## COMING OF THE JAPANESE.

Government Preparing to Act in the Matter

OTTAWA, July 30.—The Canadian Government has been inquiring into the reports from British Columbia as to the large influx of Japanese. The representatives of the Japanese Government state that the agreement made with the Canadian government a few years ago as to restriction is being rigidly observed. Before leaving their own country the Japanese must procure passports from their Government, and the Japanese government agreed that not more than one passport per month for each district would be issued to its citizens who desired to come to Canada. As there are about forty districts this would permit about 500 a year to come to Canada direct from Japan. This number has

never been reached, and as the agreement is still in force. The Japanese however, arriving in British Columbia are from Honolulu, American territory, and over them the Japanese Consuls have no official authority. They can do a great deal, however, in dissuading their people from leaving the Hawaiian Islands, and this will be done. Many of those who have arrived have gone to the United States and some of those now on the way are destined for the Great Northern. The Canadian Government is hopeful that with the cooperation of the Japanese Government they can limit this immigration to such an extent that no ill results will follow to the western provinces.

## SERIOUS CHARGE.

Wealthy New York Sportsman Said to Have Violated Game Laws.

Reports of game law violations on the headwaters of the Little South-west Mimiichi, where a wealthy New Yorker has been encamped for some weeks are in circulation and Chief Game Warden Robinson has been despatched to the scene to make an investigation. It is said that a short time ago two men from the Adirondacks in the employ of the American visitor were caught by the warden in the act of skinning a cow moose, which had been killed to

supply fresh meat for the camp. There have been complaints from lumbermen of late that the visitors have been amusing themselves setting off sky rockets and other fireworks and look into this matter. The Crown Land office officials declare that if the charges made against the American visitor are well founded, he will be taught a lesson which he will likely remember for some time to come.

## DEATH STRUGGLE A JOKE.

Spectators Laugh While Bert Handberry Drowns

FORT WILLIAM, ONT., July 30.—A big celebration which was being held at Savanah yesterday was abruptly ended by a distressing drowning accident in the river, on which water sports were being held. The affair took place during the progress of the double canoe race, in which one of the canoes, containing Billy Bunting, an old newspaper man of Toronto, and Bert Handberry, both of the Grand Trunk staff, upset, and Handberry was drowned in sight of fully 500 people, who at first viewed the antics of the men in the water as a big joke, and who did not go to their rescue until it was too late. Bunting made a gallant attempt to

pull the upturned canoe, to which Handberry was clinging, to the shore but he, like those on the bank, did not realize there was any danger until the unfortunate man went down. A large number of spectators went into the water and attempted to dive after the body, but they could not locate it, and it was fully four hours before it was brought to the surface by a grappling-iron. Handberry had been employed on the Grand Trunk engineering staff a number of years. He served through the Boer war with a regiment of irregular cavalry. He was a son of Inspector Handberry of the Scotland yard force.

## BAD BURN QUICKLY HEALED.

"I am so delighted with what Chamberlain's Salve has done for me that I feel bound to write and tell you so," says Mrs. Robert Mytton, 457 John St., Hamilton, Ontario. "My little daughter had a bad burn on her knee. I applied Chamberlain's Salve and it healed beautifully." This salve allays the pain of a burn almost instantly. It is for sale by all dealers.

Strange, yet historically true, prosperity has been the ruin of nations. Egypt, Syria, Greece and Rome, went this route. There is in it all a tendency to overstep. The finer sensibilities are blunted, ideals are weakened and stunted, and the principles of justice and right are stifled. When that's done, a nation is dead.

## IT RINGS IN YOUR EARS.

That same cough is everywhere you go, deep and hollow because consumptive. First it was catarrh which could have been cured by Catarrh-one. Moral, never neglect a 'cold,' never trifle with catarrh, go to your druggist and get Catarrh-one. It's instant death to colds, cures them in a few minutes. Throat trouble and catarrh disappear as by magic. Catarrh-one is the great throat, nose and bronchial remedy today. Throat sands use it, doctors prescribe it, why, because it does relieve quickly and cure thoroughly. Two sizes, 25c. and \$1.00 at all dealers.

"You look pleased with yourself, what's up?" "I dreamt last night I was having a fine dinner, and just as I called out to the waiter to bring the bill I woke. And I have been chuckling all day that I didn't have to pay anything for what I ate."—Berlin Simplicissimus.

## THE LARDER LAKE EXPLORATION &amp; DEVELOPMENT CO.

CAPITAL, 500,000 SHARES—PAR VALUE \$1.00 PER SHARE  
FULLY PAID AND NON-ASSESSABLE

15c

First Allotment of 50,000 Shares at Fifteen Cents per Share

15c

Our option on this small block of Underwriters' Stock expires August 6, 1907. Subscriptions post-marked at later date will be returned. Do you realize that investments of a hundred or a thousand will grow rapidly into hundreds and thousands and millions of dollars? The over-conservative and skeptical wildsmile—they will laugh at these predictions, some will even consider this a joke—but remember COBALT, if you please, two or three years ago? Then it was a "vision," it was a "dream," "a flash in the pan," "a bubble," somebody was "crazy," but now it is different. Those crazy men are now classed among the smartest and keenest business men of the day. The actual value of a few mines are worth at the present date more than one hundred millions of dollars. These are facts.

In presenting this investment for subscription we appeal to the good judgment of sensible persons as to its merit.

It embodies, we believe, a correct method for developing and establishing successful and paying mining enterprises.

We desire first of all, to conduct a successful mine development. We intend this to be done in a way that will be absolutely fair and honest, and bring the largest profit possible to those who co-operate with us.

We therefore desire this proposition to be well understood by investors. We wish it to be known just how we propose to develop, establish and operate dividend paying mining companies by and through this investment.

THE PLAN—The plan involved in this proposition is that of uniting or consolidating the investments of a limited number of persons into one sum, and under one management, to be used in acquiring and developing mining properties in this wonderful region.

THE PRINCIPLE involved in this investment, we believe, is one of absolute fairness to all interested. The "promotion interest," common to all mining companies, and which is the great unfair feature to investors who put their money into stocks of these companies and whose money develops and makes the mine, if a mine is developed—does not exist in this proposition. There is no "promotion interest." There is no "promotion interest" bought and paid for by the investors.

In this proposition the investors and all the investors become promoters. They take the "promotion interest" and all the interest. They own the whole enterprise. No matter how large or small the investment—all stand on an equal basis. Our field of operation is probably one of the greatest and without doubt the richest mineralized region in the world.

For its basis, upon which we will establish and build up several great producing, paying mining companies, we will exploit and develop in a mining like and careful manner extensive

mining properties now known to us, and other properties which we may acquire for the mutual benefit of all investors in the company.

SUBSIDIARY COMPANIES.—The Larder Lake Exploration and Development Company will incorporate a series, not to exceed five, of subsidiary mining companies upon only the real proven properties acquired.

In each and every subsidiary company incorporated, whether mining, milling, smelting, water power or electric light, the Exploration Company will take over 90 per cent. of the capital stock of each company so incorporated, and will put 10 per cent. of the capital stock of each company in its treasury. It will probably never become necessary to sell any of this treasury stock.

Out of the total capital stock of each subsidiary company, the Exploration Company will retain 50 per cent as its "Holding Stock." This will always control the company. It will take and hold 40 per cent. for the mutual benefit of all stockholders in the Exploration Company. This 40 per cent. will be known as the "Selling Stock," and as a market is created, it will be sold, and the proceeds received will be distributed pro rata to the stockholders in the Exploration Company, as their interests may appear.

The stock of the subsidiary companies will be listed on the New York Curb and Mining Exchanges of the country and started at 50 cents a share, where it can be bought and sold according to the daily market quotations. This will afford a channel by which stockholders can sell the 40 per cent. "Selling Stock" from time to time, if they wish.

PROPERTIES.—Many different mining properties will be acquired and developed as stock in the Exploration Company is subscribed for. All properties will be described, and reports submitted regarding same, as soon and as often as they can be examined by the engineers.

The mining properties which will be acquired for this proposition will be

located in the gold and silver belt, extending from the Montreal River through Northern Ontario, eastward into Quebec, and will include properties in the Lady Evelyn District, the new Montreal River Silver District, Cobalt District, and the gold districts around Round Lake, Larder Lake, Lake Abitibi, and in the great undeveloped mineralized section of Quebec lying just east of Larder Lake and extending northward to Lake Abitibi.

We shall try and make every dollar count, and make as few mistakes as possible. We hope to create such an interest in this enterprise with investors that will result in extensive and widespread co-operation.

Under this plan no one can truthfully say that it is not a great mining investment. We want every investor to feel a personal interest in this mine development. The investors in this company will own this enterprise, and we want them to co-operate with us and our associates to make it a great success.

We are now organizing THE LARDER LAKE EXPLORATION AND DEVELOPMENT COMPANY, with what we consider sufficient capital (\$500,000). We now have five distinct and separate properties which will be incorporated at \$100,000 each (100,000 shares—par value \$1.00). The Exploration Company will at all times hold a controlling interest in each of these companies, so that sixty per cent. of the dividends earned and declared will be paid into the treasury of the parent company, distributed among the stockholders on record. This, in our opinion, will enable us to pay dividends and large ones in the very near future.

The board of directors in The Larder Lake Exploration and Development Company will be composed only of engineers of national repute, setting a precedent in this line—Mr. Robert Morton will be president, which fact in itself guarantees conservative and able management.

Investors have been pouring their

money into over-capitalized mining companies, they have been plunging about wildly in the hope of some day "striking it rich" never stopping to think for an instant that the greater part of their money never reaches the ground. As a rule, seventy-five per cent. of the money invested in stock schemes goes into the broker's hands. He pays his salesmen 20 to 50 per cent. on every dollar turned in, he must get his own commission, and engineers must be paid.

We never have had associated with us a stock salesman, we require no commission, and our engineers will be our directors, so that every dollar invested with us on this proposition will be honestly used in the purchasing and development of the different properties.

We are now offering for subscription the first allotment of stock in The Larder Lake Exploration and Development Company—every one hundred shares entitles the holder to forty shares of stock in each of the subsidiary companies to be incorporated, making in all 200 shares of stock in five different companies, which, as soon as development work is started and dividends announced, will make the stock of the Larder Lake Exploration and Development Company almost invaluable. This first allotment of only 50,000 shares (\$1.00 par value) will probably be largely over-subscribed in a few days.

The next allotment will be put out September, 25th, 1907, at 75 cents per share or higher.

This price (15c) will positively be withdrawn August 6, 1907. If this allotment is over-subscribed remittances will be promptly returned. Checks, drafts and money orders must accompany all applications and be made payable to the financial agents.

Interim certificates will be promptly returned to subscribers. The stock certificates of the company representing the shares purchased will be issued and delivered as soon as allotment can be made, after the 6th of August, to all subscribers who purchase at the first underwriting price prior to that date.
