

## DRUNKEN YOUTH'S FATAL MISTAKE.

Blinded by Drink, He Shot Woman He Thought Had Jilted Him.

Freeport, Ill., June 4.—Edna Humelbegen, nineteen years old, was shot to death Saturday by Herbert E. Springer, eighteen years old, of Rockford, Ill., who chased Mrs. Humelbegen from her baby through a crowd in Ninth street, thinking she was a Rockford woman who had lived from an alcohol stupor, raved over the fatal mistake.

Mrs. Humelbegen had been married only seventeen months, and was wheeling her six months old baby along Ninth street on a shopping trip. As she stopped to rearrange the infant in the carriage, Springer stepped up and muttered a threat that caused the young mother to retreat a few paces from the baby carriage.

With a hand made unsteady by drink, Springer drew a revolver and

fired at the woman, missing her. As the man paid no attention to the child, but started toward the mother she turned and fled down the street, pursued by Springer.

A second shot missed Humelbegen as she ran, and nearly overcame by fright, she tried to enter Aton's grocery store, calling for help. Just as she reached the door of the grocery, Springer fired a third shot, and the bullet struck her dead as she fell into the arms of grocer Aton, moaning "Save me for my baby."

Springer was arrested and taken to jail, while scores of persons who had seen the murder swarmed about the dead woman, too late to render assistance. Friends took the baby home to its father, who says he never heard of Springer.

### STRUCK BY THUNDERBOLT.

Italian Military Balloon Fell Seven Hundred Feet.

Rome, June 4.—A tragic incident took place during a review yesterday of the troops by Victor Emmanuel and Queen Helena. As a part of the manoeuvres a military balloon was sent up to a height of seven hundred feet with Uhlirli in the car. A storm which had been coming up burst suddenly, and the thousands of spectators were horrified to see a flash of lightning strike the gas bag. There was an enormous burst of flame, and a terrific detonation, and the collapsed balloon, with its dangling car, fell to the earth over a mile from the scene of the review. Crowds of persons, afoot and in autos and other conveyances, rushed in the direction where the balloon had fallen. Uhlirli was found alive, but unconscious. He was placed in an auto and rushed to a hospital, where he died without regaining consciousness. King Victor Emmanuel and the military authorities went to the hospital after the review to inquire concerning him.

### LACK OF ENERGY.

A Common Trouble Among Growing Boys—A New Blood Supply is Needed—Dr. Williams' Pink Pills Actually Make New Blood.

There are thousands of young men just approaching manhood who have no energy, who tire out at the least exertion, and who feel by the time they have done their day's work as though the day was a week long. In some of these cases there is a further sign of warning in the pimples and disfiguring eruptions which break out on the face. These are certain signs that the blood is out of order, and unless it is promptly enriched, a complete breakdown, or perhaps consumption may be the result. All these young men should take Dr. Williams' Pink Pills. These pills actually make rich, red blood, clear the skin of pimples and eruptions, and bring health, strength and energy. Here is a bit of proof. Adolphe Rolland, St. Jerome, Que., is a young man of 9 years, who says: "For more than a year I suffered from general weakness, and I gradually grew so weak that I was forced to abandon work as clerk. My appetite failed me, I had occasional violent headaches, and I began to suffer from indigestion. I was failing so rapidly that I began to fear that consumption fastening itself upon me. Our family doctor treated me, but I did not gain under his care. I was in a very discouraged state when a friend from Montreal came to see me. He strongly advised me to try Dr. Williams' Pink Pills. I did so inside of three weeks I began to feel better, my appetite began to improve and I seemed to have a feeling of new courage. I continued the pills until I had taken ten boxes and I am now enjoying the best of health I ever had. My cure surprised many of my friends who began to regard me as incurable, and I strongly advise other young men who are weak to follow my example and give Dr. Williams' Pink Pills a fair trial."

There is no mystery about the cures Dr. Williams' Pink Pills make. These pills actually make rich, red blood, which braces and strengthens every organ and every nerve in the body. That is why these pills cure all common ailments like anaemia, rheumatism, indigestion, neuralgia, St. Vitus dance, headaches and backaches and the special ailments of women and growing girls. You can get these pills from any dealer in medicine or from The Dr. Williams' Medicine Co., Brockville, Ont., at 50 cents a box or six boxes for \$2.50.

### DARGAI HERO RETIRES.

Gordon Highlanders' Famous Charge Recalled.

Colonel Mathias, the famous leader of the assault by the Gordon Highlanders on the heights of Dargai in the autumn of 1897, will retire from the Army under the age regulation this week.

It was a critical moment in a fight with the Afghans when Colonel Mathias said to his men: "Highlanders, the General says the position must be taken at all costs. The Gordons

will take it." And they did. The regiment, to use the words of Sir William Lockhart's official dispatch, dashed through a murderous fire, and in forty minutes had won the heights, leaving three officers and thirty men killed or wounded on the way.

Among the wounded was Piper Findlater, who, shot in both ankles, and piped "The Cock o' the North" until the Gordons had won the heights, and he had won the Victoria Cross.

### STEEL KNIFE IN THE FLESH.

That's the sensation experienced by Robert Price of Hecaton, Ont. He knew it was scintilla and of course used "Nerviline." As usual it cured and he says: "No liniment can excel Polson's Nerviline. Severe pains made my side lame. It was like a steel knife running through the flesh. I rubbed in lots of Nerviline and completely cured." A regular snap for Nerviline to ease Sciatica and rheumatism. It sinks into the core of the pain, cures it in short order. Large 25c. bottles at all dealers.

### Cowbirds Unnatural Parents.

The cowbird is the only bird that we have in this country which is unnatural in its parental duties. It never builds a nest for itself, but lays its eggs in other birds' nests, thus forcing the rightful owners to assume parental duties. It is so sagacious enough to choose the nests of birds smaller than itself, so that its young, when it is hatched, being inevitably the largest of the brood, must necessarily receive the lion's share of the attention of its foster parents. The birds thus afflicted resort to various means to rid themselves of this unwelcome addition to their litter. The most ingenious method is that frequently used by the little fellow wabblers, who will often build a substructure on top of her original nest, thus burying the eggs of the cowbird and often some of her own with it. Nests have frequently been found with two of these substructures in cases where the wabblers have twice been visited by the cowbird.

### George Needed a Barrel.

The old courthouse had been replaced with a new one, though a very creditable sentiment prompted the citizens of Spottsylvania to make it of the same architecture as the old. By a great effort the old county records were preserved and survived the war records, antedating the Revolution by 100 years or more. One, dated 1766, cites that:

"Marye Scott and Clarissa Drury have this day been made to receive forty and sixty lashes, respectively, for stealing the clothes of one George Washington, Gentleman, whilst said George Washington, Gentleman, was in washing in the Rapidan river."

All who in youth sat at the head of the parental table and confronted a steel engraving of the dignified Father of His Country may cry out in protest against sending the decorous Washington home in a barrel, but Spottsylvania county has the records to prove it.

### About the Ice Family.

Whenever a polar expedition is in progress we hear of ice floes, pack ice, sailing ice and other things of which the reader in a temperate climate has only a hazy idea, which makes him miss the interest of the news. An "ice field" is an area of frozen snow or water so large that the limits are invisible and unknown. On the other hand, a "floe" is a mass of ice perhaps very large, but whose boundaries are seen by the explorer. When such floes become broken and the pieces are wedged together by the wind and the currents they form "pack ice" the terror of the arctic voyager. When a ship gets caught in a mass of pack ice there it remains fast until contrary winds or currents break up the pack, and then we have "sailing ice."

### WHEN LONG BREATHS HURT.

You know that troubles exist which need quick attention. Proper action consists in a vigorous rubbing of the chest and side with Nerviline which sinks into the tissues where the pain is seated, and gives relief in a few minutes. No liniment so clean, so strong, so powerful. Results guaranteed with every 25c. bottle of Polson's Nerviline. Get it today.

# RED ROSE TEA

"IS GOOD TEA"

The more particular you are, The better you will like it

The fine quality of Red Rose is most appreciated by those who are the most particular.

Notice the clear, amber color in the cup and the delightful fragrance when poured from the teapot.

Will you try a package to-day? Ask your grocer to send you one!

### Battles Decided by a Single Shot.

There are certainly three instances on record of a siege or battle having been decided by a single shot. The first in order of importance was the shot believed to have been fired by one of his own men which killed Charles XII. in the trenches of the fortress of Friedriehshall, which immediately led to the raising of the second siege of Friedriehshall. This is perhaps the most important musket shot ever fired in the history of the world. Next comes the discharge of the mortar fired by Lord Cochrane during the defense of Port Trinidad in 1808. This shot felled a French surprise and saved the fortress. Lastly, there was the single discharge of grapeshot which saved the fortress and town of Haddington in 1548. The French invaders had actually forced their way into the outworks of the castle when the one well directed shot created such havoc in their densely packed ranks that there ensued an immediate panic, which ended in flight.

### The Advantage of an Accident.

"The small size of the propeller screw," says a noted shipbuilder, "is not due to the perception of any inventor of its greater effect as compared with a larger one, but purely to accident. Many years ago screws for steamers were made as large as possible, it being the theory that the greater the diameter the higher the speed. A vessel was sent to sea with a screw so large that it was deemed best to cast each blade in two parts and then weld them together. During a storm all three blades of the propeller broke at the welding, reducing the diameter by more than two-thirds. To the surprise of the captain the vessel shot forward at a speed such as had never been attained before. Engineers then experimented with small propellers and discovered that they were much more effective than large ones. Had it not been for that accident we might have gone on using large bladed screws to the present day."

### Where Fogs Are Thickest.

"In going from Rome to Paris," said a young man, "I paid extra money to cross the St. Gothard, but that lofty Alpine pass was a disappointment. It was foggy, and I saw nothing of the Alps. Hard luck, eh?"

"Not at all," replied the globe trotter. "Nearly everybody finds the St. Gothard wrapped in fog and mist. The St. Gothard, in fact, is the foggiest place in the world. London has 38 days of fog a year, Munich has 47, Hamburg has 52, Tegernsee, in the Bavarian Alps, has 134. Overtopping all of them comes the St. Gothard, with an annual average of 277 foggy days."

### The Starry Cross.

The first order ever bestowed upon women was the order of the Starry Cross, founded in 1008 by Eleanor, widow of Ferdinand III, of Austria, in thanksgiving for the saving of a portion of the holy cross at a fire in the palace at Vienna. This order, which was confirmed the following year by the pope, is divided into two classes, containing different jewels, and is conferred in recognition of distinguished virtues. It is worn on the left breast attached to a black ribbon.

### How She Knew He Lost.

"I can always tell whether my husband wins or loses at poker," said the woman in a red gown at an afternoon tea the other day.

"I always know when my husband wins," said a woman in pink. "If he wins he makes peace with me by buying a present, but it is only when he wins that I am told of the game at all. On other occasions when he comes in late it is always because of a pressing business engagement."

"My husband lost last night," the woman in red said. "I had been out late myself to a business meeting of the club and was still up when he came in. He frowned upon seeing this house illuminated and said: 'For heaven's sake turn out some of these lights and cut down expenses.'"

### A Strong Man.

Daughter—Wasn't Julius Caesar one of the strongest men that ever lived, pa? Father—What makes you ask that question, my little girl? Daughter—I was just reading that he threw a bridge over the Rhine.

### Related Testimonials.

If the testimonials of love and faith on our tombstones were uttered in our daily life, how often would they have helped us over the briery fields and rocky roads of existence!

## SELECTIONS

### THE HUMAN BODY.

It is a Mass of Tiny Soap Globules Called "Myelins."

Man is made of soap and not of dust, according to a statement recently delivered before the Harvey society at the Academy of Medicine in New York city by Professor J. G. Adams.

Man is not entirely made of soap, of course, but there are scattered through his body an unknown number of tiny globules called "myelins," which are now believed to be a primitive form of true soap. It is the only pure type of soap on earth, and scientists say it may be that man was originally constructed on a self cleansing principle. All he had to do was to exercise his will power—think hard—and set his myriads of soap globules in motion.

The soapy nature of human beings has been discovered by means of the polarizing microscope. Professor Adams gave a history of the curious researches which led up to the great "find." Fifty years ago Virchow stumbled on the presence of myelin globules in nearly every tissue of the body. They were plentiful in the brain. They dissolved in hot alcohol. Strong alkalis caused them to shrink. Virchow thought the myelins were albumens.

It was not until 1893 it was discovered they possessed peculiar refractive power. Finally Professor Lohlein of Karlsruhe made an elaborate study of the globules and showed under the polarizing microscope they had queer cross markings and were in reality "liquid crystals," showing precisely the same markings as soap globules. This was considered sufficient to demonstrate their identity with soap.

The myelins, or soap globules, seem to contain a remarkable substance intermediate between fluids and crystals.—New York World.

### Insincerity.

Be honest with yourself, whatever the temptation. Say nothing to others that you do not think and play no tricks with your own mind. Of all the evil spirits abroad at this hour of the world insincerity is the most dangerous.—J. A. Froude.

### NEW MARKET.

Mr. Arthur Essensa was the guest of Mr. Pat. Feeney last Sunday.

Mr. James and John Chessie of Yoho spent Saturday evening with friends here.

Mr. Alex. Myshrahl was the guest of Mr. Henry Essensa on Sunday last.

Mr. James Chessie who is engaged working for Edward Feeney purchased a fine trotter from Mr. Ellinsworth, we all join in wishing him success.

Mr. William Scott who was visiting friends here has returned to Fredericton.

Mr. Neil McCashion has purchased a quantity of hay from Mr. Hugh Foley.

Mr. William Sky made a flying trip through here one day last week.

Mr. James McDade is engaged hauling potatoes to Fredericton.

Miss Mary E. Feeney of Fredericton is visiting relations in this place.

Mr. James Chessie of Yoho passed through here to-day.

House-cleaning is the order of the day.

Mr. Patrick L. Feeney was the guest of Mr. Dan McDade on Sunday last.

Mr. and Mrs. Ellinsworth of Kingsclear spent Sunday with Neil McCashion.

Mr. Daniel Burgoine has purchased a new horse hoe.

Mrs. David Essensa spent Sunday with her sister Mrs. John Feeney.

Mr. and Mrs. Kennedy of McAdam are visiting relations here.

Tallest High School Student.

Carl Fletcher, standing six feet seven and a half inches in his shoes, a member of the class of '09 of the Seattle High school, will hardly have his claim disputed to being the tallest high school student in the United States. Sophomore Fletcher is but eighteen years old, so that by the time he reaches "man's stature" he should have added at least three more inches to his height. The abnormal development of Carl Fletcher "upward" is not readily ascribed to heritage. Fletcher pere is but five feet five inches, and the school-boy's mother is four inches taller than her husband. All of the members of the family are of normal height, although an elder brother, manager of the L-tona drug store, is six feet two inches. Seattle Times.

### How Old Are Fans?

The Chinese claim to have invented the fan so far back as 2700 B. C. A mandarin's daughter, the story says, improvised the very first from her mask. In the Museum of Bouliak, near Cairo, is still preserved a wooden fan handle of a feather fan of the seventeenth century B. C. The first folding fan is said to have been invented by the Japanese about 750 A. D.

### ANOTHER GREAT DISCOVERY.

A well known gentleman in Black Bay, Ont., Mr. John Cowan, has discovered an absolute specific for rheumatism and writes: "I was afflicted with Sciatica and chronic rheumatism which I contracted years ago. The disease had a great hold in my blood, and it was hard to make any impression on it. Reading of Ferrone I was convinced of its merit and it's certainly the best I have ever tried. Why it just drove away the rheumatism. Even stiffened old sufferers will experience quick results. The reason is that Ferrone acts through the blood and thereby destroys the cause of the disease. Price 50c. per box at all dealers."

### MAILS CLOSING

In effect, October 1, 1906.

6 a.m.—For St. John, etc., St. Stephen and Charlotte Co., Carleton, Victoria and Madawaska Counties, and United States.

7:00 a.m.—Woodstock and Gibson Branch Stations, daily.

WAY MAILS.—East Side St. John River, 7:00 a.m.—For Keswick Ridge, Southampton, etc., Mondays and Thursdays.

West Side St. John River.

7:00 a.m.—For Springfield, Kingsclear, Prince William, etc. Mondays, Wednesdays and Fridays.

6:30 a.m.—St. John River via Steamer.—For Ormoco, Sheffield, Gagetown, etc.

9:15 a.m.—St. John, etc., C. P. Railway stations, East, Nova Scotia and P. E. Island.

10 a.m.—For St. Mary's Ferry, Gibson and Marysville.

WAY MAILS.

2 p.m.—For Nashwaak and St. Mary's Ferry, daily, Nasanworth, New Maryland, Hanwell, Lower St. Marys and Royal Road. Wednesdays and Saturdays.

4:15 p.m.—For Gibson, Marysville, Boiestown, Doaktown, Blackville, etc., Chatham, and I. C. Railway Stations, north and south.

4:45 p.m.—For St. Stephen, W. A. Stead, United States, Montreal, Toronto, Ottawa and North West West Provinces.

8:15 p.m.—For St. John, etc., Nova Scotia and P. E. Island.

4:30 p.m.—British mails via New York, Mondays and Thursdays.

### MAILS RECEIVED.

9:30 a.m.—From St. John, etc., and Nova Scotia.

From Hamtown, Royal Road, etc.

11:00 a.m.—From Nasanworth and New Maryland, Wednesdays and Saturdays.

12:00 noon.—From Montreal, Ottawa, Northwest Provinces, etc., and United States.

1:20 p.m.—From I. C. Railway Stations, North Shore and Quebec, Scotia and P. E. Island.

St. John River via Steamer.

5 p.m.—From Ormoco, Sheffield, Gagetown, etc.

9:05 p.m.—From Woodstock and Gibson Branch Stations, daily.

8:20 p.m.—From Nova Scotia, P. E. Island and St. John.

### WAY MAILS

7:00 p.m.—West Side River, St. John.—From Meductic, and Way Offices, Tuesdays, Thursdays, and Saturdays.

St. John.—From Woodstock and Way Offices, Tuesdays and Fridays.
