weak and sickly.

His arms were soft and flabby.
He didn't have a strong muscle in his
entire body.

The physician who had attended
his family for thirty years prescribed
Scott's Emulsion.

NOW:

To feel that boy's arm you
would think he was apprenticed to a
blacksmith.

ALL DRUGGISTS: 50c. AND \$1.00.

ACLAND TO LABOR BUREAU.
Newspaper Man Becomes Secretary
of the Department at Ottawa.

Ottawa, Feb. 27.—Mr. F. A. Acland, Western Editorial Representative of The Toronto Globe, has been appointed Secretary of the Labor Department. The position is a new one in connection with the department and Mr. Acland will act practically as assistant to the deputy minister. The work of the department is rapidly growing in scope and usefulness, and both the minister of Labor and Mr. King express satisfaction at having been able to secure the services of an assistant of Mr. Acland's ability and wide experience as a journalist in close touch with national industrial problems.

Mr. Acland, whose appointment as Secretary of Labor, removes him from the ranks of journalism, is one of the best known and most generally respected of Canadian newspaper men. Of English birth and training, he came to Canada when quite a young man and joined the staff of the Globe. A desire to see something of newspaper methods in the United States led him to Chicago, where he served under Mr. Lawson of the Daily News, and to a number of southern

cities. From New Orleans in 1887 he returned to The Globe, and from that time until 1901 he held the position first of city editor and afterwards of news editor. Dozens of the most influential journalists of the country received their training at Mr. Acland's hands during this period. Moderation of statement, unflinching courage and tireless energy were his characteristics then as now. In 1902 Mr. Acland joined the staff of the Booklovers' Library and shortly afterwards went to London, Eng., as literary adviser. He contributed many important articles to the Booklovers' Magazine. Returning to Canada in 1904, Mr. Acland assumed the editorship of The Globe Saturday Magazine, and last fall he went west as the paper's editorial representative with headquarters in Winnipeg.

Bed-ridden 15 years.—"If anybody wants a written guarantee from me personally as to my wonderful cure from rheumatism by South American Rheumatic Cure I will be the gladdest woman in the world to give it," says Mrs. John Beaumont of Elora. "I had despaired of recovery up to the time of taking this wonderful remedy. It cured completely." Sold at Central Pharmacy, A. J. Ryan—58.

HOUSEHOLD HINTS.

Some Interesting Information for Busy Housewives.

CREAMY OMELETTE.

Two eggs, two tablespoonsful milk, and salt and pepper to season. Beat the eggs slightly, add the milk and seasoning, have the pan hot, butter well and pour the mixture into it; as the omelette cooks on the bottom raise it with a knife, and let the uncooked mass run underneath; when the egg is set, fold the omelette over, slip on a hot platter and serve at once. Less expensive than the poultry omelette and takes less eggs.

ESCALLOPED LOBSTERRE

Make a drawn butter gravy very rich, using cracker instead of flour and cream instead of water. After it has boiled, mix it with the lobster, first chopping the lobster very fine and mixing it with vinegar, salt, pepper and a spice of mace. To one lobster, four pounded crackers, one-half cup cream, one cup butter; after thoroughly blending all the ingredients, place in smoothly in a nappy and bake a light brown.

CREAM SALMON.

Take the contents of a pint can of salmon, remove all bits of skin and bone, drain off the fluid, mince the fish fine. For a white sauce, boil a pint of milk, thicken with two tablespoonsful of corn starch and a tablespoonful of butter, with salt and pepper to suit. Prepare one pint of finely powdered bread crumbs, or crackers. Put a thin layer of crumbs in the bottom of a pudding dish, a layer of fish, then one of sauce, repeat, ending with the crumbs. Bake brown.

ORANGE SNOW.

Scant half-box gelatine, let it stand twenty minutes in cold water enough to cover it, drain off, then add one pint boiling water, whites of two eggs, juice of two oranges, one cup sugar; beat thoroughly until it becomes a solid foam, set on ice to harden.

SAUCE FOR ORANGE SNOW.

One pint boiling milk, thicken with one tablespoonful corn starch, yolks of the two eggs, one half cup sugar; when cool add one teaspoon Beach & Clark's true orange extract; to serve, pour the sauce in a dish and drop the snow on the top.

MACARONI WITH PARMESAN CHEESE.

No. 1. Break the macaroni in pieces three or four inches long. Boil in salt water fifteen or twenty minutes, then put them for about ten minutes in cold water, then drain them through a colander. Put a piece of butter in the frying pan and let them in, let them get hot and turn over once. When they are served sprinkle with parmesan cheese grated.

No. 2. After they have been mixed with the butter, let them cool off; make a butter gravy with cream and the yolks of three or four eggs, but-ter a chine dish, pour some of the gravy in, then a layer of macaroni, and repeat this with two more layers; cover with grated parmesan cheese, and pour a little hot butter over it; put for ten or fifteen minutes in the oven. Serve in the same dish.

Macaroni With Ham.—No. 3. Cut one pound boiled ham very fine, mix the yolks of three eggs with one pint of cream, put ham and macaroni that were prepared as before in it. Butter a pudding dish, lay some macaroni in it, crosswise, like a green then pour all in and bake in the oven thirty or forty minutes. When ready, turn over on a flat dish.

PEACH CUSTARD PIE.

Use one crust; peel peaches and have them all peeled, the hollow side upward, sweeten as you would a peach pie; take one egg, a pinch of salt, one tablespoon sugar; beat; add milk enough to cover peaches; bake. Eat when partly cool. Canned peaches will answer as well as fresh.

PEACH TAPIOCA.

Soak some tapioca over night and in the morning boil until it is perfectly clear, adding more water from time to time as needed; slice five peaches with a silver knife and sprinkle liberally with sugar; when you take the tapioca from the stove,

stir the peaches into it. Eat cold with sugar and cream.

EGGS AS FOOD.

The Herald of Health asks:—"Would it not be wise to substitute more eggs for meat in our daily diet? About one-third of an egg is solid nutriment. This is more than can be said of meat. There are no bones, no tough pieces that have to be laid aside. A good egg is made up of 10 parts shell, 60 parts white and 30 parts yolk. The white of an egg contains 66 per cent. water and the yolk 52 per cent. Practically an egg is animal food, and yet there is none of the disagreeable work of the butcher necessary to obtain it. The vegetarians of England use eggs freely; and many of these men are 80 and 90 years old, and have been remarkably free from sickness. Eggs are best when cooked four minutes; this takes away the animal taste, which is offensive to some, but does not harden the white, and the yolk so as to make them difficult to digest. An egg if cooked very hard is difficult of digestion, except by those persons possessed of stout stomachs; such eggs should be eaten with bread and masticated very finely. An egg spread on toast is fit for a king—if kings deserve better food than anybody else, which is doubtful. Fried eggs are much less wholesome than boiled ones. An egg dropped into hot water is not only a clean and handsome but a delicious morsel. Most people spoil the taste of their eggs by adding pepper and salt. A little sweet butter is the best dressing. Eggs contain much phosphorus, which is supposed to be beneficial to those who use their brains much."

A Premium on Sickness.—"Shame upon the civilization that puts a premium upon sickness," says Dr. Sergeant, and compels the physician to sit in his office and wait serenely for the onslaught of disease, which a little timely advice from him could have obviated. The highest province of the physician is to improve the hygiene of the people, to improve the sanitary conditions of the community, and to prevent disease wherever and whenever it is possible. In order the better to discharge his humane office, he should frequently be invited to examine the children and their surroundings. He should be familiar enough with health to know it when he sees it. He should be educated to deal with physiological problems before they become pathological.

His work should be supplemented by the intelligent co-operation of the co-operation of the present. They should know something of the lives of their ancestors, their mental and physical characteristics, their nationality, occupation, and the healthfulness of the town or city in which they were born. Parents should note the same facts with regard to their own lives, keeping a history of their accidents, diseases and mental and physical conditions before and after marriage. The same information and more should be recorded respecting the lives of the children. The weight should be taken at birth, and the head, body and limbs carefully measured.

The process should be repeated once a year at least throughout the whole period of growth and development. The various stages of dentition should be noted, the age at which the child begins to walk, the resemblance to father and mother and the dawning of hereditary traits.

After three or four years, the relative proportion of the different parts of the body should be determined, and the annual rate of increase in height, weight, chest, girth, etc., should be carefully ascertained and recorded. A history of the children's diseases should be kept, and the peculiar tastes and idiosyncrasies that accompany them.

The first appearance of morbid tendencies, of nervousness and malformations should be noted, and efforts made to correct them. In early life a child should be taught to respect his body, to pride himself upon the purity of his skin, the firmness of his muscles and the uprightness of his figure.

BURIED IN A TOMB OF GOLD.

Recently Discovered Mummy Demonstrates Gorgeous Methods of Early Egyptian Customs.

Mr. Theodore M. Davis has discovered at Thebes the tomb of Queen Teie, one of the greatest names in the history of Ancient Egypt. She was, says the "Times," the mother and inspirer of the famous Amenhotep IV., the "heretic king," of the eighteenth dynasty, who broke with the religious traditions of Egypt and endeavored to introduce a pantheistic monotheism, the visible symbol of which was the solar disc. The worship of Amon, the god of his fathers, was proscribed and for the first time in history there was a persecution for religion's sake. The old religion of Egypt triumphed in the end, and the tomb of Teie bears witness to the blind rage of the victorious priesthood of Thebes and the intensity of their hatred towards the "heretic king."

The doorway of the piled stones, which was sealed with the royal seal, was partially broken through, the wooden doors were wrenched from their hinges, the great catafalque which stood before the coffin was torn to pieces, and the mummy itself turned over in order to erase the name of the "heretic king," inscribed on the sheet of gold which lay beneath it. Wherever the name of the heretic was found, it was carefully destroyed, and the figure of the king adorning the solar disc, which had been engraved on one of the gold plates of the catafalque, was chiselled out. The men, however, who thus violated the tomb, were no common robbers. The havoc they wrought was the result of the religious zeal, and save for these desecrations, the tomb remains as it was left by the priests amid the throes of a religious

revolution which had spent its force before Moses was born. Wherever the excavators walked they trod upon fragments of gold plate and gold leaf.

The coffin, when it was discovered, lay on a tier encrusted with gold, and supported on four lion's claws, also of gold.

The woodwork of the bier has been converted into touchwood by the action of the air. The coffin, however, is intact, and a superb example of the jeweller's work. The wood of which it is composed is entirely covered with a frame of gold inlaid with lapis lazuli, cornelian and green glass. The inlay represents for the most part a pattern of scales, but down the middle runs an inscription, from which we learn that the coffin was "made for the Teie" by her son.

The mummy itself was wrapped from head to foot in sheets of gold. There were bracelets on the arms, and a necklace of gold beads and ornaments of gold inlaid with precious stones around the neck, while the head was still encircled by a priceless object—the Imperial crown of the Queens of ancient Egypt.

This crown is at once simple and exquisitely fashioned, and represents the royal vulture holding a signet ring in either talon, while its wings surround the head and are fastened at the tips behind by a pin. The whole is of solid gold, without inlay or other adventitious ornament.

An idea of the personal appearance of Queen Teie is gained from the four portrait heads which replace the heads of the geni of the dead of Egyptian orthodoxy as the covers of the four canopic jars.

These heads are done in Egyptian alabaster, with the eyeballs and eyebrows represented by inlays of lapis lazuli and obsidian. The face is that of a woman at once masterful and engaging; but apart from the lips, there is little that is Egyptian about it, and the delicate sub-auricular curve of the nose is European rather than African.

Many articles of artistic interest were found on the tomb.

A SUGGESTION OF RARE VALUE.

A diseases condition of the surfaces of the air passages causes bad breath but more commonly emanates from the blood. Thousands of cases prove indigestion or an impure condition of that Dr. Hamilton's Pills through their specific action on the secretory and eliminative organs, not only cure bad breath, but so thoroughly purify the system that anything suggestive of blood or digestive troubles is impossible. Through Dr. Hamilton's Pills the skin grows rosy and clear, activity of the body and mind increases, and bounding health is established, sold everywhere in 25c. boxes. GROWING OLD BEFORE YOUR

CHILDREN CHAINED IN A COLD ROOM.

Four Little Tots Were Found in a Fireless Room in Toronto.

Four children were found by the police recently at Toronto chained together in a room on York street and left without even fire to keep them warm. It seems a man by the name of Ferris, hailing from Pennsylvania, arrived in the Union Station Thursday night with the four children, whose ages ranged from twenty-three months to seven years.

He asked for shelter from the Children's Aid Society, but on learning that he would have to be separated from his progeny, he rented a small room unheated and very bare on the corner of York and Richmond streets. The next day he sallied forth to find work, and in his absence P. C. Ross found all four children chained together in the cheerless room. A dog chain had been used by the father to keep the children together, while he was away from home.

OVERTAKEN BY NAUSEA.

You don't know whether it's going to stay down or come up. You feel like thirty cents and look even worse. If one thing is quicker than another it's "Nerviline." Ten drops in sweetened water gives relief instantly. Almost like magic is the change you experience. The cause of the nausea is removed, every symptom of vomiting and indigestion is cured within ten minutes. When Polson's Nerviline is so trustworthy and economical a bottle at home wouldn't be amiss. Large ones for a quarter at all dealers.

A large delegation from the Ontario branch of the Dominion Alliance waited upon Premier Whitney and Provincial Secretary Hanna to press their views regarding the three-fifths clause in the liquor act. Premier Whitney said the clause would not be changed this year.

George, she said, before we were married you were always giving me presents. Why don't you bring me something now?

My dear, said George, did you ever hear of a fisherman giving bait to a fish that he had caught?

Then the kettle boiled over.

ALMOST DEAD OF BRONCHITIS.

Few people have suffered more than Jno. P. Taylor of Dymont, P. Q., Ont. Today he is well and writes:—"I must tell you how much Catarrh-ozone has been to me. I was so bad with bronchitis sometimes I thought it would soon be over with me. A spell of choking would come on that left me prostrated and weak. Since using Catarrh-ozone I have had no trouble at all. It strengthened my throat, stopped the cough, gave me free breathing and entirely cured." Just the usual experience. Catarrh-ozone invariably cures whether Bronchitis, Asthma or Catarrh. Two sizes, 25c. and \$1.00 at all dealers.
