GREAT WAR TEST

Home Fleet Mobilises in an Hour—160 Ships Assemble

The mobilisation of the home fleet was carried out on Monday, July 29, with great smartness and complete success. At Portsmouth, within an hour of the signal to mobilize being made all the men were on board the ships and the crews had been brought up to war strength.

The various detachments mustered in separate groups on the parade ground, whence they marched to the dockyard jetties, alongside which the ships were lying. Each man carried his hammock on board and stowed it in the appointed place. Then, in a marvellously short time, the additional stores were shipped.

The naval authorities hold that the performance was nothing out of the common, but was merely a demonstration of what they can do at short notice, whenever they wish to bring the nucleus crews of the home fleet up to full strength.

The home fleet has three main divisions stationed at the Nore, Portsmouth and Devonport. The Nore division, consisting of six battleships, six armored cruisers, six protected cruisers, and scouts, and forty-eight de-

stroyers, is at all times fully manned, and can proceed to sea on receipt of order. The Devonport and Portsmouth divisions carry nucleus crews—that is to say, the skilled ratings needed to work and right the vessels are on board the ships, and only a certain number of officers, seamen and stokers have to be moved to them from the depots when the order to mobilise is given.

The fleet which is now mobilized consists of eleven battleships, eleven armored cruisers, thirteen protected cruisers, four scouts, and about one hundred torpedo gunboats, destroyers, and torpedo boats, with a large flotilla of torpedo boats under the orders of Vice-Admiral F. C. B. Bridgeman. The Dreadnought is the flagship.

After manoeuvres in the Channel the fleet will proceed to the Solent for review by the King

The Standard Oil Company has been ordered to pay a fine of \$29,240,000 for accepting rebates from railways. Whew! What will be the amount of the next rise in kerosene?

A BOY'S ENTERPRISE

(Chicago Inter-Ocean.)

The late W. B. Proctor, the well known soap millionaire, imputed part of his success to his soap popularity among children.

Mr. Proctor claims that habits of scrupulous cleanliness could be formed in children if, at first, they were paid to bathe. He had at the tip of his tongue a number of amusing anecdotes about the extraordinarily mercenary character of the small boy.

One of these anecdotes concerned a little chap who came to his mother one day for a nickel.

"Oh," said the lady, "be industrious and earn your own money. I am tired of always giving to you."

The youngster departed in thoughtful silence. Thereafter for some time he did not make a single demand for cash. His pleased mother discovered the reason for this obedience late one afternoon, when, in a secluded part of the garden, she found her little son standing in the centre of an appreciative crowd of urchins.

Directly behind him, quite neatly printed on cardboard, and tacked to the arbor, was this announcement:

WILLIE JONES WILL EAT.

1 small worm for ... 1 cent
1 large worm for ... 2 cents
1 butterfly for ... 2 cents

1 caterpillar for ... 3 cents
1 hop toad for ... 5 cents
And the boy, his mother plainly saw, was doing a tremendous business.

DEAFNESS CANNOT BE CURED

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. Nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free.

15c

First Allotment of 50,000 Shares at Fifteen Cents per Share

15c

Our option on this small block of Underwriters' Stock expires August 6, 1907. Subscriptions post-marked at later date will be returned. Do you realize that investments of a hundred or a thousand will grow rapidly into hundreds and thousands and millions of dollars? The over-conservative and skeptical whimsy—they will laugh at these predictions, some will even consider this a joke—but remember COBALT, if you please, two or three years ago? Then it was a "vision," it was a "dream," "a flash in the pan," "a bubble," somebody was "crazy," but now it is different. Those crazy men are now classed among the smartest and keenest business men of the day. The actual value of a few mines are worth at the present date more than one hundred millions of dollars. These are facts.

In presenting this investment for subscription we appeal to the good judgment of sensible persons as to its merit.

It embodies, we believe, a correct method for developing and establishing successful and paying mining enterprises.

We desire first of all, to conduct a successful mine development. We intend this to be done in a way that will be absolutely fair and honest, and bring the largest profit possible to those who co-operate with us.

We therefore desire this proposition to be well understood by investors. We wish it to be known just how we propose to develop, establish and operate dividend paying mining companies by and through this investment.

THE PLAN—The plan involved in this proposition is that of uniting or consolidating the investments of a limited number of persons into one sum, and under one management, to be used in acquiring and developing mining properties in this wonderful region.

THE PRINCIPLE involved in this investment, we believe, is one of absolute fairness to all interested. The "promotion interest," common to all mining companies, and which is the great unfair feature to investors who put their money into stocks of these companies and whose money develops and makes the mine, if a mine is developed—does not exist in this proposition. There is no "promotion interest" bought and paid for by the investors.

In this proposition the investors and all the investors become promoters. They take the "promotion interest," and all the interest. They own the whole enterprise. No matter how large or small the investment—all stand on an equal basis. Our field of operation is probably one of the greatest and without doubt the richest mineralized region in the world.

For its basis, upon which we will establish and build up several great producing, paying mining companies, we will exploit and develop in a mining like and careful manner extensive

mining properties now known to us, and other properties which we may acquire for the mutual benefit of all investors in the company.

SUBSIDIARY COMPANIES.—The Larder Lake Exploration and Development Company will incorporate a series, not to exceed five, of subsidiary mining companies upon only the real proven properties acquired.

In each and every subsidiary company incorporated, whether mining, milling, smelting, water power or electric light, the Exploration Company will take over 90 per cent. of the capital stock of each company so incorporated, and will put 10 per cent. of the capital stock of each company in its treasury. It will probably never become necessary to sell any of this treasury stock.

Out of the total capital stock of each subsidiary company, the Exploration Company will retain 50 per cent as its "Holding Stock." This will always control the company. It will take and hold 40 per cent. for the mutual benefit of all stockholders in the Exploration Company. This 40 per cent. will be known as the "Selling Stock," and as a market is created, it will be sold, and the proceeds received will be distributed pro rata to the stockholders in the Exploration Company, as their interests may appear.

The stock of the subsidiary companies will be listed on the New York Curb and Mining Exchanges of the country and started at 50 cents a share, where it can be bought and sold according to the daily market quotations. This will afford a channel by which stockholders can sell the 40 per cent. "Selling Stock" from time to time, if they wish.

PROPERTIES.—Many different mining properties will be acquired and developed as stock in the Exploration Company is subscribed for. All properties will be described, and reports submitted regarding same, as soon and as often as they can be examined by the engineers.

The mining properties which will be acquired for this proposition will be

located in the gold and silver belt, extending from the Montreal River through Northern Ontario, eastward into Quebec, and will include properties in the Lady Evelyn District, the new Montreal River Silver District, Cobalt District, and the gold districts around Round Lake, Larder Lake, Lake Abitibi, and in the great undeveloped mineralized section of Quebec lying just east of Larder Lake and extending northward to Lake Abitibi.

We shall try and make every dollar count, and make as few mistakes as possible. We hope to create such an interest in this enterprise with investors that will result in extensive and widespread co-operation.

Under this plan no one can truthfully say that it is not a great mining investment. We want every investor to feel a personal interest in this mine development. The investors in this company will own this enterprise, and we want them to co-operate with us and our associates to make it a great success.

We are now organizing THE LARDER LAKE EXPLORATION AND DEVELOPMENT COMPANY, with what we consider sufficient capital (\$500,000). We now have options on and propose to acquire five distinct and separate properties which will be incorporated at \$100,000 each (100,000 shares—par value \$1.00). The Exploration Company will at all times hold a controlling interest in each of these companies, so that sixty per cent. of the dividends earned and declared will be paid into the treasury of the parent company, and the other forty per cent. distributed among the stockholders on record. This, in our opinion, will enable us to pay dividends and large ones in the very near future.

The board of directors in The Larder Lake Exploration and Development Company will be composed only of engineers of national repute, setting a precedent in this line—Mr. Robert Morton will be president, which fact in itself guarantees conservative and able management.

Investors have been pouring their

money into over-capitalized mining companies, they have been plunging about wildly in the hope of some day "striking it rich," never stopping to think for an instant that the greater part of their money never reaches the ground, as a rule, seventy-five per cent. of the money invested in stock schemes goes into the broker's hands. He pays his salesmen 20 to 50 per cent. on every dollar turned in, he must get his own commission, and engineers must be paid.

We never have had associated with us a stock salesman, we require no commission, and our engineers will be our directors, so that every dollar invested with us on this proposition will be honestly used in the purchasing and development of the different properties.

We are now offering for subscription the first allotment of stock in The Larder Lake Exploration and Development Company—every one hundred shares entitles the holder to forty shares of stock in each of the subsidiary companies to be incorporated, making in all 200 shares of stock in five different companies, which, as soon as development work is started and dividends announced, will make the stock of the Larder Lake Exploration and Development Company almost invaluable. This first allotment of only 50,000 shares (\$1.00 par value) will probably be largely over-subscribed in a few days.

The next allotment will be put out September, 25th, 1907, at 75 cents per share or higher.

This price (15c) will positively be withdrawn August 6, 1907. If this allotment is over-subscribed remittances will be promptly returned. Checks, drafts and money orders must accompany all applications and be made payable to the financial agents.

Interim certificates will be promptly returned to subscribers. The stock certificates of the company representing the shares purchased will be issued and delivered as soon as allotment can be made, after the 6th of August, to all subscribers who purchase at the first underwriting price prior to that date.

Don't wait! Be wise! Act now! NOW IS THE TIME! Here is an opportunity that exceeds that which you had two or three years ago at Cobalt. Perhaps you will say as you did then, "How do we know they have got any silver up there?" Perhaps you say now: "How do you know there is any gold at Larder Lake?"
