A MUSICAL DIRECTOR

FOR MOUNT ALLISON

Dr. Borden has Just Appointed Mr. Harry Horsfall,

A.R.C.M., L.T.C.L., L.R.A.M., of Leeds, England,

Director of Mt. Allison Musical Conservatory

Principal Borden has pleasure in announcing that he has just appointed a Director to the position made vacant by the resignation of Prof. Wilson. The directorship of the large music school where high standards are maintained is a most difficult position to fill. Few eminent musicians are good teachers and the eccentricities of genius often make the musical prodigy an impossible member of a school family.

In Mr. Harry Horsfall, A. R. C. M., L. T. C. L., L. R. A. M., of Leeds, England, is found a man who is expected to meet all the requirements of the position. Mr. Horsfall has been organist and choir master of the Woodhouse Moor Church of

Leeds, England, for the past twelve years. Leeds is, perhaps, outside of London, the most musical city in England, and the fact that Mr. Horsfall has been elected organist of the Great Leeds Nonconformist Musical Festival over the heads of so many able musicians is a rare tribute to his ability.

One of the most eminent musicians of London, who had just heard him play in an examination for a Trinity College diploma, speaks in the highest terms of his rendition of the difficult pianoforte music required.

Percy A. Scholes, A. R. C. M., A. T. C. L., speaks of Mr. Horsfall as a "brilliant and tasteful pianist, accomplished both as a solo performer and an accompanist."

MOTHERS, HERE IT IS!

A friend and comforter, an unceasing aid in every house for the hundred and one ailments that do turn up. Nervine is too valuable to be without. If some thing eaten causes trouble, if it's cramps, indigestion or headache, Nervine cures. For cold on the chest, aching limbs or lame back rub on Nervine and get suopof iaxox of uaxox st suquij ease at once. As a family safeguard Nervine. Get the large 25c. bottle from your dealer.

A kiss on the lips is worth two on the hand.

SHAKE HANDS WITH ASTHMA.

Awfully distressing is asthma. But worse if possible when combined with Bronchitis. Relieved quicker by Catarrhzone than anything else—cured so thoroughly by "Catarrhzone" that it doesn't return. Catarrhzone's healing vapor is breathed right into the lungs, destroying the cause of Asthma and succeeds in the most chronic cases. Try it. Two sizes, 25c. and \$1.00 at all dealers.

Do your part to life the whole race a notch in the scale of humanity—then, your heaven will take care of itself.

A BRILLIANT CAREER

Maritime Province Man Who Made a Good Record in Ontario Educational Life

Toronto Globe.—Sunday night death claimed one of Ontario's most prominent educationists, as well as a brilliant Canadian scholar, in the person of Dr. James Alexander McLellan, whose last active participation in life's duties consisted of the Principalship of the Ontario Normal College, Hamilton. The death occurred at 10.30 o'clock at the family residence, 83 Macpherson Ave. nue, and the end was not unexpected. For two or three years he had been in poor health, but until recently his condition had not assumed a critical stage, when he was under the care of Dr. Robert T. Noble.

BORN IN NOVA SCOTIA

The late Dr. McLellan was born in Shubenacadie, Nova Scotia, in 1832. He was of English, Scotch and Irish ancestry, while some of his forebears were in the Imperial army and were United Empire Loyalists. Early in life he became fervent in the cause of education and taught his first school when but fifteen years of age. In 1857 he moved to Toronto, where he attended the Provincial Normal School. The following year found him on the teaching staff of the Central School in St. Mary's, and at the opening of the grammar school in the same place in 1860 he joined the teaching staff there. Afterwards he entered the University of Toronto, where he obtained his degree, capturing the medal in mathematics and metaphysics in 1862. He was successful in writing his M.A. degree in 1863. However, his alma mater again chose to honor him in 1872 with an LL.B., and in 1873 with an LL.D.

On the opening of Yarmouth Seminary in 1864 he became its head, and there he took his first active part in politics. So enthusiastic was the late Dr. McLellan in the cause of confederation that he received the special thanks of the then Prime Minister, Sir John Macdonald. Two years after the confederation of the Provinces was consummated he again returned to Toronto to become a mathematical master in the Upper Canada College. However, his abilities found him wider scope in the advancement of the then infant educational system of Ontario, with the result that in 1871 he was appointed High School Inspector for the Province, and at the same time a member of the first Central Committee on Education. Following this were other appointments, notably, Director of Normal Schools for Ontario, 1875; Director of Teachers' Institutes, 1885, and in 1890 head of the School of Pedagogy, now the Ontario Normal College for the professional training of first-class public school teachers and high school assistants. In 1896 he removed to Hamilton, where the last Ontario Normal College was built. Besides being the principal of the college he was professor of psychology and history of education. He was elected a director of the Dominion Educational Association in 1895 and had also been President of the Ontario Educational Association.

THORNS IN THE FLESH.

Try a 50c. box. Sold everywhere. Even worse is the agony of corns. Why suffer—there is waiting in every drug store in the form of Putnam's Corn Extractor which relieves at once, cures thoroughly and without pain. For good results use only "Putnam's."

Our option on this small block of Underwriters' Stock expires August 6, 1907. Subscriptions post-marked at later date will be returned.

Do you realize that investments of a hundred or a thousand will grow rapidly into hundreds and thousands and millions of dollars? The over-conservative and skeptical wildsmile—they will laugh at these predictions, some will even consider this a joke—but remember COBALT, if you please, two or three years ago? Then it was a "vision," it was a "dream," "a flash in the pan," "a bubble," somebody was "crazy," but now it is different. Those crazy men are now classed among the smartest and keenest business men of the day. The actual value of a few mines are worth at the present date more than one hundred millions of dollars. These are facts.

In presenting this investment for subscription we appeal to the good judgment of sensible persons as to its merit.

It embodies, we believe, a correct method for developing and establishing successful and paying mining enterprises.

We desire first of all, to conduct a successful mine development. We intend this to be done in a way that will be absolutely fair and honest, and bring the largest profit possible to those who co-operate with us.

We therefore desire this proposition to be well understood by investors. We wish it to be known just how we propose to develop, establish and operate dividend paying mining companies by and through this investment.

THE PLAN—The plan involved in this proposition is that of uniting or consolidating the investments of a limited number of persons into one sum, and under one management, to be used in acquiring and developing mining properties in this wonderful region.

THE PRINCIPLE involved in this investment, we believe, is one of absolute fairness to all interested. The "promotion interest," common to all mining companies, and which is the great unfair feature to investors who put their money into stocks of these companies and whose money develops and makes the mine, if a mine is developed—does not exist in this proposition. There is no "promotion interest" There is no "promotion interest" bought and paid for by the investors.

In this proposition the investors and all the investors become promoters. They take the "promotion interest" and all the interest. They own the whole enterprise. No matter how large or small the investment—all stand on an equal basis. Our field of operation is probably one of the greatest and without doubt the richest mineralized region in the world.

For its basis, upon which we will establish and build up several great producing, paying mining companies, we will exploit and develop in a mining like and careful manner extensive

mining properties now known to us, and other properties which we may acquire for the mutual benefit of all investors in the company.

SUBSIDIARY COMPANIES.—The Larder Lake Exploration and Development Company will incorporate a series, not to exceed five, of subsidiary mining companies upon only the real proven properties acquired.

In each and every subsidiary company incorporated, whether mining, milling, smelting, water power or electric light, the Exploration Company will take over 90 per cent. of the capital stock of each company so incorporated, and will put 10 per cent. of the capital stock of each company in its treasury. It will probably never become necessary to sell any of this treasury stock.

Out of the total capital stock of each subsidiary company, the Exploration Company will retain 50 per cent. as its "Holding Stock." This will always control the company. It will take and hold 40 per cent. for the mutual benefit of all stockholders in the Exploration Company. This 40 per cent. will be known as the "Selling Stock" and as a market is created, it will be sold, and the proceeds received will be distributed pro rata to the stockholders in the Exploration Company, as their interests may appear.

The stock of the subsidiary companies will be listed on the New York Curb and Mining Exchanges of the country and started at 50 cents a share, where it can be bought and sold according to the daily market quotations. This will afford a channel by which stockholders can sell the 40 per cent. "Selling Stock" from time to time, if they wish.

PROPERTIES.—Many different mining properties will be acquired and developed as stock in the Exploration Company is subscribed for. All properties will be described, and reports submitted regarding same, as soon and as often as they can be examined by the engineers.

The mining properties which will be acquired for this proposition will be

located in the gold and silver belt, extending from the Montreal River through Northern Ontario, eastward into Quebec, and will include properties in the Lady Evelyn District, the new Montreal River Silver District, Cobalt District, and the gold districts around Round Lake, Larder Lake, Lake Abitibi, and in the great undeveloped mineralized section of Quebec lying just east of Larder Lake and extending northward to Lake Abitibi.

We shall try and make every dollar count, and make as few mistakes as possible. We hope to create such an interest in this enterprise with investors that will result in extensive and widespread co-operation.

Under this plan no one can truthfully say that it is not a great mining investment. We want every investor to feel a personal interest in this mine development. The investors in this company will own this enterprise, and we want them to co-operate with us and our associates to make it a great success.

We are now organizing THE LARDER LAKE EXPLORATION AND DEVELOPMENT COMPANY, with what we consider sufficient capital (\$500,000). We now have options on and separate properties which will be incorporated at \$100,000 each (100,000 shares—par value \$1.00). The Exploration Company will at all times hold a controlling interest in each of these companies, so that sixty per cent. of the dividends earned and declared will be paid into the treasury of the parent company, and the other forty per cent. distributed among the stockholders on record. This, in our opinion, will enable us to pay dividends and large ones in the very near future.

The board of directors in The Larder Lake Exploration and Development Company will be composed only of engineers of national repute, setting a precedent in this line—Mr. Robert Morton will be president, which fact in itself guarantees conservative and able management.

Investors have been pouring their

money into over-capitalized mining companies, they have been plunging about wildly in the hope of some day "striking it rich" never stopping to think for an instant that the greater part of their money never reaches the ground, as a rule, seventy-five per cent. of the money invested in stock schemes goes into the broker's hands. He pays his salesmen 20 to 50 per cent. on every dollar turned in, he must get his own commission, and engineers must be paid.

We never have had associated with us a stock salesman, we require no commission, and our engineers will be our directors, so that every dollar invested with us on this proposition will be honestly used in the purchasing and development of the different properties.

We are now offering for subscription the first allotment of stock in The Larder Lake Exploration and Development Company—every one hundred shares entitles the holder to forty shares of stock in each of the subsidiary companies to be incorporated, making in all 200 shares of stock in five different companies, which, as soon as development work is started and dividends announced, will make the stock of the Larder Lake Exploration and Development Company almost invaluable. This first allotment of only 50,000 shares (\$1.00 par value) will probably be largely over-subscribed in a few days.

The next allotment will be put out September, 25th, 1907, at 75 cents per share or higher.

This price (\$1.50) will positively be withdrawn August 6, 1907. If this allotment is over-subscribed remittances will be promptly returned. Checks, drafts and money orders must accompany all applications and be made payable to the financial agents.

Interim certificates will be promptly returned to subscribers. The stock certificates of the company representing the shares purchased will be issued and delivered as soon as allotment can be made, after the 6th of August, to all subscribers who purchase at the first underwriting price prior to that date.

Are you going to get in now, in time, at Larder Lake; you can now get in at the ground floor prices on inside properties, making big profits and lots of money; or will you wait three or four months or a year, and then fall all over yourself in an irresistible desire to get in anywhere or at any price?
