

MR. CARPENTER'S SPEECH.

Member for Queens Took a Hand in Defence of the Government.

Speaking in the debate on the budget in the legislature, Thursday afternoon, Mr. Carpenter of Queens said:

I have listened very attentively to the hon. member for Charlotte (Hart) and I agree with him in his remarks on the question of education. It is a subject of very great importance and I am glad to see that he has taken cognizance of what the government propose to do. I agree with him that the cost of school books should be reached.

In the matter of agriculture, when some years ago it was proposed to have a minister to itself, hon. gentlemen opposed the idea, but the government decided differently, and I think the result which has accrued has shown the wisdom of their judgment.

The greatest asset of this country is our young men and women, and I regret to say that a great number of the former are leaving for the west, and if it could do anything to prevent this we shall be doing a good work. The agricultural college at Truro has an excellent influence in inducing young men to stay here and I am strongly in favor of the government giving every en-

couragement in the direction of helping young men to avail themselves of the advantages of doing well.

A good deal of criticism has been made about the Highway Act. I don't think it bears at all harshly on the poor man because he does not now pay the amount of taxes that he used to do. The member for Charlotte said the government were spending more than they ought to bolster up this road act. I have been looking into the accounts. In this connection I have come to the conclusion that no more money was spent last year than was previously the case.

A good deal has been said to as to the coal fields of Queens County, and the railway. I believe we have a great asset in those things. The railway is earning more than its expenses at the present time and can be made much better still.

We have just heard a good deal about the St. John Valley road and I hope before many years more that instead of having to drive 25 miles to get to the station, I shall be able to do so in three or four. I do not share the gloomy views as to the future of this Province that seem to be held by some of the hon. members opposite.

LATE MRS. McMILLAN.

Much Sorrow at Boiestown Over Esteemed Lady's Death.

The many friends in New Brunswick of Mrs. J. D. McMillan of Boiestown, will regret to hear of her death, which took place in Montreal about midnight, March 26th.

Mrs. McMillan had been in poor health for a few months, but was not thought to be seriously ill until about a month ago. As she did not improve, the family physician, after consultation, recommended that she go to Montreal to be operated upon by the celebrated surgeon, Dr. Bell. Acting on this advice, she underwent the operation on the eighteenth inst. successfully, but the disease had made such ravages in her system that she was unable to overcome the effects. She was perfectly conscious to the last and died believing that she was going to dwell in a brighter and better land.

The remains were brought to her home at Boiestown and interment took place on the twenty-ninth inst., in the presence of a very large gathering, which testified to the popularity of the deceased.

Servants conducted by Revs. Thrope and King. The floral tributes were many and beautiful. Many outside relatives and friends were present, among whom were noticed Thomas and Alex. Perley, brothers of the deceased; Miss H. P. Perley, sister; Wm. Damery, Wm. Vells, James Rundle and wife, Claude Price and wife, A. S. Killam and wife, Ed. Dunphy, Jas. McKay, Wm. McKay and T. Lynch.

The deceased leaves behind her, besides a husband and daughter, her mother, two sisters and three brothers. The husband is the best friend and sympathy of the whole community in his loss, and they mourn with him as, besides being an exceptionally good neighbor, and friend, she was the superintendent of the Sabbath School, and ever prominent in all good works.

CORDON BLEU.

Origin of the French Title as Applied to a Fine Cook.

The Order of the St. Esprit was created in 1557, was suppressed by the revolution and was revived by Louis XVIII. in 1814. To speak rightly, Louis XVIII. considered that the order had never ceased to exist, for he had given two collars during his exile, in 1810, the one to Francis I, king of the two Sicilies, and the other to his brother, the Prince of Salerno, the father of his brother's wife, the Duchess d'Aumale.

The ribbon of this order was a light blue color. It was worn around the neck in the reigns of Henry III. and Henry IV., but was changed by Louis XIV., when it was worn across the chest. The Chevaliers of the St. Esprit were always known under the name of Les Cordons Bleus, and this was the supreme honor during the monarchy of France. It was from this that the title of "cordon bleu" was given to a first class cook. A gentleman one day declared after a good meal that he who had cooked the dinner had proved himself a "cordon bleu" among cooks—in other words, the master of his art. The title became quite the rage and is now always used to designate a good cook without the persons who use it knowing what it means or still less the origin of the title.

FOREIGN HOTELS.

They Differ in Many Ways From Those of Our Own Country.

Hot water is not "laid on" (piped) at foreign hotels, says the Travel Magazine. If you hear a gentle tap on the door in the morning, you may interpret it as meaning that a copper ewer of hot water has just been set down outside for your personal use.

If you order a bath, it will be prepared for you accordingly, and a sweet voiced maid will give you notice when it is ready. You are not expected to operate the water valves at all, and it is doubtful if you would succeed if you tried.

From a variety of vacant rooms at a hotel shown you select the one you prefer, with a definite agreement as to price. You are not required to accept humbly and thankfully, in blind faith, whatever room the clerk deigns to assign to you, as in America. It is expected, however, that you will order your breakfasts at the hotel, being free to get your other meals elsewhere if you prefer.

Electric light switches are not commonly turned on by a push button or a flat key, as in our buildings, but by a small brass lever. Many of the best hotels have a reading light in the headboard of each bedstead.

The Last Resort.

A man went into an oculist's the other day and, complaining of failing sight, got fitted with a pair of spectacles.

"Is this the weakest glass for my eye?" he asked.

"Yes," replied the oculist.

"Supposing I can't see with it after a few months?"

"Get a stronger then."

"And if I still can't see?"

"Get a still stronger."

"And if the strongest glass fails?"

"In that case I think if I were you I should buy a small, intelligent dog and a couple of yards of string."

The bed should never stand against the wall. It should be pulled out a little on all sides in order that there may be a free circulation of air.

Don't let anything interfere with your regular hours of work and rest, but get plenty of sleep.

A SHIRRED PRINCESS GOWN

In spite of the many predictions, that the Princess mode is going out of style, the newest frocks of the best designers are showing this same mode of fashioning. It is so generally becoming that no doubt remains as to its continued use for some time to come. Here is a model for a shirred Princess dress—the most practicable style for the amateur sewer. It often requires experience and skill to fit a Princess dress with gores, but the woman who sews at home can fashion this dress without difficulty. The lining extends to the hips and this must be fitted, but the outside is shirred at indicated lines and needs only to be drawn up to fit the figure and tacked to the lining. The novel yoke is very pretty and may introduce some dainty and becoming fabric next the face. The sleeves are shirred at the elbow and finished here or they may be long if preferred. A soft cloth, silk or washing fabric may serve as material of which 8 yards 44 inches wide are needed, in the medium size.

6964—5 sizes, 32 to 40 bust measure. The price of this pattern is 10c.

To the Fredericton Herald:

Please send the above mentioned pattern, as per directions given below, to

Name.....Street.....

To.....Province.....

Measurement—Waist..... Bust

CAUTION.—Be careful to send size of pattern wanted. When the pattern is sent measure you need only mark 32, 34, or whatever it may be. When in waist measure, 22, 23, 26, or whatever it may be. If a skirt, give waist and length measure. When miss' or child's pattern write only the figure representing the age. It is not necessary to write "inches" or "feet." Patterns cannot reach you in less than three or four days from the date of order. The price of each pattern is 10 cents in cash or postal order or stamps.

What a splendid type of tireless activity is the sun as the palmist describes it issuing like a "bridgegroom" from his chamber and rejoicing like a strong man to run a race. Every man ought to rise in the morning refreshed by slumber and renewed by rest, eager for the struggle of the day. But how rarely this is so. Most people rise still unrefreshed, and dreading the strain of the day's labors. The cause of this is deficient vitality and behind this lies a deficient supply of pure, rich blood, and an inadequate nourishment of the body. There is nothing that will give a man strength and energy, as will Dr. Pierce's Medical Discovery. It does this by increasing the quantity and quality of the blood supply. This nourishes the nerves, feeds the brain, builds up enfeebled organs, and gives that sense of strength and power which makes the struggle of life a joy. The "good feelings" which follow the use of "Golden Medical Discovery" is not due to stimulation as it contains no alcohol. The ingredients are plainly stated on the bottle wrapper. It is not a "brace-up" of the body, but builds it up into a condition of sound and vigorous health.

Augustus Thomas, the well known playwright, was talking about first nights, and the heartrending anxiety of them.

"On my own first nights," he said, "I am a pitiful object, utterly without hope, convinced in advance that my play is bound to fail."

"At such times I often wish I had the self confidence that possessed Charles Reade. He, after he had dramatized his novel of Never Too Late To Mend wrote on the margin of a certain passage:

"If the audience fails to weep here, the passage has not been properly acted."

LOSS OF APPETITE AND ENERGY.

Singly they are a worry—combined they become a burden, telling that waste has been immensely greater than the body's power to rebuild. The first need is to reconstruct the blood make good the deficiency of red cells. Ferrozone improves digestion, makes blood, the kind that nourishes and rebuilds. Quickly the nervous system responds to the new power supplied by Nervine. Strength returns, ambition revives, energy and endurance give the system just what it needs to maintain the balance of health. No tonic better than Ferrozone, 50c. per box at all dealers

SHELLS THAT SWIM.

These Peculiar Fish Are Mostly Confined to Tropical Seas.

The idea of shells being found anywhere else except upon the seabeach or in river beds is a little startling. Yet the naturalist who pursues his work from a ship in midocean can and does collect shells by the thousand at every dip of his net or bucket.

Swimming shellfish are mostly confined to tropical seas. The most familiar is the nautilus, which is, however, not a shellfish at all, but a near relation of the cuttlefish; also it is only seen on the surface at a certain time of the year. The real ocean shellfish are mostly very small. In the Indian ocean they may be seen by millions. One which bears the appalling name of Cavolinia trispinosa has the odd peculiarity of coming to the surface at 6 sharp every evening. Another, the Cleodora tridentata, rises at 7.

Frail as these tiny shellfish are, no storm ever injures them. They all possess the peculiar power of being able at will to sink a few feet below the surface of the sea, and there they remain when gales blow, perfectly safe, and rise again when the weather improves.

The largest of these ocean swimmers is about three inches in length. Almost all are most brilliant in color and their shells far frailer and more glossy than those found upon the seabeach.

Puzzling Measures.

Wheat is sold in Great Britain in twenty different ways—by the quarter, comb, load, boll, bushel, barrel, hundredweight, cental, windle and bobbet. Further confusion is also caused by the fact that the bushel of wheat varies from sixty-two pounds at Birmingham, Gloucester and Taunton, to eighty pounds at Monmouth and Abergavenny, while at Aberystwyth it is sixty-five pounds. Similarly, the boll weighs three imperial bushels at Newcastle, four throughout Scotland, six at Berwick, 264 pounds at Glasgow and 240 pounds at Hamilton. A quarter measures 496 pounds in country districts and 504 pounds in London—London Milling.

Apples.

The best apples are the heaviest ones and if good will yield to the pressure of the thumb with a faint cracking noise.

MAILS CLOSING.

In effect, October 1, 1906.

6 a.m.—For St. John, etc., St. Stephen and Charlotte Co., Carleton, Victoria and Madawaska Counties, and United States.

7.00 a.m.—Woodstock and Gibson Branch Stations, daily.

WAY MAILS—East Side St. John River.

7.00 a. m.—For Keswick Ridge, Southampton, etc., Mondays and Thursdays.

West Side St. John River.

7.00 a. m.—For Springhill, Kingsclear, Prince William, etc., Mondays, Wednesdays and Fridays.

6.30 a.m.—St. John River via Steamer.—For Ormoco, Shelburne, Gagetown, etc.

9.15 a.m.—St. John, etc., C. P. Railway Stations, East, Nova Scotia and P. E. Island.

10 a. m.—For St. Mary's Ferry, Gibson and Marysville.

WAY MAILS.

2 p.m.—For Nashua and St. Mary's Ferry, daily, New Brunswick, New Maryland, Hanwell, Lower St. Marys and Royal Road, Wednesdays and Saturdays.

4.15 p.m.—For Gibson, Marysville, Boiestown, Doaktown, Blackville, etc., Chatham, and I. C. Railway Stations, north and south.

4.45 p.m.—For St. Stephen, W. J. Stock, United States, Montreal, Toronto, Ottawa and North West West Provinces.

8.15 p. m.—For St. John, etc., Nova Scotia and P. E. Island.

4.30 p.m.—British mails via New York, Mondays and Thursdays.

MAILS RECEIVED.

9.30 a.m.—From St. John, etc., and Nova Scotia.

From Hamtown, Royal Road, etc.

11.00 a.m.—From Nasonworth and New Maryland, Wednesdays and Saturdays.

12.00 noon.—From Montreal, Ottawa, Northwest Provinces, etc., and United States.

1.20 p. m.—From I. C. Railway Stations, North Shore and Quebec.

St. John River via Steamer.—

5 p.m.—From Ormoco, Shelburne, Gagetown, etc.

9.05 p.m.—From Woodstock and Gibson Branch Stations, daily.

9.20 p. m.—From Nova Scotia, P. E. Island and St. John.

WAY MAILS

7.00 p. m.—West Side River, St. John.—From Meductic, and Way Offices, Tuesdays, Thursdays, and Saturdays.

St. John.—From Woodstock and Way Offices, Tuesdays and Fridays.

HE EXPLAINS.

Mr. George Y. Dibblee Tells What he Knows.

A REPORTER INVESTIGATES THE MERITS OF VINOL.

A Subject that is Agitating the Whole Country.

There has reached us rumors of a new discovery. Something that will revolutionize the practice of medicine. A remedy that has given sufferers from wasting diseases hopes of renewed health and prolonged life.

Of enough importance have these stories appeared that a special interview with Mr. George Y. Dibblee, our well known druggist, was thought advisable.

"Why," said Mr. Dibblee, "there is no more a new discovery than was the moon when it was first viewed through a telescope. The discovery existed simply in the fact of finding out a means of getting at the truth we were after. Perhaps the method might be considered a discovery, but what we have found has been known for years, and it is nothing more or less than the valuable medicinal properties that have always existed in the cod's liver, and for which cod liver oil has been prescribed by so many physicians. Cod liver oil is something that is very valuable in all sorts of wasting diseases, and in itself is extremely disagreeable. For those who have a tendency to sore throat, bronchitis, coughs, colds, every one of an anemic disposition, it has always been considered as simply invaluable; and yet it has more often been necessary to abandon its use than it has been possible to devise a way of administering it.

Two eminent French chemists started in and got interested in the matter, and, after years of study, they have succeeded in extracting from the liver of the cod just what is necessary, and have left behind that obnoxious, greasy, vile tasting fatty matter, the thought of which even has turned the stomachs of thousands. They have found a way of getting the kernel out of the nut.

That is how the so much talked about Vinol is made. It is the concentrated essence of medicine found in the cod's liver that does the good. The grease is like the shell of the nut, absolutely useless, only it is different from the shell of the nut because being useless it is extremely obnoxious and disagreeable to sight, taste and smell.

We have now taken this extract and put a sufficient quantity of it in a delicious tasting wine. We have also added a small amount of organic iron. This heightens the tonic effect of the wine. The extract of the cod's liver comes in just the right proportion to do the greatest amount of good. "Here, drink this," said Mr. Dibblee, as he reached for a bottle and poured forth a glass full of Vinol.

The reporter after carefully tasting and drinking the glass of Vinol, handed him, found it to be deliciously palatable and in every way exceedingly agreeable.

"You have just taken, condensed, of the curative principles of the cod's liver, what you would find in fifty per cent. of its volume of cod liver oil. You can therefore, imagine that if it is necessary to take this remedy, how much easier it will be to derive benefit from it than it used to be when cod liver oil was administered. Do you realize that formerly you only obtained a small proportion of these same curative properties in a whole pint of that horrid oil? Doesn't that tell the story to you?"

The Dad—My son, I want to tell you that the secret of my success, as it must be of any man's, is hard work. I—

The Son—Sh! Dad, I don't care to hear other people's secrets, and I am too much of a gentleman to take advantage of information gained that way. Say no more.

THE SHAD IN DANGER.

Coincident with the appearance on the American market of the spring run of shad come warnings from the fishery experts that this "tasty morsel from the deep" is doomed to early extinction in American waters. The growing popularity of "shad roe" is chiefly blamed for this danger of extinction. The large demand for the eggs results in the slaughter of millions and billions of embryo shad as well as their mothers. The regular replenishment of the sea stock of adults, which would normally occur each year if the adult fish were allowed to attain the upper reaches of the rivers, is very largely prevented by the capture of the mothers on their way up stream.

Unless this method of fishing is stopped the time is not far distant declares Prof. J. W. Titcomb, in charge of the hitching service of the United States Fish Commission, when shad will be so scarce in the Atlantic rivers as to become delicacies only obtainable for the tables of the rich. The Professor urges that the shad be protected by law at least during one of their annual "runs." The Washington Bureau of Fisheries has hatching stations along the Atlantic coast, with facilities for hatching and liberating 300,000,000 fry per annum. Owing to the scarcity of the fish they were unable to obtain more than 45,000,000 last year.

The New York Globe points to experiments on the Pacific Coast "as indicative of what may be done by restrictive laws." The streams in California have been stocked with shad and strict laws for their protection enacted. As a result the fish are rapidly increasing. Another cause contributing in no small degree toward the decrease of food fishes in our coastal rivers is the growing pollution of their waters. Every year they are becoming more like the open sewers, and in several cases are already sufficiently foul to render oyster beds unsafe and drive away at least in part many of the fish.—Halifax Chronicle.

A WOMAN TELLS HOW TO RELIEVE RHEUMATIC PAINS.

I have been a very great sufferer from the dreadful disease, rheumatism for a number of years. I have tried many medicines but never got much relief from any of them until two years ago, when I bought a bottle of Chamberlain's Pain Balm. I found relief before I had used all of one bottle, but kept on applying it and soon felt like a different woman. Through my advice many of my friends have tried it and can tell you how wonderfully it has worked.—Mrs. Sarah A. Cole, 140 S. New St., Dover, Del. Chamberlain's Pain Balm is a liniment. The relief from pain which it affords is alone worth many times its cost. It makes rest and sleep possible. For sale by all dealers.

Speaking with a young lady, a gentleman mentioned that he had failed to keep abreast of the scientific advance of the age.

"For instance," he said, "I don't know at all how the incandescent electric light which is now used in some buildings is produced."

"Oh, that very simple," said the lady, "you just turn a button and the light appears at once."

DO YOUR EARS RING?

When they buzz and seem slightly deaf, beware of catarrhal inflammation. This grows steadily worse, but can be cured by Catarrhazone. E. J. Hammill of Greenmount, P. E. I., proved the merit of Catarrhazone and writes: "No one could have worse Catarrh than I had for years. It caused partial deafness, bad taste, upset my stomach, made me sick all over. Catarrhazone cleared my nostrils, stopped the cough and gave me a clear feeling in my breathing organs. I am absolutely cured." Doctors say nothing is better than Catarrhazone. Try it and you'll say so too. Two sizes, 25c. and \$1.00 at all dealers.
