Vinol is as delicious as a fresh orange, and as soothing as can be to the weak, irritable stomach. It coaxes back lost appetite, improves digestion and creates strength throughout the whole system. We strongly recommend Vinol to all who are weak and run-down from any cause,—particularly to delicate women and children, old people and for those who have pulmonary troubles. Money back if you try Vinol and are not satisfied.

GEORGE Y. DIBBLEE,

DRUGGIST.

BULLDOG LIFE-SAVER.

Bruno Has Rescued Five Girls at Rockaway Beach.

NEW YORK, Aug. 15.—Down at Rockaway Beach it has reached the point that any luckless bather beyond his depth and sweeping out to sea simply yells three times and Larry Lawrence's brindle bull Bruno swims out and saves him.

Miss Estella Cohen, a pretty guest at the Hotel St. George, is the fifth this year for whom Bruno has performed this service. Miss Cohen was showing about a hundred other girls vacationists how cheap one can make a mermaid look if one only has the face and form—and a becoming bathing suit—when an ungentlemanly comber caught her up and ran out to sea with her and set her down in a hollow between two billows.

Miss Cohen is a good swimmer—inside the life line—but the rude conduct of the wave frightened her so that she swallowed almost too much water to be able to cry for help. All the other girls yelled and ran for the shore.

Bruno was catching sticks in the surf for a guest, but he heard the scream of the drowning girl, quit the stick game in the middle of a dive

and swam toward her with prodigious encouraging barks.

Miss Cohen was up for the third time when Bruno got a clutch on her shoulder. Though she was unconscious and a dead weight in his mouth, the sturdy bull dog never dropped his burden until after a quarter of a mile swim he had the half-drowned young woman lying safely on the sand before the crowd from the hotel could reach the beach.

When Miss Cohen was brought round she spent the rest of the day feeding Bruno sweetmeats and kissing him, and the big dog looked back at her as though the reward for his heroism was quite enough.

SHE WAS WILD WITH PAIN.

From Willow Creek, Ont., Miss E. Diegel writes: "A few years ago I was drenched with rain and got lumbago; it was like a steel rod piercing my back. I also had earache and was just wild with pain. I applied bathing soaked with Nerville to my ear and rubbed on Nerville to the lumbago. That rubbing relieved and in a few hours I was well. No other liniment could do this." It's the penetrating power of Nerville that makes it superior to all other liniments. Nothing beats it, 25c. at all dealers.

Gold mines would never have been discovered had it not been that the rich veins "crop out." Speaking about a man, real worth crops out, too.

REMEDY FOR DIARRHOEA NEVER KNOWN TO FAIL.

"I want to say a few words for Chamberlain's Colic, Cholera and Diarrhoea Remedy. I have used this preparation in my family for the past five years and have recommended it to a number of people in York County and have never known it to fail to effect a cure in any instance. I feel that I can not say too much for the best remedy of the kind in the world."—S. Jemison, Spring Grove, York County, Pa. This remedy is for sale by all dealers.

A SMOOTH ARTICLE

Confidence Woman Cut a Wide Swath in Winnipeg and Victimized Many Persons

WINNIPEG, August 15—A loss.

young woman, known here as "Bunny" O'Brien, whose home was formerly in Almonte, Ont., and who was connected with the Ottawa Free Press, and later with the Winnipeg Tribune, in the capacity of canvasser, has worked a smooth game on many prominent Winnipeggers whom it is reported she has victimized for large sums.

The woman represented herself here to be a close relative of Senator MacLaren, and also a niece of Hon. C. S. Hyman, provided forged documents to bear out these claims.

She asserted she had inherited \$80,000 from a deceased uncle and on the strength of this claim secured an automobile and costly furs and cut a wide figure in social circles for a time.

Then she left here suddenly, after arranging to have her automobile follow her. The arrangement was discovered and the original owners of the automobile thus escaped any serious

The woman is believed now to be residing in Ottawa, and yesterday G. A. Higginsohn, one of the victims, received a letter assuring him that his claim, amounting to about \$300, would be settled as he had threatened to have a writ issued.

Others of her victims intend to prosecute the woman for fraud, theft and false pretences, unless restitution is made.

HAD AN AWFUL TIME.

But Chamberlain's Colic Cholera and Diarrhoea Remedy Cured Him.

It is with pleasure that I give you this unsolicited testimonial. About a year ago when I had a severe case of measles I got caught out in a hard rain and the measles settled in my stomach and bowels. I had an awful time and had it not been for the use of Chamberlain's Colic, Cholera and Diarrhoea Remedy I could not have possibly lived but a few hours longer, but thanks to this remedy I am now strong and well. I have written the above through simple gratitude and I shall always speak a good word for this remedy.—Sam. H. Gwin, Concord, Ga. For sale at all dealers.

First Allotment of 50,000 Shares at Fifteen Cents per Share

15c

Our option on this small block of Underwriters' Stock expires August 6, 1907. Subscriptions post-marked at later date will be returned.

Do you realize that investments of a hundred or a thousand will grow rapidly into hundreds and thousands and millions of dollars? The over-conservative and skeptical wildsmile—they will laugh at these predictions, some will even consider this a joke—but remember COBALT, if you please, two or three years ago? Then it was a "vision," it was a "dream," "a flash in the pan," "a bubble," somebody was "crazy," but now it is different. Those crazy men are now classed among the smartest and keenest business men of the day. The actual value of a few mines are worth at the present date more than one hundred millions of dollars. These are facts.

In presenting this investment for subscription we appeal to the good judgment of sensible persons as to its merit.

It embodies, we believe, a correct method for developing and establishing successful and paying mining enterprises.

We desire first of all, to conduct a successful mine development. We intend this to be done in a way that will be absolutely fair and honest, and bring the largest profit possible to those who co-operate with us.

We therefore desire this proposition to be well understood by investors. We wish it to be known just how we propose to develop, establish and operate dividend paying mining companies by and through this investment.

THE PLAN—The plan involved in this proposition is that of uniting on consolidating the investments of a limited number of persons into one sum, and under one management, to be used in acquiring and developing mining properties in this wonderful region.

THE PRINCIPLE involved in this investment, we believe, is one of absolute fairness to all interested. The "promotion interest," common to all mining companies, and which is the great unfair feature to investors who put their money into stocks of these companies and whose money develops and makes the mine, if a mine is developed—does not exist in this proposition. There is no "promotion interest" bought and paid for by the investors.

In this proposition the investors and all the investors become promoters. They take the "promotion interest" and all the interest. They own the whole enterprise. No matter how large or small the investment—all stand on an equal basis. Our field of operation is probably one of the greatest and without doubt the richest mineralized region in the world.

For its basis, upon which we will establish and build up several great producing, paying mining companies, we will exploit and develop in a mining like and careful manner extensive

mining properties now known to us, and other properties which we may acquire for the mutual benefit of all investors in the company.

SUBSIDIARY COMPANIES.—The Larder Lake Exploration and Development Company will incorporate a series, not to exceed five, of subsidiary mining companies upon only the real proven properties acquired.

In each and every subsidiary company incorporated, whether mining, milling, smelting, water power or electric light, the Exploration Company will take over 90 per cent. of the capital stock of each company incorporated, and will put 10 per cent. of the capital stock of each company in its treasury. It will probably never become necessary to sell any of this treasury stock.

Out of the total capital stock of each subsidiary company, the Exploration Company will retain 50 per cent as its "Holding Stock." This will always control the company. It will take and hold 40 per cent. for the mutual benefit of all stockholders in the Exploration Company. This 40 per cent. will be known as the "Selling Stock," and as a market is created, it will be sold, and the proceeds received will be distributed pro rata to the stockholders in the Exploration Company, as their interests may appear.

The stock of the subsidiary companies will be listed on the New York Curb and Mining Exchanges of the country and started at 50 cents a share, where it can be bought and sold according to the daily market quotations. This will afford a channel by which stockholders can sell the 40 per cent. "Selling Stock" from time to time, if they wish.

PROPERTIES.—Many different mining properties will be acquired and developed as stock in the Exploration Company is subscribed for. All properties will be described, and reports submitted regarding same, as soon and as often as they can be examined by the engineers.

The mining properties which will be acquired for this proposition will be

located in the gold and silver belt, extending from the Montreal River through Northern Ontario, eastward into Quebec, and will include properties in the Lady Evelyn District, the new Montreal River Silver District, Cobalt District, and the gold districts around Round Lake, Larder Lake, Lake Abitibi, and in the great undeveloped mineralized section of Quebec lying just east of Larder Lake and extending northward to Lake Abitibi.

We shall try and make every dollar count, and make as few mistakes as possible. We hope to create such an interest in this enterprise with investors that will result in extensive and widespread co-operation.

Under this plan no one can truthfully say that it is not a great mining investment. We want every investor to feel a personal interest in this mine development. The investors in this company will own this enterprise, and we want them to co-operate with us and our associates to make it a great success.

We are now organizing THE LARDER LAKE EXPLORATION AND DEVELOPMENT COMPANY, with what we consider sufficient capital (\$500,000). We now have options on and propose to acquire five distinct and separate properties which will be incorporated at \$100,000 each (100,000 shares—par value \$1.00). The Exploration Company will at all times hold a controlling interest in each of these companies, so that sixty per cent. of the dividends earned and declared will be paid into the treasury of the parent company, and the other forty per cent. distributed among the stockholders on record. This, in our opinion, will enable us to pay dividends and large ones in the very near future.

The board of directors in The Larder Lake Exploration and Development Company will be composed only of engineers of national repute, setting a precedent in this line—Mr. Robert Morton will be president, which fact in itself guarantees conservative and able management.

Investors have been pouring their

money into over-capitalized mining companies, they have been plunging about wildly in the hope of some day "striking it rich" never stopping to think for an instant that the greater part of their money never reaches the ground, as a rule, seventy-five per cent. of the money invested in stock schemes goes into the broker's hands. He pays his salesmen 20 to 50 per cent. on every dollar turned in, he must get his own commission, and engineers must be paid.

We never have had associated with us a stock salesman, we require no commission, and our engineers will be our directors, so that every dollar invested with us on this proposition will be honestly used in the purchasing and development of the different properties.

We are now offering for subscription the first allotment of stock in The Larder Lake Exploration and Development Company—every one hundred shares entitles the holder to forty shares of stock in each of the subsidiary companies to be incorporated, making in all 200 shares of stock in five different companies, which, as soon as development work is started and dividends announced, will make the stock of the Larder Lake Exploration and Development Company almost invaluable. This first allotment of only 50,000 shares (\$1.00 par value) will probably be largely over-subscribed in a few days.

The next allotment will be put out September, 25th, 1907, at 75 cents per share or higher.

This price (15c) will positively be withdrawn August 6, 1907. If this allotment is over-subscribed remittances will be promptly returned. Checks, drafts and money orders must accompany all applications and be made payable to the financial agents.

Interim certificates will be promptly returned to subscribers. The stock certificates of the company representing the shares purchased will be issued and delivered as soon as allotment can be made, after the 6th of August, to all subscribers who purchase at the first underwriting price prior to that date.
