may achieve the dramatic triumph of sending a wireless message from the Pole itself.

While the plan is to return from the Pole to Spitzbergen, the explorers are prepared, should the wind be unfavorable to that course, to follow the line of least resistance and cross the Arctic to Siberia, Greenland or Canada. All the governments of these countries have given Mr. Wellman the fullest information as to the location of tribes, games, supplies, etc. Canadians need therefore not be surprised if the news of the long coveted triumph of the Pole is first announced from Fort Churchill or some of the lonely Hudson Bay forts along the Coppermine. Should any disaster happen the airship, the expedition will resolve itself into a sleighing party, the intention being to draw four trailers by two motor sledges. The airship is operated by two motors, one of 55 and the other of 25 horse power. The more powerful will operate the forward screw which is 18 1/2 feet in diameter, and will revolve 350 times a minute. It is not planned that the airship shall ascend higher than 500 feet.

Eight hundred pounds of food, enough for 75 days, will be carried. Five men—Mr. Wellman, a scientist and geographer, an aeronaut, a wireless telegraph operator, and a motor expert—will form the crew, and it is their hope to accomplish the conquest of the Pole and return in five days, if the wind is favorable, and in fifteen if the air currents are adverse.

CHLOROFORMED WILD CAT. Was Used For Window Display. Owen Sound, Ont., July 7.—Last night some daring individual chloroformed a large wild cat owned by the Owen Sound Rubber Collar Company.

It was the property of the company and was secured after the escape of another wild cat from a car while being taken to London a few months ago. The animal had but three paws the fourth having been taken off by the trap in which it was captured. A fine red fox owned by the same company was stolen the previous evening.

THE TONIC OF HEALTH.

Must be more than a stimulant—must be a food as well. There is one medicine that is both a food and tonic—it aids digestion, promotes assimilation, converts food into nutriment that builds up nerves, blood, brain and bone. That tonic is Ferrozone, which contains exactly what a run-down system needs. Ferrozone supplies oxygen to purify the blood, phosphorus to develop the brain, iron to harden the muscles. No wonder it makes such vigorous men and women. You'll eat, sleep, think and feel better by using Ferrozone; try it—now. Fifty cents buys a box of tablets, at all dealers.

A UNIQUE DESIGN.

The woman who likes to have variety in her apparel and designs that are not like those of her friends, will be pleased with the accompanying suggestion of a dressing sack. Pongee was used for material with stitching and flat pearl buttons for adornment. The aim of beauty and service are both successfully realized while the making is effected with little labor. The sack is fitted about the neck by tucks, while a shaped neckband stitched on the edges serves as a trim finish. Two tabs on the right front serve as fasteners, while the tab idea appears again at the opening of the sleeve. The sleeve is in one piece with the sack, having its only seam a continuation of the shoulder seam. The sack resembles the mandarin cut and is very graceful and unusual. In the medium size four yards of 36 inch material are needed.

6410—Sizes, small, medium and large.

PATTERN DEPARTMENT OF THE

A. TOAD'S LONG FAST. Imprisoned in a Church Tower Sixteen years.

Hesper, July 7.—Recently as some workmen were repairing the stone tower on the Evangelical church, which had been leaking, a toad was found buried in the mortar between two stones, with just enough room to move and was still alive and quite lively.

The tower, which is 40 feet high, was built sixteen years ago, and the toad must have been in close confinement when the tower was first built.

Mr. Walker, who did the repairing, has the toad, which is the color of the mortar, on exhibition at his residence, where it may be seen at any time.

SUMMER OUTINGS.

"Routes and Fares for Summer Tours," is the title of a book issued by the Grand Trunk Railway System which is full of interest to the summer tourist who is planning a summer outing for 1906. In addition to general information, the contents contain particulars of different routes and fares to points in all parts of the country and cover the principal resorts reached by the lines of the Grand Trunk and its connections. It contains a fund of information that will be of great help to those who have not yet decided where to spend their holidays. The book also contains a series of maps for reference. Write today for a copy, to J. Quinn, D. P. A., Bonaventure Station, Montreal.

AN AMERICAN DISEASE.

Some doctors go so far as to say that indigestion is the national disease of America. There is but one national remedy for indigestion and that remedy is Dr. Hamilton's Pills, which accelerate the action of the gastric glands and give tone to the digestive organs. They strengthen the blood and thus aid general tone to every organ of the body. Flesh and strength are fast restored and the patient can eat and digest any food he pleases. Test Dr. Hamilton's Pills yourself.—25c. per box or five boxes for \$1.00 at all dealers.

FREDERICTON HERALD.

Please send the above mentioned pattern, as per directions given below, to

Name.....
No.....
Street.....
Town.....
Province.....
Measurement—Waist..... Bust.....
Age (if child's or miss' pattern).....

CAUTION.—Be careful so send size of pattern wanted. When the pattern is bust measure you need only mark 32, 34, or whatever it may be. When in waist measure, 22, 24, 26, or whatever it may be. If a skirt, give waist and length measure. When miss' or child's pattern write only the figure representing the age. It is not necessary to write "inches" or "years." Patterns cannot reach you in less than three or four days from the date of order. The price of each pattern is 10 cents in cash or postal order or stamps.

WHEN SEVEN MEN DIE.

You know at least one of them had consumption. At first it was catarrh—but it was neglected. When "Catarrh" cures so quickly it's foolish to suffer—it's a shame to keep on sniffeling and hawking. Catarrh goes direct to the cause of the disease,—that's why it's so dead certain to cure. It stops the cough, prevents that disgusting discharge, clears phlegm out of the throat in a few minutes. Very pleasant, and safe too; get Catarrh gone from your druggist today.

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.

HEAVEN REVEALED

By BENJAMIN FISKE BARRETT. 383 pp., 6 1/4 x 7 inches. Large Type. Fine Cloth.

For a limited period this book is offered at trade rates 50 cents, with 9 cents postage for mailing.

CONTENTS.

The Origin of Angels—The Essential Nature of Heaven. The Character of the Angels. The Testimony of Scripture. The Sure Way to Heaven. Practical Tendency of this Disclosure. Environment in Heaven and What Determines it. Societies in Heaven. A Heaven for the Non-Christian World. Are Earthly Relationships Continued in Heaven? Sex and Marriage in Heaven. Work in Heaven. The Three Heavens and How Related. Eternal Progress in Heaven, Consociation of Angels with Men.

ADDRESS.

THE NUNC LICET PRESS, 42, WEST COULTER STREET, Philadelphia, Pa.

REVISED RULES.

Members of House of Commons to have Wednesday Evening's Off.

Ottawa, July 7.—The revised rules of the House contain very few important changes from the old rules. Only 25 out of 128 sections contain material alterations. The greater number are of a technical nature, and are not of general public interest. Those of public importance are as follows:—On Wednesdays the House will meet at 1 o'clock and adjourn at 6, leaving the evening free. It is provided, by a new rule that returns to orders not brought down during the ensuing session, without renewal of the order. The English rule as to motions to adjourn, made for the purpose of debating matters of urgent public importance, will be adopted. This provides that the member desiring to bring forward such matter, must obtain the approval of at least twenty members to enable him to do so. If, however, he only obtains the support of five members to that end, the Speaker puts the question to vote, and the majority decide whether he shall be allowed to continue or not. The rule is also guarded with other restrictions taken from the practice of the British House of Commons. Private bills legislation has also received considerable attention, important changes having been made pertaining to fees and charges, and also to periods for the presentation of petitions and bills and publication of notices. The time for presenting petitions for private bills has been extended from three weeks to six weeks, and for the introduction of bills from four to eight weeks. The usual fee of \$200 on bills is retained, but additional charges are made for non-presentation within the times fixed. There is also an additional charge made where the rules of the house have to be suspended for the benefit of the bill. Additional charges are also made proportionate to the capital stock or for increased borrowing powers of companies.
