(Formerly Windsor) Toronto, Ont.

Wood's Phosphodine is sold in Fredericton by all Druggists.

SMOKY ENGINES MAY GO.

C. P. R. Will Make a Test of Detroit Apparatus.

Toronto Globe.—As a result of the efforts of Property Commissioner Harris, the Canadian Pacific Railway have promised to make a test of a smoke preventer on one of their yard locomotives in Toronto, with a view to its adoption. The Grand Trunk people have also been communicated with, and an interview with their master mechanic will also take place. Mr. Harris explained to the C. P. R. officials that there was no authority under the city by-law at present to regulate railway smoke nuisances, but the citizens were desirous that the fouling of the air should be abated as much as possible. Mr. Harris informed Superintendent Timmerman of the preventers being used by the Grand Trunk and Michigan Central engines in Detroit, and Mr. A. W. Horsey, mechanical engineer of the C. P. R., was sent to Detroit to inspect.

Mr. Horsey reported that the device which is on the principle of injecting steam into the smoke pipes, reduces the smoke from black to a light brown or yellow in fifteen seconds, and results in slightly lessening the consumption of fuel. He estimates that the apparatus can be installed for about \$10 per engine. Mr. Preston, master mechanic of the C. P. R., has undertaken to have a test made in Toronto at an early date. There are about thirty yard engines in use in Toronto by both railways.

HAD MR. BEIT A WIFE?

Doubtless he had intended to take a Bride.

New York, July 20.—Speculation as to whether Alfred Beit, the South African financier who died in London on Monday left a widow, was aroused recently by the discovery that in making an application to an American insurance company for a policy on his life in 1890 Mr. Beit named as the beneficiary of his policy "my intended wife Elizabeth Bennett Beit."

Whether this stated intention of marrying was ever carried out was not stated in the statistics furnished to the insurance company, which

showed that at the time he submitted to a physical examination Mr. Beit was unmarried. Although six years have elapsed since the policies were taken out in favor of Elizabeth Bennett, and during that time Beit has been constantly brought to public notice, yet he has always been regarded as a bachelor.

London, July 18.—(Times Special Cable).—At the time the insurance policies on Alfred Beit's life, which name Elizabeth Bennett as beneficiary were written, Mr. Beit confidently expected to be married to that lady. He had known her many years, was very fond of her, and entertained great respect for her. Why he did not marry her he did not disclose to any of his friends.

So far as I know, his relations with her had been above reproach, and her social position and her accomplishments will in no respect be open to criticism. She is still living.

PROVED IN MOUNT FOREST.

Every doctor in this town tried his best to relieve Mrs. J. Withom of asthma; none succeeded. "For years I was a dreadful sufferer," she states, "nothing gave me relief. At times I found it necessary to have all the doors and windows open to get my breath. When in despair, I heard of 'Catarrhazone.' I used it and am now perfectly cured." This proves beyond doubt that any case of asthma is curable with 'Catarrhazone.' No remedy so pleasant, none so absolutely certain to thoroughly cure; try 'Catarrhazone' yourself; it's guaranteed.

MISS GRENFELL ENGAGED.

Many Canadians will remember Miss Grenfell, a cousin of the Duchess of Portland and sister of Lady Charles Bentinck, who accompanied the Prince and Princess of Wales through Canada during their tour of 1861 and will be interested to know that her engagement has just been announced to Mr. F. B. Midway, M. P. Mr. Midway is one of the best known society men in the House. He is a cousin of Lord Revelstoke, and is connected with the family of Earl Grey.

Why Gin Pills?

Gin Pills are called Gin Pills because each pill possesses all the curative qualities of one and a half ounces of the best Holland Gin. As a cure for Kidney trouble however, they have all of the good qualities of Gin, with none of its bad.

50 cents per box, 6 boxes for \$2.50.

See programmes, prize-list and other printed matter for particulars. Geo. E. Fisher, Secretary, Hon. L. J. Tweedie, president.

"Let the GOLD DUST TWINS do your work"

The Dog and The Shadow
You remember the fable of the dog who dropped a real bone for its shadow which he saw in the water. "Bear in mind that all is not Gold Dust that glitters under the name of washing powder. Don't accept a shadowy substitute; get the real

Gold Dust Washing Powder
with the Gold Dust Twins on the package."
OTHER GENERAL USES FOR GOLD DUST
Scrubbing floors, washing clothes and dishes, cleaning wood-work, oil cloth, silverware and tinware, polishing brass work, cleaning bath room, pipes, etc., and making the finest soft soap.
Made by THE N. K. FAIRBANK COMPANY, Montreal, P. Q.—Makers of FAIRY SOAP.
GOLD DUST makes hard water soft

REVOLUTIONISTS SET FIRE TO CITY.

Panic Stricken Inhabitants Flee to Country—Syzeran is Burning.

Moscow, July 21.—A landlord, fleeing from Bohrov, in the province of Voronezh, where a peasant uprising has taken place, has arrived here and gives a frightful picture of the devastation. He describes the losses in the province as colossal. The troops are powerless to cope with the peasants, who are marching in large bands, destroying practically everything. Not more than one-tenth of the estates are spared. The movement was started by the refusal of the landlords in the northern part of the Bohrov district to agree to an advance of wages to the farm women.

CRISIS IS GRAVE.

St. Petersburg, July 19.—The belief that the adoption by the lower House of Parliament today of a proclamation to the nation on the agrarian question will precipitate the long-brewing conflict and plunge the country into civil war is profound. All hope of reconciliation between Parliament and the Government is vanishing, and the government is evidently preparing to take up the gauntlet of battle when it is formally thrown down.

At the council held at Peterhof last night the camarilla came out strongly in favor of dissolving Parliament but, according to the best information, the Emperor hesitated, and at the moment of adjournment refused to agree to dissolution, though his final decision was postponed. Nevertheless the more moderate faction of the Constitutional Democrats, comprising the majority of the House, are hardly avoid the issue, shrink from making the appeal to the country, which may involve a climb-down. They seriously believe that the advocates of a dissolution of parliament, realizing that making the appeal would be equivalent to a declaration of civil war, count upon the active intervention of Austria and Germany which, according to the official Russia, have agreed in principle on sending troops across the border to aid in the suppression of an agrarian uprising, should the Russian government formally request it.

The Russia's announcement created a tremendous sensation. It is stated that the decision of the two neighboring powers was based on fear that the execution of the principles of the confiscation of their property in Russia would constitute a danger to them.

LOSS OF KING'S HEAD.

The Reich, which joins in the appeal to Parliament not to take a step which might warrant the government in asserting that Parliament is attempting to usurp the executive power, declares that if the government adopts the desperate expedient of calling in foreign troops to put down a civil war the result will not be the same as in 1849, when a Russian army saved the Hapsburg dynasty. The paper declares that the people will rally under the banner of Parliament as they did in England, under that of the English Parliament at the time of Charles I. "with probably a similar result, namely, the loss of the King's head."

COUNT TODLEBEN FIRED AT.

St. Petersburg, July 19.—An attempt was made yesterday to assassinate Count Todleben, aide-de-camp to Emperor Nicholas, the revolver bullet grazing his head. The would-be assassin escaped.

TOWN GIVEN TO FLAMES.

Samara, Russia, July 19.—The latest news from Syzeran is that the government buildings and treasury are on fire and the panic-stricken inhabitants have sought refuge in the surrounding fields and forests. The whole town is in flames.

St. Petersburg, July 19.—No doubt is entertained here that the burning of Syzeran was a revolutionary demonstration.

Syzeran is situated on a river of that name, near its confluence with the Volga and 70 miles south of Simbirsk. It is a busy commercial and industrial place, having a population in 1897 of over 32,000.

A NEGLECTED HERO.

What Canada Owes to the Bravery of Wolfe.

Winnipeg, July 21.—Mr. F. C. Wade K. C., of Vancouver, addressed the Canadian Club on the duty of Canada to Wolfe's grave, and pleaded for a national acknowledgement of the achievements of the hero of Quebec. Concluding his address Mr. Wade said: "In contemplating the grave of Wolfe at the old parish church of St. Alphege in Greenwich one cannot but recall his marvellous bravery and brilliant generalship that planned the attack at the Anse du Foulon, which led to the capture of Quebec and the cession of this continent to the Anglo-Saxon race. The first impulse is to look around for some great monument, some vast mausoleum, or, in default of that, some memorial to his memory, or mural tablet indicating of the love and sympathy, or at the least some sign of gratitude on the part of the Canadian people. The dark, mysterious and crypt is there, as is the iron grating which is pointed to as indicating the exact position of the tomb. These

are cold and forbidding enough, but that is all. Canada has done nothing New England and its lineal successors the United States, have done nothing. Had it not been for the efforts of private and unknown persons, by whom a beautiful memorial window was placed in the church in 1896, nearly a century and a half after the fall of Quebec, there would be nothing at St. Alphege to indicate that to Wolfe the Anglo-Saxon race on this continent almost owes its existence. Do not the people of Canada owe it to themselves, as well as to the memory of the great Wolfe, to take some action which will truly express their appreciation of the heroism of the illustrious peer to whom this continent owes so much?" The Canadian Club, after hearing the address, appointed a committee to set wheels in motion towards concerted action by all sister clubs in erecting a suitable monument, and also passed a resolution strongly endorsing the sentiments expressed by Mr. Wade.

BILLING A BIG CIRCUS.

Promotion of Publicity that Costs Hundreds of Thousands Annually

Advertising a big circus is a problem that the general public knows very little about, and yet it is a most interesting and expensive one. It is not sufficient that a circus should have a great list of attractions; it is equally necessary that the public should be made acquainted in an alluring way, with what the circus has to offer in the way of entertainment. To do this engages the efforts of an army of skilled agents, who have given years of study to the question of publicity-promotion and who have associated with them another army of willing assistants to successfully carry out their ideas.

"What is the first important step in advertising a big circus?" was the question propounded to a representative of the Barnum & Bailey Greatest Show on Earth, which exhibits here on July 27th. "Preparing the pictorial displays for the bill-boards, the heralds which are literally distributed by the millions during the circus season, and the newspaper advertisements," was the reply. "This, however," continued the circus man, "is only a small part of the work involved. To post these pictorial displays requires special arrangements with the local billposters, which frequently require particular acumen and finesse. This is done weeks and sometimes months before the paper is finally posted. The first practical knowledge the public has that the show is coming is when the first of the four advertising cars makes its appearance. Each of these cars has a manager, a billposting superintendent, and a staff of from fifteen to twenty-five men. Each car in addition to being fitted up as a travelling hotel, with comfortable berths and a complete culinary department for serving meals en route, is furnished with every conceivable convenience for advertising the big show. The lockers which hold

twenty tons of printed paper, which has to be renewed every two weeks, there is room in the wells under the cars for a dozen barrels of flour, for making paste, and all the cars are furnished with cabinets for carrying out used in the very extensive newspaper advertising.

Wherever practicable, an advertising car is scheduled to arrive in town sometime during the night. This ensures an early start for the bill-posters the following morning. Breakfast is served at five a. m. By six o'clock a caravan of light wagons, which have been arranged for with the local livermen by the agents in advance, are lined up alongside the car. Each wagon receives its allotment of pictorial paper, and with one or two men to do the work, starts on its tour of the surrounding country. From five to ten teams are sent out from each car, and every available fence and billboard for miles around is covered with the bright-hued pictorial announcements of the big show, while the descriptive books and heralds describing the wonders of the big show are given careful distribution among the homes along the routes. While the teams are in the country, the town is thoroughly "billed." In this way the newspaper advertising, which is so important that an entire staff of men is employed to devote their undivided energies to the press, the public is persistently, intelligently and attractively informed of the coming of the big show and its many wonderful features.

"The annual cost of advertising the Barnum & Bailey circus does not fall short of \$250,000 and over a hundred men are engaged in the publicity department alone."

PRESTON'S NEW JOB.

Will be Sent to the Far East to Work up Trade for Canada.

Ottawa, July 21.—W. T. R. Preston was here today and had an interview with Sir Wilfrid Laurier and

Sir Richard Cartwright. Mr. Preston will leave for England on Thursday next. He goes to close up his business as an commissioner of the migration in Europe.

It is learned on pretty good authority, although nothing official is to be had, that Mr. Preston has been offered and accepted a position in the department of trade and commerce. After completing his business in England, he will go to Japan, China, and Corea for the purpose of working up trade between Canada and these countries.

There is a steadily growing trade between Canada and the Orient and on account of the great development of the Canadian west a larger volume of business yearly will be finding an outlet by the Pacific. The visit of Hon. Sydney Fisher to Japan a few years ago was the cause of the Dominion finding a profitable market in flour and other products in Japan. Mr. Preston will have a good opportunity of still further carrying on this good work.

ST. JOHN EXHIBITION.

Thompson & Dundy, of the New York Hippodrome, have written the management of the St. John exhibition that the amusement attractions secured for the big fair which opens at St. John, September 1st, are the best acts of the kind in existence. The headline act is the Barlow Performing Elephants—the famous "Shoot the Chute" elephants which have created such a furore in New York.

The railways and steamship lines have accorded the St. John exhibition the lowest special excursion rates ever offered. The exhibition opens Sept. 1st and closes Sept. 8th and the railway rates are cheap enough to let everyone see the best fair in eastern Canada. "Meet me at the Pike," is the rallying cry this year for the St. John exhibition. St. John is to match the big World's Fair by a real up-to-date amusement row to be known as "The Pike."

The special features of the St. John exhibition which opens Sept. 1st and closes Sept. 8, would alone make it different from any former exhibition. No one who has the price can afford to miss the St. John exhibition, and the railway rates are the cheapest ever offered.

There is such a demand for space for industrial exhibits at the St. John exhibition that practically all of the available space is taken. There are, however, a few choice spaces left and any industry not yet located should apply for space at once.

The St. John exhibition has decided to offer handsome medals for choice industrial exhibits at their big fair, Sept. 1st to 8th. This will be an interesting innovation and will make the showing at St. John bigger and better than ever.

MARRIED OR SINGLE.

Close friend of Mr. Beit's Says Single.

London, July 21.—There is nothing of which I have knowledge on which to found the expectation that a woman will come forward in the course of time with the claim that she is the widow of Alfred Beit. A very close friend and business associate of Mr. Beit's said today that he did not marry Elizabeth Bennett, although he expected to marry her when he insured his life with Equitable. My informant has declined to say who Elizabeth Bennett was or where she was living at the present time. She was a lady, he told me, of unblemished life, but more than that he declined to communicate. Presumably my informant is herself well informed concerning the relations of Mr. Beit and Miss Bennett, but there is the possibility, of course, that Mr. Beit contracted a secret marriage, the knowledge of which may become public later on. If such a disclosure should be made out the effect of the worst of these great astonishment to most of his acquaintances. There are, however, some persons in London who profess to believe that Mr. Beit was a married man. I met one of these persons today, but it appeared he had not much foundation for his belief. Somebody who he thought ought to know had told him that Mr. Beit had a wife and that was all he had to go on.

THE RAFT KING.

N. R. Robinson, "the raft king," is spending a few days in Amherst and Cumberland County. Mr. Robinson was the originator and builder of the rafts at Joggins in the years 1888-1887 and 1889. It will be remembered that the worst of these rafts broke down in launching, the second was lost at sea and the third was successfully landed in New York.

In the year 1889 Mr. Robinson went west and has since been successfully engaged in rafting lumber on the Pacific coast. He resides at Portland Oregon and each year he ships four immense rafts.

Mr. Robinson has recently taken out a patent for a new raft which will contain twenty-five million feet, four times as much as the Joggins rafts contained. Associated with him is John Coates, brother of F. A. Coates, of Amherst.

Mr. Robinson is accompanied by J. G. Robinson and wife. They came to Amherst in a motor car, having travelled from Five Islands yesterday. Mr. Robinson went to River Hebert today.

HER SKIN WAS YELLOW.

"I had only to try Dr. Hamilton's Pills to appreciate their merit," writes Miss Annie S. Bryce, of Woodstock. "My system was out of order and my blood was weak and thin. I had a nasty, murky complexion. My skin was hard and dry. The first box of Dr. Hamilton's Pills made a complete change. I felt better at once. Healthy color came into my face. In about three weeks I was cured." Dr. Hamilton's Pills effect an easy cure. Try these good pills, 25c. per box, or five boxes for \$1.00 at all dealers.
