Some Interesting Information for Busy Housewives.

NEEDLEWORK NOTES.

Put a small bag of talcum powder in a box with a cover and keep it in the work box to rub on the fingers when they perspire.

When making a waist run a thread around the neck until the collar or binding can be put on. Your garment will fit better and not be stretched out of shape.

In many of the new jumper suits the lower portion of the skirt at each seam is open and strapped with pointed bands exactly matching the jumper waist bands. The style is very good indeed. The bands must be made in graduated lengths, appearing in pyramid shape upon the skirt.

In making a dainty cushion, if you will select a pretty pattern of dotted white swiss and work it over little bows of silk, the effect will be pretty. Lavender bows are pretty and the remaining dots are covered with lavender silk or outlined in rings.

Use white swiss for the ruffle, running through the lace insertion. For a cushion cover select scrim of a deep crimson color and outline on the cover large, shaggy chrysanthemums with roration braid. After the designs are outlined take silk of different shades and overlap the skeleton frame of the flowers. This produces large flowers in natural colors. This braid is splendidly adapted for this purpose and may be made without the silk coloring.

A little cushion of violet tints was made by sewing a half sphere-shaped cushion of lavender to a green-felt mat, which was notched around the edge. However, this mat was only a foundation, for large velvet pansies were pressed perfectly smooth and half of each flower rested upon the satin cushion, while the lower half, stems and leaves, covered the green mat. Everything was decidedly flat, but the flower effect was dainty and pretty. It is a simple little style which any girl could make by using any kind of flowers which were large and flat, looking like pansies. Daisies in single petal style would be neat, and how nicely they would combine with a yellow-satin cushion?

THE ORDERLY GIRL.

Ribbons, even black ones, can be washed in ordinary soap and water. Put on a flat surface and scrub with a small nailbrush, so as not to wrin-

kle. Stretch the ends out and rinse by passing under the cold water faucet. Dry by smoothing lengthwise between folds of a towel until very little dampness remains, then hang smoothly over the back of a chair. Moisture betwixt can be made like new in the same way. The first bit of soil on skirts or waists should be watched. The easiest treatment is to cover the spot thickly with French chalk and put the garment in a dark place. Brush carefully before wearing.

Then the practical girl will always keep her underclothing in order. The ribbons will be run in as soon as the wash comes up. An easy way to do this is to sew one of the ribbons to a piece of tape just the width of the heading. Run the tape through, pull it, and the ribbon will follow, keeping flat as it comes. When the wash comes up is also the time to mend small tears and darn the first hole or slipped thread in the stocking. It is well, if possible, to have one special time for this prosaic but necessary repairing which is so essential to being well groomed.

Spots should be carefully washed off. A dark cloth should be kept for this purpose in the bathroom. Soap and water will do for ordinary spots; grease, however, requires gasoline or ether, and should be pressed into brown paper.

VARIETIES.

Large buckles, curious in form, come in the front of deep waistbelts. Lace draperies forming sleeves are attached to cloth gowns that have no other lace trimmings.

Braids, put on herring-bone fashion, cover the bodice part of short saque coats. The front panel that starts from the shoulder of the princess gown is usually richly ornamented.

Delightful striped flannels of the finest weaves are made up for smart morning blouses. Trimmed and fancy short jackets are taking the place of the long plain ones so becoming to many figures.

Stained velvets trim skirts in bands as well as decorate bolero and furish deep waistbelts.

Little ribbons of satin run in and out among laces and nets made up into blouse and chemisettes.

GREATEST JUDGMENT.

London Court Awards Woman Over Four Millions.

London, July 17.—An unprecedented judgment for £887,000, or \$4,135,000, has just been given by a London law court in favor of Senora Concepcion Benitez de Beistegui, a Spanish lady, against Frank Lacroix Gardner, the Australian gold-mining millionaire. The action was brought to cause money loaned to be repaid.

According to the charge, the lady loaned the money between 1895 and 1903. It was advanced in the form of cash securities, and through the lady's secretary, Mr. Soberano, who is charged with conspiring with Mr. Gardner to defraud her. Of this money the lady, through her counsel, asserted that she had never received a cent.

The reason the action was brought in London rather than in Paris was on account of the French law, which would have compelled the prosecution to pay \$123,000 to the French government. Senora de Beistegui is an active little lady of snow white hair, unwrinkled face, and acknowledging seventy years of age.

Uraemia Follows Kidney Disease.

Dreadful perils lurk in kidney weakness.

Insidiously it develops into Bright's Disease and Uraemia, poisoning the system. Every bit of work I did made me weak and worn. I couldn't stoop or lift without getting dizzy. My tongue was furred and my appetite poor. My head ached continually, and I had severe urinary disorders. My kidneys were in the worst possible state. I heard of the wonderful Dr. Hamilton's Pills, and proved them. Just the medicine I needed. Why, I felt better in a week, and after using these pills for a month or two at regular intervals, I was completely restored.

Dr. Hamilton's Pills give complete relief because they act directly on the diseased tissues of the kidneys. Get the genuine in yellow boxes, 25c per box, or five boxes for \$1.00 at all dealers. Refuse a substitute.

Proof is abundant, and here is quoted, the experience of Mrs. Patrick McDonald of 135 Kent street, Ottawa.

"My back ached from morning till night. Every bit of work I did made me weak and worn. I couldn't stoop or lift without getting dizzy. My tongue was furred and my appetite poor. My head ached continually, and I had severe urinary disorders. My kidneys were in the worst possible state. I heard of the wonderful Dr. Hamilton's Pills, and proved them. Just the medicine I needed. Why, I felt better in a week, and after using these pills for a month or two at regular intervals, I was completely restored."

SLIT THE MAN'S TONGUE.

Buffalo, July 17.—Because he would not deliver to two burglars the keys to his employer's house, Frank Smith, 45 years old, a coachman in the employ of John Gehm, a wholesale meat dealer, was horribly tortured Sunday morning, and left for dead by his assailants. Smith slept in a room above the barn at the rear of Gehm's house. He was awakened shortly after midnight by two masked men, who demanded the keys of the house. Smith refused to give them up, and the burglars then began a series of revolting tortures. Smith's tongue was slit with a knife, and the soles of his feet were slashed in a score of places until he became unconscious. The men then threw Smith down the stairs, where he was found next morning. The matter was kept a secret by the police until today, when an arrest was made. The prisoner gives his name as Taylor.

For Tired Feet.

Bathe the feet in cold water if possible. If cold water is unpleasant use warm, and plenty of plain unscented soap. Put three drops of carbolic acid in the water. Dry thoroughly with a soft towel, and then sponge off with equal parts of water and alcohol.

Wheeled Carriages.

The first wheeled carriages were used in France in 1559.

Salt in the Sea.

If a box six feet deep was filled with sea water, which was then allowed to evaporate, there would be two inches of salt left in the bottom of the box. Taking the average depth of the ocean to be three miles, there would be a layer of salt 440 feet thick covering the bottom in case all the water should evaporate.

The Sun and Moon.

Harris in his book "Hermes" says that all the nations of the earth, ancient and modern, have ascribed to the sun a masculine and to the moon a feminine gender.

Phonographic Watches.

The first phonographic watch was made in Paris in 1897. It was large and heavy, but was regarded as a great curiosity nevertheless. Now, however, watches that speak the hours in place of chiming them are not at all uncommon.

YOUR WISEST COURSE.

JUST WHERE THE DANGER LIES.

In many catarrh snuffs, cocaine is the largely used ingredient; in consequence the drug habit may be formed. To be really cured of catarrh, to do so quickly, safely and pleasantly, doctors say Catarrhazone is superior to any other remedy. It heals sore places, stops discharge, prevents hawking, spitting and bad breath—does this by first destroying the cause of the disease. Catarrhazone is no experiment, it is a tried and proven cure that is guaranteed for bronchial, throat, nose and lung catarrh. Two sizes, 25c. and \$1.00 at all dealers.

What Do They Cure?

The above question is often asked concerning Dr. Pierce's two leading medicines, "Golden Medical Discovery" and "Favorite Prescription."

The answer is that "Golden Medical Discovery" is a most potent alterative or blood-purifier, and tonic or invigorator and acts especially favorably in a curative way upon all the mucous lining surfaces, as of the nasal passages, throat, bronchial tubes, stomach, bowels and bladder—curing a large per cent. of catarrhal cases whether the disease affects the nasal passages, the throat, larynx, bronchia, stomach (as catarrhal dyspepsia), bowels (as mucous colitis), bladder, uterus or other pelvic organs. Even in the chronic or ulcerative stages of these affections it is often successful in effecting cures.

"The Favorite Prescription" is advised for the cure of one class of diseases—those peculiar weaknesses, derangements and irregularities incident to women only. It is a powerful yet gently acting invigorating tonic and nerve. For weak worn-out, over-worked women—no matter what has caused the breakdown, "Favorite Prescription" will be found most effective in building up the strength, regulating the womanly functions, subduing pain and bringing about a healthy, vigorous condition of the whole system.

A book of particulars wraps each bottle giving the formulae of both medicines and quoting what scores of eminent medical authors, whose works are consulted by physicians of all the schools of practice as guides in prescribing, say of each ingredient entering into these medicines. The words of praise bestowed on the several ingredients entering into "Doctor Pierce's medicines by such writers should have more weight than any amount of non-professional testimonials, because such men are writing for the guidance of their medical brethren and know whereof they speak.

Both medicines are non-alcoholic, non-secret, and contain no harmful habit-forming drugs, being composed of glyceric extracts of the roots of native American medicinal forest plants. They are both sold by dealers in medicine. You can't afford to accept a substitute for one of these medicines of known composition, any secret nostrum.

Dr. Pierce's Peppets, small, sugar-coated, easy to take as candy, regulate and invigorate stomach, liver and bowels.

SKILL OF THE ANCIENTS.

The Old Timers Apparently Did Many Things Better Than We.

"We are losing all our secrets in this shabby age," an architect said. "If we keep on, the time will come when we'll be able to do nothing well."

"Take, for instance, steel. We claim to make good steel, yet the blades the Saracens turned out hundreds of years ago would cut one of our own blades in two like butter."

"Take ink. Our modern ink fades in five or ten years to rust color, yet the ink of mediaeval manuscripts is as black and bright today as it was 700 years ago."

"Take dyes. The beautiful blues and reds and greens of antique oriental rugs have all been lost, while in Egyptian tombs we find fabrics dyed thousands of years ago that remain today brighter and purer in hue than any of our modern fabrics."

"Take my specialty, buildings. We can't build as the ancients did. The secret of their mortar and cement is lost to us. Their mortar and cement were actually harder and more durable than the stones they bound together, whereas ours—horror!"

The Koran consists of 114 suras, or chapters. Each chapter begins, "In the name of the most merciful God."

The Number Three.

Three, which since the days of Pythagoras has been the divine number, is not invariably fortunate, for, though the fates are three, so also are the furies. The graces are three, but so also are the judges in hades and the heads of Cerberus. Then there are the records of three disloyal tribes in Welsh history; there are the three robbers in Orion's belt; there were the three tyrants at Athens, and 3 in mythology is as unlucky as it is di-
