FOR STARVING JAPS.

Canadian Government Will Send 20,000 Bags of Flour.

Ottawa, Feb. 23.—The Canadian government has purchased \$25,000 worth of wheat flour which will be shipped to Japan for the relief of the famine stricken sufferers in the northern part of the kingdom, where the rice crop, the staple food of the people, has proved a total failure. The flour has been largely purchased in Winnipeg and Portage La Prairie, but a part has been milled in British Columbia from Alberta wheat.

It will be sent forward in white cotton sacks, each holding 49 pounds and enclosed in a bag of coarse jute. The sides of both bags will bear this inscription in Japanese characters: "Canadian wheat flour for the special use of the north-eastern famine suffering people. The gift of the Canadian government." Twenty thousand bags of cotton and an equal number of bags of jute will be needed to transport the flour. It will go forward in two shipments the first leaving British Columbia on March 5.

Flour will not be the only thing in the bags. Advantage will be taken of this opportunity to impress the Japanese with the advantage of making bread from Canadian flour. At present they convert flour into macaroni and other foods which lack the substantial character of bread. Hence each bag will contain directions how to make bread and a sample of yeast to help to give effect to them. The directions are on leaflets of fine flimsy and are penned in the best Japanese that the Mikado's scholarly and erudite representative in the Canadian capital, Consul General T. Nosse, could command.

HON. MR. FISHER'S IDEA.

It is scarcely necessary to state the reasons for such a practical demonstration of friendship for the Japanese, nor to say that the minister of agriculture Hon. Sydney Fisher, is responsible for the recommendation upon which the government has acted. Mr. Fisher learned with regret that owing to the utter failure of the rice crop in many districts of northern Japan, where the inhabitants are dependent upon the product for subsistence, a condition of famine prevails. By the participation of the Dominion in the fifth national exhibition held at Osaka in the year 1903 the most friendly relations were established with the people of the Japanese empire, which have become closer as time has gone on.

As an evidence of the good will of the empire towards the dominion the latter has been admitted as a party to the Anglo-Japanese treaty whereby trade relations on the most advantageous terms will be established between the two countries. In Mr. Fisher's opinion the wheat flour of Canada can replace the rice of Japan as a food with benefit to the consumers in the present lamentable situation. Accordingly the minister recommended that as a mark of sympathy with the people of Japan in their distress there should be sent to that country out of the bountiful harvest with which it had pleased Divine Providence to bless the dominion as much wheat flour as could be bought for \$25,000. This recommendation met with the hearty and unanimous endorsement of Mr. Fisher's colleagues.

Most of the flour purchased has been inspected by an expert so as to insure its being of the right quality. Today Chief Inspector Horn of Winnipeg, detailed an official to go to British Columbia and inspect the wheat emanating from the mills there.
