A. J. WHITE & CO., MONTREAL.

A CHARMING LITTLE COAT AND BONNET FOR LINGERIE STUFFS.

Mistress Fashion has been evolving

some wonderful apparel for little folks of late and a most fetching coat and bonnet because of their simple attractiveness are shown. The bonnet is in one piece and finished with button holing in a scallop. The side and crown button together while the tie strings are slipped through eyelets in front. The front and side edges roll back from the face in a most becoming manner. The coat is in sack style and fastens only at the neck. A pretty design is embroidered along its edges, the round deep collar being an effective addition. The sleeves are full and finished with turn back cuffs of the embroidery. Linen pique of pongee might serve as material of which 1/2 yard 27 inches wide is needed for the bonnet in the medium size and 1 yard 54-inches wide for the coat.

Two patterns 4206—sizes, 3, 4, 5, 6 years. 4207—sizes, 1 to 6 years. The price of these patterns is 20c. but either will be sent upon receipt of 10c.

The price of this pattern is 10c.

To the Fredericton Herald:

Please send the above mentioned pattern, as per directions given below, to

Name..... Street.....

No..... Province.....

To..... Measurement—Waist..... Bust.....

CAUTION.—Be careful to send six of pattern wanted. When the pattern is sent measure you need only mark 32, 34, or whatever it may be. When in waist measure, 22, 23, 26, or whatever it may be. If a skirt, give waist and length measure. When miss' or child's pattern write only the figure representing the age. It is not necessary to write "inches" or "years." Patterns cannot reach you in less than three or four days from the date of order. The price of each pattern is 10 cents in cash or postal order or stamps.

The crowns are not for the camp followers.

'JACK THE SMEARER.'

Caught After Three Years, He Admits Throwing Fith on Gowns of Women.

Indianapolis, August 9.—William R. Gadd, an art student aged thirty years, was arrested last night as the "Jack the Smearer" who has been attacking women in this city during the past three years and for whom the best detective in the department spends months in search. The man ruined fine dresses worth thousands of dollars in the aggregate by smearing fith on them, and he now coolly admits that is his guilty. He would mingle with crowds passing from the theatres and halls. Many detectives and plain-clothes men attended the performances and passed out with the crowds, but though Gadd usually operated almost never their eyes they could not find him.

The theatre managers detailed employees to mingle with the outgoing patrons and assist the police, but their efforts were not successful. Detective Kinney was standing on the sidewalk last night when he saw some handsomely dressed woman start toward a street car. A man followed them and the detective kept close behind him. Just as the woman were boarding the car the man threw fith on the one most handsomely gowned. He was arrested. Gadd's student associates never dreamed what he was about. He says he had no motive and knows no reason except he wanted to do it and did it. He is a capable painter in oils and a crayon artist.

MAYOR HAD TO FOOT IT.

Guelph, Ont. Aug. 9.—The Mayor, Ald. Lyon, Messrs Wm. Bell and J. M. Duff, with Dr. Lyon at the wheel autoed on Tuesday to Goderich, while Lieut-Colonel Macdonald took the train to make preliminary arrangements with a committee of Goderich people for the opening of the G. & G. Railway. The trip up was lovely. On the return vicissitudes commenced. About five miles west of Stratford a tire was punctured and the Mayor footed it five miles to that city by telegraph that he could not be at the Council meeting. The auto then came up, and off they went for home about 10 o'clock. When a mile out of Petersburg another smash occurred, and then, a third not far from Berlin, where the machine was abandoned by its occupants, who got home this morning. Mr. A. Barber's fine road mare and buggy were stolen from his stable last night about 10.30. Evidently the mare had been badly hitched up and ran away, upsetting the occupants. The horse was found, badly cut up in a quarry hole, the buggy being smashed to atoms.

THE LARDER LAKE EXPLORATION & DEVELOPMENT CO.

CAPITAL, 500,000 SHARES—PAR VALUE \$1.00 PER SHARE

FULLY PAID AND NON-ASSESSABLE

15c

First Allotment of 50,000 Shares at Fifteen Cents per Share

15c

Our option on this small block of Underwriters' Stock expires August 6, 1907. Subscriptions post-marked at later date will be returned. Do you realize that investments of a hundred or a thousand will grow rapidly into hundreds and thousands and millions of dollars? The over-conservative and skeptical wildsmile—they will laugh at these predictions, some will even consider this a joke—but remember COBALT, if you please, two or three years ago? Then it was a "vision," it was a "dream," "a flash in the pan," "a bubble," somebody was "crazy," but now it is different. Those crazy men are now classed among the smartest and keenest business men of the day. The actual value of a few mines are worth at the present date more than one hundred millions of dollars. These are facts.

In presenting this investment for subscription we appeal to the good judgment of sensible persons as to its merit.

It embodies, we believe, a correct method for developing and establishing successful and paying mining enterprises.

We desire first of all, to conduct a successful mine development. We intend this to be done in a way that will be absolutely fair and honest, and bring the largest profit possible to those who co-operate with us.

We therefore desire this proposition to be well understood by investors. We wish it to be known just how we propose to develop, establish and operate dividend paying mining companies by and through this investment.

THE PLAN—The plan involved in this proposition is that of uniting or consolidating the investments of a limited number of persons into one sum, and under one management, to be used in acquiring and developing mining properties in this wonderful region.

THE PRINCIPLE involved in this investment, we believe, is one of absolute fairness to all interested. The "promotion interest," common to all mining companies, and which is the great unfair feature to investors who put their money into stocks of these companies and whose money develops and makes the mine, if a mine is developed—does not exist in this proposition. There is no "promotion interest" there is no "promotion interest" bought and paid for by the investors.

In this proposition the investors and all the investors become promoters. They take the "promotion interest," and all the interest. They own the whole enterprise. No matter how large or small the investment—all stand on an equal basis. Our field of operation is probably one of the greatest and without doubt the richest mineralized region in the world.

For its basis, upon which we will establish and build up several great producing, paying mining companies, we will exploit and develop in a mining like and careful manner extensive

mining properties now known to us, and other properties which we may acquire for the mutual benefit of all investors in the company.

SUBSIDIARY COMPANIES.—The Larder Lake Exploration and Development Company will incorporate a series, not to exceed five, of subsidiary mining companies upon only the real proven properties acquired.

In each and every subsidiary company incorporated, whether mining, milling, smelting, water power or electric light, the Exploration Company will take over 90 per cent. of the capital stock of each company so incorporated, and will put 10 per cent. of the capital stock of each company in its treasury. It will probably never become necessary to sell any of this treasury stock.

Out of the total capital stock of each subsidiary company, the Exploration Company will retain 50 per cent as its "Holding Stock." This will always control the company. It will take and hold 40 per cent. for the mutual benefit of all stockholders in the Exploration Company. This 40 per cent. will be known as the "Selling Stock," and as a market is created, it will be sold, and the proceeds received will be distributed pro rata to the stockholders in the Exploration Company, as their interests may appear.

The stock of the subsidiary companies will be listed on the New York Curb and Mining Exchanges of the country and started at 50 cents a share, where it can be bought and sold according to the daily market quotations. This will afford a channel by which stockholders can sell the 40 per cent. "Selling Stock" from time to time, if they wish.

PROPERTIES.—Many different mining properties will be acquired and developed as stock in the Exploration Company is subscribed for. All properties will be described, and reports submitted regarding same, as soon and as often as they can be examined by the engineers.

The mining properties which will be acquired for this proposition will be

located in the gold and silver belt, extending from the Montreal River through Northern Ontario, eastward into Quebec, and will include properties in the Lady Evelyn District, the new Montreal River Silver District, Cobalt District, and the gold districts around Round Lake, Larder Lake, Lake Abitibi, and in the great undeveloped mineralized section of Quebec lying just east of Larder Lake and extending northward to Lake Abitibi.

We shall try and make every dollar count, and make as few mistakes as possible. We hope to create such an interest in this enterprise with investors that will result in extensive and widespread co-operation.

Under this plan no one can truthfully say that it is not a great mining investment. We want every investor to feel a personal interest in this mine development. The investors in this company will own this enterprise, and we want them to co-operate with us and our associates to make it a great success.

We are now organizing THE LARDER LAKE EXPLORATION AND DEVELOPMENT COMPANY, with what we consider sufficient capital (\$500,000). We now have options on and propose to acquire five distinct and separate properties which will be incorporated at \$100,000 each (100,000 shares—par value \$1.00). The Exploration Company will at all times hold a controlling interest in each of these companies, so that sixty per cent. of the dividends earned and declared will be paid into the treasury of the parent company, and the other forty per cent. distributed among the stockholders on record. This, in our opinion, will enable us to pay dividends and large ones in the very near future.

The board of directors in The Larder Lake Exploration and Development Company will be composed only of engineers of national repute, setting a precedent in this line—Mr. Robert Morton will be president, which fact in itself guarantees conservative and able management.

Investors have been pouring their

money into over-capitalized mining companies, they have been plunging about wildly in the hope of some day "striking it rich," never stopping to think for an instant that the greater part of their money never reaches the ground, as a rule, seventy-five per cent. of the money invested in stock schemes goes into the broker's hands. He pays his salesmen 20 to 50 per cent. on every dollar turned in, he must get his own commission, and engineers must be paid.

We never have had associated with us a stock salesman, we require no commission, and our engineers will be our directors, so that every dollar invested with us on this proposition will be honestly used in the purchasing and development of the different properties.

We are now offering for subscription the first allotment of stock in The Larder Lake Exploration and Development Company—every one hundred shares entitles the holder to forty shares of stock in each of the subsidiary companies to be incorporated, making in all 200 shares of stock in five different companies, which, as soon as development work is started and dividends announced, will make the stock of the Larder Lake Exploration and Development Company almost invaluable. This first allotment of only 50,000 shares (\$1.00 par value) will probably be largely over-subscribed in a few days.

The next allotment will be put out September, 25th, 1907, at 75 cents per share or higher.

This price (15c) will positively be withdrawn August 6, 1907. If this allotment is over-subscribed remittances will be promptly returned. Checks, drafts and money orders must accompany all applications and be made payable to the financial agents.

Interim certificates will be promptly returned to subscribers. The stock certificates of the company representing the shares purchased will be issued and delivered as soon as allotment can be made, after the 6th of August, to all subscribers who purchase at the first underwriting price prior to that date.

Are you going to get in now, in time, at Larder Lake; you can now get in at the ground floor prices on inside properties, making big profits and lots of money, or will you wait three or four months or a year, and then fall all over your head in an irresistible desire to get in anywhere or at any price?
