JUST WHERE THE DANGER LIES.

In many catarrh snuffs, cocaine is the largely used ingredient, in consequence the drug habit may be formed. To be really cured of catarrh, to do so quickly, safely and pleasantly, doctors say Catarrhzone is superior to any other remedy. It heals sore places, stops discharge, prevents hawking, spitting and bad breath—does this by first destroying the cause of the disease. Catarrhzone is no experiment, it is a tried and proven cure that is guaranteed for bronchial, throat, nose and lung catarrh. Two sizes, 25c. and \$1.00

SCOTCH SETTLEMENT

Aug. 6th, 1907.—The farmers here have just got fairly started at haying but owing to the frequent rains they do not have to work very steady.

The trustees have been repairing the outside of the school house during vacation, now with the addition of a nice coat of paint it will present a very pleasing appearance. They have engaged Miss Eva J. McDougall of Keswick Ridge as teacher for the next term.

Miss Effie Esty is visiting her friend Miss Florence Merrihow at Mouth of Keswick, for a few days.

Mrs. Robert Sanson spent last week with friends at Stanley.

The many friends here of Mr. Moses Flemming are very sorry to hear of his severe illness at his home at Scotch Lake.

Moose are getting on quite friendly terms with the farmers of this section. There was a large one in Mr. Alfred Christie's orchard one day this week. We hear that they have been quite destructive to fields of grain at Scotch Lake.

SYSTEM REQUIRED FREQUENT CLEANSING.

Not only outside but inside as well your body must be frequently cleansed. Otherwise it becomes loaded with wastes that clog up the wheels of health. Much better to act in time. Use Dr. Hamilton's Pills; they strengthen and regulate the bowels, assist digestion, enrich the blood and thereby fortify the nerves and lay the foundation of lasting good health.

Dr. Hamilton's Pills bring vim and vitality so much sought for today; they infuse a feeling of freshness and spirit in those who have been ailing for years. Really no medicine so popular at all dealers.

First Landlady—It's hard to tell what to do.

Second Landlady—Yes, if they carry suit cases you suspect them of being embezzlers, and if they don't you don't want to trust them for board.

END OF ROMANCE.

Boy and Girl Love Affair Ending in Courts

Changed Her Mind After Marriage Ceremony—Father Seeks to have Marriage Annulled as both Parties were Minors.

TORONTO, Aug. 2.—With the brand new wedding ring just a moment before placed on her finger and with the echo of the final words of the marriage ceremony still ringing in her ears, seventeen-year-old Ellen Maria Fasken of Pilkington township, Wellington County, left her husband Henry Parr aged eighteen years, on declaring she would have nothing to do with him, and subsequently made an affidavit of the case as preliminary to the suit which her father entered on her behalf at Osgoode Hall yesterday morning to have the marriage annulled. The statement was sworn to before Henry Wissler, a notary public of Elora, and the action comes under section 15 of the marriage act as recently amended giving Justice of the High Court of Justice of Ontario power (to annul marriages under certain limitations). The suit has not yet been brought to trial, but in the meantime Chief Justice Zalcenbridge has made an order appointing Mr. Hugh Guthrie, barrister of Guelph, as guardian of the young man for the purpose of defending the suit. The whole story leading up to the marriage, which took place April 19, 1906, is one of boy and girl lovelorn and the outcome

of the romantic tendencies of the two schoolmates.

It appears that the courtship began with young Parr's walking with Miss Fasken on the way home from Sunday school in Elora prior to the winter of 1906. During the winter he sometimes walked with her after the afternoon session of the Elora High School, where they were students. According to the affidavit all these meetings were had in the presence of the young lady's younger sister, Henry Parr, so the affidavit declares, knew that the girls' parents would not sanction a marriage, and he had never even seen her home. Miss Fasken swears that the marriage was never consummated and that she is not influenced by others in her decision regarding the marriage. Her parents, she says, upon learning the facts, told her she might live with Parr if she loved him and would really be happy. "I only realized," pursues the affidavit, "what a foolish thing I did when the minister pronounced us married. I gave the ring to the defendant, also the marriage certificate, and have never seen him since." The marriage was conducted by a minister whom the affidavit does not mention on April 19, 1906.

THE LARDER LAKE EXPLORATION & DEVELOPMENT CO.

CAPITAL, 500,000 SHARES—PAR VALUE \$1.00 PER SHARE

FULLY PAID AND NON-ASSESSABLE

15c

First Allotment of 50,000 Shares at Fifteen Cents per Share

15c

Our option on this small block of Underwriters' Stock expires August 6, 1907. Subscriptions post-marked at later date will be returned.

Do you realize that investments of a hundred or a thousand will grow rapidly into hundreds and thousands and millions of dollars? The over-conservative and skeptical wildsmile—they will laugh at these predictions, some will even consider this a joke—but remember COBALT, if you please, two or three years ago? Then it was a "vision," it was a "dream," "a flash in the pan," "a bubble," somebody was "crazy," but now it is different. Those crazy men are now classed among the smartest and keenest business men of the day. The actual value of a few mines are worth at the present date more than one hundred millions of dollars. These are facts.

In presenting this investment for subscription we appeal to the good judgment of sensible persons as to its merit.

It embodies, we believe, a correct method for developing and establishing successful and paying mining enterprises.

We desire first of all, to conduct a successful mine development. We intend this to be done in a way that will be absolutely fair and honest, and bring the largest profit possible to those who co-operate with us.

We therefore desire this proposition to be well understood by investors. We wish it to be known just how we propose to develop, establish and operate dividend paying mining companies by and through this investment.

THE PLAN—The plan involved in this proposition is that of uniting or consolidating the investments of a limited number of persons into one sum, and under one management, to be used in acquiring and developing mining properties in this wonderful region.

THE PRINCIPLE involved in this investment, we believe, is one of absolute fairness to all interested. The "promotion interest," common to all mining companies, and which is the great unfair feature to investors who put their money into stocks of these companies and whose money develops and makes the mine, if a mine is developed—does not exist in this proposition. There is no "promotion interest" bought and paid for by the investors.

In this proposition the investors and all the investors become promoters. They take the "promotion interest" and all the interest. They own the whole enterprise. No matter how large or small the investment—all stand on an equal basis. Our field of operation is probably one of the greatest and without doubt the richest mineralized region in the world.

For its basis, upon which we will establish and build up several great producing, paying mining companies, we will exploit and develop in a mining like and careful manner extensive

mining properties now known to us, and other properties which we may acquire for the mutual benefit of all investors in the company.

SUBSIDIARY COMPANIES.—The Larder Lake Exploration and Development Company will incorporate a series, not to exceed five, of subsidiary mining companies upon only the real proven properties acquired.

In each and every subsidiary company incorporated, whether mining, milling, smelting, water power or electric light, the Exploration Company will take over 90 per cent. of the capital stock of each company so incorporated, and will put 10 per cent. of the capital stock of each company in its treasury. It will probably never become necessary to sell any of this treasury stock.

Out of the total capital stock of each subsidiary company, the Exploration Company will retain 50 per cent. as its "Holding Stock." This will always control the company. It will take and hold 40 per cent. for the mutual benefit of all stockholders in the Exploration Company. This 40 per cent. will be known as the "Selling Stock," and as a market is created, it will be sold, and the proceeds received will be distributed pro rata to the stockholders in the Exploration Company, as their interests may appear.

The stock of the subsidiary companies will be listed on the New York Curb and Mining Exchanges of the country and started at 50 cents a share, where it can be bought and sold according to the daily market quotations. This will afford a channel by which stockholders can sell the 40 per cent. "Selling Stock" from time to time, if they wish.

PROPERTIES.—Many different mining properties will be acquired and developed as stock in the Exploration Company is subscribed for. All properties will be described, and reports submitted regarding same, as soon and as often as they can be examined by the engineers.

The mining properties which will be acquired for this proposition will be

located in the gold and silver belt, extending from the Montreal River through Northern Ontario, eastward into Quebec, and will include properties in the Lady Evelyn District, the new Montreal River Silver District, Cobalt District, and the gold districts around Round Lake, Larder Lake, Lake Abitibi, and in the great undeveloped mineralized section of Quebec lying just east of Larder Lake and extending northward to Lake Abitibi.

We shall try and make every dollar count, and make as few mistakes as possible. We hope to create such an interest in this enterprise with investors that will result in extensive and widespread co-operation.

Under this plan no one can truthfully say that it is not a great mining investment. We want every investor to feel a personal interest in this mine development. The investors in this company will own this enterprise, and we want them to co-operate with us and our associates to make it a great success.

We are now organizing THE LARDER LAKE EXPLORATION AND DEVELOPMENT COMPANY, with what we consider sufficient capital (\$500,000). We now have options on and propose to acquire five distinct and separate properties which will be incorporated at \$100,000 each (100,000 shares—par value \$1.00). The Exploration Company will at all times hold a controlling interest in each of these companies, so that sixty per cent. of the dividends earned and declared will be paid into the treasury of the parent company, and the other forty per cent. distributed among the stockholders on record. This, in our opinion, will enable us to pay dividends and large ones in the very near future.

The board of directors of The Larder Lake Exploration and Development Company will be composed of engineers of national repute, setting a precedent in this line—Mr. Robert Morton will be president, which fact in itself guarantees conservative and able management.

Investors have been pouring their

money into over-capitalized mining companies, they have been plunging about wildly in the hope of some day "striking it rich" never stopping to think for an instant that the greater part of their money never reaches the ground, as a rule, seventy-five per cent. of the money invested in stock schemes goes into the broker's hands. He pays his salesmen 20 to 50 per cent. on every dollar turned in, he must get his own commission, and engineers must be paid.

We never have had associated with us a stock salesman, we require no commission, and our engineers will be our directors, so that every dollar invested with us on this proposition will be honestly used in the purchasing and development of the different properties.

We are now offering for subscription the first allotment of stock in The Larder Lake Exploration and Development Company—every one hundred shares entitles the holder to forty shares of stock in each of the subsidiary companies to be incorporated, making in all 200 shares of stock in five different companies, which, as soon as development work is started and dividends announced, will make the stock of the Larder Lake Exploration and Development Company almost invaluable. This first allotment of only 50,000 shares (\$1.00 par value) will probably be largely over-subscribed in a few days. The next allotment will be put out September, 25th, 1907, at 75 cents per share or higher.

This price (15c) will positively be withdrawn August 6, 1907. If this allotment is over-subscribed remittances will be promptly returned. Checks, drafts and money orders must accompany all applications and be made payable to the financial agents.

Interim certificates will be promptly returned to subscribers. The stock certificates of the company representing the shares purchased will be issued and delivered as soon as allotment can be made, after the 6th of August, to all subscribers who purchase at the first underwriting price prior to that date.
