A LAW.

To regulate the Use of the Common Sewers of the City of Fredericton and to Establish the Rates to be Charged Thereof.

BE IT ENACTED by the (L. S.) Mayor, Aldermen and Council of the City of Fredericton as follows:

(Sgd.) H. F. McLeod,

Mayor.

1. The City Engineer under the direction of the City Council, shall have the general supervision and inspection of the construction and maintenance of all common sewers built or owned by the City, and of all connections of particular sewers built and constructed under the provisions of this law. The Engineer shall cause accurate plans thereof to be made, representing the location, depth and material, with a section plan of each sewer, indicating the size, shape, thickness and construction and shall cause to be shown up on said plan all existing connections of said sewers and all other connections as they are made.

2. All applications for the construction of particular sewers, and their entrances into the common sewers, and for permits to enter the same, shall be in such form as the City Council shall prescribe, and be filed with the City Engineer. All that portion of any particular sewer laid within the limits of any public street, square and alley-way of the City of Fredericton, and its entrance into the common sewer, shall be constructed, maintained and kept in repair by the City Corporation, and shall be the property of the City and the cost thereof shall be paid by the owner of the estate connecting, before the same is used or house connections made therewith. The cost of all repairs, or removal of stoppages, made upon any particular sewer, shall be paid by the owner of the estate connecting.

3. No work of laying a particular sewer shall be commenced or allowed to continue unless and until the deposit hereinafter required shall have been paid to the City Treasurer and a permit in Form "A" prescribed in schedule hereto, shall have been issued by the City.

4. Applications for permits to connect any particular sewer with a common sewer shall be made in writing signed by the owner or owners of the property to be connected, according to Form "B" of the Schedule hereto. At the time of making such application the applicant shall deposit with the City Treasurer an amount equal to the estimated cost of making the required connection, in no case less than TEN (\$10.) dollars, and no permit shall be issued until the amount of the required deposit has been paid. This deposit shall be credited to the cost of installation, and should such cost exceed the deposit, the applicant will be required to pay the difference to the City Treasurer, together with the amount of his sewer rate for the then current half-year before the same is used or house connections made therewith. In case the deposit should exceed the cost of installation and rental, the surplus shall be refunded by the city treasurer to the applicant.

5. Every particular sewer shall be of such size and laid at such grade as the City Engineer or his assistant shall direct.

6. The City Engineer, or other person appointed by the City Council for such purpose, shall have the right at all reasonable hours to enter the premises and inspect any particular sewer and its connections and plumbing.

7. The inside of every particular sewer, after it is laid shall be smooth and clean throughout its entire length and all work and plumbing on same must be done to the satisfaction of the City Engineer.

8. When any change in direction is made in the pipe, either in horizontal or vertical direction special bends shall be used.

9. No live exhaust or waste steam or blow off, or drip pipe from any steam boiler, waste from acetylene or other illuminating gas plant, or any drainage shall be discharged directly into any common sewer or any particular sewer or house drain, connected therewith.

10. No permit to connect with the common sewers shall be issued to any manufacturing establishment until the owner or owners, shall have furnished any special requirement recommended by the City Engineer.

11. No person shall throw into any sewer or drain, inlet, manhole, catch-basin, any earth, dirt, stones, bricks, sawdust, ashes, cinders, shavings, hair, grease, oyster, clam or lobster shells or any other substances detrimental to the sewers or the use thereof.

12. Every particular sewer, which shall enter into any common sewer, shall be built of such materials, dimensions and description, with such grade and in such manner as City Engineer shall direct.

13. Every person owning or occupying property situate on any street along which there is a common sewer shall make immediate connection with the same within such time as the City Engineer, shall direct, by a written notice served on such person by delivery of the same personally, or by leaving same on the premises. In case any person shall neglect or refuse to comply with the terms of such notice the City Council may order such sewer connection to be made and the expenses of same shall be a lien upon the property, so connected and may be recovered from the owner by suit in any court of competent jurisdiction.

14. Any person convicted of a breach of any of the provisions of this by-law, shall forfeit and pay, at the discretion of the convicting magistrate, a penalty not exceeding FIFTY DOLLARS and costs for each offence.

15. Every person or owner who connects his particular sewer with a common sewer shall pay for the use of such common sewer, an annual rent, to be fixed by the City Council. Such rental shall be paid semi-annually on the first day of May and the first day of November in each year,

at the same time the water rates are now payable, and no water permit shall be issued upon any premises having sewer connection unless the sewer rental has been paid. Unless the water rates and sewer rental are paid within sixty days after the time heretofore mentioned, it shall be the duty of the engineer to cause the water to be shut off such premises. In any case where the water supply has been shut off for non-payment of water rates or sewer rental, or both, the sum of three dollars will be charged for turning on the water and inspecting the water and sewer connection.

The following shall be the rentals to be charged for the use of the common sewers, to be paid semi-annually in advance on the first day of May and the first day of November as aforesaid:

SCHEDULE FOR SEWER RENTALS.

One kitchen sink in dwelling.....	\$2.00
One kitchen sink and one bath room, (to include wash bowl, seat and tub) in dwelling.....	4.00
Each additional bath.....	2.00
Each " closet.....	2.00
Each slop sink.....	2.00
Each additional urinal.....	1.00
Each " wash bowl.....	1.00
Each " sink.....	.50

Hotels, boarding houses, etc., shall pay the same as for family rates and in addition shall pay a fixed sum of twenty-five cents per bed.

All government buildings, federal and provincial, one half the amount of the water rates.

Buildings occupied as stores, or offices, or for other business or commercial purposes, when not otherwise specified, an amount equal to the water rates.

School buildings and churches, one half the amount of the water rates.

Manufacturing establishments, when discharge is properly protected to the satisfaction of the engineer, employing fifty persons or less, ten dollars; for each additional 25 or less two dollars.

Steam laundries, when discharge is properly protected to satisfaction of engineer, fifteen dollars.

In no case shall the minimum rental be less than two dollars.

Form A.

FREDERICTON SEWERAGE SYSTEM.

Received from..... street, the sum of..... Dollars the estimated cost of making connection from said premises to common sewer. The above payment is received and this permit issued, subject to the regulations and by-laws of the city of Fredericton.

City Treasurer

Form B.

APPLICATION FOR A PARTICULAR SEWER OR HOUSE DRAIN.

To the Mayor and Aldermen and Commonality of the City of Fredericton:

The undersigned, being owner of the estate requests that a private sewer be laid from the..... street, and that the same may be connected with the..... street sewer, and that..... may be allowed the use of such sewer for the purpose of disposing of the sewerage of said.....

And the undersigned agree to pay to the said city before connecting said..... with the said particular sewer, all of the cost of said sewer, including labor and materials or any other expense incurred necessary for the proper construction of said sewer.

And the undersigned further agree to strictly conform to the laws and ordinances relating to sewers and to the rules and regulations that are now in force or may be hereinafter adopted in relation thereto and also to the plumbing laws and ordinances so far as they relate thereto.

And the undersigned further agree that no claim for damages which may be occasioned to such estate, or any property thereon in any manner, by the construction, use or existence of such particular sewer or connection, shall be made against the city of Fredericton.

And the undersigned further agree that the said city engineer and other parties authorized by the city shall have access at all reasonable hours, to the said premises, to see that all laws, ordinances and rules relating to the sewer are complied with.

(Signature)..... (Address)..... Passed and enacted this fifth day of July, A. D., 1907.

J. W. McCREADY, City Clerk

CITY OF FREDERICTON, S. S.:

I, James W. McCreedy, city clerk of the city of Fredericton, do hereby certify, that the foregoing pages, numbered from one to nine, both inclusive, contain a correct copy of a by-law passed and enacted by the city of Fredericton on the fifth day of July instant, under authority of 50 Victoria, Chapter 52, Section 15 (1896), the same having been compared by me with the original law as passed and on file in my office.

In witness whereof I have hereunto set my hand and affixed the corporate seal of said city this tenth day of July, A. D., 1907.

JAMES W. McCREADY, City Clerk.

Dig for your coin, and dig hard—but be the master of your dollar, and not its slave.

WORLD'S MOTOR RECORD BROKEN.

Mr. S. F. Edge Drives 1,581 Miles in 24 Hours--Average of 65.7-8 Miles an Hour.

(London Daily Mail.)

Mr. S. F. Edge at 6 p. m. on Saturday completed his arduous twenty-four hours motor ride on the Brooklands racing track, and in covering 1,581 miles 1,310 yards in that time he has left all previous records far behind. His average speed for the whole run was 65.7 miles an hour. The following table giving the time in minutes occupied in round distance will make readily understood the marvellous nature of Mr. Edge's achievement—

50 miles — 42 min. 46 2-5 sec.
100 miles — 85 min. 13 2-5 sec.
500 miles — 440 min. 25 sec.
1,000 miles — 894 min. 85 2-5 sec.
1,500 miles — 1,060 min. 15 sec.

When Mr. Edge brought his car to a standstill at the finish of the race, he did not look nearly so tired as dozens in the crowd who had watched him all night and all day whirling round the course.

CHEERING CROWDS.

"I have done better than I hoped," he said. "I felt I could go sixty-five miles as an average; sixty would have been very comfortable, but I have perfect faith in my car. I do not feel very tired; a good night's rest and a quiet day to-morrow will give me all the rest I want. I must say the weather was grand. We were very lucky."

The car with which he made his record-breaking run was a 60-h. p. three a. m. on Saturday he made six-cylinder one. It was painted

green, and the motorist was accompanied by two other cars exactly similar in make, one painted red and the other white.

From time to time during the run Mr. Edge had to stop for a change of tyre or wheel, and on one occasion a wheel was changed in twenty-one seconds. The average time for change of tyre was under one minute.

One of the few exciting incidents of the closing hours was when Edge's glass wind-shield was jolted out of its fastenings as the car passed over the broken surface of the curve under the bridge, and the fragments fell jingling on the track. Sweepers with brooms quickly removed those dangerous fragments.

Frequently during those renewals and repairs Mr. Edge left his car and stretched himself at full length on the track to get absolute rest for a few seconds. He partook on the journey of very light diet, mainly grapes, oranges, bananas, and chocolate, which his attendant mechanic fed to him in regular intervals. Small draughts of cold tea or coffee at the stops were also partaken of.

OVER 72 MILES AN HOUR

Some of the fastest times were made during the night. The fastest hour's run was 71 miles 150 yards, between seven and eight o'clock on Saturday morning. The slowest, 60 miles 340 yards, between twelve noon and one o'clock. Between two and three a. m. on Saturday he made within a few yards of 72 miles.

HOUSEHOLD HINTS.

Some Interesting Information for Busy Housewives.

HEALTH AND BEAUTY

The continual wearing of gloves at night causes the hands to assume a yellowish tint. An occasional wearing is all right.

A few drops of any good toilet water in the last rinsing water gives a faint suggestion of perfume to the hair that is very refreshing.

A reddish brown veil is the best protection against the sun's rays. White and blue veils are no good whatever, since the sun's rays pass directly through them.

Learn to dance; dancers are fine walkers. Dance fifteen minutes every day; it will make you more limber in the unused muscles.

When you walk try to relax a little. Most walkers walk as if they were trying to walk a crack; they walk stiffly.

If a girl is on her feet all day she should wear her clothing rather snug pull the belt or girdle tight—and she should get into the habit of standing with her shoulders thrown back. It is just as easy after one gets used to it.

SIMPLE HELPS.

A little saucer of fresh charcoal kept in the refrigerator helps to keep it sweet.

Sliced raw onion sandwiches are delicious with pressed meat of any kind for a picnic basket. The onion must be delicate in flavor and sliced exceedingly thin.

To keep a currant or seed cake moist, place it in an air-tight tin with a good sound apple, renewing the apple when it becomes the least decayed.

Large pores on the nose and chin may be reduced by applying several times a day a lotion made of lemon juice and glycerine, or one of alum and water.

After using borax and rose water for the removal of tan and freckles, a little cold cream should be applied, as borax makes the skin dry.

A cure for hiccoughs is to inhale as much air as the lungs will hold and retain it as long as possible. If one inhalation is not enough, repeat as often as necessary.

A simple mixture of equal parts of lemon juice, honey and cologne is an excellent lotion for whitening the hands if they are abnormally red. Apply at night, rubbing well into the skin.

Should anything get into the eyes,

one drop of sweet oil should be dropped in the corner of it, but if it be mortal or lime, bathe with a solution of water and vinegar.

A freshly made sponge cake split and filled with boiled custard, to overflowing, and frosted with boiled icing, is delicious.

CANNED ASPARAGUS.

Wash the asparagus and cut off the tough parts of the stalks. Lay in an asparagus boiler, cover with salted water, and boil until tender, taking care that the tips do not get soft enough to break. Drain and stand on end in perfectly clean cans. Set the cans in a pan of boiling water on top of the range, and up the liquid in which the asparagus was boiled and when the water in the pan has boiled for five minutes fill the cans to overflowing with the asparagus liquor, screw on the tops and seal tightly. Keep in a cool, dark place.

STRAWBERRY JELLY.

Soak a half box of gelatine in a gill of cold water for an hour. Mash a quart of strawberries and cover with sugar, allowing them to stand for two hours. Put into a saucepan two cups of boiling water, dissolve the gelatine in this, and when this is all melted, stir in the juice, which has been pressed from the sugared berries and the juice of a lemon. Strain through a flannel bag into a mould wet with cold water. Set in the chest when cool. Serve with cream.

CANDIED CHERRIES.

Make a syrup of a pound of granulated sugar and a gill of Rater and boil until a little dropped into iced water is brittle. Have ready firm unstemmed cherries. Take a saucepan of syrup from the fire, set it in an outer pan of boiling water and dip the cherries, one at a time and quickly, into the syrup and lay on a waxed paper to dry. Stand in a warm place to dry.

MUSHROOM SOUP.

One pint of mushrooms, one pint of milk, two tablespoonsful of butter, salt and pepper to taste. Wash and scrape or peel the mushrooms, chop them fine and put on to cook with cold water. Simmer for a half hour, then add milk, butter pepper and salt to taste as soon as the boil is reached. Serve with crackers.

EVER HAVE CRAMPS?

Kind of fierce to be tied in a knot at midnight with cramps. Keep Nerviline handy. Ten drops quiet cramps instantly. Used occasionally Nerviline prevents this trouble entirely. From Stratford, Ont., Wm. Dee writes: "Nothing I know of will give such quick relief to cramps, colic or pain in the stomach as Nerviline. If you feel squeamish or sick, just ten drops of Nerviline in water and you're well next minute." Think of the protection and comfort contained in a 25c. bottle of Nerviline and get it today.

TWO BROTHERS DROWNED.

Double Fatality at Glace Bay on Monday.

Glace Bay, N. S., July 16—Two sons of Councilor Anderson of Glace Bay were drowned by the overturning of a sail boat off Catalone, C. B. yesterday, while their comrade, Jos. McDonald, came within an ace of sharing their fate.

The two drowned lads, Crawford and Alexander, were 21 and 19 years respectively. The young men were on their way from Catalone Gut to Glace Bay, and when about four hundred feet from the shore a squall struck the boat and upset.

All three were thrown into the water. They clung to the boat for a while and shouted for help.

Alexander Anderson said he would try to swim for shore and in spite of McDonald's warning he set out. He took an oar but let it go and set out without it. His brother Crawford followed him. Both young men went down before reaching land.

McDonald was rescued half an hour later. The bodies have been recovered.

"Take this old world just as it is and try to make it better."

Some folks kids are a series of inexcusable mistakes.
